Budget Message

Budget Message

BY

GOVERNOR EDMUND G. BROWN

To the Senate and Assembly of the Legislature of California:

I present with this message my budget for the 1963-64 fiscal year.

It recommends expenditures of $2,945,027,761 from current income, and $305,374,208 from capital outlay bond issues—a total of $3,250,401,969.

Of that total, $3,167,000,000 represents program commitments already made by the Legislature or the electorate of the State of California through the Constitution, statutes or bond authorizations.

Of the remaining $83.4 million, $30.7 million is for salary increases and $52.7 million is for new program or improved levels of service. Of this last amount $30 million is for additional aid to local school districts.

I emphasize that the new and improved services represent only 1.6% of the total budget.

This budget is once again soundly but narrowly in balance. It proposes no new or higher taxes, but requires acceleration of collection of personal income, bank, corporation and insurance taxes to put them on a current basis. The State of California can no longer afford the luxury of permitting payment of some taxes more than a year after it must meet the cost of providing essential services.

This budget conforms to the strictest standards of austerity. Additional hundreds of millions of dollars in requests were eliminated through refusal or drastic scaling down of the amounts sought.

In my judgment, this budget recognizes both the most pressing requirements of our growing population and the necessity of maintaining the traditional quality of government services in California.

This is the largest State budget in the history of the nation, but this State now has the largest population of any State in the nation.

This budget again sets a new record, but every budget in the foreseeable future of California will either set a new record or ignore the minimum annual requirements of our astounding growth.

Despite the sheer size of recent budgets, moreover, it is noteworthy that in the last decade California's tax burden has dropped from a position of 19th among the states in 1953 to 31st today. And its net debt of $2.68 per $100 of personal income is 33rd among the states and compares to an average of all the states of $4.04 per $100 of personal income.

Not only in the last decade, but since World War II, it would appear that California has used its resources wisely to provide the base on which we have built an economy steadily expanding at a more rapid rate than the rest of the nation.

In education, water, highways, social insurance, public health, employment and safety we have invested in programs which have not just repaid us, but have provided unmatched economic dividends.

Personal income for the nation is expected to rise 3.5% this year. By coincidence, California's population is also expected to rise 3.5%, but the state's personal income will rise an anticipated 5.7%. It is this trend which has carried California's share of the national income from 9.24% 10 years ago to an expected 11.4% this year, again a percentage greater than our proportion of the population.

It is in terms of this remarkable performance of California's economy and of the role played by governmental services in that performance that this budget should be evaluated.

Whether the proposed expenditures are in the area of current operating expenditures or in the financing of capital projects, the tests are the same.

Do they economically and efficiently provide direct and necessary services to the people of California today? Do they constitute prudent investments in human and natural resources to meet the long range demands of the future of the leading state in the nation? If the expenditures proposed here do neither, I invite you to delete them.

As in past years, I again seek your counsel on how to produce true economies, economies that do not impair today's needed services or add unduly to the already certain burdens of tomorrow.

I ask you to remember always that ours is a growing family. We have no option but to build and to provide.

Our growth and price increases alone account for an automatic addition of about $135 million or 4.6% of proposed operating expenditures.

As for capital projects, they are almost all for growth. Sale of $157 million in water bonds will more than double our pace in the California Water Plan's race against time and population trends. Approximately 85% of the $148 million in State building bonds will go to keep California first in providing facilities for tuition-free higher education.

We must remember also that growth imposes as heavy a burden on local government as it imposes on the State. This budget provides an increase of $153 million in subventions to cities, counties and local districts for education, health, welfare and flood control.

This will raise the total amount of local assistance money spent not by the State but by its subdivisions to $1,652,000,000 or 56% of total operating expenditures.

Look for economies, yes, but not at the expense of necessary functions of government—either State or local.

In the same spirit, I renew my own pledge to economize as fully as possible in the administration of this budget. In my first term of office, our average management savings were more than $24 million a year, and I will do my best not only to maintain that average, but to improve upon it.

I want to add another promise at this time.

Both you and I have encountered steadily increasing difficulty in dealing with the complexities and intertwined detail of the massive itemized budget which accompanies this message.

I commend to your attention the introductory summary program statements on revenues and expenditures in the budget document, but I do not believe they satisfactorily meet this problem.

I intend to submit a budget to you next year which will more clearly establish the lines between operating expenditures and long term capital investment programs—a budget which will make easier our joint task of searching for economies and measuring program effectiveness against program costs.

At the close of this message, I propose to discuss briefly specific proposals for major new expenditure programs and increased levels of services or local subventions. It will also detail my salary recommendations.

First, however, let us examine projections of revenue from our present tax system and a series of tax reform and conformity measures.

These two elements are essential to the support of the proposed expenditure program, and deserve your fullest consideration.

To begin, although the rate of growth in our economy is substantially ahead of the nation as a whole, it will not move as rapidly during the coming year as it did last year.

The Gross National Product advanced from $518 billion to $554 billion in the 1962 calendar year, a gain of $36 billion. Our projections are based on a GNP of $575 billion in 1963, a gain of only $21 billion. That means a relatively lean year in growth of revenues from California's present tax structure and collection system. While the longer term prospects are good, collections for the 1963-64 fiscal years would leave a gap of about $150 million between revenues and the proposed expenditure program were we to make no changes in our revenue system.

I am recommending to you, however, a series of long overdue reforms in our present procedures for collecting personal income, bank, corporation and insurance taxes which will close the gap, not only for the 1963-64 fiscal year, but for the succeeding fiscal year.

Let it be clear at the outset that there are no new or increased taxes involved in these proposals. To the contrary, I propose to remove 850,000 low income taxpayers from the rolls this year and to forgive one-quarter of all personal income taxes due for the year 1964.

Of these reforms, two are most important.

The first would end California's present unusual system of permitting personal, corporate and bank taxpayers to pay on an installment basis *after* the date due.

In other words, a man who moved to California in January of this year and immediately received the benefit of all State services, would not have to pay any income tax until April 15, 1964, and even then could pay in two installments thereafter without any additional penalty or interest.

The State would not receive its first payment for 15 months and its final payment for 24 months, yet would be paying the bills for services rendered for the whole 24 months.

No newspaper would or could be as generous to a new subscriber. No other manufacturer or supplier of services could function successfully on such a basis. No union could accept a new member on these terms. Yet we get 600,000 new citizens every year and they are entitled to immediate service—whether educational or institutional, whether in the form of highways or an adequate water supply.

The first major step in this tax reform program would simply be a requirement that all taxpayers meet their full tax for 1963 by April, 1964. Tax collections would then be current on at least an annual basis.

The second major step would be to install a withholding system on July 1, 1964, accompanied by a system for a quarterly estimating and payment system for individuals and semi-annually for banks and corporate taxpayers.

This would operate just as the long-established Federal system does, and would, in fact, make the handling of the two tax obligations simpler and easier for the taxpayer.

Since the State income tax has little impact on family incomes under $10,000, and a much lesser impact on incomes above that amount than the Federal tax, installation of the withholding tax in mid-year after more than a year's notice would cause little difficulty.

Moreover, because of the extra revenue generated by the acceleration to a pay-as-you-go system, the State could provide a 25% forgiveness, and I recommend that this be done. The forgiveness I propose would amount to $85 million for individuals and $65 million tax credit for banks and corporations which in the past paid a double tax when they started operations in California.

I should note here that 26 of the 32 states having a general personal income tax provide for withholding. Of the 26, only three forgave any part of the previous year's taxes when they began withholding, and all three did so because they coupled withholding with tax increases. I propose no such increase, but I believe the 25% forgiveness is justified nonetheless.

There are other compelling reasons for adopting these measures. Although we in California are proud of our excellent tax enforcement, it is estimated that at least 100,000 Californians leave the State annually, many of them without paying State income taxes before they depart.

In almost every one of the states which have adopted withholding, the new revenue produced has exceeded expectations substantially.

If California is to avoid levying new taxes, it must receive full and equitable return from its present revenue structure and this is the only satisfactory way to insure full compliance at a reasonable cost.

Some have been concerned about the cost of withholding to business. It will cost the State, which employs more than 130,000 persons, only about 30 cents per employee a year, certainly not an amount which would indicate an undue burden on other employers, large or small.

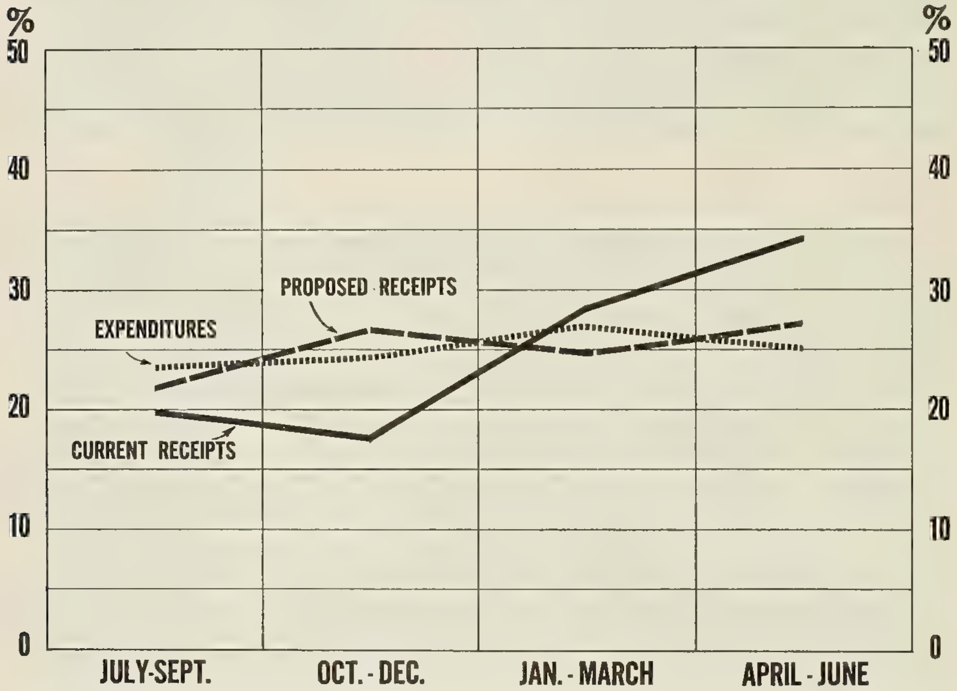
The proposals would solve another difficult problem.

We now not only must wait up to 24 months to collect for today's services, but we must borrow from ourselves in order to maintain a reasonably even relationship between revenues and expenditures within a given year.

We receive the bulk of our revenues in the second half of the fiscal year. In order to keep up with demands in months of minimum revenue receipts, the General Fund must borrow from special funds and repay not only the principal, but the interest which would have accrued if the funds had been left invested in securities or in bank deposits.

This fiscal juggling as illustrated in the chart below is contrary to all sound money management policy, and the time has come to end it.

IMPROVED PATTERN OF GENERAL FUND INCOME AND OUTGO



This chart shows the improvement in the flow of State General Fund revenue which will result from income tax withholding and current tax payments by banks, general corporations and insurance companies. The revenue trough experienced in the October-December quarter under the present system will be eliminated, and the peak flow of the April-June quarter will be materially reduced by the proposed plan. At the same time revenue receipts in every quarter will more closely align with expenditure requirements of that quarter.

The following table shows what these proposed tax reforms plus a number of supplementary reforms and changes would provide in added revenue for the next two fiscal years.

TWO-YEAR PLAN TO BRING TAX COLLECTIONS CURRENT WITH OBLIGATIONS

An outline of revenue sources, changes recommended and amounts involved in each of the two ensuing fiscal years are given in the following summary.

	(In millions)	
Bank and Corporation Tax:	*1963-64*	*1964-65*
Eliminate installment payment privilege effective January 1, 1964	$82.5	$10.8
Provide for payment of estimated tax on current business profits, with credit offset for double tax in second year of operation in California	–	32.0
Adopt present Federal limitations on business deductions for gifts, entertainment, club dues, etc.	1.0	1.2
Totals, Bank and Corporation	$83.5	$44.0
Personal Income Tax:		
Eliminate tax liability below $5 (single) and $10 (married or head of household)	—$2.5	—$2.5
Eliminate installment payment privilege effective January 1, 1964	35.0	4.7*
Adopt withholding procedures and estimated tax declarations effective July 1, 1964, with forgiveness of one-quarter of the tax due on 1964 incomes	–	96.2
Adopt present Federal limitations on business deductions for gifts, entertainment, club dues, etc.	0.5	0.7
Totals, Personal Income	$33.0	$99.1
Insurance Tax:		
Provide for quarterly remittance of tax after January 1, 1964	$22.0	$1.5*
Eliminate principal office deduction	†	5.3
Transfer surplus line brokers' tax to the General Fund	–	0.7
Eliminate constitutional rate provision	†	‡
Totals, Insurance	$22.0	$7.5
Gift Tax:		
Conform with Federal law by reducing the annual exemption from $4,000 to $3,000	$0.5	$0.5
Totals, Revenue	$139.0	$151.1
Oil Royalties:		
Redistribute royalty income in order to make unneeded balances available for education	$26.3	no estimate
Grand Totals, All Sources	$165.3	$151.1

* Increase due to annual growth in the tax base.
† Requires constitutional amendment.
‡ No change anticipated at this time.

The most important of the other changes is a proposal to change the handling of our tidelands oil and gas bonuses and royalties.

Under present statutes, most of the revenues are assigned to the California Water Fund.

Because of stepped-up tideland leasing activity, however, more money is going into the California Water Fund than was contemplated earlier or is now required.

I therefore propose enactment of a new statute which would guarantee to the Water Fund the approximately $9 million needed to meet our standing commitments to the California Water Plan, but divert whatever remains from the conservation of natural resources to the conservation of human resources, or, to be more specific, to education.

This will be increasingly important as development proceeds on the rich new Long Beach tidelands area.

If the entire revenue program proposed above is enacted, California will be able to meet its fiscal commitments without hardship through the next two fiscal years.

Since this plan was first set forth publicly, however, concern has been expressed that most of the revenue advantages would be behind us by 1965, and that we would then face a major new tax problem.

Our economic studies show just the opposite. The career economists in the Department of Finance believe that the gap between expenditures and revenues will lessen rather than widen. Instead of today's gap of $150 million, they estimate a gap of perhaps less than $100 million in 1965.

There are three basic reasons for this projection. First, the President's tax cut program, with its favorable impact on our revenues and the nation's growth pattern, would substantially improve the ratio of growth between California's revenues and our expenditures, thus narrowing the present gap. Second, we will have learned how much income tax is being evaded, and have added that extra amount to our revenue projections. Third, we will begin to receive much more substantial revenues from Long Beach and other rich tidelands leases.

It would be foolish to predict now whether or not we will need some additional taxes in 1965.

But it would be even more foolish to increase taxes or impose new taxes today when this two-year program makes it not only unnecessary, but unwise to do so.

By 1965, there is a reasonable chance that there will be no need for additional taxes, or that the need will be minimal.

I recommend that we adopt the changes I propose today, then reappraise our total position in 1965.

In the meantime, however, we must take added precautions to make our position in 1965 as strong as possible. We must keep the expenditure base set forth in this budget firmly under control. Only in this way can we prevent added expenses from erasing the advantages of the added revenues we foresee.

There is yet another excellent reason to defer consideration of any other fundamental changes in our tax structure until 1965.

As I noted in my Inaugural message, I believe this session of the Legislature should authorize creation of a Tax Commission to undertake during the next two years a fundamental analysis of our local and state tax structures and their increasingly complex relationships.

That Commission should report both to the budget session next year and the general session of 1965 on possible methods of apportioning responsibilities for support and tax resources equitably among the State and its various subdivisions.

We all know that the property tax, the principal source of local revenue, is frequently burdensome and often unfairly applied.

At the same time we know that this fact continues to force local officials to ask for State tax funds to finance activities which most would agree are local responsibilities.

I will later send you a special message on this subject, but the proposed creation of a Tax Commission to report in 1965 is one more strong and central reason to adopt the revenue reform recommendations contained in this budget.

Against this background, I now ask you to consider the following noteworthy expenditure proposals:

EDUCATION

In this budget, as in my past four budgets, I assign first priority to public education. The dramatic increases in our school population, and the public's wise insistence on the highest academic standards, compel this emphasis.

I recommend expenditure of $1,233,000,000 for public education from current income—an increase of $98 million. The total figure amounts to more than 42% of total revenues for 1963-64. Four-fifths of the increase or $78 million will augment present apportionments for average daily attendance.

Our public schools, from kindergarten through junior college, will have an attendance of more than 4 million in the next fiscal year—a growth of more than 220,000. Under present law, this growth would require an additional state contribution of $48 million. I propose, however, that we add $30 million more to that amount to relieve demands on the local property taxpayer.

But I firmly believe you should not make the additional $30 million available unless you also enact a realistic program of countywide equalization, which in itself would produce still another $25 million a year.

Islands of assessed wealth should contribute their fair share to the cost of public education. The present system enables rich districts to contribute a negligible fraction of assessed valuation to the schools while property owners in poor districts pay three and four times as high a percentage.

Democracy requires that we share the cost of schools just as we share the cost of public recreation or public health.

I also propose that the State strengthen its long-neglected public library system by encouraging regional cooperation and the formation of adequate library service areas. Funds to implement this program have been included, subject to your approval of a formula for distribution of these grants.

Continued growth of our college age students will again require substantial additional support for the University and State College systems. With 12,000 more students, these institutions will require operating funds of $266 million. Commitments for future enrollments will also require additional classrooms and other educational facilities totaling $125 million from the state building bond issue approved at last November's election. This includes $67.5 million for the University of California and $57.6 million for the State Colleges. I again include a modest amount to establish and encourage faculty research within our State College system, as recommended by the master plan under which we are now operating. Research opportunities must be provided if we are to compete and maintain our position in the intellectual market.

One other educational program will provide the means for a State-wide attack on the problem of culturally deprived students who, because of economic, racial, migratory, or other background, fail to realize their educational potential. Leadership within the State Department of Education has been provided to assemble data needed to solve the many facets of the problem, and to conduct research studies in selected school districts. I strongly recommend this program for your approval.

HEALTH AND WELFARE

This budget carries improved programs in the general field of human welfare. It recognizes the need for greater participation in State-local cooperative programs directed toward both mentally ill and mentally retarded persons.

State participation in the Short-Doyle mental health program should be increased by $2,000,000, with the additional money to be applied to new and expanded local programs, including recently authorized multi-purpose centers for the mentally retarded.

Those handicapped, either vocationally or socially, will receive recognition by an increase of $7.5 million in Aid to the Totally Disabled and Aid to Needy Children. This amount will also make a substantial contribution to cost sharing between the counties and the State.

Provision is also made, at a cost of $375,000, for an intensified review and rehabilitation of the industrially injured.

Increased emphasis in this general field also includes special projects for vocationally adaptable mental hospital patients and recipients of Old Age and Survivors Insurance or public assistance to help make them at least partially self-supporting.

WATER DEVELOPMENT

I propose construction of $193 million in State Water Plan projects—more than double the $87 million for the current year.

Of this investment in water facilities, $36 million will come from the California Water Fund and $157 million from the initial sales of water bonds. Inclusion of these self-liquidating bonds in the budget totals, incidentally, is an excellent example of the confusion caused by mixing expenditures from current income with long term capital investment.

Among major expenditures for 1963-64 are $79,998,000 for the Oroville Division, including $29,908,000 for the dam proper; $47,975,000 for the San Luis Project; $17,451,000 for the South Bay Aqueduct, and $15,490,000 for the North San Joaquin Division of the California Aqueduct.

Until now, work on the water project has been largely preparatory. But the coming year marks the beginning of major project construction.

The Oroville Dam will be the largest earthfill dam in the world. The aqueduct system will channel more water to farm, home and factory than any other public project in history.

I can report to you with pride that this plan, historic in conception and scope, is proceeding on schedule, and bids on major units continue to come in under estimate.

AGRICULTURE

The budget contains allocations for research in two areas of vital concern to the future of California's $3 billion agricultural economy. One involves the European Common Market and the other a system of domestic freight rates that I believe to be harmful to California farmers in the national market.

I propose, first, that we employ an economist and staff to protect and promote California agriculture in Common Market and all other foreign trade negotiations.

The Federal government is now discussing tariff adjustments with the Common Market and we expect requests from member countries that would impair the marketing position of at least 20 of California's farm products. The staff I propose to create would develop and assist industry in presenting the case against unfair tariffs in Washington. If we can show a damaging impact on our economy from tariff adjustments, I am certain Washington will resist many of the Common Market demands.

I recommend also that we employ a staff to analyze the effects of restrictive inter-state freight rates on California agriculture, particularly poultry, dairy and livestock producers.

Definite inequities presently exist and we must move as quickly as possible to present the case for adjustment to Federal officials.

Finally, I recommend that we augment our present inspection safeguards against pesticide contamination of milk, fruits and vegetables.

In the current year, we are able to inspect less than one percent of such products reaching the consumer, and find excessive contamination in one out of 20 inspections.

Employment of seven additional chemists in the Department of Agriculture, and purchase of new testing equipment, will enable us to double the present number of inspections.

SALARIES

The State Personnel Board has made recommendations which would require increases of $62 million if all comparable State employees were to be covered. Of that amount, $45 million would be from the General Fund and $17 million from special funds.

The Board has recommended a 10% increase for many, a 5% increase for some, and no increase for still others.

In view of the difficult financial problems facing the State, I am compelled to reduce the total to $30,750,000, $21,830,000 from the General Fund and $8,920,000 from special funds.

The amount provided will permit 5% increases for all those classes designated by the Personnel Board as lagging furthest behind, and another $2,000,000 for apportionment among the other classes to meet inequities causing management problems.

I also propose to submit limited salary increase measures for statutory officials and judges. These measures will be designed to bring these salaries into more equitable relationships with executive and judicial salaries paid in other governmental jurisdictions.

Finally, I propose 5% increases in academic salary funds which will be available for independent apportionment by the University of California and the California State College system.

This message has dealt in detail only with broader expenditure categories. But you will find in the budget other proposals of decisive impact on the State and its future.

Among them are creation of a Human Rights Commission, urban affairs and housing, more highway patrolmen, promotion of tourism, educational television, a youth conservation work program, a broader scope of activity for the Committee on Automation and Technology, continued government reorganization, and enhancement of opportunities for minorities through broader emphasis on apprenticeship training.

Following is a summary of the General Fund condition:

GENERAL FUND CONDITION
(in Millions of Dollars)

	1961-62	*1962-63*	*1963-64*
Beginning Surplus and Reserves, July 1	$61.8	$92.6	$18.8
INCOME:			
Revenues and Transfers	$1,728.2	$1,845.3	$2,099.7
EXPENDITURES:			
State Operations	$607.1	$689.8	$753.5
Capital Outlay	16.8	32.1	14.8
Capital Outlay—Bonds	(88.0)	(158.0)	(148.5)
Local Assistance	1,073.5	1,197.2	1,337.8
Total Expenditures	$1,697.4	$1,919.1	$2,106.1
Committed Reserves	$47.6	$15.2	$8.4
Ending Surplus, June 30	$45.0	$3.6	$4.0

Thank you for your consideration of these proposals. I submit them without regard for partisanship and trust that you will evaluate them in the same spirit.

They represent many hundreds of decisions, reached in an effort to answer the single most dominant question of modern California government: How can we maintain the quality of life in California at a time when momentous growth imposes a relentless pressure on all our resources?

Together, Republicans and Democrats, we have done remarkably well. And we have done best when we have avoided the rancors and bitterness of extreme partisanship.

Let us once more do our best. Let us once more act in California's traditional spirit of affirmation.

We are not here to turn back or stand still but to move boldly forward. This budget is designed to help us do just that, and I herewith submit it to you with pride and with confidence.

Respectfully submitted,

Edmund G. Brown

Governor

Letter of Transmittal

Honorable Edmund G. Brown
Governor of California
State Capitol
Sacramento, California

Dear Governor Brown:

Submitted herewith are the summary statements and detailed schedules for the Budget of the State of California for the Fiscal Year beginning July 1, 1963 and ending June 30, 1964. The programs and expenditure estimates embodied in this document reflect the full and conscientious application of your policies and instructions.

The revenue estimates contained in this budget are predicated on continuation of economic activity at current levels during the first half of 1963 with a rise during the latter half. The extent of this rise is dependent in part on the influence of the President's tax revision program. In addition, the estimated revenues take into account the effects of the recommended adjustments in California's own tax collection schedule. As in the past, these estimates are the result of an exacting appraisal of the economic situation and consultation with leading economists.

The expenditures proposed in this budget were included only after intensive screening to assure compliance with your policies and the realization of maximum economies consistent with meeting the State's obligations.

I wish to again express my appreciation for the co-operation demonstrated by the department heads and their assistants. I must also commend the budget staff for their diligent and able assistance in the preparation of this budget.

Hale Champion

Director of Finance

---

[1] The General Budget Summary includes the revenues and expenditures of all state funds and activities that reflect the cost of state government. The transactions involving bond funds, federal funds and other funds (see page 1025) are excluded.

[2] Income for the General Fund includes revenues which were originally deposited in a special fund and subsequently transferred to the General Fund, and transfers of surplus from special funds. Such amounts are reduced from special fund revenues.

[3] Outgo from the General Fund includes amounts transferred to special funds and expenditures from special funds are reduced by a like amount.

Schedule 1-A

GENERAL FUND SURPLUS AVAILABLE FOR APPROPRIATION

JUNE 30, 1963

RECONCILIATION OF THE CHANGES FROM THE PREVIOUS BUDGET ESTIMATES

GENERAL FUND SURPLUS AVAILABLE FOR APPROPRIATION, JUNE 30, 1963, as estimated in the 1962-63 Budget	$2,071,952
Effect of Legislative Action:	
Net reduction in Budget Act appropriations	2,031,986
Special appropriations enacted	—10,174,429
Deficiency appropriations enacted, less than the amounts anticipated in the Budget	4,970,728
Reversion of prior year appropriations	216,800
Transfer from Motor Vehicle Transportation Tax Fund	5,000,000
REVISED ESTIMATE OF GENERAL FUND SURPLUS AVAILABLE FOR APPROPRIATION June 30, 1963, as reported in the Summary of Financial Legislation dated May 31, 1962	$4,117,037
Special Appropriations, Third Extraordinary Session	—12,490

EFFECT OF REVISED ESTIMATES OF REVENUES AND EXPENDITURES, as estimated in the 1963-64 Budget:

1961-62 Fiscal Year	Previous Estimate	Revised Estimate	
Revenues (including transfers)	$1,723,909,189	$1,728,221,900	+4,312,711
Expenditures (including transfers):			
State operations	618,857,679	607,168,613	+11,689,066
Capital outlay	36,391,346	16,787,566	+19,603,780
Local assistance	1,083,283,783	1,073,477,208	+9,806,575
1962-63 Fiscal Year			
Revenues (including transfers)	1,887,681,495	1,845,351,753	—42,329,742
Expenditures (including transfers):			
State operations	690,544,937	689,837,944	+706,993
Capital outlay	16,407,429	32,119,002	—15,711,573
Local assistance	1,217,804,448	1,197,152,941	+20,651,507
Unencumbered balances in continuing appropriations	2,676,971	15,211,930	—12,534,959
Prior year surplus adjustments	—2,314,315	1,006,112	+3,320,427
GENERAL FUND SURPLUS AVAILABLE FOR APPROPRIATION, JUNE 30, 1963, as estimated in the 1963-64 Budget			$3,619,332

Schedule 1-B

GENERAL FUND—STATEMENT OF FINANCIAL CONDITION[1]

June 30, 1962

ASSETS		
Cash		
In State Treasury	$122,422,714	
In agency accounts	14,465,068	
Total cash		$136,887,782

SURPLUS		
Surplus available for appropriation		45,004,818
TOTAL LIABILITIES, RESERVES AND SURPLUS		$380,004,088

---

[1] This statement was prepared by the office of the State Controller. The revenues and expenditures for the 1961-62 fiscal year as reported in this budget are in accordance with the accounts that produce this statement of financial condition of the General Fund.

[2] "Feeder Funds" have been established by law as the depositories for collection of certain major taxes prior to clearance as revenue to the General Fund. The equities stated herein represent the amount of collections which had not been cleared to the General Fund on June 30, 1962.

[3] Unreimbursed Debt Service of $131,837,910 represents the accumulated cost of debt service on state school building bonds in excess of reimbursements received from the school districts. The ultimate amount of reimbursements will be limited by each district's ability to pay in relation to its assessed valuation and bonded debt burden. Reimbursements to date have amounted to approximately 40 percent of the total debt service cost from the beginning of the State's public school building loan program.

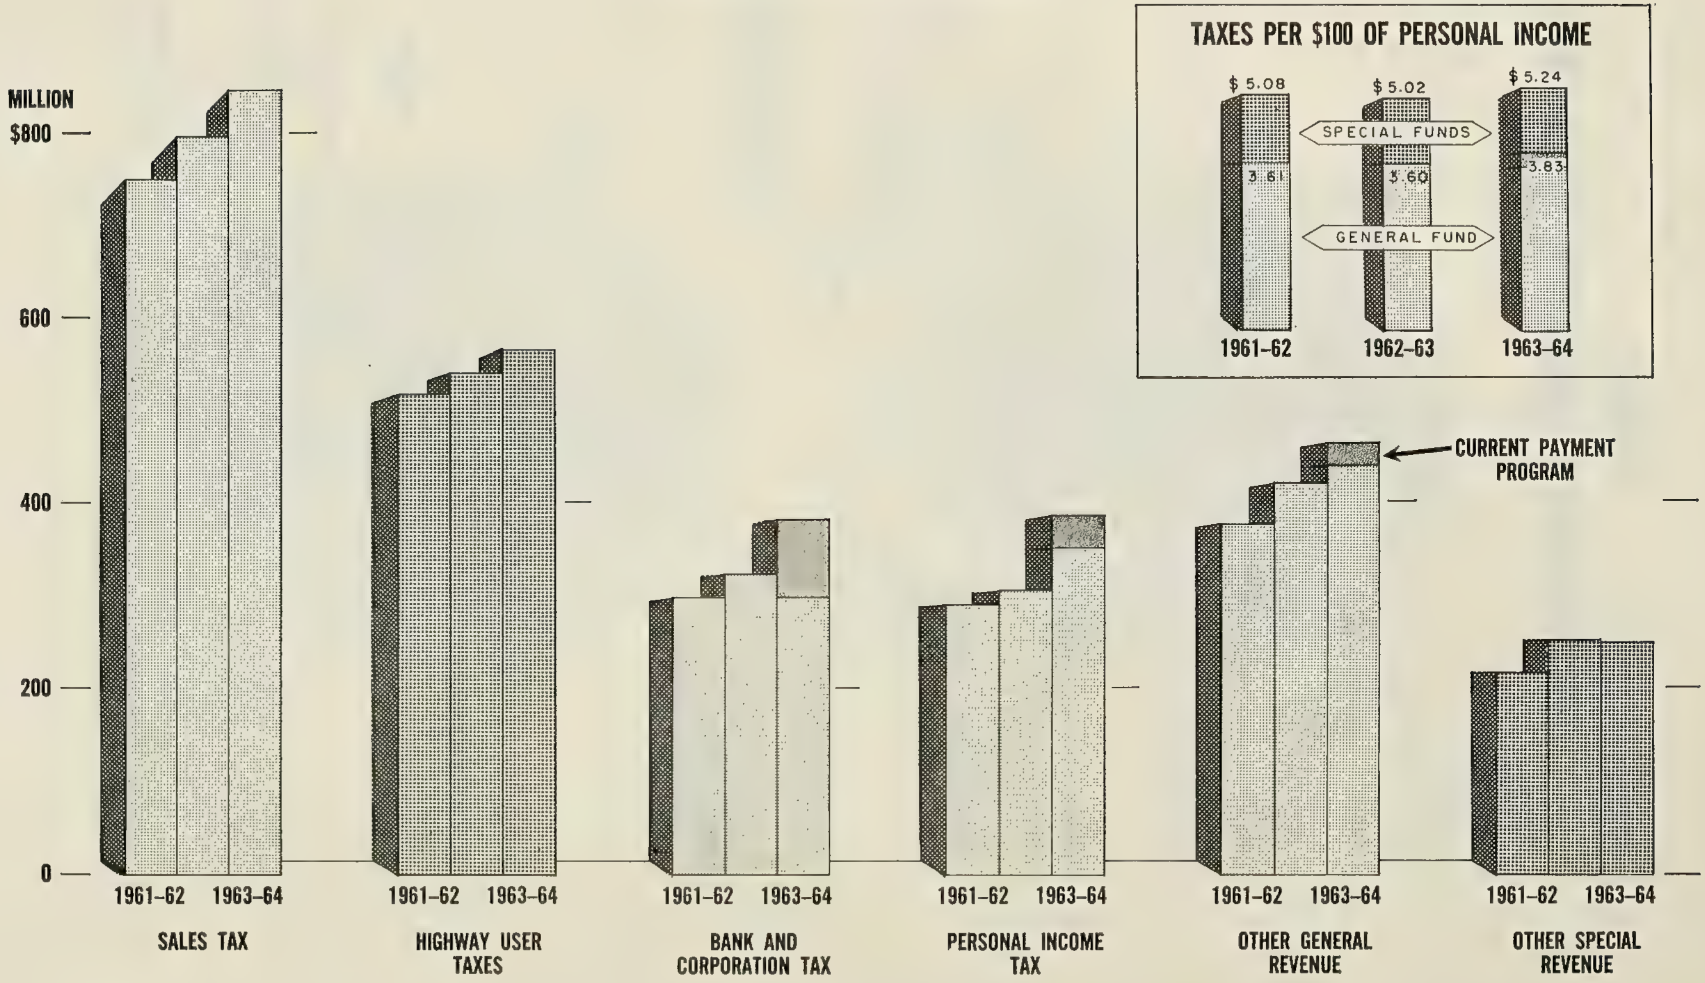
COMPARATIVE REVENUE

1961-62, 1962-63, 1963-64



Revenue Estimates

State revenue receipts totaling $2,883,738,093 are estimated for the 1963-64 fiscal year, according to the forecasts presented in this budget. Of this amount, $2,099,711,412 will accrue to the General Fund and $784,026,681 will constitute income for the various special funds. Approximately $139 million of the General Fund total represents receipts to be obtained under the several features of the revenue program recommended in the Budget Message and $26.3 million comprises a reallocation of special fund receipts.

As the first step in a two-year program to bring individuals and corporations fully current in discharging their tax liabilities, the Governor has recommended elimination of the installment payment privilege after January 1, 1964. Also included are loophole closing amendments in several tax laws, and relinquishing unneeded balances in special funds to meet general service needs. Of the additional revenue total in 1963-64, approximately $84 million will come from banks and business corporations, $22 million from insurance companies, $33 million from individuals. *

The revenue forecasts rest upon two basic assumptions: (1) no major international crisis in 1963; (2) a reduction in Federal income taxes which will stimulate personal consumption and business investment during the latter part of the year. Gross national product in the year as a whole is estimated at $575 billion, up from $553.5 billion last year. Personal income is projected at $456 billion, an increase of $15 billion over the 1962 total. Income of Californians is expected to reach $52 billion, aproximately $2.8 billion (5.7 percent) over last year's record.

General Fund receipts of $2,099,711,000 † will be $254,360,000 greater than the total indicated for the current fiscal year. Most of this increase results from recommended changes in the revenue system. Growth, coupled with the anticipated gradual expansion in the tax base throughout most of the year will account for an increase of $89,060,000. The sales tax will provide $847,000,000, or 40.4 percent of the General Fund total, and will remain by a substantial margin the leading source of State revenue. The levy on net profits of banks and corporations will account for $386,500,000, returning this tax to second place among General Fund sources, while the personal income tax will contribute $382,000,000. Receipts from other major General Fund levies are shown in the adjoining table.

Revenue receipts for the various special funds during 1963-64 are estimated at $804,027,000, an increase of $14,279,000 over the anticipated total for the current year. A transfer of $20,000,000 from the Water Fund to the General Fund for support of education is recommended, and this will reduce special fund income after the transfer to $784,027,000.

For the most part, special fund revenue represents taxes and fees relating to the ownership or operation of motor vehicles. Under constitutional restriction, motor vehicle revenue must be used for some activity connected with highways, roads and streets. Other special fund revenue includes license fees connected with the regulation of businesses and professions; hunting and fishing licenses; and certain oil and mineral royalties earmarked for such special purposes as water resource development. Receipts from principal special fund sources are shown in the lower section of Table 1.

Additional details on State revenues are provided in Schedule 2 of the budget summary, while factors affecting revenue yields are outlined in the remainder of this statement.

Table 1

COMPARATIVE REVENUES

(In millions)

Taxes, fees, etc.	*1961-62 Actual*	*1962-63 Estimated*	*1963-64 Estimated*	*% of total 1963-64*
General Fund:				
Sales and use	$749.5	$794.5	$847.0	29.4
Bank and corporation	290.9	306.5	386.5	13.4
Personal income	299.0	324.2	382.0	13.2
Insurance	71.7	76.2	103.3	3.6
Inheritance and gift	76.0	95.0	100.7	3.5
Cigarette	66.1	71.0	73.3	2.5
Alcoholic beverages *	59.1	61.6	64.5	2.2
Horse racing †	29.7	32.6	32.6	1.1
Other sources **	75.1	83.7	89.8	3.1
Totals, General Fund	$1,717.1	$1,845.4	$2,079.7	72.1
Special Funds:				
Motor Vehicle				
Fuels	363.8	382.1	397.6	13.8
Registration, weight, etc.	140.7	148.1	151.8	5.3
License (in lieu tax) ††	132.6	141.5	150.9	5.2
Transportation	13.2	9.0	15.0	0.5
Liquor license	10.3	10.5	10.6	0.4
Horse racing	8.6	7.8	9.3	0.3
Other sources	64.8	90.8	68.8	2.4
Totals, Special Funds	$734.1	$789.7	$804.0	27.9
Grand Totals, Revenue	$2,451.2	$2,635.1	$2,883.7	100.0

* Excluding special fund share of liquor license fees.

† Excluding special fund share of horse racing tax.

** Includes $5 million in 1962-63 transferred to the General Fund from the Motor Vehicle Transportation Tax Fund.

†† Excludes General Fund share of vehicle license fee.

Due to the recommended changes in payment dates and adjustments in the bases of personal and corporation income taxes, the insurance tax and the gift tax, amounts shown for these four levies in 1963-64 are not strictly comparable with corresponding figures for the other two years. (See box, Page A-10). This is a particularly important factor in appraising the bank and corporation tax forecast. Recent action by the United States Treasury Department in liberalizing and updating depreciation guidelines for use in tax computations will effect substantially larger depreciation deductions this year. The result will be a smaller volume of taxable profits and a drop in the probable volume of revenue. Thus, the entire increase in receipts from this source shown in the table above is traceable to the accelerated payment procedure which, together with a minor amount of loophole closing, will generate an estimated $83.5 million, more than offsetting a $3.5 million decline otherwise anticipated for this tax.

---

* Other features of the program are outlined in the material beginning at the end of this page.

† This and all subsequent dollar amounts are rounded to the nearest thousand.

Similarly, the estimated increase in personal income tax receipts next fiscal year is divided $24.8 million from growth in the tax base and $35.5 million from elimination of the privilege of paying this tax in three installments. The latter figure includes the increase as a result of proposed loophole closing amendments conforming to the changes made last year in the federal tax. These increases will be partially offset by the $2.5 million decrease in income tax payments in the lowest brackets as a result of the Governor's recommendation that liability of less than $5 be canceled in the case of a single taxpayer and less than $10 in the case of a family.

Of the $27 million rise in the insurance tax anticipated for the budget year, $5 million represents recurring growth and $22 million will be due to the transition from one annual payment to quarterly remittances after January 1, 1964.

TWO-YEAR PLAN TO BRING TAX COLLECTIONS CURRENT WITH OBLIGATIONS

An outline of revenue sources, changes recommended and amounts involved in each of the two ensuing fiscal years are given in the following summary.

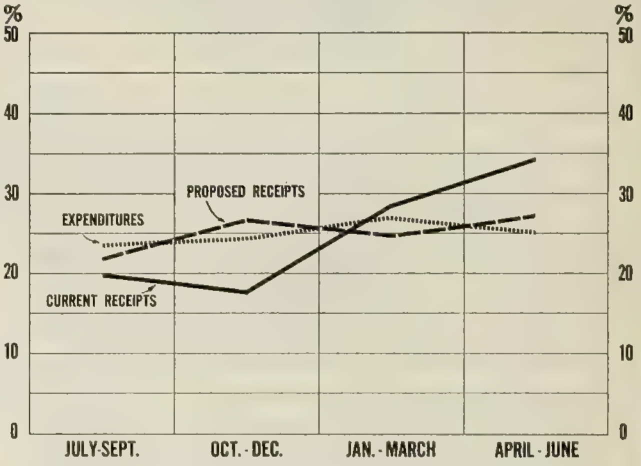
	(In millions) 1963-64	*(In millions)* 1964-65
Bank and Corporation Tax:		
Eliminate installment payment privilege effective January 1, 1964	$82.5	$10.8
Provide for payment of estimated tax on current business profits, with credit offset for double tax in second year of operation in California	–	32.0
Adopt present Federal limitations on business deductions for gifts, entertainment, club dues, etc.	1.0	1.2
Totals, Bank and Corporation	$83.5	$44.0
Personal Income Tax:		
Eliminate tax liability below $5 (single) and $10 (married or head of household)	—$2.5	—$2.5
Eliminate installment payment privilege effective January 1, 1964	35.0	4.7*
Adopt withholding procedures and estimated tax declarations effective July 1, 1964, with forgiveness of one-quarter of the tax due on 1964 incomes	–	96.2
Adopt present Federal limitations on business deductions for gifts, entertainment, club dues, etc.	0.5	0.7
Totals, Personal Income	$33.0	$99.1
Insurance Tax:		
Provide for quarterly remittance of tax after January 1, 1964	$22.0	$1.5*
Eliminate principal office deduction	†	5.3
Transfer surplus line brokers' tax to the General Fund	–	.7
Eliminate constitutional rate provision	†	‡
Totals, Insurance	$22.0	$7.5
Gift Tax:		
Conform with Federal law by reducing the annual exemption from $4,000 to $3,000	$0.5	$0.5
Totals, Revenue	$139.0	$151.1
Oil Royalties:		
Redistribute royalty income in order to make unneeded balances available for education	$26.3	no estimate
Grand Totals, All Sources	$165.3	$151.1

* Increase due to annual growth in the tax base.
† Requires constitutional amendment.
‡ No change anticipated at this time.

Bringing the annual gift tax exemption into conformity with the federal allowance will produce an estimated $500,000 in state receipts from this levy.

Chart 5

IMPROVED PATTERN OF GENERAL FUND INCOME AND OUTGO



This chart shows the improvement in the flow of State General Fund revenue which will result from income tax withholding and current tax payments by banks, general corporations and insurance companies. The revenue trough experienced in the October-December quarter under the present system will be eliminated, and the peak flow of the April-June quarter will be materially reduced by the proposed plan. At the same time revenue receipts in every quarter will more closely align with expenditure requirements of that quarter.

Revised Estimates

Revenue data for the current fiscal year represent revisions of the material submitted in the Governor's Budget last February. Against an original estimate of $2,652,472,000, it now appears that revenue in the current year will be $2,635,099,000, a revision of 0.7 percent. Compared with $1,887,588,000 for the General Fund, including transfers of horse-racing and transportation tax revenue originally deposited in special funds, the revised total is $1,845,352,000, a decrease of $42,236,000, or 2.2 percent. Special fund receipts, adjusted for the change in method of reporting, were originally projected at $764,884,000 and are now estimated at $789,748,000, an increase of $24,864,000 (3.2%). The latter includes $22,800,000 received as bid bonuses for oil drilling rights on State lands had not been anticipated in the estimates prepared last year.

Four elements have contributed mainly to the change in General Fund receipts. First, the recovery from the 1961 recession low was not quite as robust as had been anticipated. Second, there has been a gradual tapering off in the amount of additional sales tax generated by a given increase in personal income, so that this revenue source is not as productive at high income levels as it gave promise of being a few years ago. This is not a new development, but it is now sufficiently pronounced and persistent as to be reasonably measurable. Third, the liberalized depreciation allowance promulgated by the Federal Government and adopted by the State will reduce the personal income tax and corporation franchise tax this year.

This adjustment in the depreciation schedules was unforeseen in the projections prepared a year ago. Fourth, partly offsetting the first three, the inheritance and gift taxes have proved to be more productive than had been expected earlier. In contrast with an original allowance of $78.1 million, present trends indicate a total of $95 million from these sources in the current year.

A summary comparison of the original forecasts and the revised estimates is given in the table below:

Table 2

COMPARISON OF ORIGINAL AND REVISED REVENUE ESTIMATES, 1962-63

(In millions)

Taxes, fees, etc.	*Original*	*Revised*	*Change*	
			Amt.	*Percent*
Alcoholic beverages	$72.1	$72.1	–	–
Bank and corporation	320.3	306.5	—$13.8	—4.3
Cigarette	71.8	71.0	—0.8	—1.1
Horse racing	41.1	40.5	—0.6	—1.5
Inheritance and gift	78.1	95.0	16.9	21.6
Insurance	75.8	76.2	0.4	0.5

Fuels	381.7	382.1	0.4	0.1
License (in lieu)	143.5	142.6	—0.9	—0.6
Registration, weight	146.9	148.1	1.2	0.8
Transportation	14.5	14.0	—0.5	—3.4
Personal income	330.7	324.2	—6.5	—2.0
Private car	1.8	1.8	–	–
Sales and use	832.5	794.5	—38.0	—4.6
Total Taxes	$2,510.8	$2,468.6	—$42.2	—1.7
Other revenue	141.6	166.5	24.9	17.6
Total Revenue	$2,652.5	$2,635.1	—$17.4	—0.7
General Fund	1,887.6*	1,845.4	—42.2	—2.2
Special funds	764.9*	789.7	24.8	3.2

* Horse racing and transportation tax revenue transferred to the General Fund is shown as General Fund revenue, in accordance with present practice.

ECONOMIC CONDITIONS

The foregoing projections of State revenue in the next fiscal year rest upon two fundamental assumptions:

1. No major international crisis during 1963.
2. A reduction in Federal tax levies after midyear, designed both to stimulate personal spending and to provide greater incentive for business investment.

In the event the first of these premises proves incorrect and there is a substantial heightening of international tension, the revenue forecasts will prove too conservative, because California will share fully in any activity directed toward further strengthening the Nation's defense capabilities.

If the second assumption should prove to be incorrect, the revenue predictions may prove to be high. Without action to raise the level of personal consumption and business investment, it appears unlikely that economic activity in 1963 will reach the levels necessary to generate $2.9 billion in aggregate State revenue.

The pattern of business developments underlying the revenue projections contemplates near stability in total business during the first half of this year, with even less rise than that which characterized the closing half of 1962. It is believed that this unsatisfactory level of performance will add to the pressure for tax adjustments after midyear, and that Congress will approve the President's recommended tax reduction in time to provide a strong thrust to activity late in the year.

Value of gross national production in 1963 is estimated at $575 billion, an increase of $21.5 billion (3.9%) over the indicated total for 1962. It is expected, however, that the annual rate of production in the final quarter of this year will be more than $30 billion above the corresponding level of the quarter just closed.

Personal income in the Nation is estimated at $456 billion, an increase of $15.5 billion (3.5%) over last year. California can anticipate continuation of its growth in economic importance, with the result that income of California residents will rise from an estimated $49.2 billion last year to $52 billion in 1963.

Continued growth will carry California's population to 17,688,000 by midyear, an increase of 594,000 (3.5%) over the comparable number for 1962.

Gross National Product

While 1962 was a year of growth and economic progress, it failed to fulfill initial expectations. After starting a normal upswing from the recession low of early 1961, the recovery lost momentum during the summer months of last year and for a time another recession threatened.

Popularity of new model cars introduced in October and evidence of economic stability in some of the major business indexes brought a return of confidence in the fall and this, coupled with a heightening of international tension, dispelled the threat of recession. It is significant in looking forward to the new year, however, that government—federal, state and local—which comprised a little more than one-fifth of the total output of goods and services accounted for more than one-third of the increase in demand last year.

Again in 1963, government is likely to provide the largest relative increase. Federal expenditures for defense and space exploration are scheduled to rise substantially this year. Other federal expenditures—reflecting both population growth and the salary increase effective last fall—will be greater, despite efforts to relate tax reduction with expenditure reduction. The same factors of growing workload responsibilities and higher pay scales will affect state and local disbursements, continuing the $3 to $4 billion annual increases which have characterized these expenditures during recent years.

In total, purchases of goods and services by all levels of government are likely to reach $127 billion this year, an increase of $9.1 billion over 1962. On this basis, the government sector of the economy will again account for more than one-third of the increase in gross national product. Moreover, the demands for governmental services in the fields of protection, education, health and welfare, conservation and resource development are so insistent as to make an expenditure rise of about these proportions virtually guaranteed.

Business investment in plant and equipment promises to be slightly better in 1963 than in the year just closed. Idle capacity in many lines will curtail expenditures for plant expansion until there is a pickup in consumer demand. Consequently, it is probable that business expenditures will be directed toward further modernization of equipment essential to meet competition and to turn out new products arising from recent research and development.

It must be emphasized, however, that the potentials of rapid business expansion are currently present as a result of liberalized depreciation schedules, the new tax credit for business investment, and retained earnings. These factors, together with the existence of ample funds from external sources, could provide the basis for a rapid rise in business investment late in the year, if demand is stimulated by adoption of the federal tax adjustments mentioned above.

Neither of the other two major sectors of private investment—residential construction and accumulation of business inventories—is likely to be a greater source of economic strength in 1963 than in 1962. Pending a new wave of family formation later in the decade, residential construction can be expected to continue in roughly the current volume of 1.4 million units a year—sufficient to provide replacements, meet the needs of a shifting population and allow some leeway for the trend to multihome families. Similarly, business inventories are likely to expand only with population growth, though here too an upsurge late in the year is a distinct probability in the underlying pattern of economic assumptions.

The new car market is a major unknown in the area of personal expenditures. Traditionally, the motor vehicle industry has been unable to put together two successive outstanding years. The all-time record in passenger car sales in 1955 was followed by a 17 percent decline. The 1960 peak was followed by an 11 percent decrease in 1961. Will the near record sales volume of 1962—a record volume for California—be followed by a decline in 1963?

The car sales record to date would indicate the contrary, but there is a possiblity that a part of the initial sales volume last fall was borrowed from 1963. Thus, the current year's final total may fall into the historical pattern. For purposes of the revenue estimates, the national sales volume has been assumed to drop from a little more than 7,000,000 last year to 6,350,000 units in 1963.

Other items of personal expenditures can be expected to continue in the gradual upward trend, sustained by population growth, rising incomes, and slightly higher prices. The initial effect of federal tax reductions should produce an increase in expenditures for nondurables and smaller appliances during the latter part of the year, with an improved market for so-called big ticket items in 1964.

Personal income for the nation this year is estimated at $456 billion, an increase of 3.5 percent over the previous total. This includes allowance for a billion dollar increase in social security contributions by individuals as a result of the higher tax rate effective January 1st. Disposable income is estimated at $398.1 billion, or 4.1 percent above last year's total. An estimated $367.5 billion in personal expenditures will leave $30.6 billion in savings (7.7 percent), a record dollar amount, but below several of the earlier postwar years as a percentage of disposable income.

Corporate profits are estimated at $47.5 billion, compared with $50.8 billion in 1963. Most of the change is the result of larger deductions for depreciation under last year's liberalized allowances.

California Situation

California's dominant position in defense production, electronics and aerospace industries will result in considerably better relative economic conditions in this State than in the nation. Currently, more than one-fourth of all military prime contracts, as measured by dollar value, are awarded to California firms and approximately the same percentage of defense-space production occurs here. An even larger share of the expenditures for research and development are accounted for by the many California aerospace firms and educational institutions. With expenditures for defense and space scheduled to increase $4 billion or more and California likely to obtain a larger share of the total, this aspect of national economic developments could readily add a billion dollars to California's economy this year.

Table 3

ECONOMIC DATA

(Dollar amounts in billions)

National data:	*1961 Actual*	*1962 Prelim.*	*1963 Estimated*	*Percent Change 1962-63*

* Disposable income of California residents represents personal income less federal and state personal income taxes. Other personal tax and nontax payments have not been deducted.

** Spendable resources of California residents represent disposable income adjusted for estimated changes in short-term consumer credit and in liquid asset holdings of individuals—e.g., money, bank accounts, savings bonds, etc. Amounts are estimated by the State Department of Finance for use in connection with the analysis and projection of sales tax revenue.

† Index for California as computed by the California Department of Industrial Relations, Division of Labor Statistics and Research.

‡ Assuming liberalized depreciation allowances.

SOURCE: National data for 1961 from reports of the Office of Business Economics, U.S. Department of Commerce; preliminary figures for 1962 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the State Department of Finance; estimates of national data for 1963, estimates of California's population, personal income, personal taxes, disposable income, etc., are based upon studies by the Financial and Population Research Section, Budget Division, State Department of Finance.

Personal income of California residents is forecast at a record-breaking $52 billion, an increase of $2.8 billion (5.7 percent) over the total for 1962. At this level, California will show a continuation of the persistent rise which has carried this State's share of the nation's total personal income from 9.24 percent 10 years ago to 11.4 percent in prospect for this year.

The State's population continues to grow by approximately 600,000 a year, and this is another major favorable factor in the economic pattern. It means a continued demand for new homes at about the 240,000 unit rate indicated for last year. It means new urban development, new shopping centers, added school buildings, extended public works and all of the other considerations which enter into modern living.

Taxable retail sales of California stores are estimated $24.8 billion, up $1.2 billion from the indicated total for 1962. Total taxable transactions, including those of building contractors, manufacturers and others will total $27.1 billion, 5.1 percent more than last year.

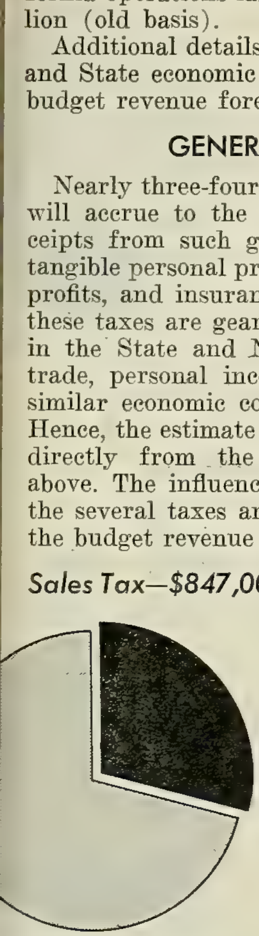
Corporate profits arising from business operations in this State during 1963 are estimated at $4.47 billion. This allows for the new, liberalized depreciation deductions and compares with an estimated $4.56 billion on the old basis. Corporate profits from California operations last year are estimated at $4.76 billion (old basis).

Additional details on these and other basic national and State economic factors utilized in preparing the budget revenue forecasts are given in Table 3.

GENERAL FUND REVENUE

Nearly three-fourths of the aggregate State revenue will accrue to the General Fund. This includes receipts from such general levies as those on sale of tangible personal property, personal income, corporate profits, and insurance premiums. For the most part, these taxes are geared directly to business conditions in the State and Nation. The aggregate volume of trade, personal income, corporate profits and other similar economic considerations determine the bases. Hence, the estimate of revenue from each source flows directly from the economic assumptions outlined above. The influence of these economic factors upon the several taxes and the methods used in preparing the budget revenue estimates are explained below.

Sales Tax—$847,000,000



.4% OF TOTAL BUDGET

This 3 percent * State tax on sale of tangible personal property shows almost an immediate and direct relationship with income and business conditions in California. This correlation was demonstrated in 1962 when taxable sales exceeded 1961 by almost $1.8 billion, but fell somewhat short of the increase projected a year earlier. The largest dollar discrepancy between anticipated and actual sales was in producers' equipment and supplies, followed by consumer durables, and consumer nondurables. Building material sales reached the expected level, and motor vehicle sales exceeded the anticipated volume. The general business outlook, which ranged from optimism at the outset to caution at midyear and a recovery of confidence in the fall, was fully reflected in the sales reports. The actual sales volume fell short of the projected by $70 million in the first quarter, $151 million in the second, $325 million during the third, and an estimated $230 million in the fourth.

Taxable sales for 1963 and 1964 are expected to show sizable gains, reflecting the direct impact of the Federal personal income tax reduction and the cumulative effects of various other factors contributing to economic growth. With respect to 1964, however, only the first quarter taxable sales and those of vendors reporting monthly during the second quarter will influence State revenue of the 1963-64 fiscal year.

As in the previous years, forecasts of taxable sales have been prepared by two independent methods. One is based on detailed analyses of trends in per capita sales of more than 40 types of business. Aggregate sales of consumer nondurables, consumer durables (except autos) and motor vehicle supplies have been estimated at $14.57 billion in 1963 and $15.26 billion in 1964, on the basis of this detailed analysis. The corresponding volume of purchases last year was $13.94 billion.

Separate projections of sales were made for motor vehicles, building materials and business plant and equipment. These projections are based on the assumptions concerning business activity, outlined in a preceding section, with allowances for population increases, estimated price changes, and for spending pattern in the appropriate phase of the business cycle.

Motor vehicle sales are expected to decline slightly from the record $4.02 billion in 1962 to $3.86 billion in 1963. Sales for 1964, however, are estimated to rebound and reach $4.08 billion, up 5.7 percent from the 1963 level.

The estimates of taxable transactions by manufacturers and wholesalers, at $5.15 billion for 1963 and $5.36 billion for 1964, indicate a 3.8 percent and a 4.1 percent increase, respectively.

Sales of building materials and taxable transactions of contractors have been projected at $2.97 billion for 1963, up 3.5 percent from the 1962 level, reflecting not only the continuing population influx in California but also expansion of commercial and industrial outlays. For 1964 this component is expected to increase 5.1 percent to $3.12 billion.

The second estimate was obtained from a regression equation relating total taxable sales to spendable resources of California residents. Although this general approach has been used in the previous years, the estimate this year was based on a second degree rather than on a linear equation, as in the past. The second degree curve not only gave a better fit but also was of the shape describing the empirically established relationship that the proportion of income spent on commodities—as contrasted to services—tends to decline as income increases.*

The adjusted estimates of taxable sales were obtained by reconciling the figures from the two approaches and are shown in Table 4, together with the corresponding data for 1962.

Taxable transactions were allocated by quarters on the basis of seasonal patterns, with allowances for changes in the dates of Easter and other factors affecting fiscal year collections.

---

* An outline of the state tax system, showing rates and measures of the various taxes, is given in Table 9.

* The equation is: $Y = -786.945 + 0.81088238X - 0.00000331697X^2$, where Y is taxable sales and X is spendable resources, both in millions of dollars. In this equation, the standard error of Y at 398 million is somewhat smaller than the comparable figure (409 million) obtained from a linear equation.

After audit adjustments, the sales tax is estimated to yield $794,500,000 for 1962-63 and $847,000,000 for 1963-64, compared to actual receipts of $749,523,000 for 1961-62.

Table 4
TAXABLE TRANSACTIONS IN CALIFORNIA
(In millions)

	1962	*1963*	*Percent change over 1962*	*1964*	*Percent change over 1963*
Consumer nondurables	$10,795	$11,307	4.7	$11,800	4.4

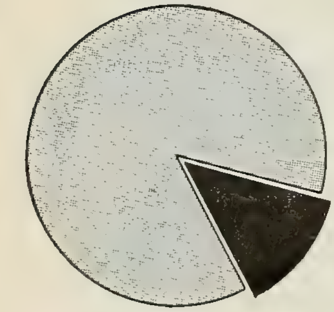
Unallocated	--	550	--	740	--
Totals	$25,782	$27,100	5.1	$28,560	5.4

Bank and Corporation Tax—$386,500,000



13.4% OF TOTAL BUDGET

Receipts from this tax during period covered by the budget will depend primarily upon corporate earnings during 1962 and 1963. The estimate of 1962 profits is based upon the results of a carefully selected sample of 636 corporations doing business in California in 61 industry fields. In addition to the request for data on 1962 earnings, the sampled corporations were asked to indicate whether they would use the revised Federal depreciation guidelines which permit a more rapid write-off of depreciable assets, thus increasing expenditures and reducing net income and tax liability.

According to the information obtained from this survey, corporate income attributable to California, after adjustment for revised depreciation schedules, totaled $4.54 billion in 1962, down only 0.2 percent from the previous year. A summary of earnings by major industry for 1961 and 1962 is shown in the following table.

Table 5
CORPORATE PROFITS BY MAJOR INDUSTRY, CALIFORNIA, 1961 AND 1962
(In thousands)

	1961	*1962**	*Percent change*
Agriculture	$43,090	$46,000	+6.8
Mining and oil production	218,150	216,100	—0.9
Construction	127,000	95,000	—25.2
Manufacturing	1,563,475	1,682,700	+7.6
Trade	601,315	602,750	+0.2
Service	236,803	231,500	—2.2
Financials subject to bank tax	597,476	495,000	—17.2
Real estate, insurance, etc.	357,685	318,150	—11.1
Public utilities	779,332	828,000	+6.2
Other	26,750	27,000	+0.9
Totals	$4,551,076	$4,542,200	—0.2

* After adjustment for new depreciation guidelines.

The estimate of corporate earnings for 1963 is based upon the national outlook and its relation to California. In total, corporate earnings this year are projected at $4.47 billion, slightly below the indicated level of 1962.

The most important feature of the Governor's current payment program for 1963-64 is the elimination of the installment privilege now enjoyed by banks and corporations. Approximately $82,500,000 will be realized as a one-time gain from this action. In addition, the program calls for enactment of loophole closing provisions as they relate to corporations similar to those enacted into the Federal law last year.

After adding collections resulting from the audit activities of the Franchise Tax Board and from the complementary corporate income tax, revenue from the bank and corporation tax in the budget year is estimated at $386,500,000. This compares with $306,500,000 in 1962-63 and actual receipts of $290,870,000 in 1961-62.

Personal Income Tax—$382,000,000

13.2% OF TOTAL BUD

Personal income of Californians is, of course, the basis of the revenue under the Personal Income Tax Law. As stated in the economic outlook underlying the revenue estimates, increases are expected in personal income in 1963 for both the State and the Nation.

California personal income, which reached a record $49.2 billion last year, is estimated at $52 billion for 1963. Details of these totals together with comparable amounts for 1961 are shown in the table below.

Table 6
CALIFORNIA PERSONAL INCOME
(In millions)

Source	*1961*	*1962*	*1963*
Wages and salaries	$30,765	$33,300	$35,200
Proprietors' income	5,082	5,390	5,550
Property income	6,140	6,700	7,230
Other income	4,804	5,160	5,695
Less: Social insurance contributions	1,204	1,350	1,675
Totals	$45,586	$49,200	$52,000

Source: U.S. Department of Commerce, 1961; State Department of Finance, 1962 and 1963.

Wages and salaries, proprietors' income, and property income (interest, dividends and rents) account for more than 85 percent of the current year self-assessed tax. Capital gains and miscellaneous income —such as annuities and alimony payments, which are not included in Department of Commerce concept of personal income—make up the remainder.

Some types of income tend to be more concentrated in certain income brackets and therefore are subject to different average tax rates. Generally, wage and salary income accumulates in the lower and middle income brackets, proprietors income in the middle brackets and property income in the higher ranges. Thus, an accurate estimate of the amount of income by type is essential to a reliable forecast of revenue from this source.

Analysis of the relationships existing between each type of income and the amount of tax attributable to that income was used to arrive at the total amount of self-assessed tax. The estimate of tax from dividends includes amounts to be paid on the distribution of General Motors stock by the DuPont Corporation. The following table illustrates the relative importance of these components of personal income and the tax attributable to each source in 1961:

	Personal Income (Percent)	*Tax Assessments (Percent)*
Wages and salaries	67.5	54.3
Proprietors' income	11.1	16.3
Property income	13.5	15.1
Interest	6.7	3.5
Dividends	3.3	9.2
Rents	3.5	2.4
Other income	7.9	2.3
Capital gains	--	12.0
Totals	100.0	100.0

A study prepared by the Franchise Tax Board indicated that over half of the capital gains tax was derived from stock sales, and on this basis a relationship was established between the tax attributable to capital gains and stock market activity. The tax of the miscellaneous group was based on a projection of past trends.

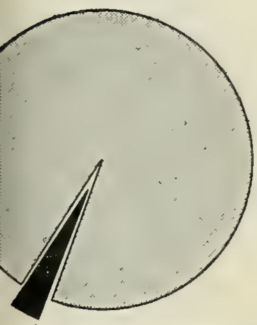
Features of the Governor's recommendations regarding the personal income tax for this budget period include:

1. Cancellation of tax liability of less than $5 (single persons) and $10 (married or head of household).
2. Elimination of the privilege of paying this tax in three installments.
3. Adoption of loophole-closing amendments similar to those contained in the U.S. Revenue Act of 1962.

The first of these recommendations will reduce revenue by $2,500,000 annually, while the second will result in a one-time gain of $35,000,000 and the third will provide an estimated $500,000 annual revenue increase. The estimate also allows for the effect of revised depreciation guidelines.

After adding audit collections by the Franchise Tax Board and converting calendar year data into fiscal years, revenue from the California income tax during 1963-64 is expected to amount to $382,000,000, compared with $324,200,000 in 1962-63 and actual receipts of $299,034,000 in 1961-62.

Insurance Tax—$103,250,000



.6% OF TOTAL BUDGET

This tax is imposed on premiums written by insurance companies and is in lieu of all levies except those on real estate and motor vehicle fees. The base for 1962-63 was estimated from the replies of 74 insurance companies to a questionnaire asking for their estimates of the percentage changes in the volume of premiums written on major lines of insurance between 1961 and 1962. These companies accounted for almost 65 percent of the total volume of taxable premiums in 1961. The replies indicated a net taxable base of $3,438 million for 1962. Allowing for the special tax rates on annuities and ocean marine insurance and the deduction of property taxes paid by an insurer on its principal office in California, revenue for 1962-63 is estimated at $76,250,000. This compares with $71,699,000 last year.

The tax base for the current year has been estimated by projecting life annuity and disability insurance on the basis of population growth; motor vehicle insurance on vehicle registrations and other lines on recent trends. These projections, after adjustments, resulted in net taxable premiums of $3,680 million, 7 percent higher than 1962. Revenue yield from this base is estimated at $81,250,000.

The current payment program, requiring quarterly remittance of the insurance tax based on the preceding quarter's writings, will add $22,000,000; hence, total receipts in 1962-64 will amount to $103,250,000.

Inheritance and Gift Taxes—$100,750,000

3.5% OF TOTAL BUDGET

Inheritance and gift tax collections have risen rapidly during recent years, partly as a result of the larger tax base growing out of current property values and partly because of tax adjustments effected in 1959. Collections anticipated in 1963-64 are approximately two and one-half times the volume of four years earlier.

Receipts from these two levies depend primarily upon such variable factors as the number and size of bequests and the relationship between the decedent or donor and the beneficiary. Tax rates rise substantially as the value of the transfer increases and as the relationship recedes. Exemptions are scaled down with the remoteness of the relationship.

An additional factor of uncertainty currently arises from the 1961 law exempting all community property passing to a surviving wife. Formerly one-half of such property had been taxed. It was believed that offsetting adjustments were made in the law, but the amended act has not been in effect long enough to be entirely certain that a complete offset was achieved.

Thus, there are a number of variables in connection with these taxes, and the estimates of revenue inherently are subject to a considerable margin of error. With these qualifications, receipts from the inheritance tax are estimated at $95,000,000 in 1963-64, an increase of $5,000,000 over the projected total for the current year and nearly $25 million above actual receipts last year.

Gift tax collections of $5,750,000 are forecast for the budget period, up $750,000 from the current year. This includes normal growth and the revenue to be obtained by reducing the annual exemption from $4,000 to $3,000, in conformity with the federal provision on this point.

Alcoholic Beverage Taxes—$75,172,000

2.6% OF TOTAL BUDGET

Revenue related to the sale and consumption of alcoholic beverages are of two types: (1) excise taxes collected on beer, wine and distilled spirits and (2) liquor license fees collected from firms engaged in this industry.

The estimates of these taxes are made on the basis of an analysis of per capita trends in relation to income and time. Estimated consumption per adult civilian is given below:

	(In gallons)			
	1961	*1962*	*1963*	*1964*
Distilled spirits	2.975	3.093	3.176	3.274
Beer	23.620	24.030	24.010	24.020
Sweet wine	1.814	1.648	1.626	1.577
Dry wine	1.673	1.727	1.779	1.827
Sparkling wine	.101	.106	.108	.111

Per capita consumption of distilled spirits has shown substantial growth in the past few years. While it is not anticipated that the exceptionally large rise which occurred in 1962 will be repeated, the estimate calls for growth in line with the trends of the past few years. Total consumption of distilled spirits is expected to reach 35,300,000 in 1964, compared with an indicated 31,350,000 gallons in the year just closed.

Per capita beer consumption, which dropped in 1960 and 1961 and increased last year, is expected to remain at about the 1962 level. Taxable sales of beer are estimated at 259,000,000 gallons in 1964, compared to 243,500,000 gallons in 1962. Per capita consumption of sweet wine has been following a downward trend for a number of years with a particularly sharp decrease last year; a continuation of the trend of the past years is forecast for 1963 and 1964. Because of population growth, however, total consumption is expected to equal 17,000,000 gallons in both years, compared to an estimated 16,700,000 gallons in 1962. Conversely, per capita consumption of dry wine has been increasing and continued growth is forecast. Dry wine consumption is estimated at 19,700,000 gallons in 1964, as compared to an estimated 17,500,000 gallons in 1962. Sparkling wine consumption, though still small, has also shown substantial increases and is expected to continue upward. Total consumption is expected to reach 1,200,000 gallons next year, as compared to an estimated 1,070,000 gallons for 1962. The estimates for the excise tax revenue are shown below:

	(In thousands)		
	1961-62	*1962-63*	*1963-64*
Distilled spirits	$45,418	$47,850	$51,200
Beer	10,495 *	9,806	10,133
Sweet wine		336	332
Dry wine		180	190
Sparkling wine		328	345
Total Excise Taxes	$55,913	$58,500	$62,200

* Cannot be separated due to credits and other adjustments.

Revenue from liquor license fees accrues to both the General Fund and the Alcoholic Beverage Control Fund. General Fund money is composed of application fees for new licenses and intercounty transfers, service charges and 10 percent of all other fees, primarily the annual renewal payments. The remaining 90 percent of other fees is held in the Alcoholic Beverage Control Fund for distribution to the cities and counties. It is anticipated that slightly fewer new licenses will be issued in the current year than in 1961-62, resulting in a small reduction in General Fund money for the 1962-63 fiscal year. The intercounty transfer of licenses is scheduled to expire in June of 1963. This, combined with a reduction in the number of new licenses available, will result in substantially lower receipts for the General Fund in 1963-64.

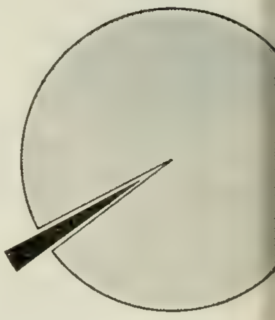
Revenue for the Alcoholic Beverage Control Fund has increased slowly over the past few years and further small increases have been projected. Amounts for both the General Fund and the Alcoholic Beverage Control Fund are shown below:

	(In thousands)		
	1961-62	*1962-63*	*1963-64*
General Fund	$3,190	$3,100	$2,325
Alcoholic Beverage Control Fund	10,343	10,470	10,647
Total Liquor License Fees	$13,533	$13,570	$12,972

Cigarette Tax—$73,250,000

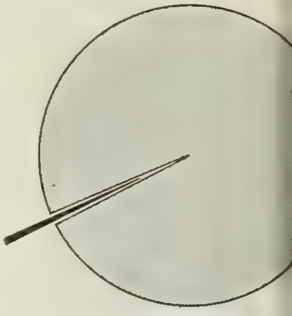
The cigarette tax is estimated on the basis of an analysis of trends in California consumption since the inception of the tax. Per capita civilian consumption is expected to be 141.66 packages in 1964, up about one-half package per individual from last year.

Application of the 3 cent tax rate and the 2 percent distributor's discount to the appropriate fiscal year sales date, yields revenue estimates of $71,000,000 for the current year and $73,250,000 for the budget year, compared to $66,054,000 in 1961-62. Revenue in the latter fiscal year was reduced by about $2 million as a result of legislation allowing cigarette distributors to purchase stamps on credit.



2.5% OF TOTAL BUDGE

Horse Racing—$41,860,000



1.4% OF TOTAL BUDGET

Parimutuel betting on horse races tends to rise with personal income, and the revenue estimated has been prepared on this basis. Correlations between income and betting at each track over a period of years have been used to forecast receipts for future meets. There are a number of other variables, however: (1) The value of daily wagering varies considerably among the several tracks and during the various seasons for the same track; (2) The rotation of the spring, early fall and late fall meets between the Bay Area tracks creates variations in total betting; (3) Weather conditions also influence track attendance and, consequently, wagering. The unseasonably bad weather in February 1962 probably reduced the volume of betting at the Santa Anita track by $3.5 million, and cut State revenue more than $300,000.

The aggregate handle for all tracks for 1963-64 has been estimated at $556.0 million, compared with $539.6 million for the current fiscal year and $508.4 million last year. The table below shows the amount of revenue from horse racing and the disposition of receipts among the various funds. Since excess revenue in the Fair and Exposition Fund is subsequently transferred to the General Fund, final disposition of receipts is shown instead of initial deposits.

	(In thousands)		
	1962	*1963*	*1964*
Tax on parimutuel pools	$32,769	$34,935	$36,185
Breakage	4,927	5,212	5,315
Unclaimed wagering tickets	326	282	305
License, fines and penalties	51	53	55
Miscellaneous	237	–	–
Totals	$38,311	$40,483	$41,860
General Fund	29,677	32,650	32,607
Fair and Exposition Fund	7,884	7,083	8,503
Wildlife Restoration Fund	750	750	750

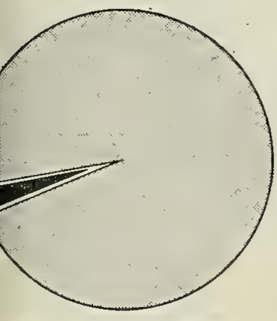
Private Car Tax—$1,954,000

1% OF TOTAL BUDGET

Railroad cars owned by companies other than railroads are taxed by the State rather than by the various local governments. Assessed valuations are determined by the State Board of Equalization and the average statewide property tax rate during the preceding fiscal year is applied against the assessment roll.

Both the assessed value and the tax rate increased in the current fiscal year. As a result, there was a slight rise in the total tax assessment for 1962-63. Allowing for a moderate further increase in tax rates, receipts from this source during the budget year have been projected at $1,954,000, compared with $1,808,000 currently and $1,753,000 in 1961-62.

Non-tax Receipts—$86,785,000



3.0% OF TOTAL BUDGET

A substantial volume of revenue accrues to the General Fund from sources other than tax levies. These include bonus payments and royalties on the production of oil and gas from State-owned lands; interest on investments and bank accounts; charges for treatment and services at State hospitals, if the patient has private means or is a responsibility of counties; charges to counties for support of Youth Authority wards; and such other items as sale of property and penalty payments for traffic violations.

In total, miscellaneous general receipts will amount to $86,785,000 in the budget year, an increase of $11,076,000 over the corresponding figure for the current period. Principal amounts comprising the total are shown in Schedule 2. It is of interest that these miscellaneous receipts fall into four almost equal categories: Pay patients and county board charges at hospitals and correctional schools—$20.7 million; interest income—$18.3 million; oil and gas royalties—$22.6 million; and all other, chiefly traffic penalties, sale of property and charges for certain services in connection with business incorporations and issuance of stock—$25.1 million. The increase over receipts in the 1962-63 fiscal year is due largely to proposed sale of surplus real property and the change in the distribution of oil and mineral royalty revenue. One of the principal parcels of property was intended for sale in 1962-63 but has been held up by title proceedings which it is anticipated will be completed in time for sale in the next fiscal year.

In line with the recent moves to reduce the earmarking of certain general revenue for specific purposes, this budget takes a further step in releasing revenue from oil and mineral royalties for general purposes. Two years ago receipts from this source were reassigned from beach and park development to the General Fund and General Fund appropriations were provided for beach and park purposes. The current budget makes a similar change with regard to oil and mineral royalties going to the Water Fund. Formerly, a specified amount of royalty income was made available for general purposes and all the receipts above that sum were credited to the Water Fund. In the future, current year needs of the Water Fund will be met first and all amounts above that current need will be deposited in the General Fund. This change will make an additional $6.0 million of current revenue and $20 million unneeded Water Fund balance available for support of education.

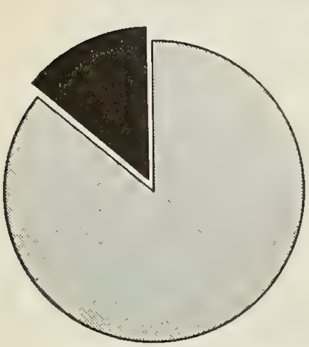
SPECIAL FUND REVENUE

Provisions of the State Constitution, codes and statutes restrict the use of certain revenue to specified purposes, and under California's financial procedure these receipts are separately accounted in various special funds. In general, they comprise three categories of income: (1) receipts from broad tax levies which are allocated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of business and professions are typical of the second, while oil and gas royalty revenue assigned in part to water resource development and school support is an example of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

Motor vehicle taxes and fees account for 90 percent of all special fund revenue. Principal sources of this income are the levies upon motor vehicle fuel, registration and weight fees, transportation tax and the vehicle license fee which is levied in lieu of local taxes on this type of personal property. During the 1963-64 fiscal year $716,400,000 will be derived from motor vehicle taxes. Approximately $285 million of this revenue will be returned to local governments, and $1.1 million will accrue to the State General Fund to meet highway fund interest and redemption charges. The remainder will be available for various activities related to state highways and vehicle regulation.

Regulatory fees and charges for special services to industry, business and the professions constitute the second largest source of special fund revenue. Coupled with hunting and fishing licenses, receipts from these sources will amount to $50,000,000 in the coming fiscal year. Rents, royalties and other similar receipts during 1963-64 are estimated to total $11,600,000.

Motor Vehicles Fuel Taxes—$397,600,000



13.8% OF TOTAL BUDGET

The forecast of revenue for the gasoline tax is based upon estimates of the number of vehicles in operation and the average consumption per vehicle. Including exempt vehicles, total registrations are expected to reach 10,000,000 by year-end 1963, up 4.3 percent from last December 31st.

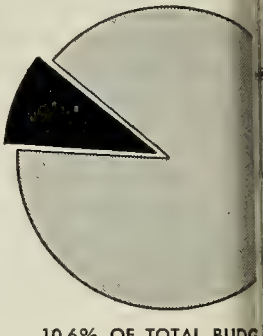
The increasing importance of compact cars in the motor vehicle total, the greater use of lightweight materials and continued growth in multi-car families have tended to decrease the average gasoline consumption per vehicle. This decline is expected to continue, dropping to 620 gallons in 1963-64 from 631 gallons consumed during 1961-62.

With registrations at the ten million level, net taxable gasoline consumption will reach 6.2 billion gallons. This volume at the 6 cent per gallon rate will result in collections from the gasoline tax of $372,000,000 during 1963-64, compared with $358,000,000 in 1962-63 and actual receipts of $340,986,000 in 1961-62.

Diesel fuel consumption is expected to increase in line with the anticipated pickup in economic activity. However, continued use of piggyback hauling of trailers will offset part of this gain. As a result, consumption of diesel fuel is expected to total 350,000,000 gallons in 1963-64 up from 306,700,000 gallons in 1961-62.

Consumption of liquid petroleum gas has been declining over the last few years and has been projected downward for the coming period. Total receipts from the 7 cent per gallon diesel tax and the 6 cent tax on liquid petroleum gas is expected to reach $25,600,000 in 1963-64, compared with $24,100,000 in 1962-63 and actual receipts of $22,785,000 in 1961-62.

Motor Vehicle Fees—$303,800,000



10.6% OF TOTAL BUDG

The number of units and their value, together with weight in the case of commercial vehicles, determine the bulk of motor vehicle revenue. Sales of new vehicles during 1963 are expected to total 830,000 and an estimated 305,000 vehicles will be brought into the State by people moving to California. Allowing for scrappage and vehicles leaving the State, total fee-paid vehicle registrations at year-end 1963 are estimated at 9,791,000.

Average weight fees paid on commercial vehicles have been declining as greater use is made of lightweight metals in truck and trailer construction. This trend is expected to continue in the coming years and to result in an average fee of $13.83. Drivers' license fees will total approximately $8,000,000 in each of the years covered by this budget.

In the aggregate, receipts from registration and weight fees, drivers' licenses and miscellaneous charges are estimated at $151,800,000 during 1963-64, compared with $148,100,000 in 1962-63 and $140,723,000 last fiscal year.

In addition to the number of vehicles, the original market value and age distribution are factors in the determination of vehicle license fee revenue. The average value of new cars appears to be increasing after a brief decline which followed introduction of the compacts. Further increases in average values are anticipated in 1963-64. The average renewal fees on automobiles already in the structure will continue to increase moderately and the combination of higher average fees and a larger volume of registrations will result in an increase of about six percent in automobile license fees in both 1963 and 1964.

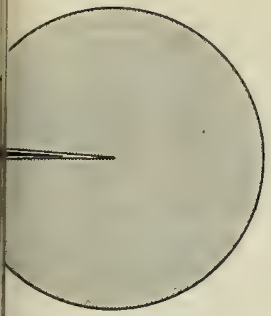
Vehicle license fees attributable to trucks, trailers and motorcycles, which account for about 18 percent of the total, are also expected to increase at about a six percent annual rate.

Total fiscal year revenues for motor vehicle fees are shown below.

(In millions)

	1961-62 *Actual*	1962-63 *Estimated*	1963-64 *Estimated*
Vehicle license fees	$134.2	$142.6	$152.0
Registration and weight fees	129.4	135.7	139.2
Drivers' license fees	7.6	8.1	8.2
Other	3.7	4.3	4.4
Totals	$274.9	$290.7	$303.8

Transportation Tax—$15,000,000



% OF TOTAL BUDGET

Gross receipts from the operation of motor vehicles engaged in the transportation of persons and property for hire outside of city limits are subject to a 1.5 percent tax. This type of activity is also sensitive to business conditions and is estimated by a relationship with personal income of California.

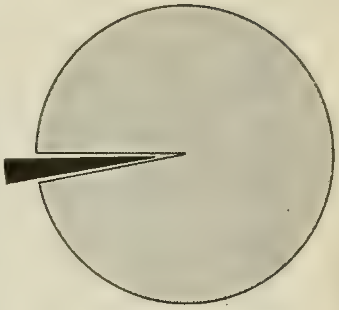
In 1945, legislation was adopted authorizing a $5 million loan from a State General Fund reserve to the Golden Gate Bridge and Highway District. Repayment was originally scheduled to begin in 1971, but legislation adopted last year provided that security for the loan should be transferred to the Highway Fund and repayment to the General Fund should be made from transportation tax receipts.

Therefore the current fiscal year estimate of revenue from this source shows $5,000,000 accruing to the General Fund and $9,000,000 to special funds for highway purposes. This compares with $15,000,000 anticipated during the budget year and actual receipts of $13,187,000 during 1961-62.

Other Special Fund Revenue—$68,817,000

In most part, nontax revenue accruing to special funds represents regulatory fees self-imposed by industries and professions, or charges for special services to designated groups. In many instances the distinction between a license fee and a service charge is somewhat vague.

In total, fees and charges during 1963-64 will amount to approximately $40 million, with fishing and hunting licenses the major item, followed by the various license fees for business and the professions.



2.4% OF TOTAL BUDGET

Oil and gas royalties earmarked for the State Water Fund and for support of public schools will amount to $11,600,000. Interest receipts from investments held for the various special funds are estimated at $10,768,000, while miscellaneous items—chiefly State Fair revenues and penalty charges related to unemployment contributions—will reach nearly $7,000,000 during the budget year.

Table 7

SUMMARY OF STATE POPULATION, INCOME OF CALIFORNIA RESIDENTS, AND STATE TAX COLLECTIONS

Excluding Departmental, Interest and Miscellaneous Revenue

	Estimated				State Tax Collections			Taxes per Capita			Taxes per $100 of Personal Income		
ear	Population July 1st (Thousands)	Personal Income (Millions)	Income per Capita	Fiscal Year	General Fund (Thousands)	Special Funds (Thousands)	Total (Thousands)	General Fund	Special Funds	Total	General Fund	Special Funds	Total

Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

Estimated.

opulation data, 1936 through 1949, are based on United States Census Bureau estimates; population, 1950 to date, estimated by the State Department of Finance.

ersonal income, 1936 through 1961, from estimates by the Office of Business Economics, United States Department of Commerce. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1962 and 1963 are estimates by the State Department of Finance.

ncome per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

axes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

---

[1] Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.

[2] Including special fund share of horse racing revenue.

[3] Includes the motor vehicle (gasoline) fuel tax, use (diesel) fuel tax, and brokers and producers fees.

[4] Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.

[5] Motor vehicle transportation tax and permit fees. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.

[6] Includes General Fund share of revenue from liquor license fees.

NOTE: Changes in rates and other features of these taxes have affected revenue yields during the period covered by this table, hence the data shown are not strictly comparable.

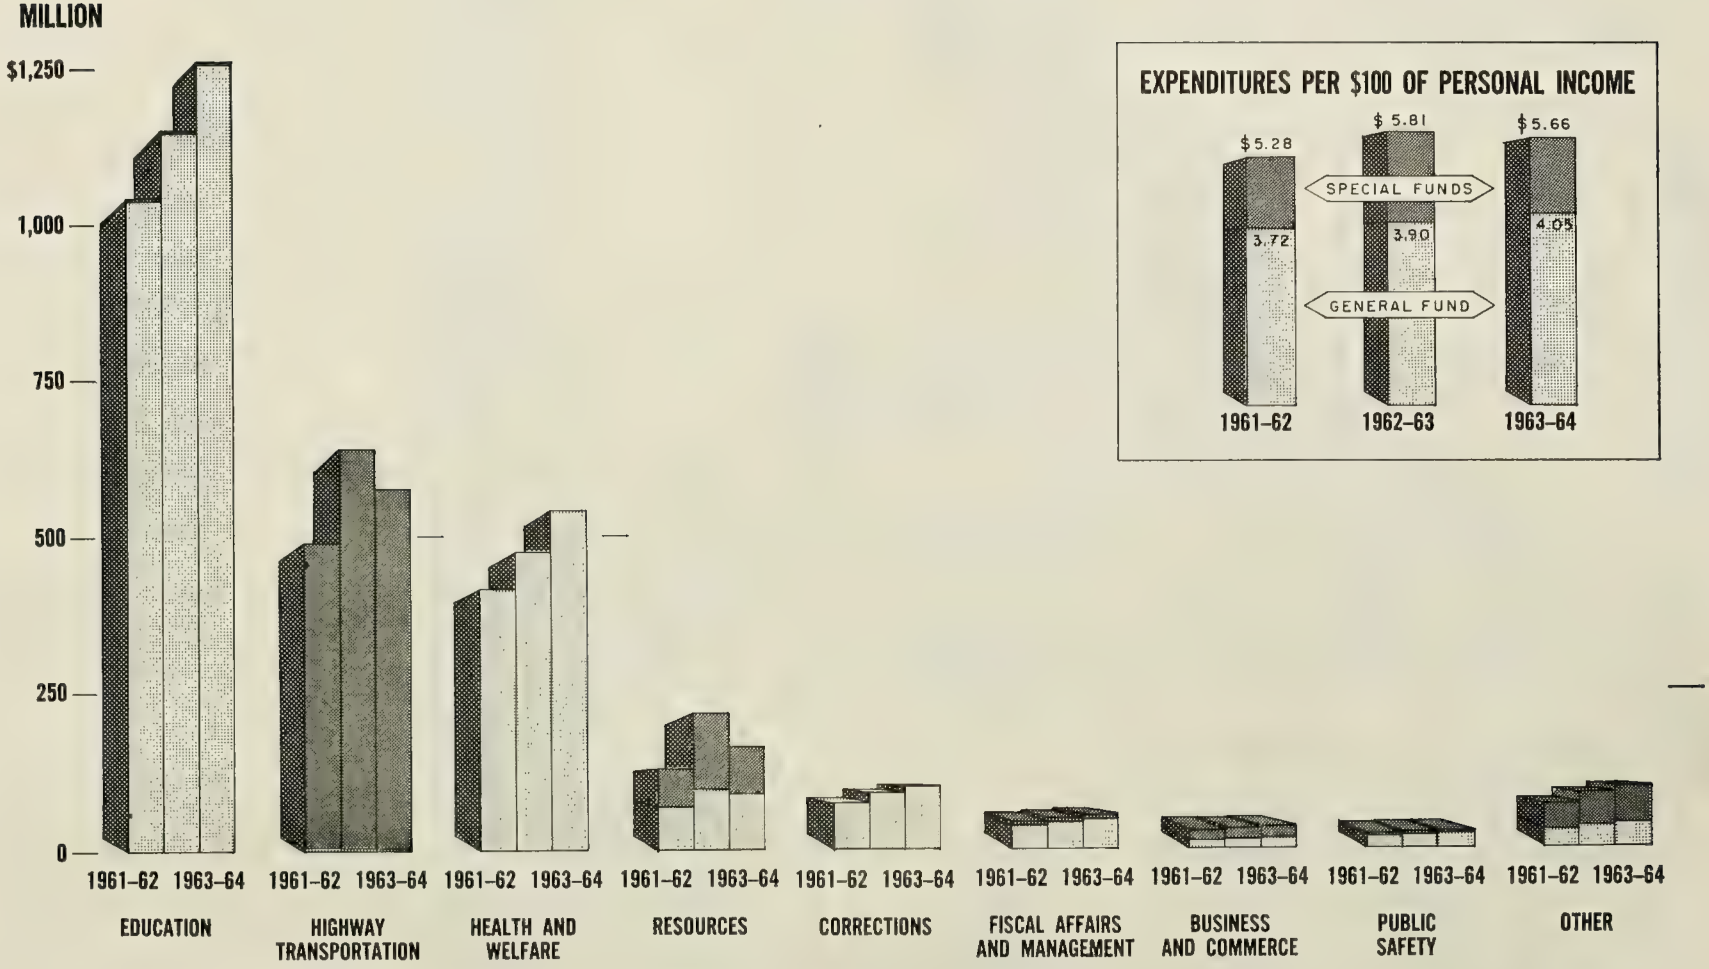
(1) Revenue and Taxation Code.
(2) This tax is levied at the rate of $1.24 per 31-gallon barrel.
(3) State Board of Equalization.
(4) Distilled spirits in excess of proof strength are taxed at double this rate.
(5) Minimum tax $100 per year, not applicable to banks.
(6) Franchise Tax Board.
(7) This tax is levied at the rate of 1.5 mills per cigarette.
(8) Business and Professions Code.
(9) Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. A special rate also applies to annuities.
(10) For return to cities and counties.
(11) For payment of administrative costs, highway bond interest and redemption and apportionment to counties, cities and school districts.
(12) For administrative expense and apportionment to State, counties and cities for highways, airport and small craft harbors.
(13) For support of State Department of Motor Vehicles, California Highway Patrol, county roads and State highways.
(14) For administrative expenses and State highways.
(15) Average property tax rate in the State during preceding year, which for 1961-62 was $6.54 per $100 of assessed valuation.

CHART 6

COMPARATIVE EXPENDITURES

1961-62, 1962-63, 1963-64



Expenditure Program, 1963-64

California's continuing growth which has brought to it the largest population in the nation has also created a new high in expenditure needs during 1963-64. Although the heavy investments required for institutional building and State-wide water facilities are being met through bonds, the operating budget financed by current income will increase almost seven percent above the level approved for the 1962-63 fiscal year.

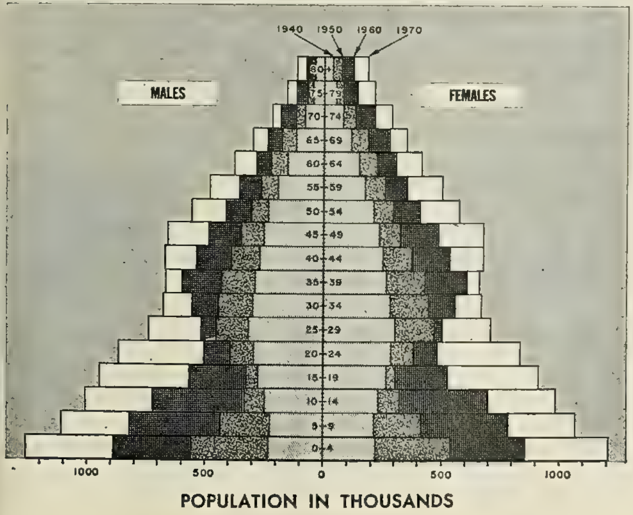
During the coming fiscal year, this State's population is expected to rise from 17,688,000 on July 1, to 18,274,000 on June 30—an increase of nearly 600,000 people. Due to the disproportionate growth of the younger age groups affecting the public schools, higher education, and other institutional populations, this budget as well as all others in this decade will reflect the impact of that growth on all areas of government in the State—without comparable increases in the productive age groups which supply the funds for the needs of our younger people (See Chart 7). These variations within our population structure are comprehensively examined in a later section of this summary on page A-39, entitled Analysis of Expenditure Trends.

In a continuing effort to minimize the cost of services necessary to meet the growth requirements of this decade, the 1963-64 budget has again been prepared under a policy which provides additional funds only in those areas of most essential service to the people of this State, and to the students and wards for whom the State is responsible. In addition the Governor is expecting management savings of $5 million during 1962-63 from departmental administrators, and the current year revised budget anticipates this saving.

While increases in expenditures are applied primarily to the maintenance of existing levels of service, improvements are provided in certain areas of continuing urgent need. The most important of these are additional funds for public school support, reforms in the welfare program, strengthening of the State's rehabilitation services—particularly to those injured in industrial accidents, and attacks on such serious problems as school drop-outs, technological unemployment, urbanization, and financing of low-income housing.

Chart 7

CALIFORNIA'S POPULATION GROWTH BY AGE AND SEX PORTRAYED BY THE 1940-1960 CENSUSES, AND BY PROJECTIONS TO JULY 1, 1970



In an attempt to meet these problems, an expenditure program from current income sources of $2,945,027,761 has been developed for the 1963-64 fiscal year, representing an increase of $187.4 million over the $2,757,632,794 approved by the 1962 Legislature. In addition, $305 million of bond financing will be utilized for capital construction, of which $148 million for State institutional building will be repaid from income in subsequent years, while $157 million for water facilities will be met by future water users. Although these bond expenditures are not included in detailed budget totals, since they are accounted when repaid in future budgets, they can be combined with expenditures from current income to produce a total of $3.25 billion which best expresses the investment impact of the budget program upon California's economy.

Although over-all expenditure increases of $187 million are recommended for 1963-64, this Budget reports a total increase of only $85 million. This apparent inconsistency is created by substantial revisions to the approved 1962-63 expenditure program as shown on the following tabulation:

COMPARISON OF ORIGINAL AND REVISED EXPENDITURES

(In thousands)

	Original 1962-63 Expenditures	Revised 1962-63 Expenditures	Proposed 1963-64 Expenditures	Increase Over Original 1962-63	Increase Over Revised 1962-63
General Fund _____	$1,924,756	$1,919,110	$2,106,143	$181,387	$187,033
Special Fund________	832,876	940,798	838,885	6,009	—101,913
Total ___________	$2,757,632	$2,859,908	$2,945,028	$187,396	$85,120

Two adjustments account for practically the entire revision. The first represents approximately $80 million of unspent highway funds which, by custom, have been brought forward from previous budgets and simply added on top of the 1962-63 program. In actual practice, a similar amount will probably again remain unspent at the end of the current year, and should be so considered when making comparison of expenditure trends to the 1963-64 budget. The second adjustment represents an expenditure of an additional $22 million for water construction projects over the amount originally planned for 1962-63. Since these two capital outlay adjustments, totaling $102 million distort true expenditure trends, it is felt that a more proper comparison of 1963-64 budget expenditures is reflected by the $187.4 million increase over the original budget approved by the 1962 Legislature.

One problem that will be alleviated only temporarily within this budget program is the growing and incessant pressure from local government upon the State's revenue structure. With its major revenue source—the property tax—rapidly reaching the saturation point in many areas, local government is looking more and more towards increased State assistance to provide its historical services. Perhaps one of the most significant features contained in this entire budget is a recommended Tax Revision Commission, proposed to study the various levels of governmental services, who should perform them, and who should pay for them. Piecemeal solutions are not sufficient—only a broad scale study at all governmental levels within the State will provide the lasting framework required.

Even before the full pressure of local needs is felt by the State tax base, aid to local government already overshadows all other State costs. As shown in the diagram on the following page (illustrating the three major divisions of California's expenditure budget), assistance to local government is predominant, exceeding by more than one-quarter the combined current operating costs of State departments and funds for capital construction of highways, institutions and other State facilities.

Local Assistance

Continuing its gradual growth of the past few years, State assistance to cities, counties, and special districts comprises 56 percent of the entire budget. These grants are primarily for public school support and welfare assistance. They also include certain payments where the State merely acts as a tax collector and returns such funds directly to local government (although legally these amounts must be accounted as State expenditures and included in the budget totals). In the aggregate, expenditures for local assistance are projected at $1,651,960,000, an increase of $153 million or 10.2 percent over the current year. Two-thirds of the entire budget increase, excluding capital outlay, is recommended here.

State Operations

Costs of operating the various State institutions, departments, boards, commissions, and independent offices comprise one-third of the budget, or $963 million. Included within the $77 million of additional costs provided for this divisional category are $69 million for required growth needs and $8 million for program improvements in higher education, mental health, and other areas directly affecting the lives of people.

Since the most significant cost of State Operations is contained in the staffing required to operate the various departmental programs, it is important to note that 136,000 employees are included in 1963-64 requests at a cost of $918 million from State, Federal, and trust funds. Within this total are 7,157 proposed new positions of which 2,500 are included for the University and Colleges, and the remainder provided primarily for institutional staffing, water and highway construction, transportation agencies, and employment. For summary purposes, Table 22 on page A-41 contains a breakdown of existing and proposed new positions and costs for the three fiscal years reported by this budget, subdivided by functional classification.

In addition to the personnel costs listed above, this budget contains $31 million for salary range changes for employee groups most urgently in need of adjustment to solve management problems, or to provide comparability with like work in outside employment. Included within this adjustment program are academic positions at the University and Colleges, judges, statutory officers, and certain broad civil service classes.

Capital Outlay

Less than one-eighth of total budget expenditures from current income are applied to capital construction—primarily from special funds dedicated to highway and water facility construction. Total expenditures from current revenues will drop to $330 million, a decline of $145 million from revised current year projections. As discussed previously, this decrease is particularly deceptive because the 1962-63 highway budget has been augmented by $80 million of projects originally scheduled for construction in previous years. A substantial decrease will also be experienced in the California water fund where large construction outlays will be financed for the first time from bond funds which are not included in expenditure totals.

In addition to $157 million of projects financed by water bonds, all major construction for buildings and facilities at the University, State Colleges, mental hospitals, and correctional institutions will be financed from bond proceeds approved at the 1962 general election. A lump sum amount of $20 million from this general obligation bond issue is also reserved for legislative allocation for junior college construction in subsequent years. In total, $305 million of bond funds are programmed for use in 1963-64, with almost the entire increase of $164 million representing the initial large-scale construction of such water facilities as the Oroville and San Luis dams, and aqueduct distribution systems.

Table 10

STATE EXPENDITURES BY PRINCIPAL BUDGET DIVISIONS

(In millions)

	1961-62 Actual	1962-63 Estimated	1963-64 Proposed	Change from 1962-63 Amount	Change from 1962-63 Percent
State Operations	$779.0	$886.2	$963.2	$76.9	8.7
Capital Outlay	275.6	474.7	329.9	—144.9	—30.5
Bonds, Building	(88.0)	(158.0)	(148.5)	(—9.5)	—6.0
Bonds, Water	(.1)	(.2)	(156.9)	(156.7)	–
Local Assistance	1,351.6	1,498.9	1,652.0	153.0	10.2
Totals	$2,406.2	$2,859.9	$2,945.0	$85.1	3.0

Functional Distribution

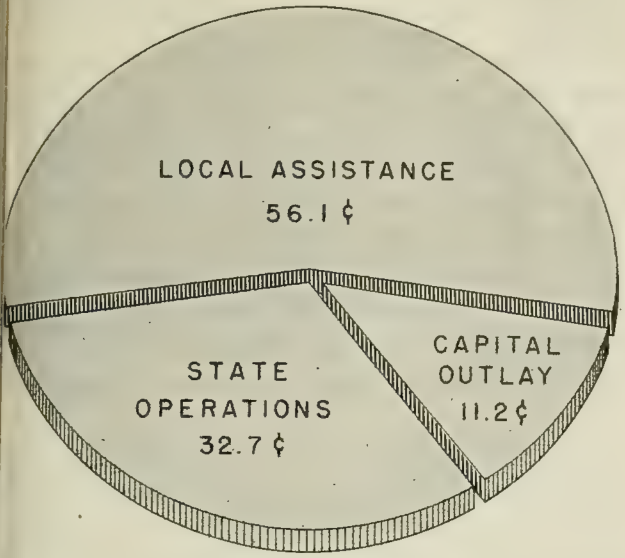
It is informative to view also the recommended expenditure program in terms of major activity areas and the amounts devoted to each. To facilitate this kind of appraisal, this expenditure analysis presents a digest of the entire budget on the basis of the nine principal functions contained therein.

So that all applicable costs might be reported for each function, the recommended salary increase and debt service expense have been distributed among the several functions. Similarly, predictable but currently unidentifiable savings anticipated in the current and

Chart 8

MAJOR DIVISION OF THE EXPENDITURE DOLLAR

1963-64



budget years have been reflected in the functional expenditure figures appearing in this statement. These adjustments account entirely for the differences between the figures in this analysis and those reported in the detailed budget schedules.

The recommended expenditure program, after such adjustments, is summarized by function in Table 11 below. With these data as points of reference, and after allowing for the distortions in Special Fund Capital Outlay trends discussed previously, specific functions and programs may be seen more readily in true perspective.

Table 11

EXPENDITURES CLASSIFIED BY PRINCIPAL FUNCTIONS

(In millions)

Function	Proposed 1963-64	Percent of Total	Change from 1962-63	
			Amount	Percent
Education	$1,261.7	42.8	$111.0	9.6
Highways	577.2	19.6	—64.6	—10.1
Health and Welfare	541.9	18.4	65.9	13.8

Corrections	96.8	3.4	7.8	8.8
Fiscal Affairs	52.4	1.8	5.8	12.3
Business and Commerce	30.8	1.0	1.8	6.2
Public Safety	23.5	0.8	0.6	2.5
Other	197.9	6.7	12.7	6.9
Totals	$2,945.0	100.0	$85.1	3.0

Education—$1,261,681,000

California's commitment to provide the best possible system of publicly supported education is a policy of long standing. To support this policy, the State's expenditures for education continue to constitute the greatest single portion of the total budget. Programmed at $1.26 billion, the expenditures for this function account for 42.8 percent of all expenditures and more than twice the amount devoted to the function next largest in terms of State cost.

Unmatched increases in enrollments which have boosted the number of students in California's publicly supported schools to the highest in the nation; improvements in curricula required to cope with the evolving technological and social problems of an increasingly complex world; and special educational programs designed to meet special needs combine to dictate the necessity for devoting an ever-increasing share of the budget to educational needs.

Within the total program, the State's responsibilities are diverse and numerous. Assistance to school districts for operation and construction; a university functioning through nine campuses and which is an acknowledged leader in its field; an array of 17 State colleges emphasizing the liberal arts and teaching programs; and special programs for the injured, the handicapped, and the gifted are illustrative of the scope of California's efforts in this most important and fundamental governmental undertaking.

The administration and general supervision of public school education through the junior college level is the responsibility of the Department of Education. Among the programs embraced by this broad field are the apportionment of funds for public school support; selection, printing and distribution of free textbooks for the elementary grades; and direct administration of special schools and facilities for the handicapped.

The Department also acts as the cooperating agency in such Federal-State cooperative programs as vocational education, vocational rehabilitation, national defense education, and the distribution of surplus property to eligible agencies.

The 1963-64 Budget of the Department of Education includes funds for the first phase of a 3-year project to strengthen the role of education in the prevention of narcotics addiction and use of dangerous drugs in keeping with the recommendations of the Special Study Commission on Narcotics. During the first year it is planned to develop specific program plans, educational materials and teaching aids.

In the area of civil defense, the Department is being assigned increased responsibilities for working with public schools in civil defense and disaster preparedness.

The budget also proposes a new program in compensatory education for culturally handicapped pupils. Similar programs, where tried, have brought about marked improvement in the academic achievements of children lacking the cultural and social advantages enjoyed by the majority of California students.

Local Assistance

During the budget year approximately 4 million children, or one person in five of California's total population, will be in kindergarten and grades 1 through 14. This segment of our population, which is growing at a rate far exceeding that of the general population will, during 1963-64, require $813.2 million for public school support. This is an increase of $48 million over the previous year and will provide funds for the education of an additional 220,000 students in the public school system. In addition to the funds proposed to continue the present program, an additional $28 million is recommended to provide additional support for the public school system. These additional funds will allow the State to meet its responsibilities under a countywide plan for public school support which will be proposed to the Legislature during the 1963 General Session. Also recommended is $2 million to increase the level of the foundation program for junior colleges.

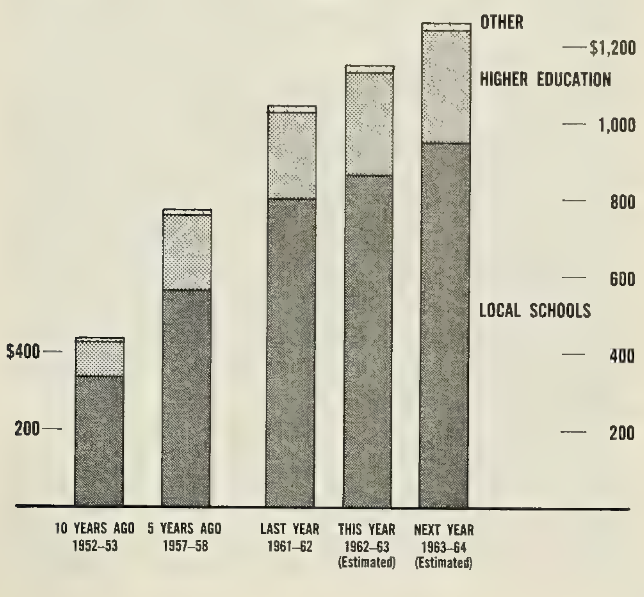
Rising enrollments and new adoptions in the free textbook program for the public schools will require an expenditure of $11.8 million in the 1963-64 fiscal year. The program calls for new adoptions in 6th and 7th grades history and geography texts to be distributed to the public schools by fall of 1964.

Funds for child care centers of $5.6 million will provide for an estimated 1.5 percent increase in hours of attendance over 1962-63. These centers are operated by 48 school districts, primarily in the urbanized areas of the state, to provide low cost care and supervision of children whose parents must work to provide a livelihood for the family.

Chart 9

COMPARATIVE EXPENDITURES FOR EDUCATION

(In millions)



The 1963-64 budget includes $850,000 for State assistance to local libraries, which are an integral part of the education process of all citizens, and, as such, merit assistance from the State. The amount proposed, when applied to areas of greatest need, will make a significant contribution toward the improvement of public library services in California.

The State will contribute $47.3 million toward the retirement costs of over 27,300 retired teachers in 1963-64, an increase of 10 percent over the prior year. Within this amount is included an improved benefit program which is intended to partially offset cost of living increases for retired teachers with limited incomes.

A federal cooperative program to deal with the problem of unemployment resulting from automation and technological changes is also included. The Vocational Education Section of the Department will supervise the training aspects of the Manpower Development and Training Act Program. The training will be performed by public schools with full reimbursements of the excess costs. This program will be financed from federal funds through the 1963-64 fiscal year; thereafter, the State would be required to provide matching funds.

The need for assistance to junior colleges for capital outlay purposes is a continuing one that cannot be adequately met by the tax relief measures currently authorized. For this reason the State Construction Bond Program, approved at the last general election, included $20 million to provide some additional State assistance to the junior colleges in coping with the tremendous enrollment growth they are currently experiencing and that which they face in the near future. It is anticipated that the necessary enabling legislation will be enacted by the 1963 Legislature and $20 million has, therefore, been reserved for this purpose.

Higher Education

During the coming fiscal year the State will support public higher education through three separate but complementary systems: the locally governed junior colleges financed jointly by the local districts and the State; the State colleges offering four and five year liberal arts programs; and a State university emphasizing graduate and professional education. So that these systems may best serve California's growing needs, the Coordinating Council for Higher Education was established in 1961. This advisory body, composed of representatives of public and private higher education and the general public, was created to promote the coordinated and orderly growth of higher education and to advise the Governor and Legislature in this important field. Expenditures for direct State responsibilities in this field total $400.3 million plus allocations to local districts for junior colleges.

University of California

To maintain its status as a world-recognized center of teaching and research activities, $158 million will be required in 1963-64 for current operations and $69.5 million in capital outlay to meet future student enrollments. This reflects provision for an estimated 61,277 students on the University's 9 campuses, an increase of 4,074, or 7.1 percent, over the current year.

An increase of $788,000 is required for new and improved programs. Of the major items, $222,000 is included for planning the San Diego Medical School in preparation for an entering class of 32 medical students in the fall of 1965. The amount of $100,000 is proposed to initiate a new Department of Applied Science at Livermore under the College of Engineering at Davis. In the first year, 50 graduate students will be admitted as candidates for masters' and doctors' degrees in this new department.

As part of the new program increases, $250,000 is for the cost of continuing, through the 1963-64 budget year, the academic salary schedule which became effective July 1, 1962.

In the 1963-64 capital improvement program of $69.5 million is the addition of new facilities at each of the operating units of the University. The largest single allocation ($10,914,000) is for the new Irvine campus in Orange County to accommodate an entering enrollment of 500 students in September 1965. The largest single project budgeted is a new Chemistry Building for the Berkeley campus at an estimated cost of $5.4 million.

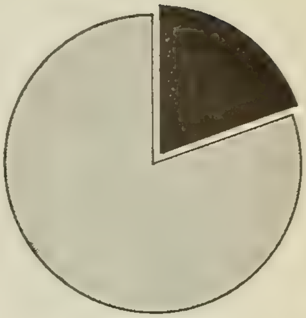
State Colleges

The 17 State colleges,* are administered by the Board of Trustees of the California State Colleges. These colleges will provide academic programs for an estimated 94,840 students in 1963-64, an increase of 8,435 students, 9.8 percent over current enrollments. The State Colleges have become the fastest growing and largest single complex for higher education in the nation. The individual colleges, each with a geographic, curricular, and academic character of its own, offer solid basic programs in the liberal arts. Beyond this, each college enjoys individuality in academic emphasis which makes for a diversified system. Course offerings leading to the bachelor's and master's degree are designed to satisfy existing student interests and to serve the technical and professional manpower requirements of the State.

The budget totals $114.1 million for current operations providing for the continuation of existing service levels, plus three program improvements. A total of $1.6 million, of which $421,000 appears in the capital outlay program, is provided for library books and processing costs as special allowances to improve library collections from current inadequate levels. A similar program was approved in the 1962 budget. To establish a research program, $500,000 is included for incidental expenses, such as clerical and technical assistance, operating expense and equipment to support classroom-related research projects. A total of $55,000 is provided for faculty travel related to professional development.

The capital outlay budget totals $58.7 million. The additional classroom buildings and related facilities included within this sum will provide capacity for an additional 11,000 students.

Highway Transportation—$577,179,000



19.6% OF TOTAL BUDGET

Expenditures for highway transportation related activities constitute the second largest segment of the budget. The construction and maintenance of highways, enforcement of safety and traffic controls, registration of vehicles, and licensing of drivers add up to one of the biggest tasks facing the State Government.

Of the $577.2 million budgeted for this function, nearly $342.6 million will be expended for State highways of which $272.6 million is earmarked for construction, reconstruction, and rights-of-way to keep pace with the ever growing number of vehicles. The regulatory and enforcement activities of the Department of the California Highway Patrol and the Department of Motor Vehicles will require an aggregate expenditure of $85.2 million. Most of the $149.4 million remainder will be distributed to cities and counties for local roads and streets. In addition, a total of $305.6 million in Federal funds has been allotted to California for development of roads, streets and highways.

Highways

The State highway budget is prepared under the direction of the State Highway Commission. The Streets and Highways Code requires that the budget be submitted to the Legislature, as adopted by the commission, without modification by the Governor. This budget is, however, included in this presentation for comprehensive expenditure reporting purposes. The proposed expenditures for the 1963-64 fiscal year, including Federal funds, totals $692.5 million.

---

* Including San Bernardino-Riverside and South Bay State Colleges which are in the planning stage.

The State operations portion of the highway budget is $70.0 million for the maintenance of the 16,355 mile State Highway system and the overhead costs of the headquarters and district offices.

The recommended capital outlays total $568.2 million. Of this amount, $554.7 million (which includes $296.7 million of Federal funds) is for State highway construction and purchase of rights-of-way. The construction program consists of 218 projects, including construction of 267 miles of multi-lane freeway, 31 miles of multi-lane expressway, 23 miles of two-lane expressway (designed for future expansion) and improvement of 26 miles of existing freeways. The capital budget also provides $1.1 million for honor camp construction; $9 million for buildings, plants and equipment; and $3.4 million for Highway Planning. In previous years highway planning was included within the State Operations section of the division's budget.

The budget also provides $58.8 million for road purposes other than State highways. This includes $39.5 million for major city streets based on ⅝ cent per gallon of the State gasoline tax; Federal aid for county roads on the Federal aid secondary systems amounting to $8.9 million; State allocations to counties of $5.4 million for use in matching these Federal funds; $5.3 million to help finance railroad grade separation projects on local streets and roads; $1.4 million to cities for engineering; and $1 million to pay part of the cost of urban extensions of the Federal aid secondary system. In addition California's 58 counties receive 1⅝ cents per gallon from State fuel taxes plus allocations from the revenues derived from registration and weight fees. For the 1963-64 fiscal year, these State-collected funds for county roads will total an estimated $99.2 million.

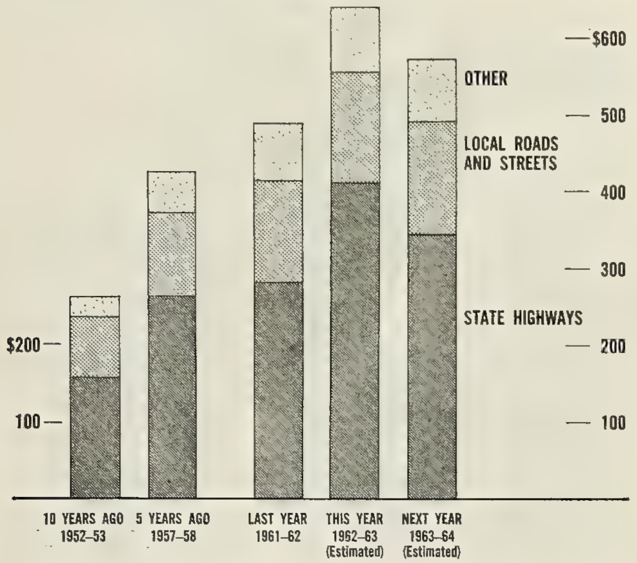
Highway Patrol

The California Highway Patrol operating budget of $40.9 million provides for an additional 75 traffic officers and 7 sergeants to cope with increased enforcement workload resulting from expanding population, registered vehicles increases, and additional miles of highway, and urban developments in rural areas. The State's record of 4,106 deaths and 180,000 injuries during 1962 from motor vehicle accidents is ample evidence of the need for intensified efforts to reduce such a shocking toll.

Chart 10

COMPARATIVE EXPENDITURES FOR HIGHWAY TRANSPORTATION

(In millions)

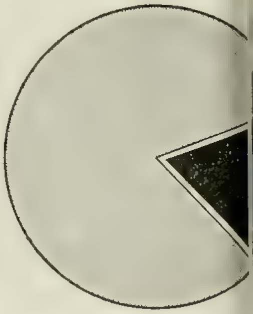


Department of Motor Vehicles

The major activities of the Department of Motor Vehicles are the registration of vehicles, the licensing of drivers, and the determination of the financial responsibility of individuals involved in vehicle accidents. It is estimated that this Department will register 10,077,000 vehicles and issue 2,887,000 licenses to operate vehicles during the 1963-64 fiscal year. In this work the Department will spend $40.2 million, an increase of $3.7 million over the current year total.

The major 1963-64 increase for the Department is for 408.2 employee man-years for increased workload at a cost of $1,983,000. An additional $645,000 is budgeted to reinstate levels of service that were eliminated or reduced in scope. Also recommended is $250,000 for study and training of personnel in connection with the development of an electronic data processing system to automate the drivers' license record file and for file conversion.

Health and Welfare—$541,891,000



18.4% OF TOTAL BUD

Third in magnitude are expenditures for programs to combat illness, both physical and mental; to provide assistance to aged, the needy, and the handicapped; and to promote a more healthful environment for the people of California.

Within this broad field, the costs of many activities are shared by local, federal, and State governments—a reflection of the wide-spread, basic importance of these programs socially and economically.

For these purposes, the State's expenditures will total nearly $542 million: $171 million for mental health; $327 million for welfare; and $44 million for public health.

Mental Hygiene

Substantial progress has been achieved in balancing admissions and releases of those suffering from mental illness despite the continued spiraling of State hospital admissions. Since 1959 releases have actually exceeded admissions resulting in a reduction of the number of mentally ill patients hospitalized. The four major developments which have made this result possible are: (1) a higher level of hospital treatment achieved by enriched staffing, intensified treatment programs, and the increased availability of tranquilizing drugs to a larger number of patients; (2) emphasis on research, involving both project and career positions, to assure a comprehensive and balanced program embracing both applied and basic research; (3) continued growth of staff training at all levels directed toward improved treatment; and (4) strengthening of local mental health services to eliminate the need for large numbers of citizens to leave their home communities because of mental illness. Success in the above areas is best indicated by the fact that 1962-63 year-end resident population will be at the lowest level in the last nine years. The resident population will drop an additional 500 by June 30, 1964, to 33,900 patients. The number of admissions will increase by 1,400 over the current year to a new high of 30,700.

* Less than $500.

Contrary to the trend in the resident population for mentally ill, the inpatient population for the mentally retarded hospitals has undergone a considerable rise. There are at present substantial numbers of patients on the waiting list for admission to State hospitals for the mentally retarded. A continuing effort is being made to provide additional capacity through conversion of mentally ill facilities and activation of new facilities. This will alleviate the waiting problem to some extent. In the coming fiscal year, at a cost of $1,276,000, the capacities of Porterville and Fairview State Hospitals will be increased by 786 additional beds with the activation of new facilities. In addition research and testing goes forward to develop promising, less expensive, and more effective alternatives to continually increasing hospital capacities.

This budget proposes intensification of treatment, research, training, and community development of mental health services. It provides $379,000 to handle the increased mentally ill admissions and $606,000 to strengthen existing hospital services through the correction of hospital staffing deficiencies and increases for such items as drugs, equipment, rehabilitation supplies, personal care supplies, and miscellaneous feeding supplies. Expansion of post-hospital services is proposed through the provision of $420,000 for 300 additional mentally ill home placements and 200 additional mentally retarded home placements to prevent a buildup of resident hospital population which would otherwise result from the growing admission rate.

Recruitment of qualified personnel is a crucial problem in meeting the needs of California's mental health services. To meet this challenge, the training program includes $236,000 for additional psychiatric residents, career residents, scholarships, internships, and training administration.

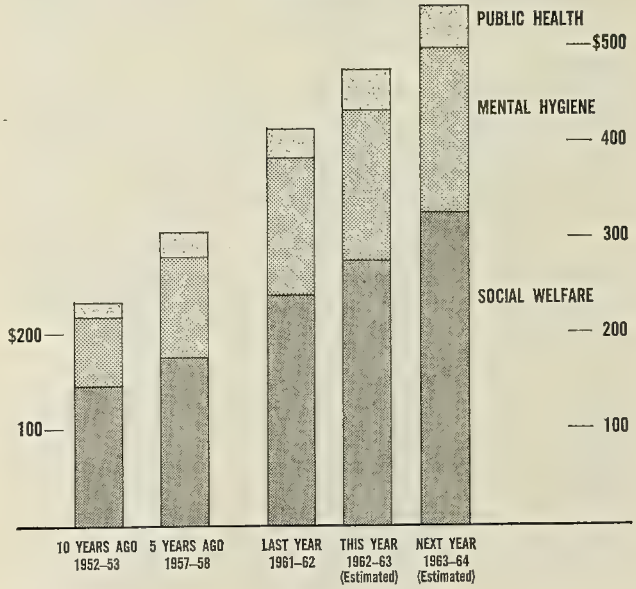
The budget provides $1.5 million during 1963-64 to continue the present comprehensive and balanced research program.

Special programs are proposed in this budget for two segments of the patient population—the old and the young. Development of an intensive treatment program for the inpatient care of emotionally disturbed children and adolescents is proposed at a cost of $177,000. A geriatric program is budgeted in the amount of $222,000 to avoid admissions of persons whose problem is senility rather than mental illness and to accelerate release and placement of elderly patients in the community when specialized hospital services are no longer required.

Chart 11

COMPARATIVE EXPENDITURES FOR HEALTH AND WELFARE

(In millions)



Funds in the amount of $135,000 are proposed to provide administrative strengthening in the areas of accounting, management analysis, insurance coverage of patients, and disaster planning.

An allocation of $3.5 million is provided to continue expansion of community mental health services (Short-Doyle Program) and thus obviate the necessity for large numbers of citizens to leave their home communities because of mental disorders. Changes in the program to encourage greater local participation are anticipated during the 1963 Legislative Session and $2 million is included in the budget for this purpose.

Capital outlay projects in the budget year totaling $8.1 million are proposed to provide additional auxiliary facilities, to remodel outdated ward buildings, including a limited amount of air conditioning; and to improve physical plants through the correction of other deficiencies. In addition, the first phase of construction is proposed at Modesto State Hospital in the replacement of outdated military structures.

This moderate expansion of the mental health program will require an increase of $6.2 million over current year expenditures, carrying the cost of this function to $171.1 million in 1963-64.

Public Health

Support expenditures for the Department of Public Health will increase $484,000 over the current year to a total of $10.8 million as the result of workload growth and the strengthening of existing programs.

A new Division of Emergency Health Services is proposed as a result of the reassignment of responsibility for the Public Health Services of the civil defense organization. In addition to the transfer of the existing function from the Disaster Office, service expansions in the amount of $120,000 are recommended, one-half of which are to be financed from Federal grants.

A new program to provide laboratory diagnostic services for enterovirus and respiratory diseases is planned at a cost of $32,000, and the sum of $15,000 is proposed for initial planning of a program dealing with the medical aspects of safety and accident prevention.

Information for regional hospital planning will continue to be developed in San Francisco and Los Angeles to guide these communities in developing desirable size, location, and service criteria.

The Department of Public Health will assume the responsibility for operating the laboratory investigating problems of air pollution by motor vehicle exhausts. This is currently being operated by the Los Angeles Air Pollution Control District. The laboratory will also provide services to the Motor Vehicle Pollution Control Board.

New federally supported programs include increases of $75,000 to administer a Statewide program for better medical services to the chronically ill and aged population through stimulation of local efforts, $52,000 to provide a three year inventory of the services in the State available in the Neurological and Sensory Disease field, and $108,000 for expansion of services for registration of radiation producing machines.

State assistance to local agencies for public health will increase to $32.8 million in 1963-64, an increase of $2.1 million over the current year. This results primarily from the normal growth in the aid of counties for the care of crippled children (up $2.3 million). There will also be increases in: the physical therapy subvention due to the greater numbers of handicapped children who qualify for this care; in the general public health assistance made by the State in the form of subventions to counties having health departments, and; in services to counties without such departments. Tuberculosis sanitoria expenditures will decrease $0.6 million because of the reduction in patient days made possible by improved techniques of early diagnosis and treatment.

Social Welfare

Assistance to California's aged, handicapped and needy citizens in the form of economic aid, medical care, and social services are provided in this budget at an estimated cost of $327.2 million in State funds. This amount is $30.6 million over the $296.6 million proposed for the same purposes in the 1962-63 budget, or $51.6 million more than the revised estimate for 1962-63 shown in this budget.

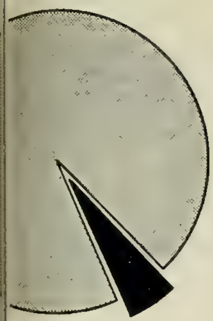
Factors contributing to the growth of these social welfare programs include the maturing of the improvements inaugurated in recent years, action taken by the Federal Government in liberalizing the national subventions for social welfare, and the recommendations of the Welfare Study Commission.

In 1961, the Legislature authorized several changes in the State social welfare program. These included (1) medical assistance for the aged effective January 1, 1962; (2) grant and cost-of-living increases for the aged, blind, and disabled; (3) modification of the responsible relative provisions; (4) inclusion of non-citizen aged and disabled; and (5) liberalization of property and disability definitions. As a result, caseloads of the various programs have increased significantly. The downward adjustment in the 1962-63 expenditure estimate is attributable to a more gradual increase during 1962-63 for the Old Age Security and Medical Assistance for the Aged programs than was anticipated a year ago.

Amendments to the Federal Social Security Act effective in 1962-63 required the State to place considerably more stress on services, training, and rehabilitation as means of reducing dependency and encouraging self-care. The Federal Government, by raising its financial participation from 50 to 75 percent for these new services, will pay most of the increased cost.

On January 1, 1963, the Welfare Study Commission submitted a report to the Governor and Legislature recommending substantial changes in State-county relations and cost sharing, administrative structure and procedures, and scope of program. In anticipation of legislation on this subject, the sum of $7.5 million in the State funds proposed for 1963-64 has been included in the budget to finance modifications in the programs for Aid to Needy Children and Aid to the Needy Disabled.

esources—$162,849,000



F TOTAL BUDGET

The combined expenditures of $162.8 million for conservation, development, and constructive use of natural resources place this function fourth in the array of principal budget categories. Despite the generous endowment of native assets, continued population growth imposes demands which cannot be met without the most careful husbanding and judicious use of the State's wealth of natural resources.

High in importance within this function is provision or the second year of full-scale construction effort on he vital Feather River Project. In addition, this category of State operations embraces such essential activiies as wild land management and protection, services o agriculture and the extractive industries, protection nd management of fish and game, and the acquisition, levelopment, and operation of recreational areas and acilities.

Water Resources

Maximum water conservation and development are mong the primary goals of the State. Construction to peed the delivery of water to present and future users s well underway. Proposed budget year expenditures f $204 million indicate the vigor with which this ndertaking has been pushed since voter endorsement f the California Water Development Program in November of 1960.

The first sales of bonds authorized under Chapter 1762, Statutes of 1959, as approved by the voters, are cheduled for 1963-64 in the amount of $200 million. Expenditures from this source of $156.9 million are planned during 1963-64 plus $36.6 million from the California Water Fund for planning and construction of State Water Facilities. In addition to these amounts expenditures of $10.5 million from the General Fund are recommended for general planning, regulatory, and administrative responsibilities of the department.

During the current year work was started on the Oroville Dam embankment—the keystone of the entire system of aqueducts, dams and reservoirs stretching from the upper Feather River in the north to Perris Reservoir in Riverside County in the south. Federal contributions of $14 million toward the cost of construction of Oroville Dam for the navigation and flood control aspects were received in the current year and an additional $10 million is expected in the budget year. Construction of the joint Federal-State San Luis Project is on schedule with State advances to the Federal Government estimated at $41 million during 1963-64.

Maximum recreational benefits from the project are being developed in close coordination with the engineering design to assure full usage as soon as each unit becomes operational. To this end, $686,000 is included in the Department of Water Resources' budget for access roads to the recreational area at Frenchman Dam and Reservoir, for recreation development at Antelope Valley, Del Valle, and Airpoint Dams and Reservoirs, and for trees at San Luis Dam and Reservoir.

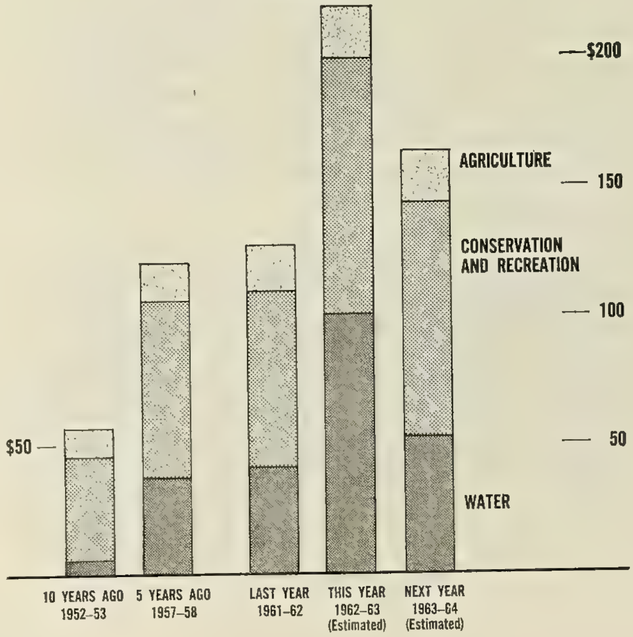
General planning activities financed from the General Fund are continued at virtually the same level for 1963-64; project-oriented planning investigations, however, are increased by $1.1 million reflecting the overall acceleration required in this area.

Approximately $20.3 million is included in the local assistance budget for 1963-64 to finance State participation in flood control and beach erosion projects.

Chart 12

COMPARATIVE EXPENDITURES FOR RESOURCES

(In millions)



Included in this amount are funds for continuation of the State constructed San Joaquin River flood control project.

Conservation

To protect and enhance the State-wide values represented by 39,000,000 acres of timber, range, watershed, and recreational lands will require expenditures by the Division of Forestry in excess of $23.2 million during the coming fiscal year. In the accomplishment of this mission the division operates through a network of strategically located fire suppression stations and conservation camps.

New conservation facilities scheduled to be opened in the budget year are Black Mountain Conservation facility (80 men) in Sonoma County; and Chino Conservation facility (100 men) in San Bernardino County. Two 80-man facilities expected to become operational in the current fiscal year were not completed. One of these, Mono-Inyo Conservation facility, is now expected to be completed on July 1, 1963. The other, Konocti Conservation facility, is due to be activated on August 1, 1963. As of the beginning of the coming fiscal year, it is estimated that 2,160 Department of Corrections inmates and 345 Youth Authority wards will man 30 permanent conservation facilities, 3 mobile camps and 3 temporary camps.

To provide adequate fire protection for lands under State responsibility in Mono and Inyo Counties, the Owens Valley Ranger Unit is scheduled for activation. This unit will also plan and assist in pre-suppression work on these valuable watershed lands.

The use of aircraft under contract in controlling and suppressing wildland fires has proven very effective. Intensification of this program is proposed in the budget year to provide better coordination of the aircraft enroute to fires and to assure that aircraft and fire retardants will be available when needed.

The budget also provides funds for the employment of young men between the ages of 16 and 21 to provide opportunities for beneficial experience and constructive work at a modest salary. As planned, this is a pilot program under which these young men (400 maximum) will be assigned to regular forestry facilities in accordance with the terms of enabling legislation to be introduced in the 1963 General Session.

Other divisions of the Department of Conservation—Mines and Geology, Soil Conservation, and Oil and Gas—are projected at current levels.

Parks and Recreation

The planning for future recreational lands and developments to meet the demands generated by increased population has been given even greater emphasis in this budget. A new recreational planning unit in the Division of Recreation is recommended to work with public and private interests in the development of factual information on recreational needs on a State-wide basis and in the formulation of recommendations as to how these needs may be met.

The work of this new unit will be co-ordinated with and complement that undertaken as part of the preparation of the State Development Plan.

As a consistent and correlative measure, the establishment, through reorganization, of a separate planning unit within the Division of Beaches and Parks is proposed to improve master project planning and advance project planning for State parks and beaches.

Acceleration of the construction of funded projects is also proposed so that the people of California may enjoy the greatest immediate benefit from the moneys expended for park purposes.

Fish and Game

For the protection, propagation and management of the State's fish and wildlife resources, the proposed budget for the Department of Fish and Game totals $11.7 million. As recommended, this budget is predicated generally on continuation of present levels of services. Some slight reductions in certain activities are planned, however, to keep expenditures consistent with the resources of the Fish and Game Preservation Fund.

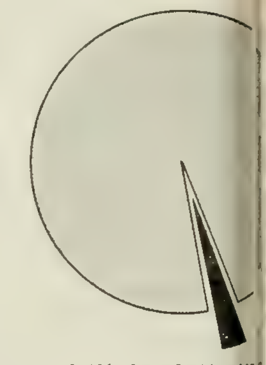
Agriculture

The Department of Agriculture budget includes $57,000 for the assumption by the Division of Agricultural Economics of new responsibilities related to the Federal Trade Expansion Act of 1962 and transportation rate problems. Factual data will be made available to the agencies involved in tariff discussions to assure that the effects on California's economy are accurately and fully presented, and studies will be made of transportation rates affecting the national competitive position of the State's agricultural output.

Testing of agricultural products for pesticides, long a Department of Agriculture activity, will require an increase of $70,000 to provide the level of surveillance necessary for the protection of the public from toxic effects of pesticides. Expansion of this activity is proposed because of the increased use of pesticides by all segments of industry and the consequent need for stricter control of the use of pesticides.

Corrections—$96,768,000

Among the oldest of governmental responsibilities is the imprisonment of those who have violated the laws of society. Because all but a small fraction of the total number of persons committed to the State's correctional institutions will be released eventually, modern penology programs emphasize the rehabilitative rather than the merely punitive approach. Thus the State's correctional function consists of two major phases: confinement, treatment, and training; and supervision and guidance of parolees.



3.4% OF TOTAL BU

During the next fiscal year, the Departments of Corrections and Youth Authority will operate 22 institutions and 41 conservation camps with an aggregate, average population of nearly 31,200. During this same period these departments will be responsible for nearly 27,000 adult and minor parolees. In addition, the State will provide $3.8 million in assistance to local communities for the establishment and operation of juvenile homes and camps.

Department of Corrections

The Department of Corrections will continue to develop the Nonfelon Narcotic Program and the Conservation Center Program which were inaugurated in the 1962-63 fiscal year. Current commitments for narcotic addiction are being received at the new California Rehabilitation Center near Corona and nonfelon narcotic inmates are now being transferred from other institutions to this center. If proposed legislation is adopted in 1963, the population of this center could also include persons committed to correctional institutions for habitual use of dangerous drugs. The projected population for this facility is 1,615 on July 1, 1963, increasing to 2,310 by June 30, 1964.

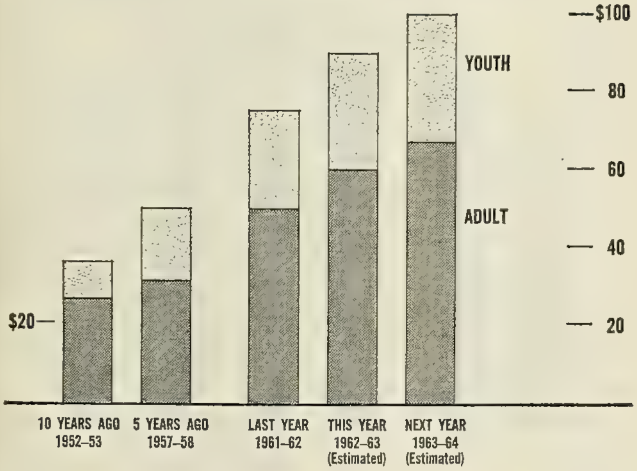
Chart 13

COMPARATIVE EXPENDITURES FOR CORRECTIONS

(In millions)



The Conservation Center program is progressing with the first reception of inmates in January of this year at the center in Susanville and the conversion of the Chino Branch, California Institution for Men, to the Conservation Center, Southern Branch, planned for July 1, 1963. Projected population for this center and its branch is 1,176 on June 30, 1963, with an increase to 2,991 by June 30, 1964.

In a continuing effort to increase the effectiveness of the parole program and to improve rehabilitation systems, the Department of Corrections proposes to establish a demonstration community correctional center in 1963-64. Although the $110,000 cost is minimal and the center is planned only as a demonstration project, the anticipated benefits are large. The several functions pertaining to parole currently performed by the parole districts and institutions will be combined in this center with a halfway house and sheltered workshop. The center will offer a solid transitional step from confinement in a penal institution to membership in free society. In reverse it will offer a convenient, economical, less institutionalized setting to which parolees who are in danger of violating their paroles can be returned for needed therapy. A pilot program to test the effectiveness of a portion of the community center plan was started in 1962 with the opening of a halfway house in Los Angeles financed from foundation grants.

It is expected that the center will also demonstrate that both the State and the individual will benefit from increased community interest and greater understanding of the State correctional program.

Reorganization plans within the department include full institution status for the Tehachapi Branch of the California Institution for Men which will become the California Correctional Institution at Tehachapi on July 1, 1963. On the same date the Chino Branch of the California Institution for Men will become the Southern Branch of the California Conservation Center.

During the next fiscal year, the Department of Corrections will operate 12 institutions with an average daily population of 24,545 felon inmates and 1,875 nonfelon narcotic addict inmates. The post-institutional program will provide supervision and guidance for an average of 13,420 felon parolees and 929 nonfelon narcotic addict parolees. Expenditures of $64.2 million are proposed to carry on these and other support programs of the Department of Corrections.

A capital outlay program of $3 million is recommended to provide preliminary site development for a new 1,200 bed institution at Tehachapi to meet anticipated increases in population, equipment for previously funded projects, alterations in the food service facilities of the Institution for Women, a correctional industries warehouse at Folsom, and other projects to meet operating and maintenance needs at various institutions.

Youth Authority

Although the Youth Authority is smaller than the Department of Corrections, both in numbers of wards and size of facilities, the more intensive treatment program is justifiable in that society has a greater stake in the rehabilitation of youth. Being younger, the released ward presents a longer potential career as a productive member of society than does a parolee from a Department of Corrections institution.

Expenditures of $27.3 million are recommended for operating and maintaining 10 institutions and 4 forestry camps housing 4,766 wards. In addition, an average of 12,657 minor wards will be under parole supervision. As in the case of the adults, parole has proved to be a more economical way of conducting the rehabilitation processes and transition to free society.

The budget also provides for the establishment of a partway home project at a cost of $75,000 so that homeless wards, or wards who have no satisfactory home to return to, can make the transition from institutional life to a free society with greater expectation of success.

In addition, the sum of $50,000 is recommended for housing wards of the State in privately owned rehabilitation centers on a test basis. This approach offers a possibility that the State can reduce future capital outlay costs. It is planned to conduct this program at rates of payment that do not exceed the annual costs of maintaining a ward in a State-operated institution.

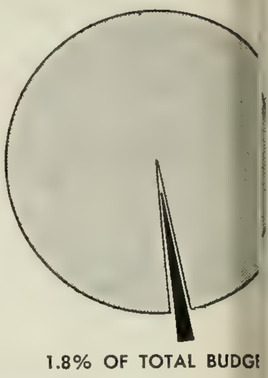
The cost of new programs and services at a level above that currently provided, including the two mentioned directly above, total $454,000.

Public and private agencies that combat juvenile delinquency and provide rehabilitation at the local level will continue to receive assistance from the State in 1963-64 in the form of consultation and advice, and monetary subventions to counties and cities complying with established standards. A total of $3.8 million is proposed to aid cities and counties in the construction and maintenance of juvenile homes and camps. Assistance to the City of San Diego for checking juveniles crossing into Mexico at the San Ysidro Border Station will be continued at the currently authorized amount of $27,000, based on the ratio of juveniles from areas of the State other than the City or County of San Diego to the total number of juveniles involved.

Despite the effort devoted to the struggle against juvenile delinquency and the inauguration of more effective correctional and rehabilitation programs, additional facilities will be needed.

The capital outlay program totals $10,730,000 for 1963-64 the major portion of which is for the construction of a new (second) unit of the Northern California Youth Center near Stockton at a cost of $5,800,000 to house 400 boys. Augmentations for the first unit and central administration core add to the program at this site. Two living units are also recommended for Fred C. Nelles School for Boys. Other projects include equipping already funded construction projects and the repair and maintenance of existing facilities.

Fiscal Affairs and General Administration—$52,430,000



Measured by any standard, State Government in California is a major enterprise. It is, moreover, a public trust with responsibilities and obligations beyond those to be found in the private sector of the economy. Control and management functions, therefore, are emphasized to assure the maintenance of highest standards of integrity and efficiency in the business affairs of the State.

Included within this function are the executive, tax collection, business management, general service, and similar activities.

Tax Collection

The major tax collection responsibilities are divided among the State Board of Equalization, the Franchise Tax Board, and the Office of the State Controller. The increase in tax administration costs of $3,267,000 is attributable largely to higher price levels and normal workload increases plus data processing improvements in the Franchise Tax Board.

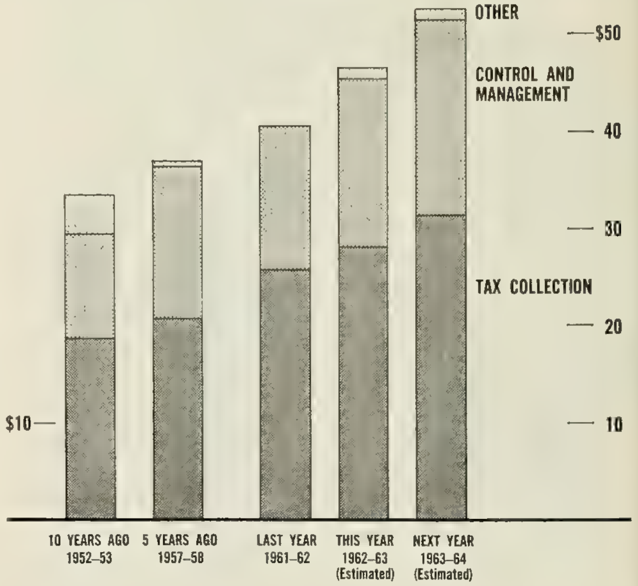
The major difficulty faced by the Board is the physical handling and subsequent storage of and reference to the increasing volume of returns and related materials involved in the administration of the personal income and bank and corporation taxes.

To cope with this situation the Franchise Tax Board proposes the development of an electronic data

Chart 14

COMPARATIVE EXPENDITURES FOR FISCAL AFFAIRS AND MANAGEMENT

(In millions)



processing system and related organization at an estimated increased cost of $230,000 for the 1963-64 fiscal year. The new system will have the necessary capacity to handle the various processes now accomplished either manually or by punch card equipment.

At the present time, punch card equipment is used by the Board for extensive records of accounts receivable, statistical evaluation of tax programs, complex bank tax rate computation, and delinquency control for the franchise tax. All of these processes are adaptable to an electronic data processing system at an ultimate savings in personnel, storage space, and time.

In addition a major workload impact will be experienced by the Franchise Tax Board as a result of proposed tax legislation. The recommended revenue program involves the adoption of a current payment plan for both individuals and corporations beginning in 1964-65. This will entail withholding taxes on salary and wage payments above specified minimum amounts, and estimated tax returns for individuals with more than nominal income from sources other than salaries and wages. Corporations with incomes above $25,000 a year will also file estimated tax returns and make payments on current income, beginning in 1965. This new program will require mass data processing techniques.

Two major elements in this new procedure will affect the work programs of the Board. First, there will be additional account records for individuals, required both for the quarterly payment of estimated taxes, and for refunds of over-payments. In addition, the system will require a record of employer withheld taxes and a related compliance program to assure collection of amounts withheld. Second, it will be possible within the course of two or three years to reduce two enforcement activities now carried on at a saving of approximately $1 million a year—the Federal comparison program and the information at source program. This will offset a substantial part of the initial expense of the withholding and estimated tax plans.

Table 17

Grand Totals	$40,685	$46,676	$52,430	$5,754	12.3
Bond act program	(165)	(620)	-	(—620)	—100.0

The Office of the State Controller has met tremendous workload increases in the disbursements of State funds by the utilization of electronic data processing equipment. In addition to producing savings substantially in excess of estimates, this program is providing the capability for handling payroll deductions for the Medical Care Act and integration of coverage of State employees under the Old Age and Survivors Disability Insurance Act.

Finance

Within the Department of Finance, a master plan for State development is being initiated. Through the use of State and Federal funds, studies are being conducted that will give meaning and direction to the State's continuing growth. A careful appraisal of physical, social, economic, and governmental factors is expected to indicate those areas where greater regional and governmental coordination is required to assure orderly development. Problems of land use, urbanization, use of natural resources, population growth, and capital improvements will all be reviewed to formulate a plan outlining objectives and proposals for sound future planning.

The same growth that demands a development plan generates the need to meet the housing requirements of low income groups. For this reason $2 million is recommended to inaugurate a program of interest guarantees to assist in filling a void in financing housing for low income groups. In a limited capacity this program will stimulate low income housing construction and thereby provide better housing at a lower purchase price or rental cost.

The Governor has recommended that California's tax structure be subjected to a detailed reappraisal starting in 1963-64. Provision is made for the inclusion of a Joint Tax Commission within the Budget Division of the Department. The commission will review the entire spectrum of State taxation to identify provisions which are no longer appropriate and to recommend modifications of the existing tax structure.

An additional major office building will be opened in Sacramento at the close of the budget year. This building, which was financed from funds borrowed from the Employees' Retirement System, will make available over 642,000 square feet of much needed space.

Secretary of State

The central records depository program under the Secretary of State has been expanded to include a facility to service the Los Angeles area. This program will be extended to the San Francisco area during the budget year as a part of the statewide paperwork management program intended to increase efficiency and realize savings in the costs of file equipment, space, and personnel for file maintenance.

During election years the Secretary of State budget includes the cost of publication and distribution of pamphlets containing the text of proposed amendments to the Constitution, propositions and other ballot measures together with arguments. Expenditures for this purpose during 1962-63 are estimated at $406,000; however, this amount includes the publications for both the 1962 primary election and the 1962 general election. The estimated expenditures are $114,000 higher than anticipated in the 1962-63 budget, due to the repetition of the State Building Bond measure and to the greater length of the pamphlets.

To prevent the steady deterioration of many historically valuable records held by the Secretary of State, it is planned to add a small records preservation laboratory which will permanently preserve a sampling of the more important documents. This laboratory will be staffed with only one position, and after the initial equipment investment the annual cost will be modest in relation to the value of the records preserved.

Business and Commerce—$30,841,000

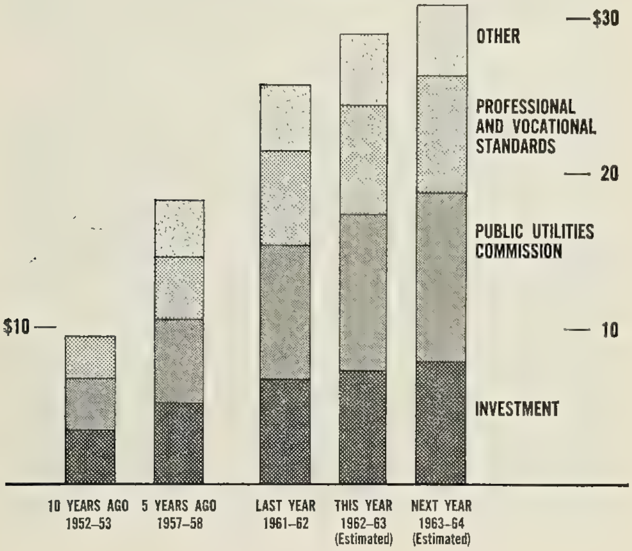
Grouped within this category are those agencies of State Government responsible for licensing and regulating the wide variety of business, commercial, and professional fields in California. In total, this group accounts for one percent of the entire budget, or $30.8 million. The agencies considered here are the Public Utilities Commission, the Department of Professional and Vocational Standards, the Department of Alcoholic Beverage Control and the Appeals Board, the Department of Investment, the Horse Racing Board, and the Office of Consumer Counsel.

In almost all instances the number of businesses and individuals regulated by these agencies has increased in proportion to the population growth in California. Although improved procedures are continually being explored to find ways to handle the increased workload with existing staff, the growing volume of work requires additional personnel in many of these agencies.

Chart 15

COMPARATIVE EXPENDITURES FOR BUSINESS AND COMMERCE

(In millions)



As a means of improving efficiency the Department of Alcoholic Beverage Control has budgeted an additional $32,000 in 1963-64 for converting its licensing activity to a machine operation and at the same time converting to a permanent form of license. Savings, after initial conversion costs are absorbed, will approximate $22,000 per year.

By an expansion of a joint examination program with the Federal Home Loan Bank Board, the Division of Savings and Loan will be able to meet the increasing workload related to the regulation of State licensed savings and loan associations without requiring any additional examiner personnel in 1963-64. Without this expanded joint examination program an additional 16 positions would be required to meet the projected workload increase.

With the growth in business and commerce in this State, there is a constant shifting of activity and new concepts within established industries. To meet these changes the regulatory agencies must constantly review their programs to adequately protect the public. In the Division of Real Estate, the increased number of out-of-State speculative real estate subdivisions being offered for sale in California has required careful inspections to guard the public from frauds and misrepresentations.

The Division of Corporations proposes an increase in the audit program of check seller and casher agencies to prevent frauds or defalcations in businesses which now handle over $700,000,000 each year of the public's money.

The Public Utilities Commission, as a result of active participation in natural gas rate proceedings before the Federal Power Commission has been successful in obtaining a decision in favor of the vast numbers of California consumers of out-of-State natural gas.

Of the four cases before the Federal Power Commission, involving an estimated $75 million, one case involving approximately $30 million has been decided in favor of California. This decision, which requires the El Paso Natural Gas Company to refund this amount to California consumers, has been upheld by the Fifth District Court of Appeals in New Orleans, Louisiana. The Public Utilities Commission will continue to seek favorable decisions upon the remaining $45 million on behalf of the many California consumers.

Production pricing continues to be the main problem in the determination of natural gas rates. As reliance upon this basic energy source increases, continued participation in proceedings involving Federal regulation will be required.

Within the budget of the San Francisco World Trade Center Authority, $10,000 is included for an

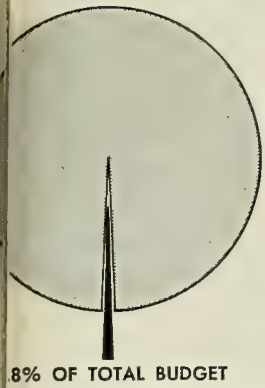
exhibit at the 1964 United States World Trade Fair to be held in San Francisco to emphasize the State's products and its place in the world economy.

The budget also provides $50,000 for a World Trade Development Program to provide necessary representation for the State's business interests and agricultural products in foreign markets.

In addition, $100,000 is recommended for encouragement of tourism. The realization of the full potential of this segment of our economy requires centralized efforts in addition to the present individual programs currently conducted by various communities and civic organizations.

Public Safety—$23,536,000



Included within this category are those agencies and activities responsible for the protection of the public and the preservation of law and order. These are the Office of Atomic Energy and Radiation Protection, Disaster Office, Fire Marshal, Department of Justice, Military Department, and Department of Veterans Affairs.*

The Department of Justice has appealed the Special Master's Report on the Colorado River litigation. The Supreme Court has the matter under consideration, and it is unknown when a decision will be reached. A limited staff has been retained contingent upon action by the Court to re-open all or part of the suit. For the acceleration of investigations of an increasing number of fraudulent acts affecting investors and consumers, it is also proposed to add eight positions to the staff of this department. This expansion is designed to augment rather than supplant current efforts in this field by the Department of Investment.

The Fire Marshal budget provides for 4 new positions to meet expanding workload in fire prevention and protection programs. Additional enforcement hours will be required to inspect the growing number of coin-operated dry cleaning establishments and places of public assembly within the Fire Marshal's jurisdiction. Additional personnel time will also be required to review plans for new State college buildings to insure compliance with fire and panic safety standards.

The increased tension of international affairs has emphasized the need for preparedness of State Government to meet its responsibilities to the public under emergency operating conditions. The Disaster Office is implementing a plan based upon the national program to assure the continuity in the operation of State departments for the maximum public safety in the event of war. The plan will ultimately provide a cadre for State representation in all areas of governmental service of practical necessity. The training of State employees to provide public shelter and care, and public education in self-help is designed to cope with natural and man-caused disasters.

Bond act program	(134)	(187)	–	(—187)	–

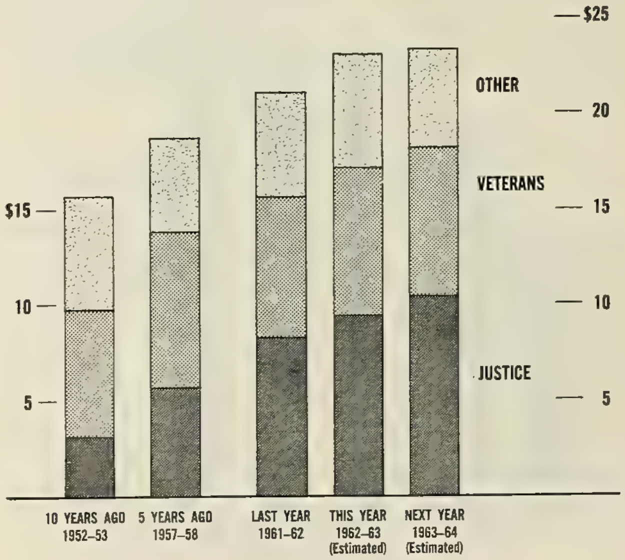
The Military Department includes the Army and Air National Guard, the National Guard Reserve, and the Cadet Corps. The primary purposes of these groups are to provide an effective military organization within the State to protect life and property during periods of emergency or disaster and to provide military units ready for federal mobilization missions in the event of a national emergency. The Cadet Corps makes possible a program of military education for high schools and junior colleges.

Major problems in the Department of Veterans Affairs are educational assistance to veterans, educational assistance to veterans' dependents and claims and rights services. In addition the Department operates the Veterans Homes with an anticipated average population of 1,825 during the coming year. Total expenditures for these purposes are proposed at $7.8 million. Workload increases primarily at the Veterans Home are nearly offset by a reduction of $100,000 in the educational assistance program as a result of declining caseload.

Chart 16

COMPARATIVE EXPENDITURES FOR PUBLIC SAFETY

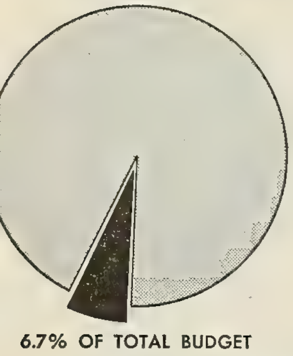
(In millions)



---

* The Highway Patrol is covered under Highway Transportation because of its more direct relationship to that category both functionally and financially.

Other Expenditures—$197,852,000



Within the wide range of State activities there are a number which cannot be fitted within any of the preceding functional categories. To complete the review of the budget intended by this analysis such activities have been combined here. These include the legislative and judicial branches of State Government and the Departments of Employment and Industrial Relations.

Of the $197.9 million budgeted for these purposes, however, the major portion is for assistance to local government in the form of State-collected revenues distributed to cities and counties. In total such expenditures amount to $157.0 million and consist of payments of $145.8 million from vehicle license fees, $10.6 million from alcoholic beverage permit receipts, and $550 thousand from highway property rentals.

The budget for the Department of Industrial Relations contains $67,000 to provide for prevention of discrimination in publicly financed housing. Legislation will be proposed amending the Discrimination of Public Assisted Housing Act of 1959 which will expand the Fair Employment Practices Commission into a Human Rights Commission with these broader enforcement responsibilities.

A pilot program, at a cost of $75,000, is also included to review all serious industrial injury cases to determine vocational rehabilitation needs. Estimates indicate that present services are being used by only one-third of the injured workers potentially capable of rehabilitation.

In the promotion of opportunities for apprentices, $20,000 is provided for increased work with minority groups to assure equal employment opportunity without regard to race, creed, color, or national origin.

The addition of 10 referee teams in the Division of Industrial Accidents at a cost of $383,000 is necessary because of population pressures. The continually increasing number of employers and employees in California requires an increased staff in the Division of Labor Law Enforcement to handle complaints, and in the Division of Industrial Safety to continue the protection of workers and the public. Additionally, the Division of Industrial Safety has new responsibilities in the inspection of industrial users of radioisotopes.

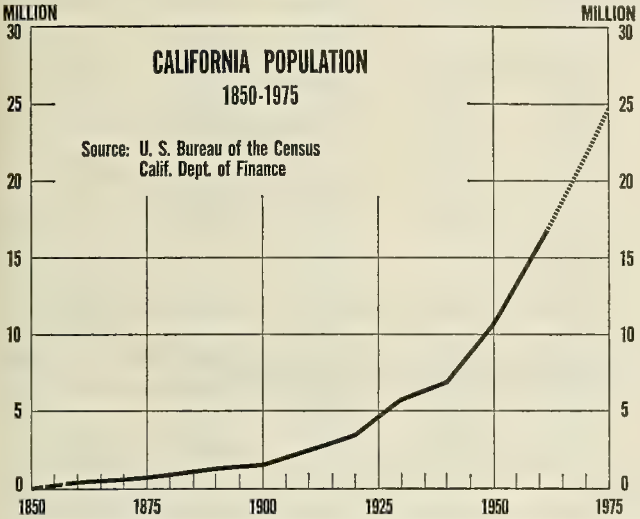
Although the State Department of Employment is supported almost entirely from Federal subventions and trust funds and such expenditures are not included in the budget totals, the size and significance of the activities of this agency justify review here. Program costs will increase from $630 million in 1962-63 to $665 million in 1963-64, including increases of $16 million in unemployment benefit payments, $14 million in disability insurance benefit payments, and $5 million in administrative costs. Most significant among the new program areas within this agency are the Manpower Development and Training Act which provides for retraining and placement of technologically displaced workers, and the Commission on Automation and Technological Developments whose purpose is to conduct a continuous appraisal of the impact of rapidly changing technology on California's work force. The program under the Manpower Development and Training Act will be financed from federal funds through the 1963-64 fiscal year; thereafter, the State would be required to provide matching funds. It is planned that the actual training will be administered by the Vocational Education Section of the Department of Education and local school districts.

ANALYSIS OF EXPENDITURE TRENDS

California's population has more than doubled each twenty years since 1860, with only one exception when the growth rate fell to 72 percent. From 380,000 people and twenty-fifth place among 40 states a hundred years ago, California now with nearly 17,500,000 residents ranks first among fifty.

Inevitably this growth has brought new responsibilities to State government and just as inevitably each responsibility has grown. Support of public schools began in 1854 with payments of $52,000. It reached the million dollar level in 1875 and will barely fall short of a billion next year. Orphan aid started in 1862 with an appropriation of $12,000. Expenditures for normal schools, forerunners of today's State college system, started with $2,955 just a century ago, while the first payments on behalf of the University were recorded in 1867—$1,590.

Chart 18



California's population has increased from 380,000 a hundred years ago to nearly 17,500,000 in 1963—from 25th place among 40 states in 1860 to first among 50 states this year.

Public health was recognized as a problem of State government in 1870. Supervision of banks began in 1878 and supervision of building and loan associations in 1894.* Other mileposts include the Veterans Home at the turn of the century; industrial welfare in the Hiram Johnson era of 50 years ago; and the beginning of State assistance to the aged in 1930. In fact, the reader of financial documents is impressed by how little of the current budget total represents genuinely new services of government.

Compounding the relentless growth in population and new responsibilties has been an equally inexorable trend to higher prices. According to consumer price records, costs today are nearly five times those of a century ago.

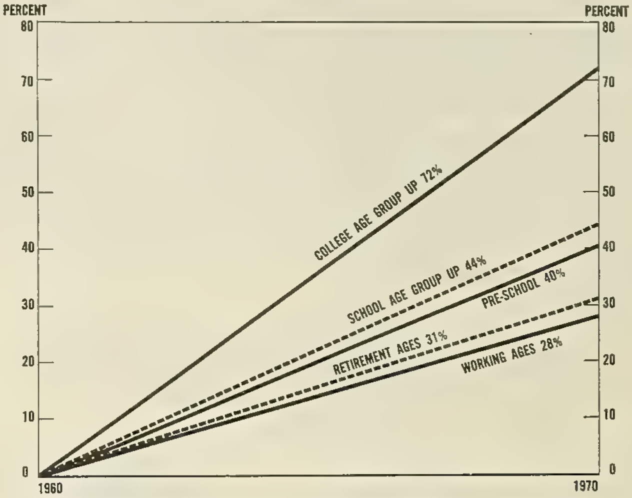
Expenditures in the current decade are certain to maintain this longterm rise and the rate of growth may well exceed that of the recent past. The war babies, whose births began as a wave in the early forties and reached tidal proportions in 1947, are now of college age, or are nearing that milestone. As the accompanying diagrams show, California's 5,800,000 growth in the 1960's will be reflected in all age groups, but the increase will be most concentrated in the college and school age groups and least in the working ages.

Compared with a 29.5 percent growth in the last decade, the college age group will increase 71.7 percent between 1960 and 1970. Against a doubling in the primary and secondary school ages in the 1950-60 period, these groups will increase 43.6 percent in the current decade.

Chart 19

GROWTH RATES, CALIFORNIA

1960-70



Here are the growth rates for the major segments of our population. As this chart shows, the slowest growth will occur in the working age groups—those 25 to 64.

The numerical increase in primary and secondary enrollments of the State's public schools in the current decade will be slightly greater than that of 1950-1960, only the rate of growth will be less. However, high schools will grow faster than elementary and enrollments at centers of higher education will increase faster still.

Table 21

POPULATION GROWTH BY MAJOR AGE GROUPS, 1950-70

	1960			1970

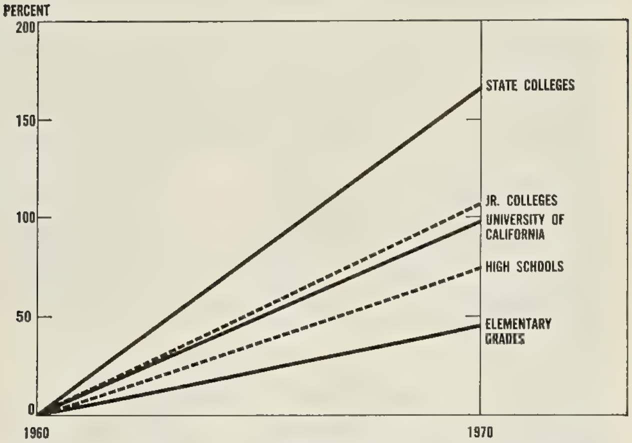
---

* Data on expenditures prior to 1910 are from *A Financial History of California* by William C. Fankhauser, University of California Press, 1913.

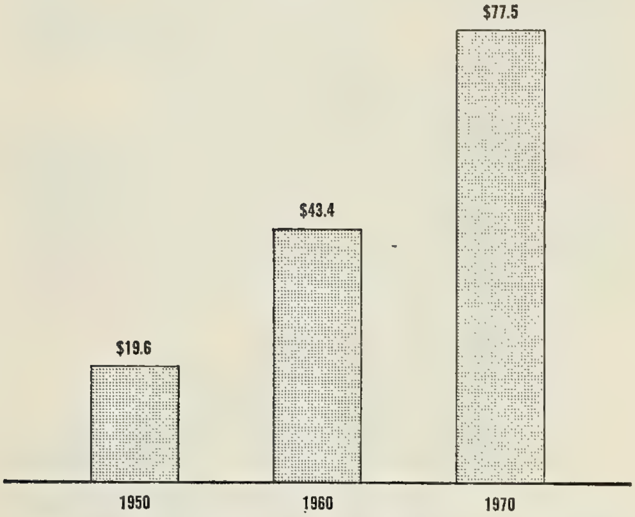
Chart 20
WORKLOAD INCREASES
PERCENTAGE GROWTH IN SCHOOL ENROLLMENTS
1960-70



These growth rates, coupled with the necessity of keeping a greater percentage of our high school and college age groups in school for more years results in unprecedented workload increases during this decade for institutions of higher education and continued rapid growth throughout the school system.

Compared with a rise of approximately 270,000 in the college age groups in the 1950 decade, there will be a growth of nearly 850,000 in the 1960's. This growth, coupled with the necessity of retaining a larger percentage of these youths in school and greater emphasis upon graduate work will be the dominant figure in the pattern of State expenditures for years to come.

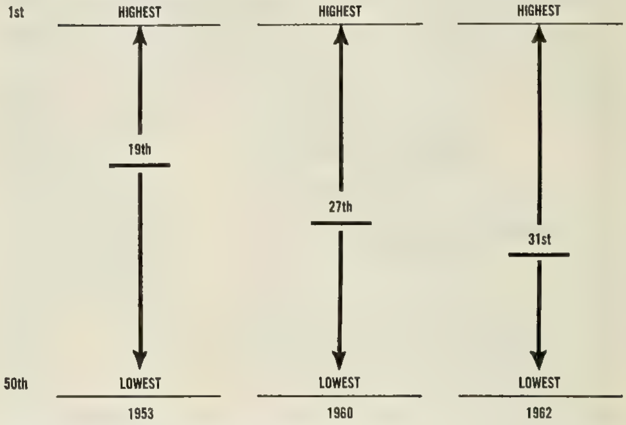
Chart 21
ACTUAL AND ESTIMATED PERSONAL INCOME OF CALIFORNIA RESIDENTS
(In billions)



Fortunately, California is in an enviable position to carry this increasing load. The ratio of taxes to personal income is average among the states. In fact, as measured by tax burden—the ratio of State tax collections to aggregate personal income—this State has dropped from 19th place in 1953 to 31st from the top in 1962.

The net long term debt of State government in relation to personal income is considerably below the national average. In 1961 California's net state debt mounted to $2.68 per $100 of total personal income. The highest State ratio of net debt to personal income was $15.22, the all-state average was $4.04 and the lowest 38 cents.

Chart 22
CALIFORNIA'S RANK IN STATE TAX BURDEN



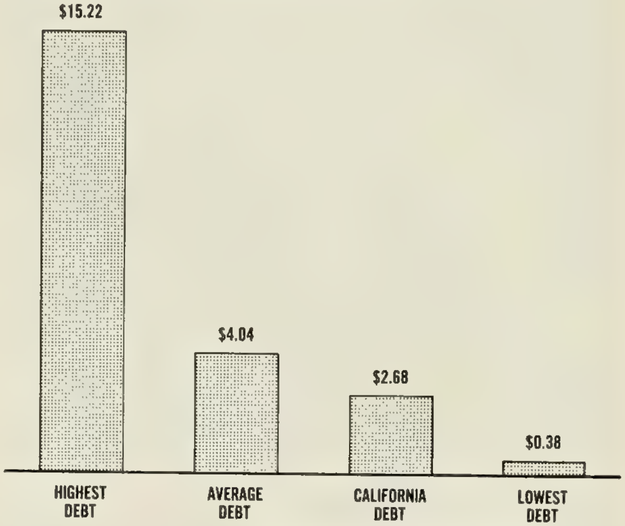
The State's net debt in 1961 amounted to $2.68 per $100 of income. The all-state average was $4.04.

California ranked 33d in state debt to personal income and 27th in state and local debt to personal income.

More important than these measures of the current position, however, is the fact that personal income of California residents will continue to grow in the years ahead; hence, the ability to assume the increasing cost of governmental services to an increasing population will continue to expand.

Personal income in 1950 amounted to only $19.6 billion. This year it will reach $52 billion and by 1970, at current price levels and average productivity gains, the total should reach $77.5 billion.

Chart 23
NET LONG-TERM DEBT OF STATES PER $100 OF PERSONAL INCOME
1961



Source: Governmental Finances in 1961
U.S. Census Bureau

Personal income will continue to increase. From an aggregate volume of $52 billion in prospect for the current calendar year, the income of California residents will grow to an estimated $77.5 billion by 1970 and $100 billion in 1975.

---

[1] There are $1,273,184 in the Sacramento State Building Interest and Sinking Fund in excess of $3,000,000 required to redeem all of the outstanding bonds.

[2] Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount required to pay the debt service costs.

[3] Repayments from the school districts are available to pay part of the debt service costs for the State school building bonds.

[4] Chapter 104, Statutes of 1958, First Extraordinary Session, authorizes bonds to be issued amounting to $20,000,000.

[5] The servicing of these bonds is primarily the responsibility and is paid from operating revenues of the San Francisco Harbor Improvement Fund, the Veterans Farm and Home Building Fund of 1943, the Small Craft Harbor Improvement Fund, and the California Water Resources Development Bond Fund.

[6] Callable on and after January 2, 1951 in the amount available in the Sinking Fund.

[7] Callable on and after January 2, 1955 in the amount available in the Sinking Fund.

[8] Callable by lot on and after January 1, 1941.

[9] Chapter 103, Statutes of 1958, First Extraordinary Session, authorizes the issuance of bonds totaling $50,000,000 for the San Francisco Harbor and $10,000,000 for the development of small craft harbors, all the small craft harbor bonds have been sold.

GENERAL ANALYSIS

Objectives

The Legislative Counsel Bureau provides legal assistance to the Legislature and state officials in drafting legislative measures, and gives legal advice, acts as counsel for committees of the Legislature, and represents the Legislature and legislators in litigation. It maintains indexes, tables and digests of all legislative measures, and edits, compiles, and indexes state legal publications for the State Printer.

Program and Performance

The Legislative Counsel acts as the legal adviser to the Legislature. Legal services furnished include opinions, bill drafting, counseling and attendance as counsel at meetings of committees of the Legislature. The attorney-client relationship is maintained, and all work is confidential.

In addition, the office maintains an Indexing Section, which indexes all bills introduced, maintains a statutory record, and acts as editor and compiler of all state-published codes and the official publication of the statutes. The work of this section during the sessions is published as Interim Subject List, Tables of Sections Affected, and Final Subject List.

The decrease in total expenditures reflects the change from the 120-day General Session to the 30-day Budget Session.

LAW REVISION COMMISSION

Office at Stanford University

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$89,335	$111,165	$106,831	—$4,334 (—3.9%)
Personnel man-years	5.9	6.8	6.8	–

GENERAL ANALYSIS

Objectives

This commission examines the law to discover defects and recommends needed changes, receives proposed changes in the law necessary to modify or eliminate obsolete or unconstitutional provisions and reports proposed studies to the Legislature.

Program and Performance

The commission consists of a Member of the Senate appointed by the Committee on Rules, a Member of the Assembly, appointed by the Speaker, and 7 additional members appointed by the Governor with the advice and consent of the Senate. The Legislative Counsel is an ex officio nonvoting member of the commission.

The workload of this commission is determined primarily by the number of studies assigned to it by the Legislature. Because studies are scheduled for completion just prior to the General Session of the Legislature, workload statistics are presented in terms of fiscal periods of 2 years.

	Actual 1959-61	Actual 1961-63	Estimate 1963-6
Studies	12	10	3

A study on sovereign immunity is one of the studies upo which a recommendation will be made to the 1963 Genera Session of the Legislature. An Emergency Fund allocation i the amount of $13,180 has been provided in the current year t finance the extraordinary printing costs arising from this stud

This budget provides for the addition of 1 position to reliev the legal staff of the following duties: 1. Supervision of th printing program, 2. Initial editing of research studies, 3. Distribution of publications, 4. Accounting and budget administration and, 5. Office management. This position has been temporarily authorized in the current year partially financed fro savings anticipated to be made by the position, and the positio is proposed for continuance in the budget year. A portion of th work to be done by the position was previously accomplished b contract, and it is from the area of contractual services tha savings are anticipated. Savings in contractual services in th budget year are offset by increased consultant services require to study 3 additional aspects of sovereign immunity.

COMMISSION ON UNIFORM STATE LAWS

Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
SUMMARY			
TOTAL EXPENDITURES			
Support *(General Fund)*	$4,047	$5,850	$5,850

GENERAL ANALYSIS

Objectives

In conjunction with other states the commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws.

Program and Performance

The commission is composed of 4 members appointed by the Governor, the Legislative Counsel as a member ex officio, and 2 legislators.

Provision is made for the attendance of the commissioners at meetings of the national conference, and California's contribution to the conference.

COMMISSION ON UNIFORM STATE LAWS—Continued

COMMISSION ON SENATE APPORTIONMENT

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
SUMMARY			
TOTAL EXPENDITURES			
Senate apportionment study *(General Fund)*	$19,548	–	–

GENERAL ANALYSIS

The Study Commission on Senate Apportionment was established by Chapter 607, Statutes of 1961.

The commission consisted of 2 members of the Senate, 2 members of the Assembly and 5 nonlegislative members appointed by the Governor.

The commission could do any and all things necessary or convenient to enable it to exercise the powers and perform the duties in studying and analyzing all facts relating to representation in the State Senate, including proposals designed to modify the present federal plan of apportionment by increasing the representation of extremely heavily populated counties without destroying or rendering ineffective the tested principles of equitable representation for all geographic areas of the State.

The commission completed a report to the Governor and the Legislature during the 1961-62 fiscal year.

The members of the commission served without compensation. Each member was allowed actual travel expenses incurred in the discharge of his duties.

The existence of the commission terminated on July 3, 1962.

CONTRIBUTION TO LEGISLATORS' RETIREMENT FUND

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES *(General Fund)*	$140,000	$160,000	$315,000	$155,000 (96.7%)

GENERAL ANALYSIS

The State's contribution to the Legislators' Retirement Fund represents that portion of benefits to be paid from the fund which is not provided by the accumulated contributions of the members receiving such benefits. By reason of Chapter 1897, Statutes of 1961, the minimum age of retirement has been reduced from age 63 to age 60 and retirement allowances for members of the Legislature having more than 15 years service have been increased. The funds previously provided for the 1962-63 fiscal year have been found to be inadequate because of an estimated increase in new retirements and additional deaths. This has created a deficiency of $50,000 in the current year which will be funded by an increase in the normal appropriation required for the budget year. The level of the appropriation for the budget year needs is increased over previous levels based on revised estimates of the cost of statutory allowances and benefits.

SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$905,012	$954,240	$1,008,918	$54,678 (5.7%)
Personnel man-years	64.8	66.1	69.7	3.6

GENERAL ANALYSIS

The Supreme Court reviews cases including appeals in cases of equity, cases at law involving title or possession of real estate, taxation and probate matters, and death penalty cases. It also has jurisdiction to review all cases decided by the several district courts of appeal. In addition, it has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition and certiorari. The court admits to the bar. It must also consider all executive clemency applications submitted to the Governor where the applicant has suffered two or more felony convictions.

It is anticipated that the justices recently appointed to the Supreme Court will be disqualified from participation in certain cases more frequently than those justices who have served in the court for a longer period of time.

This situation will require nearly a full-time justice pro tem to participate when a justice disqualifies himself. The pro tem justice will be assigned by the Judicial Council. One research attorney is added to work with the assigned justice. Justification for the proposed attorney is further strengthened by the steadily increasing workload of the court especially in petitions for hearings. This increase has occurred over the past several years.

Two clerical positions are added. One position will be assigned to work with the justice pro tem and to help with other office duties in San Francisco. One position will be assigned to the Los Angeles office, which is now without any clerical help, and will work with the court when it sits in Los Angeles, with justices who have work to do in Los Angeles, and with the deputy clerks in the regular duties of the court.

Greater personnel turnover requires increased on-the-job training and accrued vacation payments. This need has been recognized by the addition of 0.3 man-year of temporary help.

GENERAL ANALYSIS

Objectives

The Judicial Council is a constitutional agency under the chairmanship of the Chief Justice. Its duties include: (1) surveying the business of all courts with a view of simplifying and improving the administration of justice; (2) submitting suggestions to the courts in the interest of the uniform and expeditious conduct of business; (3) submitting recommendations to the Governor and the Legislature; and (4) adopting rules of procedure for the courts.

Program and Performance

The council is composed of 12 judges, 4 lawyers and 2 legislators. The chairman expedites and equalizes the conduct of judicial business by assigning judges to act where calendars are congested, judges are disqualified or vacancies exist. Judges are required to serve as assigned and to report to the chairman concerning the conduct of business in their courts.

To carry out its administrative functions, the Judicial Council has delegated broad authority to the Administrative Director of the Courts who, under the supervision of the chairman, directs the staff of the Administrative Office of the California Courts. This office performs legal, managerial and clerical staff functions in connection with the work of the council committees and institutes, in the preparation of specialized reports and studies, in the gathering and interpreting of statistical information relating to court business, and in the development of management methods and techniques applicable to court operations. This new function as the Administrative Office of the California Courts commenced after the start of the 1961-62 fiscal year, so the 1962-63 fiscal year will reflect the first full year's operation of the Administrative Office. In general, this budget continues the existing level of service.

GENERAL ANALYSIS

Objectives

The Commission has authority to hear charges against any judge of a California court and to recommend to the State Supreme Court the removal of a judge for wilful misconduct in office, wilful and persistent failure to perform his duties or habitual intemperance, or his retirement for permanent disability seriously interfering with the performance of his duties.

Program and Performance

The Commission on Judicial Qualifications consists of 9 members: 2 justices of district courts of appeal, 2 judges of superior courts, 1 judge of a municipal court, 2 members of the State Bar, and 2 citizens appointed by the Governor in accordance with Section 1b of Article VI of the Constitution.

Based on information received concerning California judges, the Commission may make such investigations as it deems necessary. It is essential that such investigations be completely objective and confidential, and be handled carefully to accord with commission policy. This budget recognizes the need for such investigations.

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Los Angeles, San Luis Obispo, Santa Barbara, and Ventura Counties.

The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 4 divisions of 3 justices each. The proposed budget continues the existing level of service.

Two positions are added for workload increases which have been created by the increased number of superior court judges in Los Angeles County and by the recently authorized appeals from inferior courts. The accounting position will handle the normal accounting, budgeting, and personnel documentation work.

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Imperial, Inyo, Orange, Riverside, San Bernardino and San Diego Counties.

The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 1 division of 3 justices and holds regular sessions every other month at San Diego. The intervening months the court holds sessions at San Bernardino for cases originating or appealed from Superior Courts in the San Bernardino section.

The proposed legal secretary position which has been administratively established in 1962-63 is necessary to handle the 34 percent increase in court filings experienced in the first half of 1962 as compared with the same period in 1961. Timely and adequate performance of court duties with this substantial workload increase cannot be maintained without this additional position.

GENERAL ANALYSIS

The Constitution of the State of California vests the supreme executive power for State Government in the office of Governor. In order to effectively administer the far-reaching programs and services which government provides the people, the Governor has broad powers to plan, organize, direct, and co-ordinate the activities of state agencies and to appoint various state officers and members of many boards and commissions.

Along with his executive responsibilities, the Governor presents to the Legislature the state budget outlining anticipated programs and the means by which they will be financed. He also reports to the Legislature on the condition of the State and makes various legislative proposals.

This budget provides $6,000 for a current year advisory study on the re-employment potential of persons displaced from their employment by the effects of automation. A legislative program will be proposed for the Department of Employment to continue this program in the budget year.

In addition the governor has a responsibility to make daily reports through news media to the people of California on his policies and executive actions. Traditionally, the bulk of the reports have been made with press releases. With the increasing importance of television news, there has been an increasing demand for film clips and radio tapes, the television equivalent to the press release. This budget provides $10,000 to permit the governor to meet these requests and more fully carry out his responsibility to keep the people of California informed about the activities of state government.

SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$32,738	$42,958	$47,705	$4,747 (11.1%)
Personnel man-years	2.5	3.3	3.3	–

GENERAL ANALYSIS

Objectives

This office is charged with broad responsibilities with respect to atomic energy development and radiation protection. In that field, the coordinator is required to: advise the Governor and the Legislature; co-ordinate the activities of all State agencies and the cities and counties with each other, with other states, and with the Federal Government; act as liaison to other states and the Federal Government, including the Atomic Energy Commission; and disseminate information to the public and to state agencies.

Program and Performance

Two advisory groups are prescribed by statute: an Advisory Council of 10 members, representing 10 areas of public interest in atomic energy matters, and a Departmental Co-ordinating Committee of 16 members, who are the heads of those state agencies principally involved in atomic energy affairs.

With the ratification, in the 1962 legislative session, of an agreement between the U.S. Atomic Energy Commission and California, the State assumed most of the regulatory authority previously exercised by the Atomic Energy Commission with respect to radioactive materials produced or used in reactors. The transfer became effective on September 1, 1962, and involved co-ordination of activities of the State Department of Public Health, the Division of Industrial Safety, and such city and county health departments as elect to participate in the program, as well as close liaison with the Atomic Energy Commission and other federal agencies. Integration of this phase with the rest of the total radiation control program, which became effective on July 1, 1962, has resulted in a comprehensive and effective system, based on uniform regulations throughout the State and avoiding overlapping jurisdiction. Development of details is expected to continue during the next year.

Public concern with the hazards of fallout from nuclear tests has led to development of a co-ordinated program involving the dairy industry, the State Department of Agriculture, and the State Department of Public Health, to prepare for prompt countermeasures in event of milk contamination. Support has been given to an improved public information program on the subject of fallout as it affects food, water, and air. Activities of this kind will be required while the testing continues.

The growing use of nuclear reactors for power generation creates problems of siting and establishment of operating criteria, as well as problems of public understanding. Participation of this office in formal hearings by the State Public Utilities Commission and the Atomic Energy Commission, as representative of state and local agencies, has assisted in clarifying and strengthening safety requirements. This is a continuing program.

In connection with these programs, an increase in general expense expenditures is proposed in the budget year to provide for the printing of information of general concern to the public.

GENERAL ANALYSIS

Objectives

This activity of the Governor's office, created by Chapter 467, Statutes of 1959, is responsible for advising the Governor on all matters affecting the interests of the people as consumers, and as to methods to increase the competence of the people as purchasers. The Consumer Counsel recommends to the Governor and to the Legislature the enactment of such legislation as is deemed necessary to protect and promote the interests of the people as consumers.

Program and Performance

The counsel makes such investigations and studies as are necessary to accomplish these functions, and renders reports to the people of the State. A 15-member advisory committee has been appointed by the Governor to assist the Consumer Counsel.

The workload of the Counsel's office has continued to grow as public awareness of the program has developed. More and more demands for assistance in various areas are received from interested persons in all segments of the economy. These demands require more intensive consideration and have become more extensive in character. To help meet the increased workload this budget proposes the addition of an administrative assistant position. The new position will handle the more routine administrative problems of the office and manage the office in the absence of the Consumer Counsel. The addition of this position will release time of existing technical staff to meet the workload demands outlined above.

GENERAL ANALYSIS

Objectives

This agency has the responsibility for planning and co-ordinating a state-wide program for emergency relief operations in the event of a natural or war-caused disaster, and for providing leadership and assistance to other state agencies and local governments in the development of an effective state of operational readiness. The objectives of this program are:

1. A fully prepared state government with all departments and agencies having emergency responsibilities prepared to carry out their assigned emergency jobs under disaster conditions;
2. Fully prepared county and city governments;
3. A co-ordinated and integrated federal-state-local emergency preparedness program;
4. A well-informed and prepared public.

Program and Performance

The Disaster Office is organized with a central administrative staff and a group of specialists who are responsible for the pre-emergency planning, training and organization for all types of disaster operations; providing technical guidance and assistance to other state agencies and local governments in their efforts to prepare themselves for emergency operations and specific services that would be required during an emergency.

A field organization has been established which includes 6 regions with staffs headed by administrators whose assignments are to implement the disaster program on a comprehensive basis.

Under the provisions of the California Disaster Act, the office is responsible for the following functions:

1. The development and maintenance of the master emergency plans and programs of the State;
2. recommendation for assignment by the Governor of appropriate emergency roles to the other agencies of state government and to the local governments;
3. providing assistance to agencies and local governments of the State in planning, programming, organizing, equipping, and training necessary emergency organizations;
4. co-ordination between federal, state and local agencies of emergency plans;
5. assisting all agencies and local governments in obtaining federal funds and equipment to implement approved emergency plans and programs;
6. co-ordination of planning activities pertaining to post attack management of resources and economic stabilization functions which might have to be performed by state agencies due to disruption of normal procedures on a national basis.

In addition to performing the before-mentioned functions on a day-to-day basis, the agency must be in constant readiness to perform its emergency role. During an emergency, it functions as the immediate staff and co-ordinating organization of the chief executive in carrying out the State's responsibilities under the California Disaster Act and applicable federal statutes.

California's emergency preparedness effort has been closely integrated with and is based on the national program. A plan has been implemented to insure the continuity of state government in the event of war. The plan prescribes that all state agencies provide for: (1) protection of personnel, vital public records, and essential equipment against the effects of enemy attack; (2) for carrying on of necessary regular functions of the agency under enemy attack; and (3) for providing training to supervisory and other personnel to prepare them for their emergency responsibilities. In addition to the Disaster Office's overall civil defense co-ordination activity other state agencies have been charged with the following specific duties:

Department of Agriculture—Food supply administration, biological and chemical defense. Two new positions are proposed for this activity in 1963-64.

California Highway Patrol—Traffic control and radiological monitoring.

Department of Conservation—Fire and rescue organization and radiological monitoring.

Department of Corrections—Emergency shelter and welfare for disaster victims and radiological monitoring.

Department of Education—Dissemination of survival information. Two new positions are proposed for this activity in 1963-64 including 1 position established in 1962-63.

Department of Employment—Manpower administration.

Department of Finance—Equipment and materials supply and records preservation.

State Fire Marshal—Assist fire and rescue operation and radiological monitoring.

Department of Fish and Game—Law enforcement and radiological monitoring.

Department of Industrial Relations, Division of Industrial Safety—Protection advice and radiological monitoring.

Department of Justice—Law enforcement, communications and radiological monitoring.

Department of Mental Hygiene—Medical care and emergency welfare to disaster victims. One new position is proposed for this activity in 1963-64.

Military Department—Law enforcement and intelligence. One new position was established in 1962-63 and is proposed for 1963-64.

Department of Motor Vehicles—Central registration service for displaced persons.

Department of Parks and Recreation—Emergency shelter and welfare for disaster victims.

Department of Public Health—Medical care, sanitation, and public health, chemical and biological defense, radiological monitoring. Fourteen proposed new positions are anticipated to expand this activity in 1963-64. This number includes 1 position established in 1962-63 and 7 positions that have been shifted from the Disaster Office.

Public Utilities Commission—Transportation resource.

Department of Public Works—Damage control intelligence and transportation resource.

Department of Social Welfare—Emergency relief. Four new positions are proposed for this activity in 1963-64.

Department of Veterans Affairs—Emergency shelter and welfare for disaster victims.

Department of Water Resources—Flood control, engineering and radiological monitoring.

Department of Youth Authority—Emergency shelter and welfare for disaster victims and radiological monitoring.

During the past year, the Federal Government has placed more emphasis on mass or community-type shelters. A program of surveying and marking suitable shelters has been partially completed and the second phase has been initiated—that of stocking these shelters that have been designated and placed under contract for public use. The State's part in this program is the assistance to local jurisdictions in contracting for these facilities and acting as intermediary in the stocking program.

The State also has the responsibility for administering the programs for federal assistance to local political jurisdictions for matching funds under Public Law 920 and Public Law 85-606. These programs provide for federal participation in the purchase of supplies and equipment and administrative expense of state and local civil defense organizations. Under the provi-

GENERAL ANALYSIS—Continued

Program and Performance—Continued

sions of these laws the State is responsible for processing the requests for funds and the actual payment of funds for civil defense purposes.

Additional equipment is being made available by the Federal Government for radiological monitoring. The distribution, maintenance and inspection of these instruments is a function of the Disaster Office. In addition to the distribution and maintenance function, a monitor training program is in effect to provide qualified operators for the additional instruments that are available. The agency also has contracts with 2 other state agencies to perform certain laboratory analyses relating to samples of water and marine life provided by these agencies and to report on data obtained as a result of such analyses.

The agency is also engaged in the improvement of the emergency communications systems. Many changes have been required as a result of Federal Communications Commission action. The requirements of the Department of Defense, Office of Civil Defense in regard to standby power facilities are being met as rapidly as possible.

The Fire and Rescue Division of the agency is also completing its communications network with a view to being operational in all but 3 counties of the State within the year. Personnel of this division participate in major fire operations which require the dispatch of individual personnel to the fire location to assist the using agency in co-ordinating fire operations.

A large quantity of emergency equipment has been strategically stored throughout California in the care of state and local agencies. This has to be inspected and maintained to insure its immediate availability for use in the event of a major disaster.

In keeping with the latest concepts of survival from attack; films, fact sheets, and an emergency information fact book are being prepared. Special briefings and television programs will also be used to emphasize shelter and other survival needs. A program designed to assist civil defense preparedness in schools, colleges, and universities is underway and will be expanded in the year ahead.

The current year budget reflects an organizational change to strengthen the ability of the headquarters office to deal with increased statewide program responsibilities in the shelter program, in federal assistance co-ordination, in development of the State responsibility in law enforcement, co-ordination, and in overall administration of the program of the office. Five positions were created for the above purpose funded by the abolishment of five presently authorized positions plus one man-year of temporary help. This change is continued in 1963-64. In addition seven positions in the Medical and Health function are to be transferred to the Department of Public Health in 1963-64. These positions will continue to perform civil defense responsibilities related to public health in that agency.

GENERAL ANALYSIS

This activity of the Governor's office will provide direction to the many related responsibilities of the State in relationship to the problems of urban areas. The scale of population and continued growth makes timely and necessary a bolder effort to direct and co-ordinate both fiscal and physical planning going forward in state and local government. Legislation will be proposed to outline the precise structure within which the activity will be accomplished. The creation of a co-ordinating council on urban policy is contemplated. Such a council should have broad representation from city and county groups, special districts, educational interests, regional citizens groups, and various state agencies. The council will be a meeting ground for representatives of great urban areas to review, co-ordinate, plan and initiate needed policy and action.

Related to the foregoing activity is recognition of a need to revise existing state laws controlling local boundary reforms. In addition there is a need to provide a framework for co-ordination of city and county planning efforts on a regional basis. The State has an interest in the development of minimum standards for the incorporation of new cities. It also has an interest in resolving conflicts between neighboring cities with respect to annexation of unincorporated territory. To deal with both matters it is proposed that a permanent state review or appeals board be established.

GENERAL ANALYSIS

Objectives

The Governor's Advisory Commission on Housing Problems was created by Chapter 1242, Statutes of 1961 and terminates June 30, 1963. The commission has as its purpose the study of housing needs in California, both public and private, to determine how best the State can use its powers to meet those needs.

Program and Performance

The commission consists of 11 members appointed by, and serving at the pleasure of the Governor. Two Members of the Assembly, appointed by the Speaker, and 2 Members of the Senate, appointed by the Senate Committee on Rules meet with and participate in the work of the commission.

The commission is completing a detailed study of housing needs as they affect all persons within the State, the homebuilding industry, and the various systems of home financing. Under the supervision of an executive director contracts have been awarded for services necessary to fulfill the commission's responsibilities. A final report of the commission's findings and recommendations is being submitted to the Governor and the 1963 General Session of the Legislature.

A proposed program in this general area of housing problems is discussed in the budget for the Local Allocations Division of the Department of Finance (page 320).

GENERAL ANALYSIS

The Lieutenant Governor is elected to hold office for the same term as the Governor. In the absence of the Governor from the State, the Lieutenant Governor must assume the duties of the chief executive. He presides over the State Senate during its sessions. He is a member of the Governor's Cabinet and the Governor's Council. He is a Regent of the University of California and member of the Board of Trustees of the State College System. He is a member of the State Lands Commission and Chairman of the Commission on Interstate Co-operation, member of the State Toll Bridge Authority, the California State Disaster Council, the Re-apportionment Commission, and the California Reciprocity Commission.

Offices are maintained in both Sacramento and Los Angeles for the convenience of the public.

GENERAL ANALYSIS

Objectives

The purpose of the State Employees' Retirement System is to effect economy and efficiency in the public service by providing a means whereby employees who become overaged or incapacitated may be replaced by more capable employees without prejudice or hardship. To this end the system provides retirement compensation and death benefits. The policy-fixing body for the retirement system is its 8 member Board of Administration. One of the board's most important functions is to invest money contributed by participants in the retirement system. The board also administers the Legislators' Retirement System.

Program and Performance

The Board of Administration consists of the Director of Finance, a member of the State Personnel Board, 3 members elected from the members of the system, a life insurance company official, a bank officer, and a representative of the University of California.

Members of the State Employees' Retirement System consist of state employees (including most University of California employees employed prior to October 1, 1961) and employees of more than 350 local governmental jurisdictions, participating on a contractual basis. During the 1961-62 fiscal year, 27 additional governmental jurisdictions came under contract with the system for retirement benefits. Coverage of these local governmental jurisdictions extends to employees of cities, counties, schools and miscellaneous districts. Members of the Legislators' Retirement System consist of Legislators and elective state officials who elect membership.

During the 1961-62 fiscal year the number of members of the State Employees' Retirement System also covered by Social Security benefits grew to 110,000, of which slightly more than 41,000 were State and University employees. The 1959 survivor benefits available within the framework of the State Employees' Retirement System now cover in excess of 70,000 members.

The addition of 6.5 positions has been provided for the current fiscal year. Two permanent positions are to be utilized in the electronic data processing function to provide additiona supervision and workload capacity for the processing of retir ment contributions. Workload indicators support the inclusio of these two positions. The workload includes increased retir ment because of extension of OASDI coverage to State employees; increased refunds because of immediate membership added documentation attributable to OASDI adjustments an record choice of school employees and other related factors Temporary help is increased 4.5 man-years to finance severa current year problems. These funds will provide $10,000 fo overtime and extra help in tabulating machine operations in th electronic data processing function, EDP. The critical period o conversion to tape operation and continuing need for thre months further has required more time than was anticipate In addition $4,800 will be provided to value the effects of "cost of living" benefits increase which is anticipated in 196 Three thousand dollars will be required to close out accountin records at the end of the year. The discrepancies uncovered i the conversion to EDP plus the interrelated adjustments required in the OASDI program have delayed normal workloa Finally $2,000 is provided to conduct a board member electio

The addition of 7 positions is proposed for the budget yea Two positions are for the continuation of the EDP position administratively added for workload purposes in the curren fiscal year. One secretary position is provided to serve both th executive officer and the assistant executive officer. One cler is provided in the central files function to process the increase workload generated by an increase in membership from 279,34 in 1961-62 when this staff was last augmented to 312,000 members anticipated in 1963-64. Three clerical positions are proposed for the benefits unit to process the increased gross retir ments anticipated in 1963-64.

Temporary help is reduced 10.3 man-years in the budget yea as a result of the conversion of punch card equipment to electronic data processing.

STATE EMPLOYEES' RETIREMENT SYSTEM—Continued

HEALTH BENEFITS

Objectives

The purpose of the health benefits program is to promote increased economy and efficiency in state service by enabling the State to attract and retain qualified employees, by providing health benefit plans similar to those commonly provided in private industry, and to recognize and protect the State's investment in each permanent employee by promoting and preserving good health among state employees.

Program and Performance

This program is conducted under the provisions of the Meyers-Geddes State Employees' Medical and Hospital Care Act. The program is administered by the Board of Administration of the State Employees' Retirement System whose composition, when acting in the administration of this act, is augmented by three members representing the public, appointed by the Governor.

The act provides that the board may contract with carriers for basic health benefit plans or approve basic health benefit plans offered by employee organizations under certain circumstances. The board is empowered to prescribe eligibility for participation in the plans and establish standards. The State will contribute up to a maximum of $5 per month for each e ployee toward the amount necessary to pay the cost of a bas health benefits plan approved under the act.

The State's contribution toward the cost of a basic healt benefits plan is charged to the fund from which the employee salary is derived.

The cost of administration of the program is also derive from the various state funds by which the employees are pai The amount assessed against the funds for such administrati expenses for each fiscal year is not to exceed 2 percent of th total of the contributions made by the employee or annuita and the State. An additional 3 percent of the same base is cu rently being assessed to establish the State Employees' Conti gency Reserve Fund. It is anticipated that in the 1963-64 fisc year, between 80,000 and 100,000 eligible employees and annu tants will be enrolled. One temporary help position is admini tratively added in the current year to provide additional cleric staffing for the open enrollment period scheduled for Januar and February 1963 and in sorting and filing the resulta volume of enrollment forms.

OLD AGE, SURVIVORS' AND DISABILITY INSURANCE

Objectives

The purpose of the Old Age, Survivors' and Disability Insurance program is to administer a program providing federal insurance to employees of the State and public employees under the Social Security Act.

Program and Performance

This program is conducted under the Federal Social Security Act and in accord with provisions of state law and a federal-state agreement. Financing of the program is derived from assessments of all political subdivisions participating in the program. Chapter 1834, Statutes of 1961, appropriated a sum of $10 per elector of social security to be paid by each elector to reimburse the retirement system for the administrative costs of social security integration during the 1961-62 and 1962-63 fiscal years. These costs are included within the budget detai of this division and administration division offset by OASDI participants reimbursements. Presently, there are 2,546 political subdivisions participating, with approximately 197,000 employees covered. It is anticipated in the 1963-64 fiscal year the number of participating political subdivisions will reach 2,625, covering 225,000 employees, including 60,000 state employees. One added position is requested in the 1963-64 fiscal year to provide sufficient clerical staff to cope with the increased workload as added employees are brought under social security coverage.

To provide for the participation of the State of California in funding the cost of the operation of this division, an appropriation of $20,000 from the General Fund has been proposed.

Support *(General Fund)*	$50,081	$51,905	$65,905	$14,000 (27%)

GENERAL ANALYSIS

Objectives

The commission formulates proposals for co-operation with other states and the Federal Government and participates in the support of the Council of State Governments.

The council is a research and service agency which assists the various interstate associations of state officials consisting of representatives from the several states.

Program and Performance

The commission consists of 7 Senators, 7 Assemblymen, and 5 officers of the State appointed by the Governor.

The principal item of expenditure by the commission is California's proportionate share of the cost of operation of the National Council of State Governments.

California's share for 1963-64 is $63,000 based on a formula of $1,000 for each 250,000 population. This represents a $14,000 increase since the last time the schedule of contributions from the various participating states was revised to reflect the fiscal needs of the council and the population shifts in the member states.

PERSONNEL BOARD

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$3,050,316	$3,296,519	$3,412,541	$116,022 (3.5%)
Personnel man-years	432.7	444.1	451	6.9

GENERAL ANALYSIS

Objectives

Under the State Civil Service Act, the Personnel Board is responsible for serving the personnel needs of state agencies as well as providing leadership for these agencies in improvement of personnel practices and procedures and in personnel management. The board which consists of 5 members appointed by the Governor for 10-year terms, prescribes, amends, and repeals rules as necessary to administer the State Civil Service Act, and sets the general policies for the Personnel Board. Technical personnel services are provided for political subdivisions on request.

Program and Performance

Under the general policies of the Personnel Board, the executive officer directs the various divisions in recruiting, examining, certifying, adopting suitable pay rates, co-operating in training, and establishing standards of health and safety. The functions of the divisions have become more complex during the past few years due in part to the continued growth in number of state employees and the condition of the labor market.

Continuing emphasis is being put on research to develop methods to improve and save on time and staff. New procedures have been and are being introduced due to this work. Training courses are being conducted for various state departments to develop personnel efficiency and promote better departmental training programs.

An additional 12.9 man-years are provided in the budget year for workload and are presented in detail in the various organizational units where the positions will be located.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 61-62 (Filled)	62-63 (Auth.)	63-64 (Auth.)	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

BOARD

Objectives

The board adopts general policies and rules, establishes job classes and pay ranges, and hears and decides appeals from disciplinary and other actions.

The board consists of 5 members appointed by the Governor to carry out the administration's policy and provide effective, economical administration of laws affecting this department.

Program and Performance

The board meets once every 2 weeks for 2 days. The meetings are scheduled at Sacramento, San Francisco, or Los Angeles.

The hearing officer presides at hearings on appeals concerning civil service status. The number of these hearings has become too numerous for the Personnel Board and its hearing officer, and assistance from the Office of Administrative Procedure is required.

ADMINISTRATION

Program and Performance

Within the general policies, this division plans, directs, coordinates, and controls the work of the agency.

The executive officer directs the line functions of the board through the assistant executive officer who directly supervises the chiefs of the Personnel Services Division, Recruitment and Field Services Division, Examining Standards Division, and Office Services Division. The chiefs of the staff divisions, Cooperative Personnel Services, the Administrative Service Officer, and Personnel Management Consultant report directly to the executive officer.

PERSONNEL SERVICES DIVISION

Objectives

This division maintains and revises the classification and pay plans for civil service employees. The division is charged with the responsibility for the preparation of examinations utilized in the state selection program for civil service employees. Upon specific request, the division also conducts classification and pay studies for certain exempt employees.

Program and Performance

Operations Section, consisting of 4 units, performs the day-to-day classification and examining work of the Personnel Board. These units also analyze and prepare recommendations concerning salary ranges for civil services classes and establish new or revised civil service classes.

Examining Services Section is responsible for scheduling activities such as the written examinations, oral interviews, and the conducting of investigations of applicants for state employment. The examination proctoring function has been transferred to Office Services Division effective in the current year. This transfer of 9.7 positions will provide more appropriate administrative control. A reimbursed contract with the California Disaster Office for merit system services requires 1.2 man-years of temporary help in 1962-63.

The activities of this division are influenced by such factors as growth in the number of state employees, changes in the scope and variety of state programs and functions, labor market conditions, the activity of employee and other organized groups, and changes or additions to laws and rules affecting the State Civil Service System.

As state service enlarges, various steps have been and are being taken to streamline and update technical processes to best utilize technical staff time. In recent years, clerical assistance has been added to relieve technicians of certain detail work; in the interest of efficient use of technical staff, changes in procedures have been implemented; continuing effort is being placed in reviewing operating procedures to develop the most effective and economical methods of filling the legal responsibilities vested in the board.

RECRUITMENT AND FIELD SERVICES DIVISION

Objectives

The primary functions of the division are to attract qualified applicants to compete for positions in the state service, to provide information concerning state employment, to administer continuous testing programs, and to provide assistance in personnel matters to state agencies. Branch offices are maintained in San Francisco and Los Angeles to provide assistance to state departments and the public.

Program and Performance

The public information counters at Sacramento, Los Angeles, and San Francisco give information concerning the state civil service to state employees and the public. The number of contacts at these information counters is increasing with the population growth and the increased economic activity in the State.

The division supervises the proctoring of state examinations in the metropolitan centers and administers continuous clerical testing. It also administers a number of other continuous examining programs which have been decentralized to the field offices for such classes as nurses, social workers, doctors, engineers, auditors and correctional counselors.

The division has programs designed to provide direct and continuing contact with employment sources such as schools, colleges and other training centers, placement services, and technical and professional associations to create favorable long-term interest in state employment as a career and to advertise and personally recruit at sources of labor supply. The workload has increased with the rise in the number of authorized positions in the state departments and with increased shortages of professional workers. The division continues to measure the effectiveness of various recruitment media and techniques. It is planned to offset, in part, workload increases and to improve recruiting by effecting closer co-operation with operating departments and their field offices throughout the State.

Due to the increased scope of the continuous testing program an assistant personnel analyst and an intermediate typist are requested in San Francisco. General workload increases require the addition of 2 intermediate typists in the Los Angeles office.

In the current year 2 positions are reclassified: the office supervisor I position to assistant personnel analyst and the editorial aid position to assistant information officer, and are continued in the budget year. The conversion of 1 man-year of temporary help in 1962-63 to a regular clerical position is proposed as a new position in the budget year.

STANDARDS AND SURVEYS DIVISION

Objectives

This division develops classification and pay policy, standards, and techniques. It conducts general wage, salary, and employee benefits surveys to facilitate keeping state salaries in reasonable relation to those paid in other governmental jurisdictions and private employment. It conducts agency classification and personnel management surveys. It develops physical standards for jobs, directs the program of pre-employment physical examinations, and advises agencies on medical phases of personnel programs. It reviews procedures of various operating units of the board to eliminate unnecessary activities and develop improved procedures.

Program and Performance

In conjunction with the agency classification survey progra emphasis is being placed on the development and improvemen of classification standards and encouraging the participation o line supervisors in the classification process. In an effort t meet the future needs of state service, the division is engaged i long-range studies of various plans to cope with the problem inherent in the increasing size and complexity of state government. These include the experimental development of allocatio controls by postaudit reviews to replace preaudit of individua appointment documents. One-half junior-intermediate typist clerk position has been reclassified to temporary help in th current year to adequately provide for workload peaks. This adjustment is continued in the budget year.

EXAMINING STANDARDS DIVISION

Objectives

The function of this division is to insure the adequacy of the State's personnel selection program. One of its units develops policies and standards and prepares operating manuals for the guidance of the staff, evaluates the effectiveness of the selection program, develops and co-ordinates improved methods of selection such as continuous testing, trains the staff in examining techniques, develops new examining techniques, and produces form or standardized tests for long-term use. Another unit maintains files of test materials and assists the technical staff by preparing both new and old material for use.

Program and Performance

Emphasis has been given to the development of (1) methods that attract better employees to state service, that result in filling vacancies more quickly, or effect economies in operating procedures and (2) techniques that increase the effectiveness of the selection process, with particular emphasis on the development of more effective means of evaluating management potential and skill. A common type of assignment is the correction of a situation in which the operating agencies are not satisfied with the quality or numbers of persons available for appointment in a class. The solution to the problem may include changes in the classification structure as well as improvement of the recruiting and testing methods, and sometimes delegation of the testing program to the agencies.

A major function is the construction of standardized written tests. High quality tests of known difficulty are a necessity in continuous testing programs. Their increased validity has favorably affected the quality of employees hired. Their repeated use over a period of several years makes their cost comparable to custom made tests and frequently effects savings in cost.

Temporary help is increased by 0.7 man-years of clerical effort for workload purposes.

OFFICE SERVICES DIVISION

Program and Performance

This division processes applications, arranges, administers, scores, and processes examinations and establishes and maintains employment lists; maintains statistical data, and the state employee roster; prepares reports, conducts certification activities; and performs related office services and clerical operations. The examination proctoring function, 9.7 positions, has been transferred from Personnel Services Division to provide for more appropriate administrative control.

Processing and operating procedures in this central service unit are constantly being reviewed for simplification and improvement. Increased use of electronic and mechanical aids such as EDP equipment, punched cards, mechanized files, photographic reproduction, offset duplication, and microfilming has speeded production and increased capacity.

Workload increases require 7.2 man-years, 1 man-year each in application review, data processing, and duplicating; 4.2 man-years of temporary help in test scoring, files, data processing, clerical services, certification, and application review. A reimbursed contract with the California Disaster Office for merit system services requires 1 man-year of temporary help in 1962-63.

TRAINING DIVISION

Objectives

The Training Division provides leadership to, plans for, and co-operates with state agencies and departments in the development and conduct of employee training, staff improvement, and safety programs. Training functions are designed to improve the efficiency and quality of services rendered by state employees; safety functions to foster safety consciousness and reduce accident costs in state service.

Program and Performance

The division encourages and supports continuous training activities in units of State Government, resulting in increased organizational efficiency, more effective communications, and improved employee productivity and morale. Emphasis has been placed upon the attainment of improved management effectiveness through consultation and direct training to organizational administrators and their staff. The division encourages and assists training for the improvement of work methods and for increased professional or technical skills and knowledge. To further these efforts, the division maintains a library of reading material and audio-visual aids, undertakes pilot studies and action-research type activities and introduces modern techniques and concepts into employee appraisal and development. To improve administrative performance of state managers in their present and future assignments, the division administers a state interagency management development program and provides leadership for a statewide supervisory training program.

The State Safety Coordinator promotes and encourages the communication of safety information and training efforts to increase employee safety and to reduce occupational injuries. The division provides leadership and technical assistance for an extensive driver safety program to reduce the number and costs of driver accidents.

CO-OPERATIVE PERSONNEL SERVICES

Objectives

This division provides personnel services to local agencies on their request and on a contract basis by which all costs are reimbursed.

Program and Performance

An increasing trend in local government to employ staff through merit selection methods has led to this program serving more than 167 agencies and giving almost 1,251 examinations for such agencies during 1961-62. These agencies find this service more effective and economical than providing their own testing service. Methods are being reviewed constantly to lower these costs without sacrifice of quality.

An increasing number of local agencies have turned to the State for experienced help in installing and maintaining modern job classification and standardization plans. During 1961-62, 64 agencies including over 8,258 jobs were studied by this division.

GENERAL ANALYSIS

Objectives

Examines and files articles of incorporation, amendments thereto, elections to dissolve and final dissolutions; statements of trust receipt financing; certificates of recordation relating to mortgaged personal property; registers trademarks; exercises general supervision of elections; maintains the Archives of the State and the Central Record Depository; attests the official acts of the Governor and Legislature.

Program and Performance

Before a corporation can operate in California, its articles must first be reviewed, and if approved, filed with the Secretary of State. Likewise, all amendments to corporate articles, as well as dissolutions, agreements of merger, and consolidations must be filed with this office. In the 1961-62 fiscal year there were 35,409 corporate documents reviewed. This represents a decrease of 1,772 or 4.8 percent when compared to the 1960-61 fiscal year. Of this total 30,163 were filed of which 18,764 represented articles of new corporations in California. This reflects a slight increase of 468 in the number of new corporations. Continued slight increases are predicted for the current and budget years.

In the budget year the Secretary of State will collect cash receipts of approximately $3,483,010. This includes franchise tax prepayments of about $1,627,200.

The publishing and distribution of election pamphlets normally occurs in alternating fiscal years. In the past year there were 6 measures which appeared in the June 1962 primary election ballot thereby necessitating the printing of an election pamphlet at a cost of $156,303, payment being made from Item 37 of the Budget Act of 1962. In the current year, election pamphlets covering 25 measures for the November 1962 general election are being provided at an estimated cost of $250,000. As a result of this pattern, there is a large fluctuation in the budget for this office from year to year. There is no election pamphlet expense anticipated for the budget year.

The assistant corporation documents examiner position has been abolished after becoming vacant as it is anticipated the projected workload can be handled by the presently authorized legal staff.

In the current year 1 position was administratively authorized and is proposed for continuation for workload in connection with improved cashiering procedures and 0.1 man-year of temporary help was authorized for the official election canvass. Provision for modified service in the records management program is discussed under Central Records Depository.

CENTRAL RECORD DEPOSITORY

Objectives

This unit receives and has custody of all records required or permitted by law to be deposited in the office of the Secretary of State.

Program and Performance

The Central Record Depository was established in 1947. The use of modern record center systems, procedures, techniques and equipment enables the Central Record Depository to efficiently service records for the depositing agencies and the general public. Through the record center, depositing agencies are able to effect economies due to reduced purchases of filing equipment and the need for less space for records retention.

As of June 30, 1962, total holdings amounted to 92,419 cubic feet of records. Of this amount 85,203 cubic feet were in the Sacramento Record Center and 7,216 cubic feet in the Los Angeles Record Center Annex which was established in June 1962. The 1963-64 Budget provides for the establishment of a San Francisco Record Center Annex at an estimated first year cost of $30,218. The holdings will continue to increase in line with itensified paperwork management programs. In addition 1 man-year of temporary help is added to assist the historian with the backlog of material to be screened, classified and arranged, catalogued, labeled, and filed.

A preservation program for historically valuable documents by lamination process is being planned for the budget year. First year cost of the program will be $25,509. Of this amount, $4,344 is for one proposed new position, $6,690 is for space alterations, services and supplies while $14,475 is for the required purchase of lamination laboratory equipment. At the present time, a large number of valuable historical records in the State Archives are in poor condition. Deterioration continues steadily. Preservation treatment is a necessity if these valuable records are to be salvaged.

GENERAL ANALYSIS

Objectives

The department is responsible for the protection of plants and animals from infectious disease, pest animals, weeds and injurious insects and the prevention of the introduction and spread of crop and livestock pests and diseases. The department is charged with the administration of programs designed to assist in the marketing of agricultural products, and the protection of the public by assuring quality controls and preventing fraud and deception.

Program and Performance

The reorganization of the department, commenced in 1961-62 as a result of a recommendation of the Organization and Cost Control Division of the Department of Finance, has now been largely completed. The change in organization results in units now being aligned on a functional basis. The major emphasis is now placed upon the division as the major line administrative and operating unit rather than the bureau as in the past. As a result, the department now operates through 8 divisions, field offices, crews and advisers and consultants operating throughout the State. The entire reorganization has been accomplished within the framework of existing personnel and without additional cost. A total of 8.5 authorized positions were eliminated in 1961-62 as a result of the reorganization.

A major portion of the departmental responsibility is accomplished in co-operation with the 54 offices of county agricultural commissioners. The department gives technical assistance, coordinates various programs and surveys, and assists in training field personnel.

In addition to providing for increased workload needs in the various divisions, this budget proposes work in 2 new program areas involving the Federal Trade Expansion Act of 1962 and transportation rate problems. Increased program emphasis in pesticide residue testing through expansion in the Division of Chemistry is also provided.

Also recognition is given to the civil defense role assigned to this department through the addition of 1 professional position and related clerk to co-ordinate and plan this assigned responsibility.

A total of $56,964 for 6 positions and related expenses is provided in the Division of Agricultural Economics to prepare factual data in support of California's agricultural economy. This data will be submitted to the Federal Government for consideration in tariff decisions evolving from the Trade Expansion Act. Transportation rate problems effecting California's competitive position in agriculture nationally will also be an area for study involving approximately 2 man-years of the additional positions.

A total of $70,158 for 7 chemists and related expenses is provided to increase the testing capacity for pesticide residue in the Division of Chemistry. These positions will provide the surveillance required to protect the public from contaminated agricultural products.

A summary of the new positions and amounts proposed are shown below:

Organization	*Positions*	*Salary Cost*
Division of Administration	14	$73,314
Division of Agricultural Economics	7	48,120
Division of Animal Industry	9	51,400
Division of Chemistry	7.2	55,547
Division of Compliance	9	58,488
Division of Plant Industry	8.7	47,421
Division of Standardization and Inspection	3	20,940
Totals	57.9	$355,230

Each position and its purpose is described in the program and performance statements in the appropriate division.

DIVISION OF ADMINISTRATION

Objectives

The director and his assistants are responsible for departmental policy and the direction of the efforts of the operating divisions to insure efficient administration of the agricultural laws.

Program and Performance

The Division of Administration provides agricultural and related economic information for the Governor and the Legislature. In addition, it maintains co-operative relations with federal, state and county agencies.

Personnel office activities include: recruiting, classification, training, pay, and personnel records. In addition, the personnel office is responsible for examining programs in a number of county classifications, including agricultural commissioners, inspection and weights and measures officials. The fiscal office administers all fiscal matters of the department relating to budget, accounts, collections, payrolls and disbursements.

The central services section provides central duplicating, stores, mail messenger, filing and data processing services to the operating units of the department.

A total of 14 new positions are proposed in the budget year for the following purposes:

One associate administrative analyst is necessary in implementing organization changes, improving systems and procedures and other management analysis.

An assistant personnel analyst and a junior-intermediate typist are requested in the personnel office to handle increased workload. One property clerk II is required in the fiscal office due to increased workload in property management and control, as recommended by management survey 1251 conducted by the Division of Organization and Cost Control of the Department of

---

[a] Provided by Chapter 1391, Statutes of 1961, to pay costs of elections conducted by the Table Grape Commission on a proposed marketing order which was rejected and for which reimbursements are pending.

[b] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF AGRICULTURE—Continued

Program and Performance—Continued

Finance. The equivalent of 5.5 man-years temporary key punch operator together with 1 key punch supervisor and 1 tabulating machine operator are necessary in order that the data processing unit may continue conversion to machine operation of those manual operations that can readily be converted. A civil defense planning officer and 1 stenographer are necessary to coordinate and plan the department's assigned responsibility i the civil defense field.

An addition of 0.8 man-year temporary help in the curren year and 0.5 man-year in the budget year is made to reflec past year experience in dealing with peak workload periods i the personnel office.

DIVISION OF AGRICULTURAL ECONOMICS

Objectives

This division is responsible for the administration of services designed to assist producers and handlers in the marketing of agricultural products.

Program and Performance

The Market News Service reports current price and movement information covering agricultural commodities in intrastate, interstate, and foreign markets. Information gathered in California is assembled and released over leased-wire systems to other states and markets, and similar information gathered in federal offices pertaining to California crops is received on these leased-wires and in turn disseminated to California points.

The Crop Reporting Service develops and releases forecasts of production of our major agricultural commodities and prepares and publishes annual estimates of the acreage, production, and value of most crops in the State.

DEPARTMENT OF AGRICULTURE—Continued

DIVISION OF AGRICULTURAL ECONOMICS—Continued

Program and Performance—Continued

The division assists grower and handler groups in formulating marketing orders and programs designed to control surpluses; establish acceptable standards of quality, size, condition, or pack; carry on promotional activities and research; and to control or prevent unfair trade practices in the handling of farm products. This function includes assisting in the preparation of an acceptable form of marketing order, conducting public hearings upon such proposed orders and programs, and supervising the administration of the programs after they become effective. Surveys are also made of marketing and distribution problems for various agricultural groups of the State to develop new and larger markets. Additional duties include the development of economic material for use by the Director and the staff of the department as well as by the industry. This includes material in the fields of cooperative bargaining and marketing associations, transportation, land taxation, urban sprawl, import and export of agricultural commodities, tariffs, and agricultural policy.

Seven proposed new positions are included in the budget for the following purposes:

To provide service to commodity groups affected by the operations of the 1962 Federal Trade Expansion Act, and the European Economic Community, 4 positions are provided in Marketing. In addition 2 positions are provided for investigation of transportation factors important to maintaining California agriculture's competitive position nationally. Statistical representations concerning the impact on California of proposed tariff adjustments will be made to the pertinent Federal agencies.

In order to meet increased marketing workload caused by the greater use of rapid transportation and other factors, one junior marketing specialist position in Market News Service that is authorized until June 30, 1963 is proposed on a permanent basis in 1963-64.

In the current and budget years 0.5 man-year has been reduced for an Analytical Statistician position share paid by the Federal Government, and previously shown incorrectly as a State position in Agriculture statistics. A reduction of 1.2 man-years in temporary help is made to properly show the recovery of man-years reimbursable from other functions, and 1 man-year is reduced as a result of past year experience in relation to current year needs.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 61-62 (Filled)	62-63 (Auth.)	63-64 (Auth.)	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

DIVISION OF ANIMAL INDUSTRY

Objectives

This division is responsible for the protection of the livestock and poultry resources of the State from diseases. An objective of major importance is to enforce laws and regulations designed to assure the consuming public of an abundant supply of wholesome, high quality, nonadulterated, properly labeled foods of animal origin.

Program and Performance

Interstate Quarantine—Prevention of the introduction of diseases of livestock and poultry from other states is accomplished by the enforcement of laws and rules and regulations relating to quarantines or importation restrictions imposed on other states. Special permits are issued, under certain circumstances, prescribing the conditions under which livestock may enter the State.

Animal Health—The control and eradication of diseases of livestock and poultry are the responsibility of the Bureau of Animal Health. This is accomplished by veterinarians operating out of 10 regional offices. Co-operative programs are conducted with the Federal Government and include the eradication of tuberculosis and brucellosis in cattle and swine, supervision of garbage feeding ranches, and supervision of scabies and scrapie eradication. Veterinarians conduct tests for the diseases referred to, vaccinate calves for brucellosis, and appraise and identify reacting animals. They also diagnose outbreaks of other transmissible diseases and take appropriate measures to suppress them. Provision is made for the continuation of the brucellosis eradication program during the budget year. Last year a target date of January 1, 1962, was set for the declaration of the entire State as a modified certified brucellosis area; however, this was not accomplished until October 17, 1962, due to lack of adequate federal co-operative funds resulting in a slowing down of the program. The first test of all cattle in the State was completed in August 1962, and the program will now go into a phase of maintenance and "recertification" of counties on a three-year basis followed by complete eradication and a final designation of counties accomplishing this as certified brucellosis-free areas.

During the current and budget years some limited testing for brucellosis of swine will be carried on on a pilot basis in co-operation with the Federal Government. This will be for the purpose of evaluating a swine brucellosis eradication program on an area basis and, if successful, will enable the co-operating state and federal agencies to designate the counties as swine validated brucellosis-free areas. Eradication of the disease in swine, as well as in cattle, is necessary to eventually accomplish certification of the State as being brucellosis free.

Dairy Service—A further responsibility is the enforcement of provisions of the Agricultural Code relating to standards of quality and wholesomeness of dairy products and the prevention of fraud and deception in the sale of these items. Sanitary inspection of dairy products plants and dairy farms is conducted. Supervision is maintained over local state approved inspection agencies, licensed testers, weighers, pasteurizers and quality determination technicians. Inspections and checks are made of milk products, milk products plants, recording thermometers, imitation dairy products, water supplies, pasteurizers and many other places and activities involved in the production and sale of milk and milk products. Prevention of the adulteration of dairy products with pesticides found in the feeds used for dairy animals will continue to be a very important activity of the Dairy Service. An increase in frozen food manufactured products has increased the number of plants under inspection and will require one additional dairy inspector in 1963-64. On junior-intermediate stenographer is requested partially for increased workload, and partially as a change in method of providing clerical assistance to 8 field personnel stationed in Los Angeles.

Meat Inspection—This unit enforces the provisions of the Agricultural Code providing for federal, state, or state-approved municipal inspection of all meats from animals slaughtered and meat products produced or sold in counties of over 28,000 population. A program of slaughterhouse sanitation is conducted. Supervision is extended over the preparation and composition of meat products to insure wholesomeness, and prevent deception and fraud in labeling, and adulteration with pesticides and other harmful chemicals. This division licenses importers and handlers of foreign cold storage meats and inspects such products. The volume of such importations is expected to continue at a high level. The number of establishments under inspection remains about the same, but there is considerable increase in animals slaughtered and pounds of meat food products processed requiring some additional inspection. Two senior meat inspectors temporarily approved for increased workload in the current year are proposed for continuation in the budget year on a permanent basis.

Poultry Inspection—This unit enforces provisions of the Agricultural Code requiring sanitary handling and inspection for wholesomeness of all poultry meat sold in the State. Poultry processing plants are licensed and required to meet uniform standards for building construction, equipment, and sanitation. Poultry meat inspectors are trained and licensed. Inspections are made for sanitation, and to assure that diseased or otherwise unwholesome poultry or rabbit meat is not passed for human consumption. Appropriate approval and supervision of labeling is effected to prevent fraud and deception. This bureau continues to find some difficulty in enforcement problems, and they have resorted to several administrative hearings for the purpose of suspending or revoking plant licenses. These are expected to continue in the current and budget years.

Agricultural Veterinary Laboratory Services—As the result of a departmental reorganizational program, the diagnostic laboratory services, formerly a function of the Bureau of Animal Health, have been set up in a separate staff agency designated as "Agricultural Veterinary Laboratory Services." There are six laboratories located throughout the State that furnish diagnostic services for the Bureau of Animal Health, certain poultry disease projects, and render general services to other bureaus in the division as indicated. Advances in recent years in the fields of virology and tissue culture methods have necessitated the improvement of the division's laboratories to enable adequate diagnosis of virus diseases. The workload of the laboratories continues to increase. The Fresno laboratory is specializing in the diagnosis of virus diseases. This activity is largely responsible for a request in the budget year for 2 additional laboratory assistants and 1 intermediate typist-clerk at the Fresno laboratory. Because of a continual increase in the workload, one additional Veterinarian I is requested for the budget year at the Turlock laboratory and one at the Lancaster laboratory. Provision of these positions is partially offset by a reduction of 3 man-years of temporary help. An additional reduction of 2 man-years temporary help is made possible by the request in the budget year for labor saving equipment in the various laboratories.

DIVISION OF CHEMISTRY

Objectives

This division provides analytical and other technical services to various other agencies in the department which administer laws relating to the quality or composition of agricultural products and of the chemicals used in agriculture.

Program and Performance

Samples of pesticides, fertilizing materials, commercial feeding stuffs and livestock remedies are examined and analyzed for Field Crops and Agricultural Chemicals in the Division of Standardization and Inspection to compare the composition of these materials with that guaranteed.

Samples of milk and other dairy products are examined bacteriologically and chemically analyzed for the Bureau of Dairy Service to see if these foods comply with legal requirements.

Samples of meat, meat products, and materials used in processing these materials are analyzed for Meat Inspection and Poultry Inspection in the Division of Animal Industry to see if these foods comply with legal requirements.

Samples of fruits, vegetables, hay, and other produce are analyzed for pesticide residues for Field Crops and Agricultural Chemicals to see if these foods and feeds contain deleterious levels of pesticide chemicals. To expedite prompt handling of these samples, field laboratories are maintained in Fresno, Los Angeles, and San Francisco, as well as in Sacramento.

Samples of miscellaneous materials are analyzed for Entomology, Animal Health, Plant Pathology, and other offices of the Department of Agriculture; for the Department of Finance, Purchasing Division; Department of Public Health; Department of Fish and Game; University of California; the County Agricultural Commissioners; police; and other co-operating agencies.

Technical data on toxicity and pharmacology of agricultural chemicals, and similar information on other agricultural matters, are collected and compiled for the guidance of the Department of Agriculture and various other State agencies.

The 1963-64 Budget includes an increase of 7 chemist positions to permit analysis of more samples of fruits, vegetables, hay, other foods and feeds, and particularly of milk for pesticide residues. The additional testing capacity will provide a minimum level of surveillance consistent with the necessary health protection to the consumer.

In the current year and budget years 0.2 man-year temporary help is included for peak workload situations.

DIVISION OF COMPLIANCE

Objectives

Responsibilities of the Division of Compliance are threefold: protection of the livestock industry from losses through theft, straying, or unintentional movement; protection of producers in the handling of agricultural products; protection of consumers in the regulation of weight and measure of purchased commodities; and the regulation, inspection and control of automotive fuels, as well as antifreeze, brake and automatic transmission fluids.

Program and Performance

The division protects producers of livestock from loss by theft or straying of animals through its Livestock Identification function. Brands are recorded on a statewide basis; cattle are inspected for ownership prior to shipment, sale or slaughter; hides are inspected; and salesyards, horse and cattle slaughterers, and horse transporters are licensed. The bureau also serves as a collection agency for California Beef Council promotion fees.

Provisions of the Produce Dealers Act and Processors Law are administered through the Market Enforcement function to protect producers from improper reporting, accounting, and payment for crops marketed either in fresh outlets or in processing outlets. Processors and dealers are bonded for proper performance and financial responsibility. The enforcement of marketing orders and programs; the auditing of industry records for these programs as well as for produce dealers and processors laws; and the auditing for fertilizer, agricultural mineral, and field crops tonnage tax laws, are the responsibility of this function.

Through the Weights and Measures function, the division enforces the section of the Business and Professions Code pertaining to weighing and measuring devices, prepackaged commodities, weighmasters, gasoline, motor oils, antifreeze, brake and automatic transmission fluids, bread loaf standards, and special provisions relating to farm products.

A total of 9 new positions are included in 1963-64 for the following programs:

Two supervising quantity control inspectors are proposed to extend to all counties the present level of protection to California consumers against short weight, measures, or count in prepackaged commodities.

A supervising investigator I, petroleum products, is proposed to supervise the petroleum products activities in the 48 counties comprising the central and northern areas.

A senior weights and measures investigator is proposed to supervise the establishment of tare weights in the weighmaster enforcement program. The department's participation in this activity has been greatly intensified.

Two junior-intermediate stenographers are proposed for the San Francisco and Fresno offices of the Weights and Measures function, to provide stenographic assistance and telephone coverage for the field men working out of these locations.

DEPARTMENT OF AGRICULTURE—Continued

DIVISION OF COMPLIANCE—Continued

Program and Performance—Continued

A petroleum laboratory specialist added administratively on a temporary basis during the current year for operation of the octane testing program and is proposed on a permanent basis in the budget year. One weights and measures technician for work with county sealers electric meter testing programs, and 1 senior weights and measures investigator for weighmaster complaint investigations, presently authorized to June 30, 1963, are requested to be continued on a permanent basis.

A reduction of 0.2 man-year of temporary help is made in current and budget years, to properly show the recovery of man-years reimbursable from other functions. An additional reduction of 1 intermediate stenographer position and the closing of Market Enforcement's San Jose office is made possible by the purchase of additional dictating machines in the budget year.

DEPARTMENT OF AGRICULTURE—Continued

DIVISION OF DAIRY INDUSTRY

Objectives

This division is responsible for the administration of the milk marketing and stabilization program and enforcement of the laws and regulations related thereto. Also, the division is responsible for the administration of programs designed to expand markets for dairy products and programs for sales stimulation and consumer education.

Program and Performance

The Division of Dairy Industry presently consists of the Bureau of Milk Stabilization and the Dairy Council of California.

The Bureau of Milk Stabilization fixes minimum wholesale and retail prices in each of the 25 marketing areas of the State for fluid milk, fluid cream, fluid low fat milk, and fluid nonfat milk. The administration of these activities under the provision of Chapter 17, Division 6 of the Agricultural Code comprise about 85 percent of the work of the bureau. Approximately 9 percent of the fluid milk sold in California is subject to established minimum prices. Milk distributors are licensed and th sale of dairy products is regulated. Additionally, unfair practice provisions of the Dairy Products Act are enforced as a par of the activities of this unit.

The Dairy Council of California enables the dairy industr to develop, maintain, and expand its markets through sale stimulation, research, and educational programs. The counci collects the assessments, supervises the expenditure of funds and conducts the meetings required by statute to receive nominations for membership on the board. Expenditures for the Dair Council are shown on page 54.

DIVISION OF PLANT INDUSTRY

Objectives

This division is charged with preventing the introduction and spread of crop pests, and with the protection of the farmer and consumer in respect to plants and related activities.

Program and Performance

The first line of defense against the introduction of plant pests, including harmful insects, plant diseases, nematodes, and noxious weeds, consists of agricultural inspection stations maintained at 18 border locations for the purpose of inspecting vehicular traffic and enforcing plant quarantine regulations. Stations are also maintained in San Francisco, San Pedro, and San Diego to inspect ships and airplanes. Quarantine enforcement at interior points, consisting largely of the inspection of freight, express, and mail shipments, is carried out by county agricultural commissioners under supervision of the department.

Leadership, co-ordination, and technical assistance are supplied to the counties. Field surveys are conducted in co-operation with the counties to detect crop pests present, but not yet widely distributed in the State. When they are discovered, particularly in incipient stages, suppressive and eradicative measures are initiated.

This division provides identification and classification of pests intercepted during surveys or quarantine inspections.

Co-operative programs are developed with local governments and landowners to control noxious weeds and rodents harboring diseases transmissible to humans. A joint program is carried on with the United States Fish and Wildlife Service to control predatory animals for protection of livestock, poultry, crops such as melons and grapes, and as an aid in the suppression of rabies.

The co-ordination of nursery inspection to insure uniformity of inspection procedures in all counties is accomplished through the county agricultural commissioners and county inspectors who are trained by the department in the detection and control of insects, nematodes, plant diseases, and weeds. Nurseries meeting minimum plant pest cleanliness requirements are issued certificates which permit them to ship their stock to 56 of the 58 counties without inspection at destination. During 1961-62, 8,409 nurseries were licensed to sell and ship nursery stock.

The discovery of Japanese beetle, *Popillia japonica*, in Sacramento in June 1961 represented the first and only known established infestation of this serious pest in California. In the eastern United States this beetle causes nearly 10 million dollars damage annually. An eradication program was organized immediately with foliage and soil treatments scheduled to be carried on for several years. Program costs estimated to be over $250,000 annually will be shared with the Federal Government on an equal basis, and local jurisdictions concerned are additionally providing assistance. Temporary help of 7.4 man-years, which is provided on an emergency basis in the current year, is not continued in the budget year as a result of the progress made toward eradication.

In 1963-64 a total of 8.7 new positions are proposed for the following purposes:

In Plant Quarantine, 1 junior plant quarantine inspector is for inspection of aircraft arriving at Travis Air Force Base

DEPARTMENT OF AGRICULTURE—Continued

DIVISION OF PLANT INDUSTRY—Continued

Program and Performance—Continued

from foreign countries, and 1 janitor is for the Yermo Inspection Station to relieve inspection personnel from this work. Provision of the janitor will allow the reassignment of 1 man-year of inspector duties in lieu of an additional inspector at this time.

In Plant Pathology 1 junior-intermediate typist-clerk is requested for maintenance of plant disease records, literature, and diagnostic aids in order to conserve the time of plant pathologists who must now do portions of this work. A temporary help increase of 0.7 man-year is provided for peak workload periods at the Riverside laboratory plus some adjustments for baggage inspectors at the various border quarantine stations.

In Entomology an agricultural biological technician will serve in the insect taxonomic laboratory to relieve the specialists so that they can handle the increasing specimen workload.

In Nursery Service, 1 nursery inspector position is requested for increased workload in the Sacramento and San Joaquin districts. As a part of the ongoing departmental reorganization, the Seed Potato Certification function has been moved from the Division of Standardization and Inspection as being more closely related to Nursery Service than to its former placement in Fruit and Vegetable Standardization. Six and four-tenths positions are involved in this transfer including 1.4 man-years of temporary help. From the 1.4 man-years of temporary help, a seed potato certification inspector was temporarily approved in the current year and is proposed as a permanent position in 1963-64.

In Weed and Vertebrate Pest Control, 2 rodent and weed control assistants authorized until June 30, 1963, for assistance to county programs are requested on a permanent basis for workload in all control areas.

A reduction of 4 man-years of temporary help occurs in order to properly show the recovery of man-years reimbursable from other functions.

DIVISION OF STANDARDIZATION AND INSPECTION

Objectives

The Division of Standardization and Inspection is responsible for the enforcement of laws and the administration of services designed to protect the agricultural industry in this State and consumers who use the products and materials regulated. These activities assist producers and handlers in the marketing of agricultural products and protect producers by regulating seeds, fertilizers, livestock feeds and remedies, and the activities of pest control operators. Increased use of pesticides in the production of agricultural crops has increased the importance of a function of the division designed to protect consumers from pesticide residues on food and livestock feeds.

Program and Performance

Activities of this division include enforcement of the minimum standards of the Agricultural Code relating to fruits, nuts, vegetables, honey, eggs and poultry meat designed to maintain and improve their quality and to protect consumers from fraud, mislabeling, and deception. These laws are enforced by the county agricultural commissioners in each county of the State under the supervision of this division. In 1961, the equivalent of 375,168 carloads of fruits, nuts, and vegetables were inspected.

The canning tomato inspection provisions of the Agricultural Code, administered by this division, require that all canning tomatoes delivered by producers to canners be inspected to determine compliance with minimum standards. Fees to cover the cost of this service are collected from the canner, payable one-half by the grower and one-half by the canner. In 1961, 2,389,478 tons were inspected. The acreage and expected production of canning tomatoes in 1962 have increased approximately 30 percent over 1961, and the increasing demand for canning tomato products indicates that comparable production will continue in 1963, resulting in the need for increased funds from the collection of fees to cover the cost of the service.

Grapes for crushing at wineries are also inspected on an optional basis at the request of certain wineries to determine the presence or absence of rot defects. Certification of the percent of rot defects assists the processor to determine the utilization of the grapes for wine or distilled products. The cost of this service is supported by the collection of fees. In 1961, 11,207 loads were inspected at 17 wineries. The value received by industry members from optional inspection of wine grapes to determine the presence or absence of rot defects indicates that this work will continue and probably increase.

The division has been responsible for inspection and certification of fields of potatoes being produced for seed to provide potato growers in California and elsewhere with disease-free stocks. In 1961, 5,749 acres were inspected. Most of the production was approved as California Certified Seed. This function, comprising 6.4 man-years, including 1.4 man-years temporary help, is transferred to the Division of Plant Industry, Nursery Service, in order to more properly reflect its function organizationally. One seed potato certification inspector was approved from temporary help in the current year to handle a shift in the type of workload and is included as proposed new position in the Division of Plant Industry for 1963-64.

The Federal-State Shipping Point Inspection Service, conducted by this division, is furnished at the request of growers, shippers, or other financially interested parties, and includes Federal or State marketing order groups. This work consists of inspection and certification of fruits, nuts and vegetables on the basis of United States Standards or acceptable industry standards. This is a self-supporting service supported by the collection of fees, and is operated co-operatively with the United States Department of Agriculture. In 1961, inspections and certifications on the basis of United States Standards totaled 137,389 and included 55 different commodities. In addition, 148,173 inspections were made on 8 products for processing. This included approximately 1,200,000 tons of grapes delivered to processing plants for crushing, which were inspected and certified as to sugar content as required by the provisions of a Federal marketing order regulating such grapes in 9 of the San Joaquin Valley counties. This service has been engaged by management of the Federal marketing order to conduct the same service in 1962, and the division has been informed that it will be required to render the same service during the 1963 crop year. It is expected that deliveries and inspections of wine grapes for crushing in 1962 and 1963 will be greater than in 1961. Some of the deciduous fruit crops inspected on the basis of United States Standards and for processing purposes produced less volume in 1961 than in normal years which should result in greater volume in 1962 and 1963.

This division samples fruits, vegetables, hay, and fodder to determine whether they contain deleterious spray residues which would be injurious to persons or animals. In co-operation with county agricultural commissioners, regulations are enforced pertaining to injurious herbicides and other injurious materials requiring a permit to use. In addition agricultural pest control operators are licensed for the specific types of pest control for which they are qualified. During the 1961-62 fiscal year there were 1,415 licensed operators in this State. Approximately 699 aircraft pilots are certified for pest control work. The number of pest control operators and pilots obtaining certificates of qualification has increased approximately 40 percent since 1952, and the acreage treated annually by aircraft has shown a comparable increase. It is expected that this activity will continue to increase. One additional position of supervisor of agricultural

DEPARTMENT OF AGRICULTURE—Continued

DIVISION OF STANDARDIZATION AND INSPECTION—Continued

Program and Performance—Continued

pest control operations is requested in the 1963-64 fiscal year to meet the increased demands on this function and to provide a minimum level of regulation.

This division enforces the laws relating to commercial feeds and livestock remedies, grain warehouse registration, and bonded agricultural warehouses. All commercial feeds must be labeled to show analysis and ingredients. Livestock remedies must be registered before sale in California. Approximately 8,000 regulatory samples of feeds and remedies are taken each year. Commercial feeds manufactured have increased from 1957-58 when slightly over 4,500,000 tons were manufactured to 6,350,000 tons in 1961-62. This increase and a substantial change in the handling of commercial feeds from sacks to bulk containers have increased the enforcement workload. It is anticipated that nearly 7,000,000 tons of commercial feed will be manufactured and sold in 1963-64. Livestock remedies registered in 1958, when the work was first assigned to the department, totaled 553, while in 1962, 776 such remedies were registered. Due to these increases 1 additional senior field crop inspector position is proposed to handle the increased workload in enforcing the provisions of the Agricultural Code relating to commercial feeds and livestock remedies.

In the inspection and certification of grain and commodities, approximately 65,000 samples are examined and certificates issued each year. This is a service function, supported from inspection fees, by personnel licensed under the Grain Standards Act or through a co-operative agreement with the United States Department of Agriculture.

The enforcement of the Seed Law is conducted in co-operation with the county agricultural commissioners in each county of the State. Proper labeling as to purity, germination, and presence of weed seeds, if any, is secured through the inspection of over 2,500 lots of vegetables and agricultural seeds yearly.

One additional district supervisor of seed inspection was approved in the 1962-63 Budget to June 30, 1963, and is proposed for continuation on a permanent basis in 1963-64. This position is needed to adequately and uniformly enforce the provisions of the California Seed Law and the One Variety Cotton District Law. The position is needed in the San Joaquin Valley where cotton, field corn, grain sorghum, and alfalfa seed acreages are responsible for the major increase in statewide production.

This division is also responsible for the registration of economic poisons, commercial fertilizers, agricultural minerals, and auxiliary plant chemicals in order to prevent the sale of ineffective, unsuitable, or dangerous products. During the 1961-62 fiscal year there were 1,979 firms that secured certificates of registration to sell these materials and 15,693 economic poisons were licensed. Approximately 5,215 samples are drawn each year from materials offered for sale to check conformity of composition with accepted standards of labeling and chemical content. In the 1961-62 fiscal year, 2,516 fertilizer salesmen were licensed.

Temporary help was reduced 4.2 man-years on the basis of past year experience related to present needs.

FEDERAL-STATE MATCHED FUNDS MARKETING PROJECTS

Objectives

The matched funds marketing service work being carried on by the State Department of Agriculture, under the authority of the Agricultural Marketing Act of 1946, has these aims; to help marketing agencies at each level of distribution to put into use the best known marketing practices as they are brought to light by research under the act and by other agencies, both private and public; to provide more timely and better marketing information; and to increase the consumption of farm products.

Program and Performance

For the operation of marketing service activities on the matched fund basis, allotments are made to states under cooperative agreements between the United States Department of Agriculture and the State Department of Agriculture. The states engaged in the program submit projects each year to the Agricultural Marketing Service for approval.

In California, advantage of the matched fund program is made available by the provisions of Section 1286 of the Agricultural Code and by co-operation with the Federal Government in marketing research under the provisions of Public Law 733.

Currently, there are 4 separate projects effective in California, concerned with checks of bearing and nonbearing acreages of fruits and tree nut crops; and surveys of the acreages and production of minor crops. One survey covers improvement of marketing efficiency, overcoming obstacles to distribution and sales, achieving market stability, expanding markets and effecting improvements in quality, packaging, and methods of sales promotion. Another project is directed toward the development of maturity standards, studies of containers, and packaging methods. Studies concerned with the development of a methodology for certification that fruit and nut tree and vine nursery stocks are free of serious virus diseases are also carried on.

Increase in the current year results from normal and special salary adjustments, increasing number of employees subject to retirement, health and welfare benefits, normal increase in other costs and availability of additional federal matching funds. Budget year increase is based upon additional matching funds.

---

[a] Provided by Chapter 1391, Statutes of 1961, to pay costs of elections conducted by the Table Grape Commission on a proposed marketing order.

GENERAL ANALYSIS

Objectives

The Dairy Council of California provides the means for the dairy industry to develop, maintain and expand markets for California dairy products. The board acts in an advisory capacity to the Director of the Department of Agriculture, who is designated as the administrative and enforcement officer for duties outlined in Division 4, Chapter 14, of the Agricultural Code.

Program and Performance

The board is made up of 25 industry representatives, nominated by dairy producers, producer-handlers, and handlers, and appointed by the Director of the Department of Agriculture for a 3-year term.

The use of dairy products throughout the State is encouraged by providing health and educational materials to schools and carrying on advertising and research programs. The cost of this program is defrayed entirely by fees paid by producers and handlers of dairy products. Expenditures for 1963-64 are estimates subject to revision by the Dairy Council at its budget meeting in May, 1963.

GENERAL ANALYSIS

Objectives

The Poultry Improvement Commission provides the general public and the poultry industry of California with production data on various types and strains of chickens and turkeys. The result of the program is the upgrading of poultry and poultry products.

Program and Performance

The commission is established and operates under the provisions of Sections 43 through 48 of the Agriculture Code and consists of 10 members. Three are ex officio—2 representing the University of California at Davis, and 1, the Director of the Department of Agriculture. Seven are appointed by the Governor for four-year terms, and are chosen so far as possible to give representation to the major poultry districts of the State.

The work of the commission is carried on at 2 locations, the chicken project near Modesto and the turkey project near Keyes. Specific tests, requested by the poultry industry, are conducted to provide a means whereby poultrymen may judge the merits of available strains of chickens and turkeys. A representative sample of the commercial stock of each entrant is randomly selected and brought to the testing grounds to be raised and measured. Periodic reports are made to the public and to the poultry industry including breeders, hatcherymen and poultrymen. Types of observations made include egg size and quality, meat quality, egg and meat production, and feed efficiency. The data is analyzed statistically in order to determine significant differences.

During the past year the poultry testing project was expanded to include "on-the-farm" testing. The results of this testing program will be comparatively evaluated with results from the Modesto test in order to determine if the new program should be run in connection with, or as a substitute for, the Modesto project.

The major benefits of random sample testing of chickens and turkeys accrue to the consumer. During the current year the Chicken Meat Production Test was discontinued primarily because no real differences could any longer be found among the various stocks entered in the test. It appears that the housewife is now usually able to purchase quality broilers and fryers whenever and wherever she wishes. Much of this upgrading in quality of chicken meat has been due to the pressure of random sample testing. The junior turkey test was also discontinued due to a lack of interest on the part of breeders who apparently found that consumers are not interested in the small bird. The termination of the two tests plus other economics reflect in an annual savings of approximately $25,000, a great part of this amount has been effected during the current fiscal year as well.

During 1962-63 these savings are reflected in the budget through the reduction of 3.2 positions. These positions include 1 poultry assistant, 1 typist clerk, 0.2 man-years of temporary help and 1 position in salary savings since the specific position has not been determined. In addition to the expenditure savings, entry fees have been raised from $150 to $250. Also, an increased fee of $350 has been set for additional entries and out-of-state entries which has the effect of doubling revenue received from entry fees. This represents further management effort to lower the General Fund cost for this program, and has the total effect of reducing the General Fund proposal by over one-third.

GENERAL ANALYSIS

The Agricultural Labor Commission was established by Chapter 1785, Statutes of 1961, which provides for 5 members appointed by the Governor to act as a fact-finding body to ascertain, study, and analyze the problems of labor-management relations in California agriculture. A written report to the Governor and to the Legislature is required to be filed on January 31, 1963, embodying the findings and recommendations of the commission. Expenses are primarily for traveling costs of commission members and the preparation and printing of the report.

GENERAL ANALYSIS

Chapter 2037, Statutes of 1961, established the Youth and Adult Corrections Agency and authorized the appointment of an Administrator. Under this organization the Administrator is responsible for general direction over the Departments of Corrections and Youth Authority, Adult Authority, Youth Authority Board, the Board of Trustees of the California Institution for Women, and is the Chairman of the Board of Corrections. He is the chief adviser to the Governor in these areas and as such participates in the development of administrative policy and insures that such policies are put into effect.

The agency concept was implemented for the first time in October 1961 with all costs of the office being a pro rata charge against the component departments. A position of administrato was established with minimum clerical help. Other assistance a needed was provided by the departments involved within thei then authorized budgets.

It is proposed in the 1963-64 Governor's Budget to appropriate for the operations of this office directly and to strengthe the staff of the office. To this end one additional professiona staff member and a clerk are proposed in this budget. Many o the housekeeping activities such as accounting will continue t be performed by the departments within the agency.

PART I—CONTINUING OPERATIONS

Objectives

The protection of society and the rehabilitation of the person are the primary purposes of the Department of Corrections. Since 98 percent of the prisoners are eventually released, adequate protection includes not only segregation from society by imprisonment, but also preparation for release and adequate supervision while on parole. To be most effective, the correctional process must continue throughout both the institutional and parole periods. The aim is rehabilitation in the shortest period of time and the restoration of the person to a constructive life in the community.

Program and Performance

The Agency Administrator of the Youth and Adult Corrections Agency is responsible for the policy formulation and implementation of the Departments of Corrections and the Youth Authority. This concept was initiated in accordance with law on October 1, 1961.

The Department of Corrections, established in 1944, is currently composed of the Director of Corrections, the Adult Authority, the Board of Trustees of the California Institution for Women, the Correctional Industries Commission, and the Board of Corrections. The director and members of all of the boards are appointed by the Governor.

The Director of Corrections is the chief administrative officer of the department. He is directly responsible for management of the state prisons and for the custody, care, treatment, training, discipline, and employment of the prisoners. He is likewise responsible for administration of the Parole and Community Services Division, which supervises adult male parolees.

The Adult Authority is responsible under California's indeterminate sentence law for determining the sentences of male prisoners and granting or revoking parole. Like responsibility for women prisoners is placed in the Board of Trustees, California Institution for Women.

The Correctional Industries Commission recommends industrial and agricultural enterprises to eliminate prison idleness by providing work and training. Such enterprises may be started only when authorized by the commission after a public hearing.

The Board of Corrections is composed of the Administrator of the Youth and Adult Corrections Agency, the Director of Corrections, the Director of the Youth Authority, the Chairman of the Adult Authority, the Vice Chairman of the Youth Authority, the Chairman of the Board of Trustees of the California Institution for Women, and 2 qualified persons appointed by the Governor, with the advice and consent of the Senate. It is responsible for the correlation of the State's correctional programs, the study of the entire subject of crime, inspection of jails, and the provision of advisory services to cities and counties regarding jail and detention facilities.

During 1963-64, the department will be faced with caring for an estimated average population of 26,420 inmates, including 1,870 male Youth Authority wards over 18, and 1,125 women. This prison population will be confined in 11 institutional facilities for males, 37 highway and forestry conservation camps and 1 institution for women. During 1963-64, an average of 13,050 males and 1,299 females will be under parole supervision.

The increase in the felon prison and parole population is primarily a reflection of the increase in the population of the State rather than an increased rate of crime.

The institutions and camps under the control of the department comprise a diversified correctional system. This is promoted through facilities with planned capacities with varying degrees of custodial control of inmates and provisions for special and general pro-

---

[k] Excluding cost of operating reception-guidance center but includes cost of feeding, housing, and other expenses of the inmates being processed therein.

[l] Excludes camp operations.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART I—CONTINUING OPERATIONS—Continued

Program and Performance—Continued

grams of training and treatment for different types of prisoner groups.

Maintaining persons under control in prison while treating them until evaluated safe for release is the goal for protection of the public. It is therefore essential to know what the characteristics of these people are, how to control and treat them, and what facilities are required.

The prison population for 1963-64 will represent the most serious behavior problems among those convicted of felonies in the State, since only 25-30 percent of the persons convicted of felonies are committed to the department. The balance serve county jail terms or are granted probation. The prison felon population may be described in general in terms of the "average" felon inmate: A male about 32 years old with a prior juvenile, jail, or prison record, with about 10 years' residence in California, with only a 7th grade education but normal intelligence, lacking in work skills, and having a serious personality difficulty. The nonfelon addict prison population can be characterized as having an average age of 25, educational background of the 8th grade, and with 50 percent having had prior felony convictions. In addition to the "average" inmate there are groups requiring specialized custody and treatment such as the aged, the psychotic, the sex deviate, the tubercular, the physically defective, the chronic behavior problem and condemned cases.

The program for handling 40,769 individuals daily in prison and on parole during 1963-64 will include:

Diagnosis: This is the study of each prisoner upon receipt to recommend an individualized program for his control and treatment.

Classification: This is the designation, based on diagnosis and experience, of the degree of custodial control, educational assignment, medical care, psychological therapy, religious training, and vocational training for each inmate.

Care: The feeding and clothing of the inmates is based on departmental rations. A basic food ration is maintained in all institutions under the general supervision of the departmental food administrator. Rations are modified to meet age, activity, and health needs of the inmates. The clothing ration is based on recorded usage and actual experience.

Treatment: Staff-conducted programs are utilized to effect the treatment process. Treatment involves the integrated activities of a number of subsections. Together, and in co-operation with effective custodial control, the treatment programs make possible the operation of a productive correctional process during the time the inmate is confined and prepared for release. The major activities are as follows:

Academic and Vocational Education: About 11,000 inmates are in educational programs during the year. Academic education provides elementary and high school courses, both by contracting with the local school district and by institution staff. Vocational training, conducted by the institution staff, is available in approximately 30 trades. Educational services include library programs used extensively by inmates.

Medical Care: Hospital facilities exist at all institutions and virtually any medical or surgical problem can be handled within the department. Complicated surgical procedures are generally performed at San Quentin due to the availability of specialists.

Psychiatric Treatment: While specialized psychiatric service is provided principally at the California Medical Facility, psychiatric positions are also authorized at the other institutions and the parole outpatient clinic. Psychiatric treatment includes ward management of psychotics and other highly disturbed persons. Extensive programs for individual and group psychotherapy for more than 2,000 inmates are also provided under psychiatric direction.

Counseling Services: A professional staff of correctional counselors at each institution deals with social and personal problems of inmates and families and prepares progress reports for the Adult Authority. Two specialized units of correctional counselors are engaged in pilot programs of intensive counseling with small caseloads. About 10,500 inmates currently participate in weekly group counseling sessions conducted by custodial, educational, and maintenance staff employees who have received in-service training in counseling.

Religion: The religious program includes full-time Catholic and Protestant chaplains at each institution and part-time services for the other faiths. In addition to conventional religious activities, chaplains participate in case counseling and in total classification and treatment activities of the institution.

Recreation: Programs of physical and interest-type recreational activities are maintained at each facility under the leadership of persons trained in recreation. Balance is maintained between spectator and participation programs. Such programs boost morale, encourage constructive use of off-duty time, and teach sportsmanship and teamwork.

Employment: The constructive employment of as many inmates as possible is one of the keys to the total treatment program. Prisoners work in factories, maintenance and culinary sections, offices, farms and camps, obtaining diversified work experience. Constructive use of inmate assignments has economic benefit to the institutions and carryover value for work placement after release. Idleness, on the other hand, results in low morale and mental and physical degeneration. Conservation centers and camps operated by the department provide added opportunity for outdoor projects of a type which are also beneficial to the development of California's natural resources.

Release Procedures: Each of the 10,640 inmates to be released during 1963-64 will participate in preparole instruction classes to prepare for adjustment after prison. In addition, each releasee will be inter-

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART I—CONTINUING OPERATIONS—Continued

Program and Performance—Continued

viewed regarding release plans and a report will be prepared to assist with employment and living placements.

Parole Procedure: Of the total number released from the institutions, the great majority will be released under parole supervision. The basic treatment process, which is directed toward successful adjustment in society, is continued in the parole program under the jurisdiction of the Department of Corrections while the parolee is serving the remainder of his term as a productive member of society.

Narcotic Treatment-control: 1963-64 is the fifth year of a 5-year experimental program, begun in 1959-60, to study the detection, diagnosis, custody, and clinical treatment of addicts and suspected addicts, in order to develop better methods of rehabilitating such persons.

Additional Facilities

The California Conservation Center at Susanville will begin receiving inmates in February 1963 and is expected to reach capacity by October 31, 1963. A new conservation camp with a capacity of 100 inmates within the Conservation Center will also be activated in the 1962-63 fiscal year. Three additional 80-man camps will be activated in 1963-64: Konocti, Mono-Inyo, and Black Mountain. With these additional 240 inmates in camps, the department will have an everage population of 2,305 in state conservation camps, 114 in road camps, and 28 in summer United States Forestry Service camps.

The California Rehabilitation Center with a capacity of 2,300 non-felon narcotic or dangerous drug addict inmates is to be activated early in 1963 and will be at full capacity in the 1963-64 fiscal year.

The Conservation Center, Southern Branch, which during 1962-63 is used as a branch of the California Rehabilitation Center, will be operated for its intended purpose starting July 1, 1963 with a capacity of 640 inmates. Included in the branch will be a 100-man State Forestry camp. The camps currently administered by the Institution for Men will be transferred to the branch in the 1963-64 year.

The Institution for Women will open a new 120-bed Reception-Guidance Center in June, 1964.

Narcotics and Dangerous Drugs Control

Pursuant to the enactment into law by the 1961 Legislature of the Nonfelon Narcotics Addicts Control Act, the Department of Corrections has begun a program of institutional treatment of such nonfelon addicts which is to be followed by research projects and finally by an intensive parole program, all for the purpose of controlling narcotics usage and finding pathways to its causes and cures.

The same type of program will be extended to persons falling under the jurisdiction of proposed legislation concerning the use of dangerous drugs.

1. Institutional Treatment

The designation of California Rehabilitation Center has been given to the institution that will house these nonfelon addicts. This institution will receive the addicts for processing, provide a short reception-guidance program to determine proper inmate classification as well as medical needs, and in an institutional setting provide treatment and training for the remainder of the addict's stay.

The treatment and training will be four-fold in nature: (1) each living unit, which will contain 60 men, will be denoted as a community living group under the supervision of a correctional counselor and a correctional officer and will spend many hours per week in the group counseling, group therapy, and individual counseling and therapy programs prescribed as necessary in the treatment and rehabilitation process; (2) vocational and academic education will be available for those who are in need of such program to stimulate and enhance the process of rehabilitation; (3) work programs will be scheduled to complement the more sophisticated treatment aspects; and (4) a rigorous physical education and recreation program is planned to counteract as much as possible the inevitable physical deterioration effect of usage.

2. Research Program

The medical research program at this institution has already attracted great interest from the institutions of higher learning in California. The aims and goals of the research on addicts, addictives, and addiction are to find the underlying causes, the physical and emotional effects, and hopefully, the curative and effective controlling devices.

3. Parole Program

The dichotomy of rehabilitation lies in institutional treatment and parole treatment and supervision, either of which, without the other, would not be a whole within itself. The parole program for the nonfelon addicts continues the intensified treatment theme by providing a ratio of 25 parolees per professional parole agent position. This close supervision will facilitate more effective control of usage among the parolees as well as earlier control through a 60-day pre-parole pickup on the agent's caseload.

Increased Correctional Effectiveness Program

The special Increased Correctional Effectiveness Program, which was started in July 1961, will continue through the 1963-64 fiscal year. It has been developed to include 10 small institutional units and 37 small parole caseloads located throughout the State with a total of 1,800 inmates and parolees who are either in or have been processed through the program as of the Fall of 1962.

For selected nondangerous inmates this Increased Correctional Effectiveness program replaces a portion of the individual's normal institutional term with intensive treatment and programming.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART I—CONTINUING OPERATIONS—Continued

A total of 341.8 proposed new positions, at a salary cost of $1,745,392, is included in this portion of the budget. These positions are proposed generally on the basis of increased population and facilities and in those areas where the application of accepted workload standards and formulas has not been interrupted.

Major increases in workload which these positions represent are: an increase in the parole population, requiring 97.3 new positions; the first year of full operation of the Conservation Center at Susanville and its branch at Chino, involving 98.9 new positions, as well as 5 positions for the initial staffing of the Sierra branch; the first year of full operation of the narcotics rehabilitation institution which requires 74.4 new positions; and 23.3 new positions at the Institution for Women are required to operate the new reception-guidance center to open in 1963-64. The balance of the new positions (42.9) reflect increases in workload in certain specific areas such as classification, parole and clinical processing.

In addition to these proposed new positions, a series of transfers of jurisdiction are reflected in this portion of the budget. These include establishing the Tehachapi branch of the Institution for Men as a separate institution, the transfer of all non-felon narcotic addicts to the Rehabilitation Center, the transfer of the camps at Folsom and Chino as well as the Chino branch of the Rehabilitation Center to the Conservation Program.

All of these increases in positions and transfers are discussed in the budgets for the individual institutions.

PART II—PROGRAM AUGMENTATIONS

The supplemental program of the Department of Corrections is consolidated in the following categories:

I	Community Correctional Center	$110,281
II	Staffing of new institution	22,691
III	Administrative strengthening	34,038
IV	Strengthening security	108,632
V	Classification and treatment	81,190
VI	Conservation	53,647
VII	Training	21,275
VIII	Transportation of prisoners	26,872
IX	Research	21,595
X	Adult Authority—investigative services	13,863
	Total	$494,084

State Employee Retirement, Health and Welfare Program costs are included in the costs of the supplemental programs.

The supplemental program for the Department of Corrections for the 1963-64 fiscal year proposes the correction of deficiencies in the basic programs of custody, rehabilitation services, maintenance, administration and research. It also includes a signficant new program of consolidating various institutional and post-institutional programs into a single community correctional center.

The community correctional center will provide in a single facility a 50-bed residential halfway house for male parolees, outpatient psychiatric services, a prerelease guidance unit, sheltered workshop, presentence diagnostic service for counties, antinarcotic testing and community correctional services. This unit will embody some services which are now performed at institutions. The development of this type program will help prevent the return of parolees to institutions with higher costs of maintenance. Another advantage in a community center will be to promote community interest in correctional problems which will lead to greater use of community resources and facilities in the rehabilitation of felons, thereby relieving the State of some of its burden.

An increase in administrative staff for departmental administration is proposed to strengthen the maintenance and construction program and provide a training position for administrative classes.

Additional positions are proposed at the state prisons at Folsom and San Quentin, Men's Colony—East Facility, Deuel Vocational Institution, Correctional Institution at Tehachapi and Institution for Women to correct custodial deficiencies.

Increases in classification and treatment staff are proposed to strengthen the medical treatment staffs at California Men's Colony—East Facility, California Institution for Women, California Medical Facility and the Correctional Institution at Tehachapi. Positions are also included to provide for workload increases at the southern outpatient clinic.

The Conservation Program increases include 2 positions necessary for the operation of San Quentin camps. It is also proposed to convert positions from the regular custodial series to the new correctional program supervisor series at the Southern Branch and 2 of its camps plus 2 camps supervised from the center in Susanville.

Other proposals include additional casework trainee positions to augment the parole recruitment and training program, positions to operate an additional bus for the transportation of inmates to conservation facilities and a position to assume overall responsibility for transportation of prisoners within the State and between this and other states, a superintendent for planning of the proposed new 1,200-man institution at Tehachapi, 2 additional research positions for the narcotic research program at the Rehabilitation Center, and 1 parole agent to absorb increased special investigation cases for the Adult Authority.

The distribution of the proposed positions and program by institution or organizational unit in the department are shown in the following schedule with a more detailed analysis following.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY FACILITY AND OBJECT CATEGORY

FACILITY	NUMBER OF POSITIONS	PERSONAL SERVICES	OPERATING EXPENSE	EQUIPMENT	REIMBURSEMENT	TOTAL
Departmental Administration	19.5	$133,710	$77,853	$23,054	—$29,322	$205,295
Conservation Center and Branches	1.5	41,370	–	–	–	41,370

Totals	60.5	$413,072	$86,343	$23,991	—$29,322	$494,084

DISTRIBUTION BY PROGRAM

I. COMMUNITY CORRECTIONAL CENTER

	No. of Positions	Total
Personal services	10.5	$62,061
Operating expenses	–	60,925
Equipment	–	16,617
Reimbursements	–	*—29,322*
Total	10.5	$110,281

Division of Parole and Community Services:

1	Program administrator	$9,302
1	Business service officer	7,298
1	Clinical psychologist II	8,859
2	Intermediate stenographer	8,991
1.5	Cook	7,074
3	Correctional officer	15,588
1	Temporary help	4,949
–	Operating expenses	60,925
–	Equipment	16,617
–	*Reimbursements*	*—29,322*
10.5	Totals	$110,281

Greater protection for the public and more successful parolees are the major objectives of the proposed new Community Correctional Center.

This program will provide in a single facility, the following services for male parolees:

1. Fifty-bed halfway house for housing men who have no homes to return to or whose residence in the facility is a consideration of the parole.
2. Outpatient psychiatric service to provide counseling for men experiencing difficulty in adjusting to the free society.
3. Prerelease guidance unit for help in preparole guidance and job placement.
4. Halfway (back) center for housing parolees who apparently are making poor adjustments to prevent returning them to an institution.
5. Sheltered workshop for parolees unable to fin or keep a job to prevent their return to crime.
6. Presentence diagnostic service offered to counties before sentencing to a state institution.
7. Anti-Narcotic testing for narcotic parolees.
8. Community correctional information service to secure community acceptance and assistance i furthering the program.
9. Parole services by providing space for the fiel parole unit operating in the district.

By combining the above services in one unit, mor effective administration and utilization of manpowe and office space will be obtained besides providin these services for the protection and aid of the community as well as the more effective rehabilitation o the parolee.

With the exception of the sheltered workshop th other concepts are either proven or are operationa aspects of encouraging research designs within th Department of Corrections.

II. STAFFING OF NEW INSTITUTION

	No. of Positions	Total
Personal services	2	$20,804

1	Superintendent	$15,854
1	Senior stenographer	4,950
–	Operating expenses	950
–	Equipment	937
2	Totals	$22,691

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

II. STAFFING OF NEW INSTITUTION—Continued

Section 2048 of the California Penal Code authorizes the establishment of a state prison to be known as the California Correctional Institution at Tehachapi. The current Tehachapi Branch of the Institution for Men—Chino will be so designated in the 1963-64 year, and additional funds for further development of the plans and site for the additional 1,200 man unit are proposed in the 1963-64 Capital Outlay portion of this budget.

It is proposed to establish the position of superintendent and the necessary clerical help to begin the planning and programming necessary for the construction and activation of the new 1,200 man institution.

III. ADMINISTRATIVE STRENGTHENING

	No. of Positions	*Total*
Personal services	3	$20,688
Operating expenses	–	12,406
Equipment	–	944
Total	3	$34,038

Departmental Administration—Management Services Division:

1 Departmental construction and maintenance supervisor	$10,740
1 Intermediate stenographer	4,494
– Operating expenses	2,181
– Equipment	754
2 Totals	$18,169

The position of departmental construction and maintenance supervisor with clerical support is requested to provide additional assistance in the area of planning and overall supervision of construction and maintenance of the physical plants of the institutions. At the time the existing departmental construction and maintenance supervisor was provided the department was composed of 4 institutions and 6 forestry camps. The growth to the present 12 institutions and approximately 37 camps necessitates the addition of the position.

Departmental Administration—Management Services Division:

1 Administrative trainee	$5,454
– Operating expenses	390
– Equipment	190
1 Totals	$6,034

This position is being requested to provide on-the-job training for the development of future administrative personnel for the Department of Corrections and will be assigned to institutions where training can be provided. The need for qualified administrative personnel becomes more and more acute as new institutions are constructed.

Departmental Administration Research Division:

Operating expenses (machine tabulation)	$9,835

Funds for additional tabulating machine time are requested in 1963-64 primarily to provide for the preparation of reports required to effectively manage 2 major programs authorized by recent legislation: the narcotic rehabilitation program; and the increased correctional effectiveness program. Inmate manpower control reports and additional movement reporting also require increased machine time.

IV. STRENGTHENING SECURITY

	No. of Positions	*Total*
Personal services	20.1	$108,632

Custody—State Prison at San Quentin:

2.2 Correctional officer	$12,336

In order to provide the necessary security control around the cotton textile mill at San Quentin it is proposed that 2 of the wall posts overlooking the area (2 positions with relief) be manned during the third watch (4 p.m. to midnight). Two hundred medium custody inmates work in this area during this time as the plant is operated on a two-shift basis.

Custody—State Prison at San Quentin:

2 Correctional officer	$10,681

The new recreation area which has been under construction at San Quentin is planned to be utilized on weekends and holidays in 1963-64. Sports events will be held in this area. To provide custody coverage during these events it is proposed that 2 towers overlooking the area be manned on holidays and weekends.

Plant Operation—Men's Colony, East Facility:

1 Locksmith (terminate June 30, 1964)	$6,652

The locksmith position presently authorized at East Facility has been unable to keep up with the work load involved in the initial adjustment of the many automatic and manual locking devices of this new institution as well as normal repair and maintenance. One additional locksmith for a period of 1 year is proposed to help carry the workload of initial adjustments and alterations.

Feeding—Institution for Women:

10 Supervising cook I	$53,386
0.2 Overtime—in-service training	1,342
10.2 Totals	$54,728

Currently, supervision of food preparation at the 6 inmate cottages at the Institution for Women is provided only by custody personnel when their primary duties of supervising a housing wing permit. This situation contributes to improper preparation of food and results in low inmate morale, custodial risk, and little opportunity for training of inmates engaged in cooking. The proposed positions provide supervision in the kitchen area of each of the 6 cottages 7 days a week.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

IV. STRENGHTHENING SECURITY—Continued

Custody—State Prison at Folsom:

0.5 Correctional officer ---------------- $2,066

The 138 inmate capacity adjustment center at State Prison at Folsom provides control and treatment of many of the department's most severe behavior problem cases. The proposed correctional officer relief position will remedy an existing staffing deficiency of the adjustment center where no yard officer is budgeted for weekend supervision as in other adjustment centers in the system. The operation of the exercise yard on weekends is considered necessary for release of tensions and dangerous emotional states as well as for health. The requested relief would also allow more adequate supervision during feeding and search activities.

Custody—Deuel Vocational Institution:

1.6 Correctional officer ---------------- $8,312

When Deuel Vocational Institution was originally staffed only one correctional sergeant was budgeted for the control room during the third watch (4 p.m. to 12 midnight) while during the second watch it was necessary to provide a correctional officer to assist the control room sergeant. The institution activity during the third watch is now as heavy as during the second, but the additional correctional officer position is not available. In addition to the expanding population and programs, the activation in 1960 of the 300 capacity Reception-Guidance Center placed additional work-load upon the third watch control room sergeant. The proposed new position will provide the necessary assistance on the third watch.

Custody—Correctional Institution at Tehachapi:

1.6 Correctional officer ---------------- $8,514

This request is to establish and man a post for one shift a day, with necessary sick leave and vacation relief, seven days a week. This post will provide the needed coverage on the first shift for search, escape detection and prevention, and escort services at this institution. This position will provide the only yard coverage in the late hours of the first shift, the period that inmates are awaiting breakfast after rising and are passing through the yard.

Reception-Guidance Center—
Deuel Vocational Institution:

1 Correctional officer --- ------------- $5,343

At the Deuel Vocational Institution proper it is proposed to establish an instructor in recreation and physical education in addition to the one existing instructor in order to provide more adequate supervision and organization of recreational activities. The young inmates at Deuel Vocational Institution make an extensive recreation and physical education program necessary. To provide the needed position it is proposed that the instructor in recreation and physical education which is budgeted for the Reception-Guidance Center be transferred to the institution. The new correctional officer proposed would replace the Reception-Guidance Center position. Inmates stay in the Reception-Guidance Center a relatively short time and most of their recreation consists of general activities which can be planned and supervised by a correctional officer assisted by institution staff.

V. CLASSIFICATION AND TREATMENT

	No. of Positions	*Total*
Personal services ----------------	10.4	$78,596
Equipment ----------------	–	2,594
Total ----------------	10.4	$81,190

California Men's Colony—East Facility:

1 Physician and surgeon II ------------ $13,703

This request is to continue a position of physician and surgeon which had been allowed on a limited term basis (to June 30, 1963).

At the present time there are 3 physician and surgeon II positions at this institution one of which was limited to June 30, 1963 pending determination of need. One physician devotes full time to surgery and the supervision of the surgical service. A second physician devotes a substantial part of his time to the surgical program assisting the Chief Surgeon in performing surgery. The balance of his time is devoted to many out-patient duties, including servicing of the daily sick line and clinics. The third physician's duties pertain to out-patient care of inmates and care of the many acutely ill in-patients. The loss of a physician and surgeon II would seriously curtail the necessary medical services at this institution.

California Institution for Women:

2 Graduate nurse (1 plus full relief)
(effective May 1, 1964) -------------- $1,732

The position of graduate nurse with full relief is requested primarily as a result of workload with the opening, June 1, 1964, of the new 120-bed Reception-Guidance Center and to overcome a present staffing deficiency in the institution hospital on the second shift. With the activation of the Reception-Guidance Center it will be very difficult to provide adequate nursing services for both the Reception-Guidance Center and hospital with the existing staff.

California Medical Facility:

1 Physician and surgeon II $15,905

This request of one physician and surgeon II will provide the third position for the departmental psychiatric residency program previously approved by the Legislature. The three-year training program is carried on in co-operation with the Department of Mental Hygiene and covers specialized psychiatric training for each resident. At the present time two positions are authorized for the program. With the addition of the third one there will be one position in training in each year of the program continuously. The first of the two presently authorized positions will complete his three years of training in 1964 and will then begin his three years of pledged service with

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

V. CLASSIFICATION AND TREATMENT—Continued

a Department of Corrections institution. The physicians being selected for residency are career men in the department. The purpose of the program is to facilitate the recruiting of doctors and to assure fully qualified psychiatrist services.

Tehachapi:

1 Intermediate typist-clerk—mail	$4,390

This position is proposed on the basis of a standardized provision of 1 mail clerk for each 350 inmates. This position is requested for routing the mail, posting bed moves, censoring incoming mail, receipting money orders, and other routine but necessary services.

Tehachapi:

1.2 Medical technical assistant	$6,381

The additional medical technical assistant is requested for the purpose of providing third watch coverage in the hospital. Existing staff cannot adequately provide sufficient coverage to handle the around the clock coverage that is necessary for proper hospital care, These additional 1.2 positions would make such coverage possible.

Parole and Community Services Division—
Los Angeles Outpatient Clinic:

2 Staff psychiatrist	$26,088
1 Intermediate stenographer	4,510
– Equipment	2,594
3 Totals	$33,192

These positions are required for increased workload in the Los Angeles Outpatient Clinic and are based on the ratio of 1 therapist to 50 parolees requiring psychiatric treatment to aid in their adjustment process. Scheduled therapy sessions are sometimes required as a condition of parole by the Adult Authority, and without the ready availability of such treatment, parole will be delayed. It is planned to meet this need by providing staff sufficient to handle an increase of 100 parolees at this clinic.

Tehachapi:	*Total*
0.5 Group counseling overtime	$2,336

During 1962-63, as a part of the nonfelon narcotics addict program, group counseling sessions at Tehachapi were increased to 5 a week. The increased counseling has resulted in increased staff control and improved inmate institutional adjustment.

The Department anticipates placing more difficult inmates at Tehachapi during 1963-64 and proposes to continue this effective program. To provide the needed controls for these more difficult inmates, the Department proposes to maintain 2 units with 4 daily groups each. Under this plan there would be 80 groups per week as compared with the traditional 40 groups per week. This level will be possible by doubling the present amount of group counseling overtime.

Correctional Training Facility—North:

0.7 Group counseling overtime	$3,551

During the past year group counseling has been increased from 65 percent inmate participation once a week to 100 percent participation 3 times a week. The objective of this program is to increase staff control and involve those inmates most in need of the counseling who were not participating in the voluntary program. This request would provide sufficient funds to meet this need.

VI. CONSERVATION

	No. of Positions	*Total*
Personal Services	3.5	$53,647
San Quentin Camps:		
1 Correctional lieutenant		6,952
1 Correctional officer		5,325
2 Totals		$12,277

In the 1963-64 fiscal year the State Prison at San Quentin will operate a total of 12 camps with an average daily population of 734. These camps are dispersed in remote areas throughout the northern part of the State. Since the beginning of the camp program 1 position has been budgeted to transport inmates and supplies to and from the camps and fire areas, and 1 correctional lieutenant to provide liaison between the institution and the camps to co-ordinate the supervision of individual camps by the camp lieutenants. With the growth of the camp program it has become impossible for these positions to adequately fulfill their intended functions, and these 2 positions are requested to handle this previously recognized but unmet workload. This proposal is consistent with staffing provided for camp supervision at other institutions.

Establishment of Correctional Program Supervisor Series at the Southern Branch, Conservation Center:

	Total
Increased costs of salaries to establish Correctional Program Supervision series	$20,488
1 Clinical psychologist II	8,739
0.5 Intermediate stenographer	2,303
1.5 Totals	$31,530

It is proposed that the correctional program supervisor series be established in the Southern Branch, Conservation Center. The utilization of this new class at the Southern Branch will provide a custodial control and treatment program in a minimum custody setting on the same basis as previously approved for the California Conservation Center at Susanville.

The 1 clinical psychologist II and 0.5 position of intermediate stenographer are requested to complement the training staff necessary to provide the inservice training program required for the correctional program supervisor series.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

Establishment of Correctional Program Supervisor Series in Four Conservation Camps:

	Conservation Center Susanville	*Southern Branch Conservation Center*	*Total*
Increased costs of salaries at 2 camps	$4,920	$4,920	$9,840

The correctional program supervisor series was designed by the Department of Corrections to provide treatment needs in the conservation program, including camps. It is proposed that the correctional program supervisor series be established in 2 camps of the Conservation Center at Susanville and 2 camps of the Southern Branch, Conservation Center. This will give the department the opportunity to determine the effectiveness of the correctional program supervisor in camp as compared to standard custodial staffing, and provide flexibility for the assignment of personnel between the institutions and camps.

VII. TRAINING

	No. of Positions	*Total*
Personal Services	4	$21,275

Classification and Parole—
State Prison at San Quentin:

1 Correctional counselor II	$7,675
4 Correctional casework trainee	23,014
—2 Correctional counselor I	—13,946

Regular Parole Supervision—
Parole and Community Services Division:

2 Correctional casework trainee	11,505
—1 Parole agent I	—6,973
4 Totals	$21,275

In order to recruit and train case workers of high quality, a correctional case work trainee program similar to the operational program at the Institution of Men—Chino, is proposed for joint operation by San Quentin and the departmental Parole and Community Services Division. The correctional case work trainee classification is an entry level which can be used to attract directly from college those who are interested in correctional case work. These positions are partially funded by the abolishment of one correctional counselor I or parole agent I position for each 2 trainee positions. The correctional case work trainee will undergo a 12-month training program under supervision of the proposed new correctional counselor II. At the end of the year's training each person qualifies as parole agent I or correctional counselor I. During the training program each person will carry part of a regular case load, and all trainees will receive indoctrination in both institution and parole casework.

VIII. TRANSPORTATION OF PRISONERS

	No. of Positions	*Total*
Personal services	4	$24,455
Operating expense	–	2,085
Equipment	–	332
Totals	4	$26,872

Departmental Bus Operation—
State Prison at Folsom:

1.2 Correctional sergeant	$7,415
1.2 Correctional officer	7,068
0.6 Overtime—departmental bus operation	3,000
3.0 Totals	$17,483

The State Prison at Folsom is charged with the operation of the buses which are utilized to transfer inmates between institutions of the Department of Corrections. The requested positions which include relief will operate the new bus added in January 1963. Much of the utilization of this vehicle will be in transporting inmates to and from the new conservation facilities at Susanville and Chino. The routes which the departmental buses travel are in most cases of such a length that it is not possible to cover the distance within an 8-hour working day; it is therefore necessary to provide funds for payment of overtime to the bus crew.

Management Services—Departmental Administration:

1 Supervising transportation officer	$6,972
– Operating expenses	2,085
– Equipment	332
1 Totals	$9,389

Currently, the responsibilities for transportation of inmates within the State and to and from other states are widely dispersed. The proposed position will provide economies through consolidation of trips, effective scheduling of the four departmental buses, and elimination of much duplication of effort.

IX. REHABILITATION CENTER, CORONA—RESEARCH

1 Associate social research technician	$8,859
1 Senior tabulating machine operator	5,196
Operating Expenses:	
– Rent statistical sorting equipment	6,000
– Accessories (one-time purchase)	1,215
– Supplies	325
2 Totals	$21,595

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

IX. REHABILITATION CENTER, CORONA—REASEARCH—Continued

The Rehabilitation Center Research Unit at Corona, under provisions of the Penal Code, is charged with making a study of narcotic addiction in terms of characteristics and progress of Rehabilitation Center inmates. To co-ordinate and evaluate accumulated information a data processing unit is proposed. In addition to the 1 associate social research technician authorized in the 1962-63 fiscal year, 1 additional associate social research technician and 1 senior tabulating machine operator are requested to perform the work. The operating expenses requested are to provide funds for the rental of a tabulating machine and purchase of accessories and supplies for the data processing unit. The tabulating machine operator for the equipment will be used to augment personnel and machines now at the Medical Facility, where the Rehabilitation Center machine work will be done.

X. ADULT AUTHORITY—INVESTIGATIVE SERVICES

1	Parole agent II	$8,859
–	Operating expenses	2,437
–	Equipment	2,567
1	Totals	$13,863

One position of parole agent II is requested to conduct special investigations including executive clemency and condemned cases. At the present time the Adult Authority has a backlog of cases to be investigated which is continuously growing. Matters of clemency and condemned men are to be handled with generally slow, painstaking effort and cannot be slighted. Proper coverage of future and existing cases would call for this additional position.

GENERAL ANALYSIS

Objectives

The Department of Corrections is responsible for public protection through the confinement, supervision, and rehabilitation of persons committed to it by the courts both during the term of incarceration and on parole.

Program and Performance

The Director of Corrections is responsible for carrying out policies and programs to achieve the objectives of the department. The departmental administration is designed to provide adequate staff to fulfill these responsibilities. This is accomplished through the activities of the executive and 7 major divisions, each headed by a chief. These are: Correctional Program Services, Management Services, Research, Conservation, Correctional Industries, Parole and Community Services, and the Medical Services Division.

The Correctional Program Services Division includes staff responsibility for custodial activities, employee training, education and library services, inmate classification, casework and related professional disciplines, group counseling, records, recreation, and the chaplaincy services. Each of these is an important treatment activity or service at the institution level. During the past year refinement of the department's group counseling program has been emphasized with nearly 11,000 inmates and more than 700 staff members involved in regular meetings. A large group counseling control study is being conducted at California Men's Colony—East Facility. Emphasis continues on the special treatment and custody of unusually violent individuals in adjustment centers and in the general population in the institutions.

The Management Services Division staff is responsible for general fiscal management including budget preparation and control, management analysis, prison planning, personnel management, procurement and services, departmental construction and maintenance supervision, the feeding program, and accounting.

The Research Division through its studies of inmate and parole population characteristics and performance provides important data for present and future institution and parole correctional programs by developing and testing specific types of correctional programs for specific types of inmates. During the past year, the Research Division supplemented its original Base Expectancy formula for measuring the parole performance potential of any group of inmates with a special "shorthand formula" to enable rapid evaluation of the entire inmate body. It also developed a Base Expectancy formula for women inmates.

The Conservation Division was established to provide for the central co-ordination and standardization of the conservation program. This program calls for the expanded utilization of inmates in conservation and further development of California's natural resources, working co-operatively with other governmental agencies.

The Correctional Industries Division, which is supported entirely from the Correctional Industries Revolving Fund, a working revolving fund, provides a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment to free society. The Correctional Industries program includes industrial and agricultural enterprises in all correctional institutions with the exception of the Medical Facility, Rehabilitation Center and Conservation Center.

The Adult Authority and the Board of Trustees, Institution for Women, are shown functionally within Departmental Administration.

Workload and administrative adjustments include the establishment of 0.5 clerical position in research to perform the clerical function transferred from Deuel Vocational Institution and the reduction of 1 clerical position in records based upon reorganization and more efficient operation.

Four positions are transferred from the felon narcotic parole unit as an organizational change to bring the services performed by these positions under the central office administration rather than detached to other units. The 1 clerk transferred to management services will perform the accounting function, and the 1 professional and 2 clerical positions transferred to research will continue the felon narcotic research program.

Seven positions are transferred from administration, 4 from records to paroles and 3 from research to the Medical Facility. The 4 clerks from records transferred to the parole division will be reclassified to records officers and placed in the 4 existing parole regions to maintain the parole records in each region. The 3 positions for Medical Facility merely reflect the staff necessary to operate the portion of the research function which has been decentralized to this institution.

A total of 0.5 new position is proposed for the 1963-64 fiscal year. This is composed of 2 temporary help blankets, 0.2 for the Management Services Division to provide for workload adjustments, and 0.3 for the Research Division for clerical work on various special studies and emergency reports.

ADULT AUTHORITY

Main Office at Sacramento

GENERAL ANALYSIS

Objectives

The Adult Authority protects society by setting terms for adult male felons and by the careful selection of those to be released on parole.

Program and Performance

The Adult Authority, composed of 7 members appointed by the Governor for a term of 4 years, is the term-fixing and parole-granting agency in California for the adult male felons. The Authority is fundamentally concerned with rehabilitation of adult male felons and with the release of these individuals at a time which is compatible with the interests of both the inmate and society.

The Adult Authority acts as the Advisory Pardon Board to the Governor on matters of executive clemency as well as assuming responsibility for investigating and reporting to him on condemned cases. The chairman of the Adult Authority serves on the State Board of Corrections.

The Adult Authority meets at each of the several state co rectional institutions regularly and conducts hearings by orga izing into panels for the purpose of fixing terms, granti paroles, determination and forfeiture of credits, and restorati of certain civil rights requested by inmates.

The Authority meets weekly to consider reports and recor mendations submitted by the Parole and Community Servic Division concerning revocation of parole, restoration of certa civil rights requested by parolees, reinstatements, and refixi terms of parolees. The Adult Authority grants parole to t nonfelon narcotic addicts committed to the Department of Co rections.

During the 1961-62 fiscal year, the Adult Authority heard total of 29,155 cases. It is estimated that a total of 32,49 cases will be reviewed by the Board during the 1962-63 fisc year and 36,348 cases in 1963-64.

PAROLE AND COMMUNITY SERVICES DIVISION

GENERAL ANALYSIS

Objectives

The objective of the Parole and Community Services Division is the protection of society by supervising men released from prison and assisting them to fully readjust to life in the community. More than 90 percent of the men released from prison are released to parole supervision.

Program and Performance

The Parole and Community Services Division supervises all adult males released from California prisons to parole programs in this State. In addition, it supervises men released from prisons of other states to parole programs in California, just as other states supervise California parolees residing there.

This division has its headquarters in Sacramento and 23 field offices throughout the State. For administrative purposes, the State is divided into 6 regions. The regular felon parolee population is administered in 5 regions of approximately 2,000 cases each; and the nonfelon parole program is administered from Los Angeles.

The work of the parole agent consists of investigating the proposed programs for parolees; assisting the parolee in vocational guidance, job placement, and counseling on personal problems; appraising the parolee's behavior, attitudes, work record, and associations; maintaining contact with other law enforcement agencies; and protecting the interests of society by taking the parolee into custody if he shows evidence of becoming a threat to the community.

Parole agents are budgeted on the basis of an overall ratio of 55 parolees per 1 professional employee. All professional employees, except the chief, deputy chief, and the interstate unit are included in computing the ratio.

As an aid to supervision, the division operates out-patient psychiatric clinics in Los Angeles and San Francisco. The Los Angeles facility serves a large portion of Southern California. The clinics provide professional psychotherapy to parolees with emotional problems. Clinic staff also provides emergency psychiatric evaluations of parolees, consults with parole agents, and participates in the training of agents.

Department of Corrections

DEPARTMENTAL ADMINISTRATION—Continued

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 61-62 (Filled)	62-63 (Auth.)	63-64 (Auth.)	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	

PAROLE AND COMMUNITY SERVICES DIVISION—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

In addition to the regular supervision of parolees, the division operates 2 research projects designed to discover more effective methods of parole supervision. The Special Intensive Parole Unit continues to evaluate the results of giving more intensive and specialized supervision. In its current phase, the unit is testing the effect of assigning specific groupings of parolees to selected parole agents. The Narcotic Treatment Control Project is a research design for the supervision of former felon narcotics addicts released to the community after serving their prison sentence. During the 1963-64 fiscal year, the division will continue to operate 4 field units supervising a total of approximately 770 parolees, all of whom were once narcotic addicts. Three of the field units are located in Los Angeles, where the problem is most acute, and 1 is located in the San Francisco-Oakland area. The first phase of the project is intensive supervision of small 30-man caseloads made up exclusively of former addicts by agents specially trained to work with them. The second phase is frequent chemical testing of the parolee by anti-narcotic injections which will disclose any recent use of addicting narcotics. The third phase is the provision for return of the parolee to special detention treatment units at San Quentin, the California Institution for Men and the Institution for Women when appropriate.

In the latter part of the 1961-62 fiscal year the Parole and Community Services Division started receiving nonfelon narcotics addicts committed to the Department of Corrections in accordance with Chapter 850, Statutes of 1961, who were confined in and paroled from the California Rehabilitation Center and its branches. The treatment and control of such narcotic offenders is on a budgeting ratio of 25 parolees per 1 professional employee. This ratio will provide the close supervision and treatment setting necessary for the control and rehabilitation of these non-felon addicts.

During the 1962-63 fiscal year, the Parole and Community Services Division established 2 additional parole regions, 1 for regular felon parole administration, and 1 for nonfelon parole administration. The new regular parole region is located in the Los Angeles area to cover the heavy concentration of parolees in that part of the State, and the nonfelon region is a statewide unit administering the parole program for parolees released from the California Rehabilitation Center.

Workload and administrative adjustments in this division are based on increased population and corresponding formula computations. The 1 clerk in administration is established to meet the increased personnel office workload created by the increased number of parole agents. The 1 parole agent for the felon narcotic parole unit is provided for the increased bed space at the Narcotics Treatment Control Project where he will assume a caseload of 20 addicts for counseling and rehabilitative purposes as a part of the special detention treatment unit at Chino.

During the 1962-63 year 2 new parole regions were administratively established to create more efficient administration of regions which will supervise about 2,000 parolees each. To provide positions to staff the new regions 2 parole agent IV and 1 parole agent III were established administratively with a corresponding reduction in parole agent I to maintain the proper number of parole agents based on formula. Also established was 1 parole agent IV as chief of 1 of the existing 4 regions, and to keep within the accepted formula 1 parole agent I was correspondingly abolished.

One parole agent I in the nonfelon narcotic parole unit was established in the 1962-63 year based on increased population, while 25 parole agents and 7 clerical positions in the regular parole unit are administratively established through formula computations based on increased population.

The reduction of 0.2 temporary help is made as a workload adjustment.

The transfers of authorized positions are discussed under the administration section of this budget and reflect organization changes for more efficient operation.

There are 97.3 new positions proposed for this division in 1963-64. Ninety of the positions are included based upon the formulae computations which are based on parole poulation increases.

Nonfelon Narcotic Parole Units:

Formulae: 1 agent per 25 parolees
1 clerk per 100 parolees

Parole agents	36
Clerical	9

Regular Parole Units:

Formulae: 1 agent per 55 parolees
1 clerk per 188 parolees

Parole agents	35
Clerical	10

The remaining 7.3 positions are comprised of the 1 clerk for administration and the 1 parole agent for the felon narcotic parole unit administratively established and now proposed to be made permanent. Two records officers and 3 clerical positions are requested to provide adequate records management at the regional level. Also 0.3 temporary help is included for emergency clerical assistance in the various districts.

BOARD OF TRUSTEES—CALIFORNIA INSTITUTION FOR WOMEN

Main Office in Los Angeles

GENERAL ANALYSIS

Objectives

The board protects society by the setting of terms for convicted adult female felons, the careful selection of those persons to be released on parole, and their proper supervision while on parole.

Program and Performance

The Board of Trustees—Institution for Women, is composed of 5 members of whom 3 must be women, is responsible for fixing the terms of adult female felons and granting or revoking paroles. The board also is responsibile for the supervision of women parolees through the Women's Parole Division. It also may advise the Director of Corrections on general policies affecting the California Institution for Women.

The board meets regularly, reviewing the individual cases and studying the histories of the women prisoners. A portion of the increased workload of the board is reflected in the increasing population of the Institution for Women, which has risen from an average of 864 in 1961-62 to an estimated 940 in 1962-63 and 1,125 in 1963-64 including the female nonfelons addicts at the Rehabilitation Center.

The remaining increased workload of the board is reflected in the increased parole population. Parole agents responsible to the board will supervise an average of 1,299 parolees in 1963-64 compared to an estimated average of 1,124 parolees in the 1962-63 fiscal year and an actual average of 932 in the 1961-62 fiscal year. Eight additional positions are included for this increased workload and are discussed below.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 61-62 (Filled)	62-63 (Auth.)	63-64 (Auth.)	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

Increased correctional effectiveness				0.1	2	2	–
Nonfelon narcotics addicts				–	3	8	–
Totals, Parole Agents				13.5	26	32	6 (24%)

Workload and administrative adjustments include the establishment of 1 administrative assistant in both years for necessary aid in the office work of the board. One clerical position has been reduced correspondingly. Also within the regular parole unit, 1 position has been administratively established based upon parole population increases, while 3 positions in the nonfelon narcotic parole unit are reduced based upon formula as the nonfelon addict parole population has not risen as rapidly as anticipated.

All 8 proposed new positions are in accordance with the formulae based upon parole population. These include 5 parole agents and 1 clerk for the nonfelon addict parolees, and 2 parole agents for regular parole supervision.

COMMISSION ON PROBLEMS OF INSANITY IN CRIMINAL CASES

Objectives

Broad objectives include study on problems of insanity relating to criminal offenders. Distinction is made in assignment of the problem between procedural and substantive aspects. Recommendations aimed at improving laws relating to procedures and the criminal responsibility of persons afflicted with mental diseases or disabilities are primary goals.

Program and Performance

This commission, created by Executive Order of the Governor on May 4, 1960, was divided into 2 special commissions of 5 members each. The commission is authorized to make progress and interim reports on such subjects within the general scope of its assignment and at such times as may be deemed appropriate by said commission.

The commission will terminate on June 30, 1963.

The administrative adjustment in 1962-63 is the reduction of 1 project director from Personal Services and the inclusion of the same amount of money in operating expenses for consultant services to perform the same function.

GENERAL ANALYSIS

Objectives

The Conservation Center and branches have as their objectives the confining and rehabilitation of male offenders by training and employing them in natural resources and conservation practices.

Program and Performance

The Conservation Center and its branches were authorized under provisions of Section 6200 to 6208 of the Penal Code. The center is located on 1,120 acres in Lassen County, approximately 8 miles southeast of Susanville. Architectural plans for the Sierra Branch, near Jamestown, in Tuolumne County, have been developed and working drawings are being prepared with all planning designed to open the institution in February 1965. The Conservation Center and Sierra Branch are each being constructed as permanent medium-minimum security facilities for 1,200 inmates divided into two 600-inmate units. One unit will house medium security inmates and the second unit will house minimum custody inmates.

The Conservation Program will continue to absorb additional existing operations under its jurisdiction in the 1963-64 fiscal year. In 1962-63 the camps previously administered by Folsom were transferred to the Conservation Program. The present Chino Branch Rehabilitation Center facility with 640 beds capacity and the conservation camps presently administered by Institution for Men will be supervised by the Conservation Program in the budget year.

Department of Corrections

CONSERVATION PROGRAM—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The program for the center and branches will be to receive inmates from the guidance centers and more secure prisons and train them in the skills necessary for their assignment to conservation camps operated in co-operation with the Division of Forestry, Division of Highways, and the United States Forestry Service. One hundred inmates housed in each of the permanent conservation facilities (in 1963-64, the Conservation Center and Chino Branch) will be assigned to the Division of Forestry for daily work projects. The work program for these inmates will be the same as in camps.

The staffing of the Conservation Center utilizes the new class of correctional program supervisor to provide more adequate custodial control and treatment in a minimum custody setting through closer inmate-staff relationships. The correctional program supervisor class combines in 1 person the duties and functions of a correctional officer and a number of the duties of a correctional counselor.

Conservation Center

During 1962-63 a position of correctional counselor III and 2 positions of correctional counselor II were established administratively to provide supervision in classification and casework.

New positions proposed in 1963-64 include the three positions administratively established in 1962-63 and discussed above, 1 correctional program supervisor and 2 correctional officers based on revised custodial post assignment calculations. Also proposed is a total of 2 man-years of overtime for the camps supervised from the center. In 1963-64 funds for contractual services with the Division of Forestry have been reduced. These funds will be made available to the Division of Forestry to establish permanent staff for training fire fighters at forestry training centers.

Sierra Branch

A total of 5 new positions is proposed for this institution based on the proposed opening in February 1965. Preliminary to opening a permanent institution a great many activities must be carried on—outlining of post assignments, preliminary recruiting, ordering of equipment and establishing a business service office to be prepared to operate the facility when it is complete.

These 5 proposed new positions are comprised of a deputy superintendent and a clerk effective February 1, 1964 to head up the organization and development of the institution; and 1 procurement officer, 1 accounting officer and 1 clerk effective April 1, 1964 to assist the presently authorized business manager in setting up the necessary business and administrative services for the anticipated opening.

Southern Branch—Chino

As anticipated in the 1962-63 Governor's Budget the branch facility at Chino will be operated as a part of the conservation program in 1963-64. During 1962-63 it was operated as a branch of the California Rehabilitation Center. To reflect its new function 66 positions are transferred from the Rehabilitation Center to the conservation program on July 1, 1963.

In addition a total of 90.9 new positions are proposed to fully staff the institution for its new function. The need for these positions is calculated on generally accepted standards of staffing at comparable institutions.

The new positions proposed are classified by function as follows:

Executive	1
Business services	12.1
Custody and treatment	59.2
Medical	7.5
Feeding and clothing	6.1
Plant operation	5
Total	90.9

In addition to the transfers and new positions above requested at the branch institution a total of 52.9 positions are to be transferred from the camps now operated by the Institution for Men to the jurisdiction of this branch.

CORRECTIONAL INSTITUTION AT TEHACHAPI—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

Objectives

The California Correctional Institution at Tehachapi has as its objective the protection of the public by confining male offenders for training and treatment.

Program and Performance

The California Correctional Institution at Tehachapi is authorized by Section 2048 and 5003 of the Penal Code. The present institution of 600 population has been operated as a branch of the Institution for Men. On July 1, 1963 it will terminate this branch status and become a separate institution. A permanent medium security facility for 1,200 inmates is planned for construction contiguous to the present institution.

Correctional treatment is designed primarily for carefully screened male offenders capable of profiting by the program and accepting its responsibilities. It covers a field of vocational and academic instruction, and industrial activities along with full participation in the group counseling program. Institution population may be described in general by the following characteristics: median age 33; 49 percent prior prison commitments; 12.5 percent prior escape records; offense groupings will include about 30 percent narcotic; 6 percent sex crimes; 13 percent forgery and illegal checks; 17 percent burglary; and 14 percent robbery.

Release of inmates from this institution is as follows:

Paroles and Discharges:	1963-64
Adult Felons	360

Workload and administrative adjustments for 1963-64 consist of the transfer of personnel of the Tehachapi Branch, Institution for Men (127.3 positions) to the new entity, the Correctional Institution at Tehachapi, and the reduction of 3.3 temporary help custody positions due to decrease in population.

GENERAL ANALYSIS

Objectives

The Correctional Training Facility protects the public by confining male prisoners under medium custody and treating them to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

This institution is planned to operate with an average population of 3,355 during the 1963-64 fiscal year. Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, plant maintenance training, and one of the largest agricultural enterprises in the department. Group counseling, religious programs, and recreational activities also play an important role. While the institution and programs are designed for felons, adult vocational and academic education courses are emphasized in the North Facility for the 690 Youth Authority wards that are housed there along with 510 of the younger adult felons.

One cell wing of the central unit is used as an adjustment center, housing inmates with severe behavior problems.

Institution population in 1963-64 may be described in general by the following characteristics:

Median age 26 years; 28 percent prior prison commitments; 22 percent prior escape records; offense groupings will include about 26 percent narcotic, 20 percent burglary, 23 percent robbery, and 10 percent forgery and illegal checks.

The institution is also responsible for the administration of a conservation camp program. During the 1963-64 fiscal year this will consist of 4 permanent state conservation camps with inmate population totaling 300 men. In addition to the permanent camps, a mobile camp with 40 inmates is operated for general conservation work. The camps, manned by specially selected and trained minimum custody inmates, serve the public in the conservation of the State's natural resources through fire fighting and reforestation work. This provides valuable work and excellent training experience for the inmates.

Release of inmates from this institution is as follows:

Paroles and Discharges:	1961-62	1962-63	1963-64
Adult felons	1,532	1,465	1,305
Youth Authority	735	810	810
Totals	2,267	2,275	2,115

Institution Operations:

1962-63 workload and administrative adjustments reflect a change in the organization and functions of the Correctional Training Facility and a proper staffing for those functions. One and two-tenths man-years of temporary custodial help were provided to staff for an overcrowded situation that was aggravated by the inclusion of a more volatile type of inmate in the population. A correctional counselor was added for program staffing at the South Facility and a new position proposed in 1963-64 makes it permanent. This was offset by reducing 1 shift coverage on a post assignment which allowed 2 correctional officer positions to be abolished. An intermediate clerk was added based on normal staffing formulas in classification and parole. A correctional counselor II position was reclassified to program administrator to head up and give direction to the Adjustment Center which is assuming more importance with the type of inmate housed at this institution. The program administrator position is shown in 1963-64 as a proposed new position to make the reclassification permanent. A correctional counselor position was added

Department of Corrections

CORRECTIONAL TRAINING FACILITY—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

to reflect the workload in the Adjustment Center. This position is also presented as a proposed new one in 1963-64 to make it permanent. An additional 0.3 time position for forest fire suppression work was also added to meet the demands for this service. A position of auto mechanic was abolished as it is no longer needed.

Adjustments in 1963-64 reflect the workload adjustments in 1962-63 including the abolishment of 2 correctional officers at the South Facility, the auto mechanic and a correctional counselor II. Positions to be abolished for the first time include an intermediate clerk for the mail room and a correctional counselor I and clerk based on estimates of a lower workload in classification and parole.

The 4 new positions proposed in 1963-64 include the continuation of the correctional counselor II added administratively in 1962-63 at the South Facility, the continuation of a program administrator at the Adjustment Center reclassified administratively in 1962-63, and the continuation of the correctional counselor I position added in 1962-63. One additional correctional officer position to more adequately man the Adjustment Center is requested in 1963-64.

North Facility:

Administrative changes in the staffing of the North Facility include one professional and one clerical position for classification and parole functions, based on accepted standards for those activities.

These 2 positions are requested as proposed new positions for 1963-64 based on the same type of workload computation.

GENERAL ANALYSIS

Objectives

Deuel Vocational Institution protects the public by confining youthful male offenders and by training and treating them for return to society.

Program and Performance

The Deuel Vocational Institution provides custody, care, industrial, vocational, and other training, guidance and reformatory help for young men too mature to be benefited by the programs of correctional schools for juveniles and too immature for confinement in prisons.

Treatment is designed to rehabilitate young offenders committed either to the Youth Authority or to the Department of Corrections. Academic and vocational instruction along with industrial work and training are emphasized. A research study is being conducted by the Pilot Intensive Counseling Organization (PICO) to determine the results of intensive counseling. A special program for young men with severe behavior problems is operated in the adjustment center. A group counseling program, staffed generally by volunteer leaders under trained management, provides a media wherein the majority of the inmate population have an opportunity to review with other inmates the causes of delinquency. A Reception-Guidance Center for Youth Authority wards is operated within the institution.

The adult felon institution population may be described in general by the following characteristics: 19.6 percent under 21 years of age; median age 23.4 years; 4.8 serving life sentences; 18.4 percent prior prison committments; offense groupings include 26.8 percent robbery; 10.1 percent forgery and illegal checks; 19.1 percent burglary; and 17.1 percent narcotics.

Release of inmates from Deuel Vocational Institution is as follows:

	1961-62	1962-63	1963-6
Paroles and Discharges:			
Adult felons	326	277	225
Youth Authority	775	790	790
Total	1,101	1,067	1,015
Reception-Guidance Center:			
Intake for processing	2,415	2,591	2,749

Workload and administrative adjustments for 1962-63 includ an increase of 2 custody positions to provide additional sic leave relief, 1 professional position in the Adjustment Cente based upon accepted staffing standards, and 0.1 position in Business Services to cover accrued overtime. One clerical positio in the Reception-Guidance Center is abolished in 1962-63 an 1963-64 based upon formula computation, and the transfer o 0.5 clerk to departmental administration is effective in bot years based on removal of the research clerical function fro this institution. One clerical position is abolished in bot years in Education because of assumption of property contro duties by the business office.

For the 1963-64 fiscal year, 2 custody positions are requeste in order to provide sick leave relief at the level indicated b prior year experience. One dentist and 1 clerk are requested i accordance with formula for the Reception-Guidance Center and 1 Correctional Counselor II is proposed pursuant to th accepted Adjustment Center staffing pattern. In addition, 0.1 position of temporary help is requested for Business Service based upon past experience, and 0.1 position of overtime fo group counseling is requested based upon formula computation

STATE PRISON AT FOLSOM—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

Objectives

The State Prison at Folsom protects the public by confining chronic male adult offenders, 8 percent of whom require maximum or close custody supervision. The program is designed to protect the public through a treatment process to bring about an adjustment which will permit their safe release to the community.

Program and Performance

This institution was established in 1880 on a 1,700-acre site in Sacramento County. The institution is expected to confine an average of 2,560 inmates in 1962-63 and 2,400 inmates during 1963-64.

Correctional treatment designed to rehabilitate the inmate includes academic and vocational training, industrial work and training, plant maintenance work and training, group counseling, medical and dental care, religious, library and recreational activities. Overcrowding of the institution will continue to exist during 1963-64 as well as during 1962-63 creating an idleness problem. A special unit, the 138 capacity adjustment center, provides control and treatment of many of the department's most severe behavior problem cases.

The institutional population may be described in general by the following characteristics: Median age, 38; 86.5 percent prior commitments; 33.5 percent prior escape records; 6.8 percent serving life sentences. Offense groupings include 24.3 percent robbery; 6.4 percent homicide; 18.3 percent burglary; 18.3 percent narcotics; 9.8 percent forgery and checks; 3 percent assault; 1.7 percent rape; 3.6 percent thefts except auto; 2.2 percent auto thefts; 3.8 percent escapes; 1.8 percent habitual criminals; 3.4 percent other sex offenders; and 3.4 percent other crimes.

Release of men from this institution and its camps is as follows:

	1961-62	1962-63	1963-64
Paroles and discharges	1,289	1,000	935

Workload and administrative adjustments in 1962-63 result in an increase of 1 clerical position in business services and a decrease of 4 custody positions, based on formula computations for these areas. An increase of 2.7 positions in the departmental bus operation unit is the result of the opening of the Conservation Center in February 1963. The latter positions are discussed in Part II of the budget for 1963-64.

Seven custody positions and 1 professional and 1 clerical position in classification and parole will be abolished in 1963-64 based upon formula computation. One-tenth position of group counseling—temporary help is requested based upon formula computation.

GENERAL ANALYSIS

Objectives

The Institution for Men has as its objective the protection of the public by confining for training and treatment the more tractable young male offenders with the majority under minimum custody.

Program and Performance

This institution was established in 1941 on a 2,500-acre tract south of Chino in San Bernardino County. Both temporary and permanent facilities of the main institution will house an average of 1,510 inmates during the 1963-64 fiscal year.

The Reception-Guidance Center receives all new male felon and nonfelon addict commitments from the southern counties. It will operate at an average population of 565 during the 1963-64 fiscal year and will process an estimated 3,550 cases.

Correctional treatment at the main institution is designed primarily for carefully screened young male offenders capable of profiting by the program and accepting its responsibilites. It covers a broad field of vocational and academic instruction, plus a wide variety of industrial activities, including an extensive agricultural program.

The man institution population, excluding camps, may be described in general by the following characteristics: median age is 30 years; 33 percent have prior commitment records; offense groupings will include about 29 percent forgery and illegal checks, 24 percent burglary, 20 percent robbery, and 7 percent narcotics.

The institution at present also administers 7 year-round conservation camps in co-operation with the state conservation program and the State Division of Forestry. The camps will be transferred to the jurisdiction of the Conservation Program in the 1963-64 fiscal year. All budgetary information is contained under that program.

The Tehachapi institution was opened in 1955, after the earthquake damaged facilities were repaired. Effective July 1, 1963, the branch will become a separate institution, the California Correctional Institution at Tehachapi. The program and support expenditure detail for the institution are shown in a separate budget.

The institution provides certain services to the Youth Trai ing School and the Narcotics Rehabilitation Center and it branches.

The processing of nonfelon addicts at the Reception-Guidanc Center and the use of Tehachapi for the treatment of nonfelo addicts will terminate when the narcotics programs are tran ferred to the California Rehabilitation Center.

Release of men from this institution is as follows:

	1961-62	1962-63	1963-64
Paroles and Discharges:			
Institution	1,772	1,810	1,440
Tehachapi:			
Felons	274	300	– [a]
Nonfelon addicts	4	170	– [a]
Totals	2,050	2,280	1,440
Reception-Guidance Center:			
Intake for Processing:			
Adult felons	3,403	3,550	3,550
Nonfelon addicts	724	–	–
Totals	4,127	3,550	3,550

Workload and administrative adjustments for the 1962-63 yea include the addition of 1 correctional officer because of instit tional overcrowding, 1 professional and 2 clerical positions i classification and parole based on workload in accordance wit accepted formula computations, 1 clerk for inmate records pro essing in the Reception-Guidance Center based on an approve formula, and 1 position for emergency forest fire suppressio At the Tehachapi Branch 1 clerk in the narcotics unit is aut orized based on formula for classification and parole. Reductio in the 1962-63 fiscal year are 1 clerk at Tehachapi based o classification and parole formula and 1 staff psychiatrist due t inability to recruit and also the phasing out of the narcoti program at Tehachapi.

---

[a] Operated as a separate institution in 1963-64. See Correctional Institution at Tehachapi.

[b] To be transferred to the Conservation Program of the Department of Corrections in 1963-64.

[c] Excludes cost of operating Reception-Guidance Center, but includes cost of feeding, housing, medical and other expenses of th inmates being processed therein.

Department of Corrections

INSTITUTION FOR MEN—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Administrative adjustments proposed for 1963-64 include the abolishment of 3 custody positions based on reduction of overcrowding, and 1 professional and 5 clerical positions based on accepted formulas. One storekeeper and 2 cooks are to be transferred from the main institution to the Southern Conservation Branch Center at Chino. Inmates in the facility now to be known as the Conservation Center—Southern Branch were fed from the main institution kitchen. Two cooks were established for this workload. A kitchen is now to be operated at the new branch and the cooks will be transferred there. The same is true of the warehousing operation. The entire complement of positions under Camp Operations are to be transferred to the jurisdiction of the Conservation Program. The Tehachapi Branch is to be established as a separate institution, the Correctional Institution at Tehachapi, and all positions are to be transferred from the jurisdiction of the Institution for Men to the new facility.

One and one-half new positions are proposed for 1963-64. They are 0.5 dentist and 1 clerk for the Reception-Guidance Center based on formula.

GENERAL ANALYSIS

Objectives

The Medical Facility is the psychiatric, diagnostic, and treatment center of the department. It confines and treats adult male felons who are mentally ill or who have severe mental or emotional disorders. These include psychotic, severe neurotic, and antisocial character disorders. A small number of recalcitrant tuberculars are also housed.

A reception-guidance center located in facilities adjoining the main institution receives adult male felons from the 47 northern counties for diagnosis, classification, and recommended institutional placement. Also it receives male parole violators returned to prison.

Program and Performance

Group psychotherapy is employed as a major treatment method along with programs of academic and vocational education, plant maintenance work and training, medical and dental care, occupational therapy, library, recreation, and religion which are offered to all inmates to the degree to which they can participate. These programs are designed to provide intensive treatment for felons afflicted with major mental illnesses (psychoses) and severe emotional and personality disorders. A sizeable number of problem cases are also admitted expressly for psychiatric evaluation and recommended disposition. Although the overwhelming majority are adult felons, there is a small number of wards from the Youth Authority and recalcitrant tuberculous misdemeanants from the Department of Public Health.

The institution population may be described as follows: Median age, 31 years; 39.8 percent prior prison commitments; 4.7 percent prior escape record; offense groupings include 15.7 percent sex offenders; 14.9 percent burglary; 17.4 percent

---

[a] Excludes cost of operating reception-guidance center, but includes cost of feeding, housing, and other expenses of inmates being processed therein.

MEDICAL FACILITY—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FRO 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

robbery; 12.8 percent forgery and checks; 10.3 percent narcotics, and 10.3 percent homicide.

The population may also be described in terms of medical classifications as follows:

Psychiatric observation cases for diagnosis and evaluation for the Adult Authority, courts or other institutions, 60;

Active treatment cases (consists of patients with treatable mental and emotional disorders), under intensive group psychotherapy, 585;

Care cases for continuous treatment—300. These include sexual deviates (including homosexuals, voyeurs, pedophilics, transvestites, etc.), 80; psychotics, 160; mental defectives, 20; severe neurological, 40;

Administrative cases—105. These include those awaiting transfer, parole, etc., 55; departmental policy cases, 20; tuberculosis, 30;

Workers (skilled craftsmen, cooks, clerks, nurses, technicians, etc.), assigned primarily for maintenance of the institution, 300. All of these men receive group counseling.

Release of inmates from this institution is as follows:

Paroles and Discharges:	1961-62	1962-63	1963-64
Adult felons	333	320	320
Youth authority	33	30	30
Nonfelon addicts	–	9	11
Totals	366	359	361
Reception-Guidance Center:			
Intake for processing	3,818	3,950	4,200

Workload and administrative adjustments in the 1962-63 fis year include the establishment of 0.2 temporary help for inm trust account workload; 0.1 overtime for a nalline testing search project being conducted at this institution; and 1 corr tional officer and 0.4 temporary help for the farming operati at Sonoma which are fully reimbursed through the sale or u of farm products.

Reductions in authorized positions include 2 correctional o cers due to a reduction in overcrowding; and 2 professional a 1 clerical position in the reception-guidance center based workload formula for inmate processing.

Also 3 positions are transferred from Departmental Admini tration to this institution in the 1962-63 year, 2 of which a to maintain inmate records transferred to medical facility, a 1 research position to perform a function transferred fro administration.

A total of 4.9 new positions is proposed for the 1963-64 fisc year. These include 0.4 temporary help in the accounting offi to meet inmate trust account workload; 1 dentist based on r ception-guidance center intake formula; 0.1 overtime for grou counseling in accordance with the increased counseling activity 1 correctional officer and 0.4 temporary help for farming oper tions at Sonoma State Hospital which are fully reimbursed fro these surplus farm products sold or consumed; and 1 profe sional and 1 clerical position in the reception-guidance center fo processing based on workload formula.

GENERAL ANALYSIS

Objectives

This facility protects and serves the public by confining male prisoners under medium custody and treating them to permit their safe release to the community.

Program and Performance

East Facility of the Men's Colony is a permanent medium security institution for 2,400 inmates located adjacent to the minimum security West Facility.

This institution is designed to make possible a more personal relationship between the inmate and the treatment staff, and, at the same time, effect economies by using central facilities for service and supply. It contains 4 units of 600 men each. Housing, feeding, recreation, education and group counseling facilities are provided for each unit.

Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, and plant maintenance training.

The staffing of the institution has utilized the treatment team concept. A program administrator is in charge of each of the four 600-man units and supervises both treatment and custodial personnel assigned to the unit.

The institution's population may be described in general by the following characteristics: Median age about 31 years, 42 percent with prior prison commitments, 2.2 percent serving lif sentences; offense groupings will include about 9.9 percent se offenses, 12.5 percent forgery, 4.8 percent homicide, 17 percen burglary, 16.9 percent robbery, and 25.1 percent narcotics.

Release of inmates from the Men's Colony—East Facility i as follows:

	1961-62	1962-63	1963-6
Parole and Discharges:			
Adult felons	264	800	800
Nonfelon addicts	–	54	110

Workload and administrative adjustments in the 1962-63 fisca year include an increase of 0.5 military leave position to mee anticipated needs and 1 additional clerk in classification an parole based on formula. Two medical assistant positions are t be eliminated in both 1962-63 and 1963-64 because of changes i post assignments. Two research unit positions are to be elimi nated in 1963-64 as the project for which they are authorize will terminate June 30, 1963.

In 1963-64, 3.3 new positions are proposed. These include 0. overtime help for both escapes and emergencies, and militar leave; 0.3 overtime for group counseling; and 2 clerical position for classification and parole based on formula computation.

GENERAL ANALYSIS

Objectives

The California Men's Colony—West Facility protects the public by confining aged, infirm, and other handicapped male felons and treating and training them to permit their safe return to the community.

Program and Performance

The Men's Colony—West Facility was established in 1954 on a 220-acre site in the hospital area of Camp San Luis Obispo. The institution will house an average of 1,450 men in 1962-63 and 1,425 in 1963-64.

The correctional program is designed primarily for the retraining, rehabilitation and return to free society of the elderly and infirm offender. This program includes a small vocational program, an academic program in conjunction with the San Luis Obispo School District, group counseling, organized recreation, Alcoholics Anonymous assistance, arts and crafts training, and religious guidance.

In addition, the institution operates one permanent state conservation camp with an inmate population of 80 men. This camp, manned by specially selected and trained minimum custody inmates, serves the public in the conservation of the State's natural resources through fire fighting and reforestation work.

The institution's population may be described in general by the following characteristics: median age about 53 years, 60 percent with prior prison commitments, 6 percent serving life sentences; offense groupings will include about 25 percent sex offenses, 17 percent forgery, 13 percent homicide, 10 percent burglary, 7 percent robbery, and 12 percent narcotics. Some are blind, paralyzed, senile or amputees.

Release of inmates from the Men's Colony—West Facility is as follows:

	1961-62	1962-63	1963-64
Parole and discharges	730	755	740

A temporary help position, financed from project funds, is authorized for the 1962-63 fiscal year for maintenance and construction projects; 1 correctional officer is transferred to camp operations and reclassified to correctional sergeant; and 0.3 temporary help position is abolished in administration as a result of the proposed new intermediate account clerk position.

An intermediate account clerk is proposed for 1963-64 to handle workload in the inmate trust accounts, and 0.1 group counseling overtime is included to meet the need for increased counseling activity.

GENERAL ANALYSIS

Objectives

The Californian Rehabilitation Center facility and its program serve to protect society and control addiction through the removal of drug addicts from the community and placement in facilities where they receive intensive rehabilitative treatment. An extensive research program will be conducted to inquire into the causes, effects and possible cures of drug addiction.

Program and Performance

The narcotics rehabilitation program is authorized under Section 6550 of Chapter 12 of the Penal Code. Persons convicted of any crime in a municipal or justice court where the judge thinks that the defendant may be addicted or in danger of becoming addicted to narcotics are ordered to the Superior Court for hearing to determine if such is in fact true; and men and women convicted of certain felonies but not sentenced may be ordered into the program, if the judge feels they are fit subjects for the program.

All narcotic addicts handled under the California rehabilitation program are classified as nonfelon addicts to differentiate them from the regular inmate population. This applies to volunteers, misdemeanants, and nonsentenced felons as well as those who may be committed under the dangerous drug laws which will be considered during the 1963 Legislative Session.

Correctional programs designed to alleviate the inmates' drug addiction problem include specific programs of group and individual treatment; community living group treatment for the majority of the addict inmates; academic and vocational education; medical and dental care; a physical fitness and recreational program; industrial work and training; plant maintenance; and religious and library activities.

The drug addict inmate will be assigned to work-training or school for half the day; be involved in group treatment for a quarter of the day; and the remaining quarter-day will be utilized to meet the physical fitness, individual counseling, and other requirements of the inmate. The treatment program will be directed at relief of the psychological and social problems of the individual which may well be a part of the cause of drug addiction. The rehabilitative program must be continuous and provision is made for intensive supervision and continued treatment on parole and for quick return to the Rehabilitation Center for further treatment whenever a relapse into addiction is imminent. The Rehabilitation Center treatment program will be accompanied by an extensive research program into the causes of and more positive treatment for drug addiction.

This 2,300 inmate institution will be activated in January 1963 and will be comprised of a men's unit and a women's unit with central services considered as a portion of the men's unit. It is planned to move the women nonfelon addicts from temporary housing at the Institution for Women to the Rehabilitation Center early in the 1963-64 year.

---

[a] Does not include costs of supporting nonfelon addicts in other institutions or on parole.

REHABILITATION CENTER—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The present Chino Branch of the Rehabilitation Center will convert its function from addict rehabilitation to the conservation program early in the 1963-64 fiscal year.

Release of inmates from this institution is as follows:

Paroles and Discharges:	1961-62	1962-63	1963-64
Center	–	237	2,599
Chino Branch	–	455	–
Totals	–	692	2,599

The workload and administrative adjustments reflect the reduction of certain positions at the center and at the Chino Branch as well as the transfer of positions from the Institution for Women and interunit transfers within the center itself.

Adjustments in the men's unit include the reduction of 2 clerks in 1962-63 and 5 in 1963-64 in the reception unit because of a shortening of the stay of the addicts in the reception-guidance process at this institution. One maintenance position is deleted as the function is to be performed by a federal agency. Added to the men's unit in 1963-64 are the 11 positions for central services transferred from the women's unit. These are comprised of 1 business office clerk, 5 medical and 5 classification and parole positions.

The adjustments in the women's unit include a transfer of 42 positions from the Institution for Women in 1963-64 along with a transfer of the 11 aforementioned positions to the men's unit.[b]

The 1962-63 workload adjustments at the Chino Branch show a reduction of 30 positions composed of 25 custodial personnel and 5 classification and parole positions. These positions were abolished temporarily due to an estimated decrease in population at this branch. The Chino Branch is to be converted to its originally intended use, a branch of the conservation program and a transfer of existing authorized positions in 1963-64 will reflect the change in function. One hundred thirty-nine and five-tenths of the 205.5 authorized positions will be transferred to the Rehabilitation Center at Corona while 66 positions will be transferred to the Conservation Program as the nucleus of the Conservation Program at this branch.[c]

A total of 74.4 new positions is proposed for the Rehabilitation Center in the 1963-64 fiscal year. These positions are broken down between the men and women's unit and are further classified by function as follows:

Men's Unit:		
Medical	14	
Classification and parole	1	
Education	4.4	
Maintenance of structures	1	
Total, Men's Unit	20.4	
Women's Unit:		
Custody	42	
Care and treatment	5	
Education	2	
Feeding	5	
Total, Women's Unit	54	
Total, Rehabilitation Center		74.4

These positions are proposed in accordance with generally accepted staffing patterns and formulae.

GENERAL ANALYSIS

Objectives

The State Prison at San Quentin protects the public by confining adult male felons and some Youth Authority wards under close-medium security and treating them to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

The institution is expected to confine an average of 4,003 inmates in 1963-64. Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, group counseling, medical and dental care, and religious, library, and recreational activities. Idleness due to overcrowding will be reduced in 1962-63 and 1963-64 fiscal years because of a decrease in population.

A special unit at San Quentin provides custody of inmates sentenced to death and provides for their execution under the death penalty. Another special unit, the 101-capacity adjustment center, provides control and treatment for inmates with severe behavior problems.

The Narcotics Treatment Control Project will provide a half-day treatment and a half-day work program for an average population of 20 inmates.

A reception-guidance center is operated to process parole violators. Estimated cases to be processed at this center are 2,125 in the 1962-63 fiscal year and 2,225 in the 1963-64 fiscal year.

The adult felon institution population may be described in general by the following characteristics: median age 30.8; 43.1 percent prior prison commitments; 22.9 percent prior escape records; 5.9 percent serving life sentences; offense grouping will include 11.7 percent homicide; 22.3 percent robbery; 14 percent burglary; and 21.9 percent narcotic.

San Quentin is responsible for the administration of 8 year-round road and conservation camps, 1 mobile camp and 1 seasonal United States Forest Service camp. Two additional 80-man camps, Black Mountain and Konocti, will be activated in the budget year. The Konocti camp was approved for activation in 1962-63 but its opening has been delayed until the fall of 1963 because of construction delays. This will bring the year-end camp population to 801 inmates in 1963-64. These camps, manned by specially selected minimum custody inmate serve the public by aiding in the conservation of the State' natural resources through firefighting and restoration work The highway road camp inmates perform highway maintenanc and construction work in remote areas of Northern Californi This work provides valuable work and training experience fo the inmates.

Release of men from this institution and its camps is a follows:

Paroles and Discharges:	1961-62	1962-63	1963-6
Adult felons	1,682	1,053	1,54
Youth authority	27	–	–

Workload and administrative adjustments in 1962-63 amoun to a 1.2 net decrease in the number of authorized positions a this institution and its camps. This is composed of an additiona 3.2 custodial positions (2.2 to provide third watch security a the cotton textile mill, and 1 to provide temporary help fo guarding prisoners on trial in Marin County courts), 3 professional and 2 clerical positions at the Reception-Guidanc Center based upon formula computation, 0.3 overtime position for emergency forest fire fighting, and 1.3 temporary help, fir fighting in camp operations. These are offset by abolishing temporary help positions in custody, due to a decrease in overcrowded conditions, and 2 professional and 4 clerical position in Classification and Parole based upon formula computation

1963-64 administrative adjustments reduce a total of 6 existing positions and include: 1 professional and 2 clerical positions in Classification and Parole to be abolished based upon formula computation; and 3 custody positions to be abolished because of a decrease in overcrowded conditions.

Twelve and three-tenths new positions are proposed for this institution and its camps. Institution positions include 1 dentist 3 professional, and 2 clerical positions in the Reception-Guidance Center based upon accepted formula computations and 0.1 position for group counseling overtime also based upon accepted formula computation. Six and two-tenths positions are proposed for camp operations. These include 6 positions to staff the Black Mountain camp which will open in February 1964 and 0.2 position of overtime for a supervising camp cook based upon past experience.

GENERAL ANALYSIS

Objectives

The Institution for Women receives and confines all types of female prisoners committed to the Department of Corrections, including general felony cases, youth authority wards, narcotic commitments, mentally and emotionally disturbed under felony commitment, and recalcitrant tuberculous cases, treating them to permit their safe release to the community.

Program and Performance

The correctional treatment program is designed for the rehabilitation of women inmates. It includes courses of academic and vocational instruction, group psychotherapy and counseling, medical and dental care, library, and recreational activities. During 1961-62 the increased correctional effectiveness program was initiated. A reception-guidance center for 120 inmates is now under construction and is expected to be ready for occupancy on June 1, 1964. This unit will provide an adequate area for processing women through the classification and individual program procedures. There is also an active industrial project consisting of the manufacture of garments as well as sewing projects such as designing, dressmaking, alterations and tailoring. Laundry training, food service training, nurse's aide and medical technician training, and landscape and nursery training are also available for the inmates.

A study is made of all women entering the institution and a classification committee works with the inmate to develop an individual treatment program based on her physical and mental condition, aptitudes and skills, educational background, and social history.

There is an active program of work, education, and recreation in which every woman is required to participate daily. Individual and group therapy for the more seriously disturbed inmates is conducted by a staff of a psychiatrist and psychologists. The majority of inmates receive individual and group counseling which is conducted by other staff members.

During 1961-62 a narcotic rehabilitation unit was established to provide continuous rehabilitation and intensive treatment to nonfelon narcotic addicts. This unit will be transferred to th Narcotic Rehabilitation Center on July 1, 1963.

The present population of the institution may be describe in general as having the following characteristics: median age 32.3 years; 25.5 percent prior prison commitments; 3.4 percen life sentences; offense grouping includes 33.5 percent forger and illegal checks; 24.7 percent narcotics; 12.1 percent homicide, and 8.7 percent thefts other than auto thefts.

Release of women from this institution is as follows:

	1961-62	1962-63	1963-6
Paroles and Discharges:			
Female Felons	583	565	556
Narcotic Rehabilitation Unit	5	205	–

Workload and administrative adjustments for both 1962-6 and 1963-64 include the addition of 0.2 physician and surgeo formerly budgeted under operating expense for contractual services, the abolishment of 1.6 watchman positions which had bee authorized for the custody of a condemned prisoner and 1 clerical position in classification and parole based on formula computation. The transfer of the narcotics unit to the new Rehabilitation Center in Corona July 1, 1963 results in the transfer o 42 positions which were originally authorized for that functio but were used at the Women's Institution pending the openin of the new facility.

A total of 23.3 new positions are proposed to staff this institution's new Reception-Guidance Center which is scheduled t open June 1, 1964. These include 16.1 custodial positions, cooks for food preparation and dining in the unit, 2 clerica and 1.2 professional positions for clinical processing based o formula, and 1 stationary engineer for maintenance of the new structures. All of these positions are based on necessary pos assignments and accepted staffing standards and are schedule just prior to the opening of the new facility.

---

[a] Excludes cost of Reception-Guidance Center operation, but includes cost of feeding, housing and other expenses of inmates bein processed therein.

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART I—CONTINUING OPERATIONS

Objectives

The objectives of the Youth Authority are first, the protection of society by substituting for retributive punishment, training, and treatment directed toward the correction and rehabilitation of young persons declared wards for delinquent causes or found guilty of public offenses; and second, prevention of the occurrence of delinquency. In addition, the department encourages improvements in juvenile law enforcement and probation and increased use of county juvenile homes and camps.

Program and Performance

The Department of the Youth Authority was originally conceived as the Youth Correction Authority by the Legislature in 1941. Amendments to the original law in 1943 created the present Department of the Youth Authority and gave it responsibility for the administration of the State's correctional schools and parole program for youths. The law provides that commitments can be made to the Youth Authority by judges of the superior court sitting in juvenile or criminal court and judges of the municipal court after they have determined that the youth is under 21 years of age at the time of apprehension and that there is no program at the county level to meet the special needs of the individual.

The Director of the Youth Authority is the chief administrative officer of the department and Chairman of the Youth Authority Board. He is directly responsible for the management of the State's correction schools, reception center-clinics, youth conservation camps, and for the operation of field services and branch offices. He is responsible for the custody, care, treatment, training, discipline, welfare, and supervision of wards committed to the Youth Authority, whether in the institutions or on parole in the community.

The Youth Authority Board is concerned with the acceptance or rejection of wards committed to the Youth Authority and with the parole and discharge of wards. It also works with the director in the formulation of policies concerning classification, transfer, training, and treatment of wards.

The research division was authorized by the 1957 Legislature to provide the department with the means to conduct research into the fields of human behavior as related to its wards and in the specific field of delinquency, its causative factors, treatment, and prevention.

Research programs are now under way to test the effectiveness of psychiatric treatment in institutions, optimum parole caseloads base expectancy predictions, and other programs to aid in better measurements of existing programs and evaluation of proposed plans for improving the treatment of delinquent youth.

The research division also includes the records and statistics section which is responsible for population accounting for wards in institutions and on parole. This section also provides population forecasts used in planning for Capital Outlay and current operations.

The division of probation and delinquency prevention services conducts a program to develop an awareness of the value of local delinquency prevention programs and the need for adequate community services, and assists in improving them. Training programs are provided for probation officers; counties are assisted in developing plans for new homes, camps and juvenile halls; and publications are developed that are directed toward improving the quality of local services. The Delinquency Prevention Commission established in 1961 advises the director in the field of delinquency prevention.

The 3 institutions transferred to the Youth Authority in 1943—Preston School of Industry, Fred C. Nelles School for Boys, and Ventura School for Girls—have increased to 7 institutions (5 for boys, 2 for girls), 2 reception center-clinics, and 4 Youth Authority conservation camps for boys.

During 1963-64, the institutions of the Department of the Youth Authority will have an estimated average daily population of 4,766. In addition, an average of 1,895 wards will be in Department of Corrections institutions. Also, during 1963-64 the Youth Authority will supervise an estimated average parole caseload of 12,532, as compared with 10,606 during 1961-62.

The Department of the Youth Authority's institutional program for handling the wards committed to it by the various counties includes:

DIAGNOSIS: A diagnostic study and evaluation is made of each ward committed to the Youth Authority. This study and evaluation, made during the ward's stay in a reception center and clinic is for the purpose of diagnosing the cause of the ward's delinquency and making recommendations for a program of individualized treatment to correct the ward's behavior pattern. This study and evaluation results in a recommendation of the degree of custodial supervision required, educational needs, medical and dental care, psychological or psychiatric therapy needed to treat the ward's mental and emotional needs, religious training, and other programs that will aid in the ward's return to society as a useful citizen.

TREATMENT: The correctional programs carried on in the institutions are designed to enable the Youth Authority to achieve a high degree of training and treatment in the institutional setting and to guide the ward in the development of good moral standards.

SPECIAL TREATMENT PROGRAMS: The 1957 Legislature gave the Youth Authority the responsibility for the custody and treatment of a group of wards who have severe emotional and behavioral problems and who are in need of professional, psychiatric-type treatment. The department was not previously equipped to provide both a custodial training program and psychological and psychiatric therapy services. Staff was authorized for the diagnosis and treatment division for the planning, control, and supervision of this program. Preston School of Industry, Fred C. Nelles School for Boys, Paso Robles School for Boys,

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART I—CONTINUING OPERATIONS—Continued

Program and Performance—Continued

Ventura School for Girls, and Los Guilucos School for Girls have been authorized staff for treatment units.

Capacity completed during the 1962-63 fiscal year will be one 50-bed living unit at the Fred C. Nelles School for Boys.

The department also administers programs to give financial assistance to counties in the construction and maintenance of juvenile homes and camps caring for wards who could otherwise be committed to the Youth Authority. During the fiscal year it is expected that there will be 46 county operated homes and camps. It is estimated that an average of 2,720 boys and girls will be housed in these facilities.

The Youth Authority is charged with responsibility for establishment of standards and the administration of this state aid. The construction subsidy program was established by the Legislature in 1957. A total of 1,960 county camps beds are either constructed, authorized, or proposed since the inception of this program.

A total of 66.8 new positions, at a cost of $306,819, are proposed to continue the current level of service, recognizing increased population and facilities and areas where previously accepted workload standards have not been interrupted or discontinued. Such positions are shown in individual institutional or organizational budgets. Positions which do not meet these general criteria are included in the following portion of the budget.

Twenty-eight and five-tenths of the proposed new positions are requested for the Division of Paroles, recognizing increased workload in that activity. 18.4 positions are required to staff the additional living and educational capacity at Ventura School for Girls while 7.4 positions are requested to staff the new educational facilities at the Youth Training School.

PART II—PROGRAM AUGMENTATIONS

The supplemental program of the Department of the Youth Authority for the 1963-64 fiscal year continues the department's emphasis on programs to improve the care and treatment of wards and speed their rehabilitation and return to society, the substitution of parole programs for institutionalization, and the use of community services wherever possible.

The department is planning a part way home to be operated in conjunction with a private agency. This home will provide post institutional care for young men released on parole who have no home to which to return. The home, to be operated under the supervision of the Parole Division, will provide shelter for these youths until such time as they become wholly self-supporting. It is anticipated that the youths will share in the cost of operations upon obtaining employment prior to leaving the home.

The department also proposes to use the facilities now available in private agencies. This program is proposed to determine the feasibility of private agency treatment and training as a substitute for training and custodial care in state institutions. Success of this type of program could have the effect of reducing Capital Outlay demands for increased capacity in future years.

A small increase in administrative staff is proposed in the budgets for Department Administration, Fricot Ranch School for Boys, Fred C. Nelles School for Boys and Preston School of Industry. The purpose of this staff is to permit the department to maintain an acceptable level of administrative control, review, planning, and operation of the programs within the department. The main areas to be covered by the additional staff are budgeting, personnel, institution administration and storekeeping.

Increases in the treatment program are proposed to provide for strengthening institutional care and treatment. The increases are in institution pre-parole, food service, physical education, custodial care and group counseling.

Additional positions are proposed in the Parole Division budget for the supervision of Youth Authority wards released from the California Rehabilitation Center. Reduced caseloads are proposed to permit the intensive supervision required for wards who have been narcotic addicts.

The department's request for training includes two positions to provide critically needed staff training in four institutions. The training positions will provide the additional training assistance required in institutions with high staff turnover. The training request also includes a small increase in the parole agent trainee program. This provides a method of supplying trained parole agents to meet increased parole caseloads.

A small increase in maintenance staff is proposed to maintain new capacity, provide for fire prevention and industrial safety at Youth Training School and allow the department staff to adequately plan for and supervise the institutions' maintenance.

The supplemental program for the department is consolidated in the following categories:

		Total
I	Treatment and custodial care	$115,029
II	Parole	137,328
III	Research	21,474
IV	Training	24,163
V	Plant operation	26,846
VI	Private agency treatment	50,000
VII	Administrative strengthening	80,839
	Total	$455,679

State employee retirement, health and welfare program costs and estimated salary savings are included in the costs of the supplemental programs at the rates which have been applied to the continuing program budget for each institution or administrative unit.

DISTRIBUTION BY PROGRAM

I. TREATMENT AND CUSTODIAL CARE

	No. of Positions	*Total*
Personal services	16.9	$98,943
Operating expenses	–	14,522
Equipment	–	1,564
Total	16.9	$115,029

Institutional Pre-Parole:

1	Parole agent I	$7,073
0.5	Intermediate stenographer	2,343
–	Operating expenses	1,500
–	Equipment	1,564
1.5	Total	$12,480

These positions are proposed in the Parole Division Budget to provide pre-parole services for Youth Authority wards released on parole from the Deuel Vocational Institution, the California Training Facility at Soledad and the California Medical Facility at Vacaville. There has been a gradual increase in the number of youth authority wards housed in and paroled from these institutions without provision for adequate pre-parole services by the Youth Authority.

Group Living:

Consultant services—group living $5,000

This will permit the Diagnosis and Treatment Division to contract for the services of experts in the fields of group living, race relations, custody, human dynamics and living unit recreation. The specialists will work in the institutions to help custodial and treatment staff develop more effective methods of working with severely disturbed wards of many racial backgrounds. The goal is to produce a more harmonious living unit atmosphere and make the wards more amenable to the institution treatment program.

Food Service Supervision:

1	Supervising cook I—Northern California Reception Center	$5,322
1	Supervising cook I—Southern California Reception Center	5,306
1	Supervising cook I—Los Guilucos School for Girls	5,199
1	Supervising cook I—Ventura School for Girls	5,275
4	Total	$21,102

These positions are required to meet workload increases brought about by changes in program at the two Reception Center-Clinics, a gradual increase in population and physical plant at Los Guilucos, and additional population at Ventura. These positions are part of a long-range food service staffing program of the department.

The need for a position in each of the two reception centers is the result of the department's program to speed the reception center process. The accelerated process schedule has reduced the length of stay of wards at the two reception centers, leaving less time for training wards in food service operations and reducing the uninterrupted time for kitchen work assignment. The position proposed for the Los Guilucos School for Girls is in recognition of workload brought about by a gradual increase in population during the past several years and a reorganization of the physical plant devoted to food service operations. The position at the Ventura School for Girls is requested to staff for the additional population to be housed in the new institution.

Physical Education and Recreation:

1 Instructor in recreation and physical education—Youth Training School $7,829

This position is based on a teaching post assignment staffing formula for larger institutions. The position

---

[a] Personal Services includes salaries and wages, salary savings, employees' retirement, and health and welfare.

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

I. TREATMENT AND CUSTODIAL CARE—Continued

is needed to enable the department to fulfill the requirements of the Education Code as well as provide planned and supervised physical education and recreation activities for afternoons, evenings and weekends.

Preston-Treatment and Custodial Strengthening:

3	Assistant head group supervisors	$19,350
4	Group supervisors	21,226
0.4	Temporary help—visiting	2,485
1	Temporary help—group counseling	6,000
0.5	Instructor in recreation and physical education	3,940
0.5	Temporary help—program evaluation	2,150
–	Operating expense—recreation	8,022
9.4	Total	$63,173

A gradual increase in ward population during the past several years together with the increased number of severely disturbed wards has necessitated a reorganization that reduced the span of supervision to provide for a more effective custody and treatment program. The staff proposed in this budget will further strengthen the custodial program, bring the recreation program operating expenses into line with departmental standards and provide for a group counseling program. A fractional temporary help position is proposed to permit persons working with the ward to meet together to jointly evaluate the ward's progress within his existing program. This group will also recommend changes in the individual treatment program to further aid the ward in achieving the goals established for him in helping him in his return to the duties, responsibilities and obligations expected of a citizen in a free society.

Custodial Supervision—Youth Training School:

1	Group supervisor	$5,445

The vocational and academic school area has been substantially enlarged making adequate supervision of the corridor impossible for the present staff. This position is proposed to provide supervision and control of movement in the central corridor area of the new vocational training shops and academic school addition.

II. PAROLE PROGRAM

	No. of Positions	Total
Personal services	7.5	$39,742
Operating expenses	–	99,420
Equipment	–	5,186
Reimbursements	–	—7,020
Total	7.5	$137,328

Post Institutional Narcotic Treatment Supervision:

4	Parole agent I	$19,387
1.5	Intermediate typist-clerk	5,880
–	Operating expenses	34,050
–	Equipment	3,622
5.5	Total	$62,939

This program is included in the Parole Division Budget to supervise Youth Authority wards paroled from the California Rehabilitation Center. A special staffing standard of 30 parolees for each professional position and 100 parolees for each clerical position is proposed to control more effectively possible narcotic usage and further the treatment program. This is the same ratio used by the Department of Corrections in a similar type of program for adult narcotic parolees.

Part Way Home Program:

1	Parole agent II	$8,595
0.5	Parole agent I	3,518
0.5	Intermediate stenographer	2,362
–	Operating expenses	65,370
–	Equipment	1,564
–	Reimbursements	—7,020
2	Total	$74,389

One and a half professional positions and 0.5 clerical position, together with the necessary operating expenses and equipment, are included in the Parole Division budget to provide part way home care for an average of 30 parolees. The part way home will provide temporary shelter for older, employable wards released on parole who are without homes. This program will aid in the transition from institutionalization to self-supporting citizenship in the community. The part way home will provide shelter for approximately 30 wards, with an average length of stay of 90 days. Parolees will be required to help in the housekeeping and when employed, contribute to the cost of operating the home.

III. RESEARCH

	No. of Positions	Total
Personal services	3	$21,474
Total	3	$21,474

Parole Research and Analyses:

1	Associate research technician	$9,015
1	Assistant crime studies analyst	7,425
1	Senior clerk	5,034
3	Total	$21,474

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

III. RESEARCH—Continued

Three positions are proposed for continuation of research into the effectiveness of parole practices. These positions were previously authorized on a limited term basis, but as the effective use of parole offers the most efficient and economical approach to rehabilitation it is desired to continue them on a permanent basis.

IV. TRAINING PROGRAM

	No. of Positions	*Total*
Personal services	3	$19,395
Operating expenses		3,868
Equipment		900
Total	3	$24,163

Institution Staff Training:

2	Training assistant	$14,780
–	Operating expenses	3,868
–	Equipment	600
2	Total	$19,248

Two training assistants one for the Diagnosis and Treatment Division and the other for the Fred C. Nelles School are proposed to provide more effective training of institution staff. The position in the Diagnosis and Treatment budget will be responsible for the training program at the Northern California Reception Center and Clinic and the Los Guilucos School for Girls. The position in the Fred C. Nelles School for Boys budget will provide training for both the Fred C. Nelles School for Boys and the Southern California Reception Center and Clinic. This program will enable the Department to provide the equivalent of at least one-half training officer for each smaller institution with the exception of the camps. It is expected that better utilization and development of staff will result from this training program.

Parole Training:

1	Parole Agent Trainee reclassification	$4,615
–	Equipment	300
1	Total	$4,915

This proposal provides for expansion of the Parole Agent trainee program to meet the demands for staff resulting from increased parole population. The funds provided from this request will enable the Parole Division to convert one parole agent position into two training positions, which together with the four now available will provide a total of six training positions. The training program now operated by the Parole Division provides for a 6-month training program for each trainee which then enables him to quailfy as a parole agent. Each trainee carries a half caseload during his training period.

V. PLANT OPERATION

	No. of Positions	*Total*
Personal services	3.5	$24,471
Operating expenses	–	1,335
Equipment	–	1,040
Total	3.5	$26,846

Departmental Maintenance and Construction:

1	Associate construction analyst	$9,466
0.5	Intermediate typist-clerk	2,254
–	Operating expenses	1,335
–	Equipment	1,040
1.5	Total	$14,095

This position is proposed for the Departmental Administration budget to provide adequate supervision of the building maintenance programs, both remedial and preventive, and minor capital outlay projects handled by institution staff. This position will also assist the departmental maintenance and construction supervisor in the planning and supervision of the departmental capital outlay programs.

Fire Safety and Accident Prevention—
Youth Training School:

1 Institution fire marshal	$6,785

This position is proposed for the Youth Training School budget to provide an adequate fire and industrial safety program with particular emphasis on the school's vocational shop area.

Building Maintenance—Ventura:

1 Building maintenance man	$5,966

This position is proposed to provide an adequate maintenance program for the buildings at this new and expanding institution.

VI. PRIVATE AGENCY TREATMENT PROGRAM

	Total
Operating expenses	$50,000

This program is proposed to determine the feasibility of the use of private agency facilities for training and treatment as a substitute for care in the Department of the Youth Authority institutions. The department proposes to contract for the care of 25 wards at a cost not to exceed the support per capita cost of the Youth Authority institution to which they would otherwise have been committed. The program will require approximately 6 months for final development of contractual arrangements and selection of wards, with the wards entering the private agency institutions beginning January 1, 1964. Success of this program will reduce the need for increased capacity in future years.

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

VII. ADMINISTRATIVE STRENGTHENING	No. of Positions	Total
Personal services	13.2	$77,617
Operating expenses	–	5,448
Equipment	–	7,609
Reimbursements	–	—9,835
Totals	13.2	$80,839

Youth Authority Records Office:

1	Intermediate typist-clerk	$4,466
–	Equipment	627
1	Total	$5,093

This position proposed for the Youth Authority records office is to meet increases in workload caused by the additional number of youths committed to the Youth Authority. Workload increases in this office are measured in terms of additional case history records, board actions, and increased related general office workload.

Administrative Services Division:

1	Assistant budget analyst	$7,425
1.5	Intermediate typist-clerk	8,861
–	Operating expenses	1,135
–	Equipment	2,331
2.5	Total	$19,752

One professional position and 1.5 clerical positions are proposed for the Administrative Services Division to handle the additional workload created by increased demands for budgetary preparation, fiscal management, and personnel workload resulting from the added population and staff in existing institutions, additional parole caseloads and the development of staffing requirements and budgets for the new Northern California Youth Center.

Machine Records Unit:

1	Tabulating machine operator	$4,915
2	Key punch operators	8,931
–	Operating expenses	5,340
–	Equipment	485
–	Less reimbursements, Department of Corrections	-9,835
3	Total	$9,836

The machine records unit provides tabulating machine services to both the Department of the Youth Authority and Department of Corrections. The proposed positions are to provide staff to meet the increases in workload resulting from continued increases in institution and parole populations in both departments and to meet data processing demands of previously authorized research projects.

Diagnosis and Treatment Division:

1	Deputy chief, diagnosis and treatment	$10,417
0.5	Intermediate stenographer	2,363
–	Operating expenses	1,803
–	Equipment	1,075
1.5	Total	$15,658

This position, together with clerical assistance, will permit a reorganization of the Diagnosis and Treatment Division to provide for more efficient supervision and control of the department's programs for the care and treatment of wards committed to the Youth Authority. The division is presently responsible for the operation of two reception center clinics, five schools for boys, two girl's schools and four youth conservation camps. In addition, the division is responsible for planning the staffing and ward treatment programs and organization of the new Northern California Youth Center to be constructed near Stockton, San Joaquin County, and the proposed Southern California Youth Center.

Staff and Management Services—
Preston School of Industry:

1.5	Intermediate typist-clerk	$6,726
–	Operating expenses	100
–	Equipment	1,014
1.5	Total	$7,840

This staff is proposed to provide clerical services and assistance to the two program administrators and to strengthen the personnel clerical services of this institution. New buildings have been added, old ones replaced with increased population capacity and there has been a change in the type of wards sent to this school during the past several years. Treatment and custody staff have been added and the institution has been reorganized to provide for a more efficient span of control and an improved custody and treatment program. One of the positions will provide the clerical support to meet an increased workload. The half-time position will provide additional staff to meet increased personnel office workload occasioned by the increase in staff in recent years.

Staff and Management Services—
Fricot Ranch School:

1	Assistant superintendent	$10,306
0.5	Intermediate stenographer	2,345
1	Senior typist-clerk—personnel	4,996
0.2	Temporary help—reception desk	880
–	Operating expenses	70
–	Equipment	2,077
2.7	Total	$20,674

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

VII. ADMINISTRATIVE STRENGTHENING —Continued

These positions will provide the necessary staff required to reorganize the school's administrative, custody and treatment structure. A psychiatric treatment unit was added in 1962-63 in recognition of the more severely disturbed ward now sent to this school. The change in the type of wards, the added staff to handle this type of ward and the gradual increase in population have resulted in substantial increases in administrative and treatment demands. In order to relieve these demands and to provide the institution with supervision in the absence of the superintendent an assistant superintendent position and related 0.5 clerk are proposed. This position will also allow the superintendent time for more adequate planning and control of the overall treatment program at the school.

The institution staff has almost tripled since 1951-52 with no increase in staff for the personnel function. The superintendent's secretary has handled these duties in the past but the staff has grown to the point where this is no longer practical. A typist-clerk is proposed to handle the personnel function.

The temporary help position has been added to provide reception services on a seven-day-a-week basis. At the present time, the school does not have sufficient personnel time provided to maintain year-round reception and information services for official guests, visitors, vendors and families of wards committed to this school.

Staff and Management Services—Fred C. Nelles:

1	Stock clerk	$4,986
–	Less: Operating expenses	—3,000
1	Total	$1,986

This position is proposed to staff the new commissary and provide for more efficient storage, control and utilization of materials and supplies necessary for the institution's operation. A reduction in operating expenses is anticipated as a result of expected savings that will result from the establishment of this position.

YOUTH AUTHORITY BOARD AND ADMINISTRATION

GENERAL ANALYSIS

This division includes the Youth Authority Board, director, administrative services, and supervision of the diagnosis and treatment, special treatment, and departmental research programs.

The Youth Authority Board consists of 6 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. It is concerned with accepting or rejecting wards committed to the Youth Authority and with classification, length of institutional training and parole periods, and formulation of policies concerning wards. Four youth authority board representatives assist the board in meeting part of its workload.

The executive group is composed of the director, who is chairman of the Youth Authority Board, and his staff. The director is the administrative head of the department and is charged with those duties and responsibilities of the department in carrying out its objectives not specifically assigned to the Youth Authority Board.

The youth authority clerk and records office maintains the master files on all wards committed to the Youth Authority. This office is also responsible for recording actions taken and for orders issued by the Youth Authority Board.

Administrative services are furnished in the fields of accounting, budgeting, personnel management, food administration, maintenance and construction, and general administration. The administrative services division also operates as the link between the department and the other agencies concerned with the financial and managerial services of State Government.

The diagnosis and treatment division is responsible for supervision and operation of the department's reception centers, institutions, and conservation camps. This responsibility includes the training and treatment program in the institutions, as well as reception, diagnostic evaluation, and transportation of wards between institutions. It also includes supervision and operation of the department's special treatment program which was started during the 1957-58 fiscal year. This program is designed to meet the needs of special problem delinquents who, because of emotional disturbances or other severe personality problems, do not fit into nor benefit materially from the regular treatment program.

The research division is responsible for research programs being developed and undertaken by the department as well as accounting for the ward population in institutions and on parole. Basic research is planned and being conducted in the fields of human behavior and in the specific fields of delinquency, its causative factors, treatment, and prevention.

Workload and administrative adjustments for the 1962-63 fiscal year reflect a net increase of 0.5 position because of an increase in consultant services and adjustments in various temporary help positions. In 1963-64, adjustments in temporary help positions result in a decrease of 0.5 positions.

Proposed new positions for the 1963-64 fiscal year consist of an increase in temporary help of 0.1 man-year.

DIVISION OF PROBATION AND DELINQUENCY PREVENTION SERVICES

GENERAL ANALYSIS

The Division of Probation and Delinquency Prevention Services provides assistance, leadership, and guidance to the counties and cities of the State in studying youth problems, and encourages them to provide more effective programs to meet their needs. It is concerned with the encouragement of improved juvenile law enforcement and probation. The division administers the program for maintenance of juvenile homes and camps partially subsidized by the State as well as inspection and consultative services to county and city operated juvenile halls.

DIVISION OF PAROLE

GENERAL ANALYSIS

The Division of Parole provides direct supervision and casework counseling for wards of the Youth Authority who are on parole. Parole agents make use of all available local services in directing wards toward a normal life in the community.

The division is currently engaged in a program to determine the feasibility of the substitution of treatment within the community for institution training for wards who are amenable to this type of program. The research aspects of this program are being funded by the National Institute of Mental Health.

An increased workload in the 1962-63 fiscal year over that originally anticipated requires the establishment of 2 parole agents and 1 clerical positions over the number approved in the 1962 Budget Act. The parole caseload increase projected for the 1963-64 fiscal year will require an additional 19 parole agents and 6.5 clerical positions over the number now anticipated in 1962-63.

The total additional positions required to meet the caseload in 1963-64 are shown as proposed new positions in 1963-64 even though 3 positions were established administratively in 1962-63. These increases are in accordance with the overall ratio of 55 parolees per parole agent.

A reduction of 0.5 clerical position in 1962-63 and 1963-64 due to workload adjustments is planned for the community treatment program.

	1961-62	1962-63	1963-64
Average parole population	10,606	11,532	12,532

SPECIAL PROJECT ACTIVITIES

Objectives

Research, investigation, and demonstration of methods and techniques that can be of value to the Department of the Youth Authority in the rehabilitation of certain types of youthful offenders are the goals of these projects.

Program

Public and private organizations interested in the prevention of delinquency and the treatment of youthful delinquents make funds available to the department for research activities not financed by the State. The activities must be concerned with the treatment of youthful offenders in California. Projects financed by non-State funds generally include overhead charges to reimburse the State for additional costs incurred. Expenditures are not included in budget totals.

Activities are listed indicating the type of activity and source of funding. Project fiscal years do not necessarily correspond to the State fiscal year, and as a result expenditures are assigned to the fiscal year which most nearly coincides with the State fiscal year.

Department of the Youth Authority

DEPARTMENTAL ADMINISTRATION—Continued

Program—Continued

SPECIAL PROJECT ACTIVITIES—Continued

COMMUNITY TREATMENT PROGRAM (National Institute of Mental Health)

The Community Treatment Project substitutes a program of intensive treatment and control within the community for institutionalization of selected juvenile court cases.

A highly skilled staff works closely with 100 wards paroled directly from the Northern California Reception Center and Clinic each year, their families, and appropriate public and private agencies. Wards will be given intensive treatment during a period of time comparable to the regular institutional stay. Each ward is treated according to a plan which will insure maximum control and treatment possibilities in each individual case. Wards who represent a serious menace to persons or property in the community are excluded from the study.

The project is being carried out in the Sacramento and Stockton metropolitan areas.

OAKLAND INTERAGENCY COMMUNITY PROJECT (Ford Foundation)

The Oakland Interagency Community Project is a 3-year community development program which has as its special focus the assimilation of the newcomer population living in the Castlemont area in Oakland, California. This grant was made in response to a joint proposal by several agencies of the City of Oakland, the County of Alameda, and the Department of the Youth Authority. The program will involve a series of 8 action projects to be carried out through designated agencies, all relating to the assimilation of newcomers in the Oakland area. Related research and evaluation will be carried out through a research director and staff, and a confirming program development seminar.

The Youth Authority's share of the grant will provide for the salary of 1 parole agent who will act as the department's liaison to the project.

SMALL LIVING UNIT PROJECT (Rosenberg Foundation)

The Small Living Unit Project is designed to compare the performance of wards housed in large and small living units. The purpose of the program is to determine whether the smaller living unit with increased staff-ward ratios produces desirable attitude and value changes in wards, whether the treatment program conducted results in better ward adjustment and an improved behavior pattern upon return to the community, and the kind of wards that are helped the most by the smaller living unit.

The project is being carried out at the Fricot Ranch School for Boys located near San Andreas.

[e] Grants from Federal Government and privately financed foundations and expenditures therefrom are not included in overall budget totals.

[f] Section 869.5 of the Welfare and Institutions Code provides that each county shall pay the State twenty-five dollars ($25) per month for each ward while under the supervision of the Youth Authority. These funds are collected by and included in the budget for the State Controller and shown here for information only.

Department of the Youth Authority

NORTHERN CALIFORNIA RECEPTION CENTER AND CLINIC—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	

GENERAL ANALYSIS

Objectives

The Northern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Northern California. The purpose of the reception center is to receive, examine, and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered in the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based on such study are made to the Youth Authority Board regarding type of training, treatment, and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and the intensive diagnostic evaluation program.

Ward movement and average daily population at this institution are as follows:

	1961-62	1962-63	1963-64
Average Daily Population:			
Boys	189	190	200
Girls	65	53	55
Totals	254	243	255
Admissions:			
Boys	2,194	2,131	2,256
Girls	505	506	534
Totals	2,699	2,637	2,790
Parole Releases and Processed Cases Transferred:			
Boys	2,150	2,073	2,176
Girls	512	505	497
Totals	2,662	2,578	2,673

Changes in clinic processes and reductions in admissions allows the abolishment of 2.2 graduate nurse, 1 social worker and 0.5 intermediate typist positions and reductions in various temporary help positions equivalent to 0.7 position in 1962-63 and 0.6 positions in 1963-64.

Proposed new positions in 1963-64 include 0.2 temporary help in diagnosis and treatment and 0.1 in custody and personal care to provide minor workload adjustments.

Workload and administrative adjustments include an increase of 0.3 temporary help position in care and welfare in 1962-63, a reduction in teacher reclassification funds in both 1962-63 and 1963-64 and a reduction of 0.3 temporary help position in care and welfare for both years. These adjustments are based on anticipated workload changes.

To meet workload resulting from increased admissions anticipated in the 1963-64 fiscal year, 3.5 new positions are proposed as follows: 1 social worker, 0.5 intermediate typist-clerk, and 1 dental assistant based on regular caseload formulas. One graduate nurse position is required for general workload increase resulting from an accelerated ward processing program which reduces the average length of stay at the center from 6 weeks to 4 weeks.

YOUTH AUTHORITY CONSERVATION CAMPS FOR BOYS—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

Objectives

The Youth Authority conservation camps for boys are operated jointly by the Youth Authority and the Division of Forestry. Their primary purpose is the rehabilitation of older delinquent boys through useful work including suppression of forest fires, reforestation, road construction, and general maintenance of the State's forests. Selected boys primarily in the 17 to 21 age group are sent to these camps as an intermediate stage between training in an institution and return to society. These wards include both criminal court commitments transferred from Deuel Vocational Institution and the Correctional Training Facility at Soledad, and juvenile court commitments from the Youth Authority institutions.

Program and Performance

The 4 conservation camps emphasize work programs both in the forest and in the camp. A few boys are held in each camp for operation of the kitchen, dining room, laundry, general housekeeping, and building maintenance. A recreation program is conducted after working hours including activities ranging from sports to arts and crafts. A counseling program to aid in removing the causes of delinquent behavior is conducted concurrently with the work and recreational program.

The main camps are Pine Grove, located east of Jackson; Ben Lomond, in the mountains near Santa Cruz; Mount Bullion, near Mariposa; and the new Washington Ridge Camp located near Nevada City. Three 20-boy spike camps are operated as branches of the main camps, 2 from Mount Bullion and 1 from Washington Ridge.

Camp population will remain stable at an estimated 338 during 1962-63 and 1963-64.

	1961-62	1962-63	1963-64
Average daily population	305	338	338
Parole releases	608	721	729

Workload adjustments consist of an increase of 0.1 overtime cook position in 1962-63 and the reduction of 0.1 temporary help in-service training position in both years at Washington Ridge Camp.

Proposed new positions for 1963-64 include 0.1 temporary help—in-service training position at Mt. Bullion Camp and 0.1 overtime-cook position at Washington Ridge Camp to provide for workload changes.

GENERAL ANALYSIS

Objectives

The Fricot Ranch School for Boys is a correctional school for training, education, and rehabilitation, of delinquent boys primarily between 8 and 13 years of age. The purpose of the school is to provide a residential treatment center for the youngest and most immature boys committed to the Youth Authority and to return them to society as useful citizens.

Program and Performance

This institution places major emphasis upon a program of academic education and counseling. Minimum custodial standards are maintained as part of the treatment program. Because of its location in the mountainous Mother Lode Country the school is able to carry on a program of scouting, hiking, and outdoor living as part of its total rehabilitation program.

GENERAL ANALYSIS

Objectives

The Fred C. Nelles School for Boys is a correctional school for the rehabilitation of delinquent boys, primarily between the ages of 13 and 15. The purpose of the school is to return the youths to society as useful citizens.

Program and Performance

The school conducts a program of education, training, and treatment, designed to guide the delinquent youth into accepted behavior patterns. The educational program covers the elementary and junior high school grades and is remedial in nature. Academic and Industrial arts shop program is similar to public

GENERAL ANALYSIS—Continued

Program and Performance—Continued

school programs, and conducted to enable wards to return to the public schools system at the grade level commensurate with their age. Average age of wards at this institution is approximately 14 years. In addition to the regular academic arts and crafts, and physical education program provided by the education section, there is being developed a small flower garden and landscaping program, which will be operated in conjunction with the academic school, and which will help train wards who would benefit from work experience.

Ward movement and average population at this institution are as follows:

	1961-62	1962-63	1963-64
Average daily population	369	419	462
Parole releases	568	567	619

Workload and administrative changes include the establishment of 1.3 positions in various temporary help positions in the custodial and personal care function to provide for workload changes. Reductions in authorized positions total 11.3 positions in 1962-63 and 13 positions in 1963-64. These reductions are a result of construction delays, efficiencies gained from revised planning and changes in physical plant, and a population lower than previously estimated in the 1962-63 Budget.

Proposed new positions in this budget include: 2 food service assistants and 0.2 temporary help for staffing a new food service building and 0.4 temporary help for workload adjustments in various temporary help positions based on previous experience.

GENERAL ANALYSIS

Objectives

The Northern California Youth Center is planned as a group of institutions (eventually 12) clustered around a central core of administrative and housekeeping services, i.e.—plant and equipment maintenance, hospital, food preparation and employee feeding, and business services. Eventually the total program will serve Youth Authority wards from 8 to 25 years of age and of both sexes. It will provide academic and vocational training as well as psychological counseling and treatment for youths committed from the juvenile and criminal courts to the Department of the Youth Authority.

Program and Performance

The initial phase of the projected program includes a 400-bed institution for the younger adolescent aged boy together with limited facilities for the central administrative core (i.e.—hospital, warehouse, plant maintenance). This constellation of institutions will be located on ground recently acquired by the State, a short distance south and east of Stockton, and is planned for an ultimate capacity of 4,800 Youth Authority wards. The first phase of the construction is planned for completion in 1965.

A change in policy which would transfer a greater percentage of wards from Department of Corrections institutions to this center was proposed in 1962-63. Because a faster buildup of capacity was necessitated by this change positions authorized in the 1962-63 fiscal year were established on July 1, 1962 rather than November 1 as originally programmed.

GENERAL ANALYSIS

Objectives

The Paso Robles School for Boys is a correctional school for the rehabilitation of delinquent boys primarily between 15 and 17 years of age. The purpose of the school is to rehabilitate these boys and return them to society as useful citizens.

Program and Performance

The rehabilitation process is carried out through a program of education, training, counseling, and treatment designed to resolve basic emotional conflicts and to guide boys into acceptable behavior patterns. The education program is both academic and prevocational. It is remedial in nature and covers junior and senior high school subjects with provision for graduation from high school for those who successfully complete the required courses.

Major emphasis is placed on individual and group counseling of wards, and the use of every available professional service to provide for the special treatment needs of wards. This includes psychological and psychiatric therapy.

Wards are used to help in the operation of the kitchen, dining room, laundry, shoe repair shop and maintenance functions. Training and supervision are given in these areas as part of the total rehabilitation program. A farm and garden operation is also conducted as part of the education program, to train wards interested in this field. The farm furnishes eggs, poultry, ham and pork products and a limited amount of fresh vegetables to the school feeding program.

Ward movement and average daily population at this institution are as follows:

	1961-62	1962-63	1963-64
Average daily population	450	452	452
Paroles	754	752	752

Workload and administrative changes to reflect actual experience and workload adjustments include the addition of 0.5 military leave temporary help, the reduction of 0.1 custodial and personal care and 0.5 teacher training temporary help positions. In addition, teacher reclassifications are reduced by $450 in both 1962-63 and 1963-64.

In the 1963-64 fiscal year it is proposed to continue the increase for military leave temporary help and increase teacher training by 0.1 position.

GENERAL ANALYSIS

Objectives

The Preston School of Industry is a correctional school for the custody, training, and treatment of delinquent boys, primarily between the ages of 17 and 21 years. The purpose of the school is to rehabilitate these youths and return them to society as useful citizens.

Program and Performance

The Preston School of Industry conducts an educational program in 3 general areas. These are:

1. Academic instruction for wards who are from 3 to 5 years behind the educational level commensurate with their chronological age. The program is of elementary and high school level, including graduation from high school for those successfully completing the necessary courses.
2. Vocational training in various trades such as printing, auto mechanics, cabinet work, electrical work, sheet metal, and others.
3. Farm program with basic education in the operation of dairy, poultry unit, hog ranch, and field crops.

Wards are used to help in the operation of the kitchen, dining room, laundry and maintenance program.

Training and supervision are given in these areas as a part of the total program.

A program of counseling to understand and remove the causes of delinquent behavior is conducted concurrently with the educational and custodial program. Also a program for special treatment of wards with serious personality problems or in need of psychiatric therapy has been in operation since the 1957-58 fiscal year.

Average ward population and paroles at this institution are as follows:

	1961-62	1962-63	1963-64
Average daily population	818	846	846
Released on parole	1,404	1,367	1,414

The 1962-63 workload and administrative adjustments include increases in overtime escape (0.2) and temporary help (0.1) which are offset by a decrease of 0.4 in vacation relief for teachers. This latter decrease is carried forward into the 1963-64 fiscal year.

One senior clerk from the maintenance staff is abolished due to a reorganization of that unit. A supervisor of building trades was established to correct a deficient supervisory situation in the maintenance department which contains a total of 31 positions. This position would act as a supervisor of the tradesmen which number 14. The position is requested as a new one in 1963-64.

The poultry ranch is to be discontinued as a production facility and the boys working there will be enrolled as a part of the instructional program. One position of poultryman is proposed to be deleted in 1963-64 and an instructor in agriculture is proposed as a new position.

Proposed new positions in this budget include:

One instructor in landscape gardening based on the average daily attendance standard of 15 students per instructor.

One instructor in agriculture in lieu of a poultryman. The poultry ranch is being discontinued because of excessive costs. Wards formerly in this program are to be enrolled in an agricultural education program.

One man-year of temporary help is requested to provide for workload adjustments.

Personnel man-years	355.7	394.8	401.4	6.6

GENERAL ANALYSIS

Objectives

The Youth Training School is a correctional facility for the rehabilitation of delinquent boys between 17 and 21 years of age. The purpose of the school is to rehabilitate these wards through an emphasis on vocational training with meaningful work experience and to return them to society as useful citizens.

Program and Performance

The rehabilitation process is carried out through an intensive program of education, training, counseling, and treatment designed to guide young adults into acceptable behavior patterns. The program is designed to give wards pre-employment training in the various vocational fields and to provide an opportunity for completion of the requirements for high school graduation. The vocational training program consists of 3 major divisions: (1) formal vocational instruction, (2) related work experience in maintenance and operation of the institution, and (3) work experience-education in areas not related to the maintenance and operation of the institution, i.e., offset printing, business machine repair, electronics, etc. The work experience program is conducted in 2 major areas: (1) plant maintenance and operation, and (2) food service. The auxiliary functions vital to institutional administration is performed by wards under close supervision of journeyman instructors in a program generally consisting of one-half day vocational training in the shops and one-half day related work experience.

Average ward population and releases at this institution are as follows:

	1961-62	1962-63	1963-64
Average daily population	962	1,170	1,180
Parole releases	1,023	1,624	1,834

Workload and administration adjustments include increases in temporary help-visiting and teacher training of 0.4 position each to provide for current standards in these areas. Reductions in custodial and personal care temporary help of 0.2 position and education and religion temporary help of 0.3 position reflect workload changes. One music teacher is deleted because the program at this school does not require the services of both music teacher positions now authorized.

Proposed new positions in this budget include 5 instructor positions based on the average daily attendance ratio of 15 students per teacher plus relief, 2 temporary help teacher training positions based on the relief required for teacher training, and continuance in 1963-64 of the 0.4 temporary position for visiting to bring this institution up to current standards.

GENERAL ANALYSIS

Objectives

The Los Guilucos School for Girls is a correctional school with a resident population of girls between the ages of 10 and 18. The purpose of the school is to rehabilitate these girls and to return them to society as useful citizens.

Program and Performance

The program is primarily educational and stresses remedial academic instruction, home economics, and arts and crafts with provision for graduation from high school for those who successfully complete the required courses. A counseling program to remove the causes of delinquent behavior is conducted concurrently with the education and custodial program.

Girls are used to help in operation of the kitchen, dining room, hospital, and dental unit as part of the total program. Girls are responsible for housekeeping in the dormitories and also assist the housekeepers in maintenance of less critical areas in the school.

Average ward population and releases at this institution are as follows:

	1961-62	1962-63	1963-64
Average daily population	253	260	260
Parole releases	337	290	307

Workload and administrative adjustments in 1962-63 provide an additional 0.1 temporary help position in both custodial and personal care and education for workload adjustments. These increases are proposed for continuance in 1963-64 plus an additional 0.2 temporary help for the education function. In addition, 0.3 dentist II position is proposed to absorb increased workload generated by a speedup in processing girls at the reception centers. The position is in lieu of a position at the centers and permits the centers to process wards without holding them for dental work.

GENERAL ANALYSIS

Objectives

The Ventura School for Girls is a correctional school for rehabilitation of the older delinquent girls, primarily in the 16 to 21 age group. The purpose of the school is to rehabilitate girls and return them to society as useful citizens.

Program and Performance

The Ventura School for Girls conducts a program of educational training and counseling to treat the causes of delinquent behavior. The education department offers a remedial program at the junior and senior high level, with graduation from high school for those who successfully complete the required courses.

A vocational training program is emphasized to prepare girls for employment when paroled. Training is given in practical nursing, laundry operation, production sewing, cosmetology, food preparation and serving, stenography, bookkeeping and related clerical work. A co-operative effort with the State Department of Employment seeks to make the educational program fit these girls for work when paroled.

Paroles and average ward population at this institution are as follows:

	1961-62	1962-63	1963-64
Average daily population	195	340	408
Paroles	365	325	494

On July 13, 1962, the Ventura School for Girls moved to new facilities approximately 15 miles from the original site. The new institution opened with capacity for 400 wards. A new living unit of 50 capacity is scheduled to open in 1963-64 bringing the total capacity to 450 girls. Population will reach 400 at the end of the 1962-63 fiscal year and 450 at the end of 1963-64.

Workload adjustments consist of reductions of 0.3 in temporary help positions in both 1962-63 and 1963-64 based on past experience.

A total of 18.4 positions are required in 1963-64 to complete the staffing of the new institution.

Proposed new positions in this budget include: 1 senior group supervisor and 7 group supervisors to provide custodial care for a 50-girl living unit scheduled to open April, 1964; 0.5 dentist II to absorb increased workload generated by a speedup in processing girls at the reception centers and clinics. The position is in lieu of a position at the centers and permits the centers to process girls without holding them for dental work; 1 dental assistant based on a workload formula; 2.2 hospital aid to provide adequate medical aid services in the new institution hospital; 1 supervisor of vocational instruction and 4.4 instructor positions to provide a school program for population increases projected for the last quarter of 1963-64; 1 instructor in recreation and physical education is based upon accepted workload ratio of 1 instructor per 150 girls population; and 0.3 temporary help for workload adjustments in various temporary help positions.

GENERAL ANALYSIS

Objectives

The Department of Education seeks to insure that all children of the State have an opportunity to attend the public school system and that once enrolled, they receive adequate instruction by qualified teachers. The Superintendent of Public Instruction, an elected official, is ex officio Director of Education and secretary and executive officer of the State Board of Education, which is the policy determining body of the department. The board consists of 10 members appointed by the Governor for 4-year terms.

Physically handicapped children and adults may receive an education, physical rehabilitation services, or sheltered employment through the special schools and centers operated by the department. The department also administers joint federal-state programs dealing with the distribution of surplus commodities for educational purposes and administers jointly financed education programs. A program to train teachers for civil defense classes is continued with the total cost financed from federal funds.

A new program is proposed in the 1963-64 fiscal year to encourage the establishment of special educational programs for culturally disadvantaged children. This program is dependent upon special legislation pending in the 1963 General Session and is shown in a separate budget at the end of the General Activities budget (see page 172).

The 1963-64 Budget proposes the first year of a 3-year project to strengthen the instruction of narcotics education in the public schools (See Division of Instruction page 167).

The budget also proposes increased responsibility for working with public schools in civil defense and disaster preparedness (See Division of Departmental Administration).

Program and Performance

The department is divided into 6 divisions to handle specific areas of responsibility: Departmental Administration; Higher Education; Instruction; Public School Administration; Special Schools and Services; and the Division of Libraries, which for budgetary purposes is a separate unit. The program of each division is discussed with its detailed budget presentation.

DIVISION OF DEPARTMENTAL ADMINISTRATION

GENERAL ANALYSIS

The Division of Departmental Administration, headed by a deputy superintendent of public instruction, furnishes executive, accounting, personnel, research, and legal services to the Department of Education. The expenditures of the State Board of Education are included and administered through the departmental budget.

A special representative position is proposed new in the 1963-64 fiscal year along with a supporting clerk to continue positions established administratively during the current year. These positions are included to provide needed staff assistance to the State Board of Education. In addition, 0.2 man-year temporary help is proposed in the 1963-64 fiscal year to give assistance to the State Curriculum Commission.

The Accounting Office of the division administers certain trust funds, and provides budgeting, purchasing, and internal auditing services. The accounting functions for the special schools and the Industries for the Blind are performed by those respective agencies.

The Personnel Office exercises general direction over the personnel program of the department. An administrative adjustment has provided a staff analyst for improved personnel management. It is proposed to continue this position on a permanent basis in view of the continuing workload. Costs of this position will be financed by a reduction of 2 clerks in the division.

The Administrative Adviser's Office acts as legal adviser to the Superintendent of Public Instruction and his staff, the State Board of Education, and to the staffs of the special schools and special service agencies in the department. It represents these agencies and officers in disciplinary actions, both contested and uncontested, involving disciplinary action against public school teachers and employees of the department.

During general sessions of the Legislature, the office prepares department-sponsored legislative bills, and prepares recommendations to the Governor on those bills of concern to the department. It drafts and passes on the legal adequacy of contracts, including those for the purchase of state-adopted textbooks, leases, deeds, easements, and probate documents affecting the department and the agencies under its jurisdiction.

The Bureau of Education Research is responsible for studies in the evaluation of public school curriculum, educational measurements, and in the area of school administration, such as finance, teacher preparation, class size, and enrollment data. It also furnishes consultant services to school districts in advising and planning test programs. It assists in the administration of Title 10, National Defense Education Act. The tabulating machine section renders services to the various bureaus and divisions of the department. In the apportionments to the public schools, the bureau assumes the responsibility for mechanical computations of the school apportionment.

An administrative adjustment has added a half-time key punch operator in the current year, based on workload needs, and the position is proposed new in the 1963-64 fiscal year.

The legislature approved a programmer II position to June 30, 1963; it is proposed to continue this position on a permanent basis for staffing the data-processing function.

A consultant in school civil defense planning and a supporting clerk have been added in the 1962-63 fiscal year to perform the department's responsibilities in civil defense. The department has been assigned the responsibilities of planning, coordinating, and advising the local school districts in matters relating to public school civil defense. In addition the consultant position will plan and participate in the department's civil defense and disaster preparedness. Costs of this program will be shared equally with the federal government. It is proposed to continue this program on a permanent basis.

DIVISION OF HIGHER EDUCATION

GENERAL ANALYSIS

The division was established in 1961 for the purpose of consolidating and co-ordinating the several functions of the department relating to education beyond high school. It includes the Bureaus of Adult Education, Junior College Education, Readjustment Education, Teacher Education and Certification, and the Office of Certificated Employment Practices.

The Bureau of Adult Education has the responsibility for co-ordinating and improving programs of adult education. In addition, this unit is required to approve more than 21,000 adult classes annually, as well as forum and lecture series, and also adult education summer sessions. Approval of the separate adult schools and adult education divisions of high school and junior college districts must also be given by this bureau.

The Bureau of Junior College Education is responsible for co-ordinating within the State Department of Education all matters relating to public junior college instruction and administration, including the organization, development, and promotion of new institutions; serves as the approval agency for new courses of study as prepared and submitted in applications by local districts maintaining junior colleges; processes applications for approval for conducting "out-of-district" junior college classes; participates in surveys for new junior college districts; and reviews existing junior college standards for the purpose of recommending their upgrading by the State Department of Education where necessary. Included in this bureau is a project financed by Kellogg Foundation grant funds to assist in the development of education for registered nursing through an accelerated junior college program. A total of $3,000 is proposed in the 1963-64 fiscal year to allow the department to contract with specialists in junior college program areas. These specialists will help the department in fulfilling its responsibilities with the Co-ordinating Council for Higher Education.

The Bureau of Readjustment Education has the complete responsibility for the approval and supervision of courses offered by institutions for veterans training. California has more than 10 percent of all veterans training in the United States, with also the largest number of approved schools for veterans training in any state. It is estimated there are approximately 13,000 individuals who are eligible for the benefits under the Veterans Readjustment Assistance Act of 1952 and the War Orphans **Assistance Act of 1956. The bureau is also responsible for the** administration of the provisions of the Education Code relative to private institutions covered by the "diploma-mill" legislation. This area of responsibility for authorizing the issuance of diplomas is gradually increasing and more private schools are being established in California for residence and correspondence training. 1961 legislation requiring all correspondence school salesmen to secure a permit to sell correspondence courses is also being administered by this bureau.

The Bureau of Teacher Education and Certification has the responsibility for the general functions of accreditation, teacher education, teacher recruitment, and certification. Included in these bureau functions are the secretariats of the Commission on Credentials, the California Council of Teacher Education, and the State Committee on Accreditation. A specialist in teacher education position is proposed new in the 1963-64 fiscal year to meet the increased workload in accreditation of teacher training institutions and in teacher education which has resulted from the more stringent licensing legislation enacted at the 1961 General Session.

The Certification Office handled 161,000 cases during 1961-62. In 1962-63 it is estimated that a total number of 180,000 cases will be handled and in 1963-64, a total of 190,000. One credential technician and 1 clerk are proposed in the 1963-64 fiscal year to handle the increased caseload and the increased complexities of the new credential structure. On July 1, 1963, when the new credential requirements become effective, it is estimated that more time in evaluating each case will be necessary because a more complete check of all the courses will need to be made to ascertain that the major and minor requirements of the law and State Board regulations have been fulfilled. Through an increase in the credential fee from $4 to $8, as authorized by Chapter 1691, Statutes of 1961, the credential processing function has been placed upon a completely self-supporting basis.

The objectives of the Office of Certificated Employment Practices are to assist the Commission on Discrimination in Teacher Employment, which was created by the 1959 Legislature, in the fulfillment of its purposes to assist school districts in effecting policies of nondiscrimination in the employment of teachers because of the race, religion, national origin, age, or marital status of candidates. The office also compiles, studies, and disseminates information which will promote the elimination of such discrimination in the employment of teachers.

---

DIVISION OF INSTRUCTION

GENERAL ANALYSIS

The Division of Instruction is the operating division through which the Department of Education co-ordinates the instructional program in the State's public school system. In addition, the department's services for upgrading and improving the statewide instructional program are provided through this division. Although the 2 major functions of this unit are the co-ordination and improvement of instruction, its functions in specific fields vary widely. In certain vocational fields the division provides classroom supervision services, and in 2 programs, police officer training and fire training, division staff members regularly organize and conduct classes.

The Bureau of Audio-Visual Education is responsible for the co-ordination and improvement of programs of audio-visual education in counties and school districts. The bureau is also a service unit for the department and for other state agencies and maintains materials and equipment to be used on a

General Activities—Continued

DIVISION OF INSTRUCTION—Continued

GENERAL ANALYSIS—Continued

loan basis by departmental staff members and other state agencies where necessary. Library consultant assistance is also provided to public school libraries as authorized by Chapter 2052, Statutes of 1959.

The Bureau of Elementary Education is responsible for the co-ordination and improvement of instruction in the elementary grades of the elementary and unified districts in the State. The efforts of the bureau staff are concentrated on working with key personnel in state and regional meetings and on the preparation of instruction materials such as teachers' guides and similar publications. No staff time is used for programs of inspection and approvals, for accreditations or for direct instructional services.

The Bureau of Secondary Education is responsible for the co-ordination and improvement of instruction in high schools and in this capacity works with the county superintendents and the high school and unified school districts maintaining junior, senior, and 4-year high schools. In addition, the bureau is required by law to approve the courses of study of all secondary schools. It collects and analyzes the annual reports from high schools and represents the department in the accreditation of high schools.

The Bureau of Physical Education, Health Education and Recreation is assigned the responsibility for the co-ordination of physical and health education and recreation programs in counties and districts. This includes responsibility for athletic services, medical and nursing services, and school district co-operation in community recreation programs of various types.

An administrative adjustment in 1962-63 has recognized that temporary help continuing from year to year is in reality a permanent need; an intermediate stenographer position has been established and it is proposed to continue this position on a permanent basis offset by the reduction of 1 man-year in temporary help.

The first year of a 3-year project on narcotics education is proposed in the 1963-64 fiscal year. The Final Report of the Special Study Commission on Narcotics made recommendations as to the role of education in the prevention of narcotic addiction.

In summary, it was recommended that the department

1. Improve the quality of the training and the material available for teachers who teach about narcotics and dangerous drugs,
2. Establish in-service teachers' training classes on the subjects of narcotics and dangerous drugs throughout the State,
3. Publish a new manual for teachers concerning narcotics and dangerous drugs, and
4. Produce audio-visual aids and resource materials on the subject of narcotics for use in the classroom.

During the first year of the project, specific program plans will be developed. Classroom teachers and school administrators, especially those in the areas where narcotics presents a problem, will be consulted as to instructional and in-service training needs. Material on narcotics and dangerous drugs will be revised and a new teacher's manual, audio-visual aids, and other related material for pupils use will be prepared.

The project coordinator will work closely with the State Interdepartmental Committee on Narcotics throughout the term of this project.

The Bureau of Pupil Personnel Services was formerly known as the Bureau of Guidance. It is responsible for the co-ordination and improvement of guidance programs in counties and in school districts and respresents the department in working with other state agencies that provide services related to the guidance and placement of school pupils. This bureau also co-operates in the administration of Title 5 of the National Defense Education Act. One-half clerical position is proposed in the 1963-64 year for workload on Title 5 program. Costs of this position will be reimbursed from the federal program.

DIVISION OF PUBLIC SCHOOL ADMINISTRATION

GENERAL ANALYSIS

The Division of Public School Administration assists school districts by rendering assistance in non-instructional areas. The services furnished include school planning, school district organization, school lunch, free textbooks, surplus federal property, the child care program, advisory service in school finance and attendance and federal financial assistance under Public Laws 874 and 815.

The Administrative Services Bureau advises school districts on financial and administrative matters, including child care centers. The bureau also reviews the audit reports of all school districts and takes appropriate action as indicated by the review.

The Bureau of School Apportionments and Reports verifies reports of school districts and compiles data for use by the public schools. The apportionments are made in 5 major stages to local jurisdictions by this unit. The bureau prepares for publication such materials as are necessary to establish and maintain uniformity of practices and procedures throughout the State in public school financial accounting.

County School Service Fund budgets are reviewed and control procedures maintained by this bureau.

The Bureau of School Planning assists and advises school districts in regard to acquisition of sites and construction of school buildings.

The Bureau of Textbooks and Publications is responsible for the editorial policy of all department bulletins and for administration of the free textbook program.

The Bureau of School District Organization assists county committees with district reorganizations, taking into account population, transportation, economics and school building facilities. A measure of the success of this program is the steady decline in the number of elementary and high school districts and the increase in the number of unified and junior college districts. The trend is shown in the following tabulation:

	1957-58	1958-59	1959-60	1960-61	1961-62	CHANGE FROM 1960-61
Elementary	1,463	1,402	1,361	1,316	1,266	—50
High school	232	229	225	221	212	—9
Junior college	26	27	28	30	39	9
Unified	97	103	107	119	133	14

This division also administers the school lunch and the special milk programs which are federal grant-in-aid programs in which cash reimbursement and commodities are allocated to participating schools. The expenditures for these subventions are shown in the Local Assistance for Education portion of the budget.

DIVISION OF SPECIAL SCHOOLS AND SERVICES

GENERAL ANALYSIS

The Division of Special Schools and Services provides administrative and educational supervision to the state residential schools for the deaf, blind, and cerebral palsied children, and it directs the programs of the Industries for the Blind, Field Rehabilitation Services for the Adult Blind, the Opportunity Work Centers for the Blind, the Orientation Center for the Blind, and the Vocational Rehabilitation Section. It also provides co-ordination of programs of special education in the public schools through the Bureau of Special Education.

Payments are included in the budget of this division for the housing of the former blind residents of the Orientation Center for the Blind and the stipends to these former residents.

The program and budget details of the state residential schools, the Industries for the Blind, the Orientation Center and the Vocational Rehabilitation Section are shown separately in the budget.

The Field Rehabilitation Service for the Blind acquaints blinded adults with the state services available and assists with an orientation program designed to each individual's particular needs. All blind persons are eligible for such services regardless of their financial status. Instruction is given in braille, typing,

---

[a] Neither receipts nor expenditures of bond funds are included in the overall budget totals.

DEPARTMENT OF EDUCATION

General Activities—Continued

DIVISION OF SPECIAL SCHOOLS AND SERVICES—Continued

GENERAL ANALYSIS—Continued

travel training, techniques of daily living and home economics. Close liaison with the Vocational Rehabilitation Section, Orientation Center, and the Department of Social Welfare is maintained to eliminate duplicate services.

The Bureau of Special Education is the unit through which the department co-ordinates, improves, and supervises the various programs for pupils with special needs. These include programs on speech difficulties, hearing losses, sight limitations, and crippling conditions. Because these programs which are carried on by counties and school districts must meet specific requirements in order to qualify for special state reimbursements, this bureau has certain responsibilities for program approval. Many of the districts are unable to provide qualified supervisors for such specialized programs and, in these cases, members of the bureau engage in classroom supervision. Instructional materials available to blind pupils through the American Printing House for the Blind are requisitioned and made available to school districts by this unit.

One man-year temporary help was established administratively in the 1962-63 fiscal year to complete a special project on the education of emotionally handicapped children. Costs of this position and all related expenses were recovered from a federal project grant.

ADULT EDUCATION FOR CIVIL DEFENSE

Objectives

The program of Adult Education for Civil Defense in California was established to develop adult programs in civil defense using existing state and local adult education resources as well as the resources of business and industry and lay organizations to teach the principles of individual, family, and community protection to the citizens of the State. The costs of this program are financed entirely by the Federal Government.

Program and Performance

There are 2 phases to the operation of this program: the training of teachers by the State Department of Education, and the conducting of classes for adults.

Teacher training consists of an intensive 15-hour course conducted by staff members of the Bureau of Adult Education, and covering the following principal subjects:

1. The current world situation and America's vulnerability.
2. Chemical warfare.
3. Biological warfare.
4. Nuclear warfare.
5. Methods of surviving natural and man-made disaster.

Upon completion of the 15-hour couse, the teachers are certificated in Individual and Family Survival, qualified to conduct 12-hour classes for the adults of their communities. These 12-hour classes are organized as classes for adults, and a supplementary federal reimbursement is made to school districts that maintain such classes. Classes are also organized in connection with business, industry or lay organizations.

This program of Individual and Family Survival training is in no way related to civil defense courses that are conducted by the Office of Civil Defense or by local civil defense offices. However, the State Department of Education maintains close liaison with the California Disaster Office.

At the completion of the 1961-62 school year, the Civil Defense Adult Education Program completed 778 classes in California and trained a total of 25,839 citizens.

DEPARTMENT OF EDUCATION

General Activities—Continued

ADULT EDUCATION FOR CIVIL DEFENSE—Continued

Program and Performance—Continued

During the summer of 1962 the staff of the Civil Defense Adult Education Program in co-operation with the Office of the Fresno County Schools produced an educational television series entitled "Keys To Survival". The object of the television presentations is to extend the program beyond the areas normally served by the public schools. This series is currently being shown on television stations in co-operation with local schools and district parent teacher associations. Plans for current and future operations include the continuance of 12-hour classes in connection with public schools, the development of additional classes for lay organizations and business and industry, and the viewing of the TV series in connection with such classes as a part of the educational process.

OFFICE OF COMPENSATORY EDUCATION

Objectives

The Office of Compensatory Education is proposed in the 1963-64 fiscal year to encourage the establishment and development of special educational programs for culturally disadvantaged children.

Program and Performance

Legislation has been introduced at the 1963 General Session (S.B. 115) to authorize this program. The program administered by the department will consist of consolidating materials and information already developed in the field, advising school districts on practices of merit that have been successful in other districts or states and the contracting with school districts to develop further information and programs in areas where insufficient data is available.

Funds are provided for a consultant, clerk and other related expenses. In addition $324,000 is provided for the contracting of the pilot research programs with school districts or other public educational units of the state. This amount will finance two-thirds of the excess costs, not to exceed $24 per student, for an estimated nine projects.

GENERAL ANALYSIS

The National Defense Education Act of 1958 was enacted by Congress (Public Law 85-864) to provide assistance to states and their subdivisions in order to ensure trained manpower of sufficient quality and quantity to meet the national defense needs of the country. The portions of the act of concern to the Department of Education are as follows:

Title 3—Improvement of Instruction. This title is composed of 2 programs: Title 3a provides federal funds to the Department of Education for reimbursement to local public school districts for the purchase of equipment and materials and for minor remodeling to improve instruction in science, mathematics, and modern foreign languages. These federal funds are matched by expenditures of the local school districts and are shown in the Local Assistance Section of the budget, Subventions for Education. Title 3b provides federal funds to the Department of Education for the costs of administering Title 3a and for expansion and improvement of supervisory and related services in the public schools in the fields of science, mathematics, and foreign languages. These funds are matched by the State.

Title 5—Improvement of Guidance. This program provides federal funds to be used to establish programs of testing and guidance for the identification and encouragement of able students. Existing state and local expenditures in guidance programs meet the matching requirements of this title so no General Fund appropriation is required. The Title 5 funds reimbursed to school districts are shown in the Local Assistance Section of the budget, Subventions for Education.

Title 8—Improvement of Technical Education. This program provides federal funds to improve technical vocational education and has been amended into the Vocational Education Act of 1946. Existing state and local expenditures in vocational education meet the matching requirements of this title so no General Fund appropriation is required. The budget and program for the title are shown in the Education Section of the budget, Vocational Education, and in the Local Assistance Section, Subventions for Education.

Title 10—Improvement of Statistical Services. These federal funds are provided to improve educational statistics so that more valid information is available about the condition and progress of education in the State. State matching funds are included for this program.

These programs are to expire at the end of the 1963-64 fiscal year in accordance with the provisions of the federal law.

TITLE 3b—IMPROVEMENT OF INSTRUCTION

Objectives

Title 3 of the National Defense Education Act is concerned with the improvement of instruction in the fields of science, mathematics, and modern foreign language.

Program and Performance

Before a state can participate in the provisions of Title 3, it must prepare and have approved by the United States Commissioner of Education a state plan which becomes the state's contract with the Federal Government for participation in the program. Federal funds are then released to the state in accordance with the approved state plan and on the basis of the state allocations determined by the United States Commissioner of Education.

Federal funds are provided in this program to be matched dollar for dollar by local public school agencies for the purchase of equipment, materials, and minor remodeling for instruction in science, mathematics, and modern foreign language, and additional federal funds are provided to be matched by the State for the administration and supervision of the program.

Under Title 3a of the Act, school districts and offices of the county superintendents of schools may file applications for funds for the purchase of equipment, materials, and minor remodeling with the State Department of Education. The State Department of Education reviews the applications in terms of the act and the state plan, and approves or disapproves. If approved by the State Department of Education the local agency is authorized to proceed as outlined in their project proposal. One-half of the expenditure is reimbursed to the district from the available federal funds.

Under Title 3b of the Act, local agencies may file for funds to provide special services to supplement local resources for plans to strengthen and extend activities for improvement of instruction in science, mathematics, and modern foreign language. Districts are not required to match these funds since they are matched at the state level.

These special services consist of providing consultant services to local districts and or funds for the production of materials developed at the local level for statewide distribution by the State Department of Education. Consultants are employed to provide leadership to local districts for such purposes as the development of: (1) in-service education programs for teachers, (2) instruction materials, (3) programs of evaluation, (4) local research projects, (5) improved program planning, and new methods and techniques that may be utilized in the implementation of projects submitted for the acquisition of equipment and materials.

TITLE 5—IMPROVEMENT OF GUIDANCE

Objectives

This program provides federal funds to be matched by local funds or by existing state program expenditures to establish, maintain and improve programs of guidance, counseling and testing in the public secondary schools.

Program and Performance

The program for this title consists of approving and supervising local school district programs in guidance, counseling and testing. The program also includes developing minimum and recommended program standards, principles and procedures; conducting group and individual conferences to inform local school personnel of opportunities and requirements; initiating and co-ordinating research projects designed to strengthen guidance services; and conducting surveys and preparing reports on the program in California for the United States Office of Education.

Seven positions are proposed to continue a research and development center established with federal funds in the current year. This center is assisting local districts in computer application for guidance and testing problems. In addition, 1 man-year temporary help is proposed in the budget year on a workload basis.

TITLE 10—IMPROVEMENT OF STATISTICAL SERVICES

Objectives

Title 10 provides for the improvement of statistical services of both state and local educational agencies to obtain more valid information about the condition and progress of education in the State.

Program and Performance

This title provides $50,000 a year to be matched by state funds for the purpose of of carrying on research to improve and strengthen the adequacy and reliability of educational statistics provided by state and local reports and records, and to improve the methods and techniques for collecting and processing educational data and information about the condition and progress of education in the State.

The programs being conducted in California are as follows:

1. Evaluation of existing statistical services, improvement of existing report forms, and modification of statistical services.
2. Development of accounting and reporting manuals.
3. Inventory of educational facilities.

A clerical position is proposed in the 1963-64 fiscal year on a workload basis. The cost is offset by the reduction of a field representative position which will not be needed for the remainder of the existence of the program.

GENERAL ANALYSIS

Objectives

The State Library in addition to maintaining a collection of books and other library materials has several service responsibilities. These include providing basic reference service to the State Legislature and to the executive branch of State Government; providing supplementary library service through local libraries in the State; assisting and stimulating the development of public library facilities in the State; and representing the interest of the State in the acquisition and preservation of historical material regarding the State.

Program and Performance

The State Librarian, who is appointed by the Governor, directs the activities of the State Library which is organized into 4 operating bureaus and 1 staff bureau for administration. The 4 operating bureaus are the Law Library, Library Consultant Services, Reader Services, and Technical Services.

The Law Library serves as a legal research and legal reference center for the Legislature, State agencies, the legal profession, and the citizenry of the State. The law librarian also provides consultant services to local law libraries in the State on request. During 1961-62, 10,155 volumes were circulated, and 4,655 volumes added to the collection, which now totals 110,937.

The Reader Services Bureau has the responsibility of coordinating the activities of the various public service functions of the library.

The Technical Services Bureau includes such functions as book repair, cataloging, ordering, maintenance of periodicals, photoservices and shipping.

One half-time intermediate typist-clerk position was authorized during the 1962-63 fiscal year to provide staff for the reestablishment of the State Library Branch in the Capitol Annex.

Due to hiring difficulties, it has not been possible to complete the weeding project originally planned for completion by June 30, 1963. Positions required for this project are proposed for extension of an additional year through June 30, 1964. Positions involved include a librarian and temporary specialists for the Reader Services Bureau, and a senior typist-clerk and two file clerks for the Technical Services Bureau. For similar reasons, the 1963-64 budget also proposes a 1 year extension of a half-time clerical position in the Technical Services Bureau to complete the major re-alignment of materials originally begun in 1960-61.

One librarian II and 1 intermediate typist-clerk are proposed in the 1963-64 fiscal year for workload increases resulting from recent federal legislation. Public Law 87-579, the Library Depository Bill, was enacted by Congress during the 1962-63 fiscal year and under the provisions of this law the State Library has been designated as a regional depository for United States publications. This enlarged responsibility is consistent with the other responsibilities of the State Library, but it will increase the workload of the Government Publications Section.

An increase of $15,184 is included in the book budget for 1963-64 to provide for an 11 percent price increase in order to maintain the existing level of book acquisitions.

A new program for local library assistance is proposed in the Local Assistance section of this budget.

---

[a] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

RURAL LIBRARY SERVICES

Objectives

The Rural Library Services Act (Public Law 597, Eighty-fourth Congress) has as its objective the extension of public library services to rural areas now lacking in such services. Federal funds are provided for this purpose.

Program and Performance

The State Library proposes to continue six presently authorized programs which demonstrate the advantages of improved library services in rural areas. The Library Consultant Services Program continues to be accelerated by the Federal Library Services Act through which federally reimbursed projects are demonstrating improved library services in rural areas. The Processing Center purchases, catalogues, classifies and prepares books for use by 16 member libraries in Northern California with reimbursement of full costs from the participating libraries.

The North Bay Counties Project is a demonstration of cooperative library services in parts of 6 counties in the northern San Francisco Bay area.

The San Joaquin Valley Counties Project encompasses a project to provide complete and rapid reference and information services to 6 county and 4 city libraries. This project is scheduled for completion in the 1962-63 fiscal year. The federal funds released from this project will be added to the amounts available for the North Bay Counties Project and the Mendocino County Project.

The Mendocino County Project will provide library service to this county which does not now have library service.

INDUSTRIES FOR THE BLIND—Continued

GENERAL ANALYSIS

Objectives

The State operates 3 subsidized production centers located at Berkeley, Los Angeles, and San Diego. These centers offer factory employment to blind, partially sighted, and physically handicapped persons enabling them to contribute to their own support.

Program and Performance

The manufacture of such items as brooms, mattresses, mops, pillowcases, and other textile items, surgical wrappers, brushes, and rubber mats constitutes the main production program together with the fabrication and assembly of products on a subcontract basis. The administrative and physical plant operating expenses are a direct charge against the General Fund and the manufacturing activities are financed from working capital supplied by the Industries for the Blind Manufacturing Fund into which the proceeds from the sale of the products are deposited.

For many years these centers were considered as separate entities with little direct central administration. The goal is now toward development of a strong central administration to coordinate the activities of the centers and provide adequate administrative controls over the program. The program is administered by a central office headquarters staff under the general direction of the Chief, Division of Special Schools and Services of the Department of Education.

In keeping with recommendations of the Co-ordinating Council on State Programs for the Blind management is attempting to make these centers more competitive by transferring the less efficient workers to the Opportunity Work Center Program. A full-time equivalent of 188 blind or otherwise physically handicapped workers were employed in the 3 centers during 1961-62 and the payroll for these workers was $427,747. It is expected that 256 workers will be employed in 1963-64 with a payroll of some $550,000.

Sales of the products of the three centers amounted to $2,420,215 and the cost of goods sold, including salaries and wages and other adjustments totaled $2,419,055. This reflects a small gain in the manufacturing operations of $1,160 in the 1961-62 fiscal year. However, $116,179 was paid for pro rata general fiscal charges in the 1961-62 fiscal year. This charge had never been previously paid by the fund and represented payment for the 4-year period from 1958-59 to 1961-62. As a result of this large payment, a net loss of $115,019 occurred in the fund's operation for the 1961-62 fiscal year.

In an effort to improve operations of the Industries for the Blind, management requested a marketing study by a private consulting firm. This study was completed in the 1959-60 fiscal year and it strongly recommended that the industries direct their products and sales activities more in the direction of the commercial market in order to avoid overdependency of the program on federal orders.

Management is now implementing many of the recommendations of this study. Sales and marketing specialists have been employed to increase the emphasis on commercial outlets and subcontract work. Quality control personnel have been employed to improve the quality of products and to more closely control the pricing structure of products in order to compete in the commercial market. These steps will lead to a more economical program in terms of state support and a better opportunity for the blind workers to have steady productive employment at a reasonable rate of compensation.

GENERAL ANALYSIS

Objectives

This center formerly located in Oakland, provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the East Bay area to enable them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of domestic and industrial types of corn brooms. Other products manufactured at this center are pillowcases, mailing bags, sewn domestic cotton items, rubber mats, and commissary items for the Federal Government.

This center was moved to a leased facility during October, 1962, to clear the right-of-way for a new freeway.

The Industries for the Blind Manufacturing Fund is charged with all manufacturing costs and the General Fund is charged with administrative costs not directly related to the manufacturing process. The financial transactions of the Industries for the Blind Manufacturing Fund for this center, are summarized in the following table. Administrative costs which are borne by the General Fund are excluded.

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit

LOS ANGELES CENTER, INDUSTRIES FOR THE BLIND—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Los Angeles area to enable them to contribute to their own support.

Program and Performance

This center is the largest of the 3 blind manufacturing centers and has the most diversified manufacturing program. The program includes the manufacture of mattresses, box springs, pillow cases, ironing board pads and covers, sterile wrappers, aprons, surgical drapes, mattress ticks, dry mops, mats, floor brushes, and commissary specialties. A contract department is operated in which subassembly work is done for local private industries.

The General Fund is charged with administrative costs not directly related to the manufacturing process and the Industries for the Blind Manufacturing Fund is charged with all manufacturing costs.

The financial transactions of the Industries for the Blind Manufacturing Fund for this center, excluding administrative costs borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1957-58	$1,313,147	$276,271	$996,099	$40,777

GENERAL ANALYSIS

Objectives

The Orientation Center admits blind persons as trainees in an intensive program designed to assist them in becoming adjusted to the inconvenience of blindness, to assist them to become self-sufficient, and in cases where feasible, to provide prevocational training that will enable the blind person to engage in remunerative work in trades, professions, private enterprise, or public services. The center, in the past, also provided a home for blind persons who were in residence prior to April 1, 1951. These blind residents have been moved from the center and are now being cared for in a private facility.

Program and Performance

In meeting these objectives, the center offers a program designed to deal intensively with problems arising from blindness. First of all, a blind person must learn new means of performing various tasks and functions connected with daily living, including new techniques of travel, communication, habits of daily living and the use of senses other than sight in orienting to the physical world about him. To accomplish these ends, the center offers courses in travel, Braille, typing, shop, home economics, daily living, and physical conditioning.

The program is designed to help the enrollee regain a feeling of competence and self-confidence, that he may return to the pattern of life which he would have followed in the absence of blindness. Almost without exception, all of the 114 students admitted or terminated during the fiscal year ending June 30, 1962, gained a confidence for self-help, some became entirely self-supporting, others resumed their functions as homemakers, and still others enrolled in courses of further training leading to vocational or professional goals.

The 1962-63 Budget reflected a planned move to suitable private facilities on July 1, 1962 for the blind residents and to temporary facilities on September 1, 1962 for the orientation program. Delays were encountered in both of these moves and 4.7 man-years were restored during the 1962-63 fiscal year to provide those services necessary for the operation of the center. One position of groundsman is being abolished because the present temporary facilities and the new center will not require services of this type. The orientation program is now being conducted in a portion of the Agostini Building in Oakland, sleeping facilities for students are leased in a nearby apartment house. Construction of a new permanent Orientation Center in Albany will be started soon. The present estimated date of occupancy is July 1964.

Rent of leased facilities is included in this budget for the first time in the 1963-64 fiscal year. Rent for the 1962-63 fiscal year was included in the Capital Outlay budget of the center.

GENERAL ANALYSIS

Objectives

This school provides for the education of blind children in order that they gain a knowledge of the world around them and confidence and competence to cope with their environment.

Program and Performance

This residential school offers general education to blind, partially blind, and deaf-blind children through the elementary grades and the high school levels. Besides special teaching methods and techniques, special equipment, such as Braille writers, Braille books, embossed maps and globes, geometric models, nature study models, audio equipment, and various types of other special equipment are used. The Helen Keller deaf-blind unit provides a full education program for doubly handicapped children.

In addition to the residential school programs, field services are available for preschool blind children, for graduates and ex-pupils. The school also administers reader services for blind college students who cannot be served by Vocational Rehabilitation Services.

A reduction in the number of deaf-blind students in the Helen Keller Unit has allowed the reduction of 1 instructor position effective September 1, 1962.

During the 1963-64 fiscal year, the school will provide general education for 170 resident children, guidance services for approximately 55 former students, field services for an estimated 85 preschool children, and reader services for approximately 75 blind college students.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and the determination of a treatment and educational program for children from Northern California afflicted with cerebral palsy and other similar handicaps. It also serves as a demonstration laboratory school for the education department of San Francisco State College. In addition, the school functions as a medical-educational diagnostic center for neurologically handicapped children in co-operation with the Bureau of Crippled Children Services, Department of Public Health.

Program and Performance

The children enrolled in the school are referred by their local school districts or by physicians in the northern counties served by the school. The length of enrollment is dependent upon the severity of handicaps and the degree of difficulty in establishing an individual educational, medical and therapy program. Upon completion of the residential program the child is returned to his local school district with a suggested educational and therapy program.

A total of 183 children were served at this school during the 1961-62 fiscal year. Of this number, 93 were evaluated in the diagnostic center only, and 90 were enrolled at the school for intensive educational training and therapy. The following table shows the number of students served and the average cost for the past several years:

	1958-59	1959-60	1960-61	1961-62	Change from 1960-61
Number of children served	156	181	133	183	50
Average cost of students served	$2,600	$2,431	$3,560	$2,600	—$960

Thirty students and graduate teachers from the Special Education Department of San Francisco State College were enrolled in the 1962 summer session of this school where they received instruction with first-hand observation on the education of cerebral palsied children.

The school also co-operates with the Bureau of Vocational Rehabilitation in providing a limited amount of prevocational training of students in order to develop sufficient skills that they may become good candidates for further conseling and work experience provided by the bureau.

Two-tenths man-year temporary help has been added during the current year and is proposed to be continued in 1963-64 to correct a staffing deficiency in the feeding of the children. One intermediate typist-clerk is proposed new in the budget to correct delays in getting the reports on children back to the school districts.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and the determination of an educational-medical program for children from Southern California who are handicapped by involvements of the central nervous system. It also serves as a demonstration laboratory school for the training of professional personnel concerned with the education and care of such minors. Various departments of the Los Angeles State College of Applied Arts and Sciences as well as other colleges and universities utilize the school's program in their training programs of professional personnel.

Program and Performance

The children enrolled in the school are currently referred by the Crippled Children Services of the Department of Public Health, by the local school districts or by physicians in the 13

Department of Education

SCHOOL FOR CEREBRAL PALSIED CHILDREN, SOUTHERN CALIFORNIA—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

counties of Southern California. The length of a child's enrollment, usually less than a year, is dependent upon the severity of the handicaps, the degree of difficulty in establishing an individual educational, medical and therapy program, and the response of the parents to counseling and guidance provided by the staff. Upon completion of the residential program, the child is either returned to the local community for continued special education and treatment, or he is cared for by other public or private facilities.

A total of 62 children were served at this school during the 1961-62 fiscal year. The following table shows the number of children served and the average student cost for the past several years:

	1958-59	1959-60	1960-61	1961-62	Change from 1960-61
Number of children served	58	65	90	62	—28
Average cost of students served	$5,714	$5,524	$4,244	$6,122	$1,878 (44.3%)

In the 1962 summer session, Los Angeles State College taught 6 courses in the education of physically handicapped children at this school in which 80 students were enrolled.

Rented facilities continue to be used with a minimum of maintenance in anticipation of the completion of a new facility adjacent to Los Angeles State College. The building is now under construction with an estimated completion date of January 1964. Upon completion, the program offered by this school will be enlarged by the establishment of a medical-educational diagnostic center which will be operated in co-operation with the Bureau of Crippled Children's Services of the State Department of Public Health. This extension of program will bring the services offered at the school up to a comparable level with the Northern California school.

Six and one-tenth new positions are proposed in this budget to properly staff the various functions of the new school.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts and vocational training.

Program and Performance

The curriculum of this school is similar to that found in the public day schools, but with special instruction for all students using oral techniques, speech and lip reading, as well as finger spelling. The vocational education program is an important part of the curriculum. A student may receive instruction in any one of the following fields: home economics, commercial art, business education, printing and linotyping, cabinet making, upholstery, metal shop, auto repair, baking and shoe repair.

The school also offers students an opportunity to qualify for admission to Gallaudet College in Washington, D.C. Twenty-six graduates from this school will attend Gallaudet College during 1962-63. Other graduates of this school are placed regularly in printing, construction, bakery, shoe repair, business, and self-employed enterprises.

While academic and vocational subjects constitute the main program at this school, the objectives of teaching these handicapped children to adjust to society and meet everyday problems successfully are met to a large extent by the total residential school program, employing psychological services and a staff of qualified dormitory counselors.

One classroom teacher position is reduced effective September 1, 1962. Enrollment was less than anticipated in the current year and the position was not required under the approved staffing formula. In addition, 0.5 man-year food service assistant has been reduced effective July 1, 1962 to reflect improvements in the feeding process at the school.

The school suffered considerable storm damage in October 1962. Emergency funds have been provided for those repairs that needed immediate attention to prevent further damage. The balance of the repairs will be performed in the 1963-64 fiscal year.

Two counselor positions are proposed for the budget year. A supervising counselor is included to supervise the primary department which consists of 180 children from 5-12 years of age. The additional counselor position is included to provide night coverage to the junior high school residence hall where insufficient coverage is now available. In addition, an electrician position is proposed in the budget year to correct a staffing deficiency in the plant operation section.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts.

Program and Performance

The curriculum of this school is similar to that found in public day schools but with special instruction for all students using oral techniques, speech and lip reading, as well as finger spelling.

A college preparatory course is offered for students competing for entrance to Gallaudet College in Washington, D.C. Eleven graduates from this school entered Gallaudet College in September 1962.

The vocational education program is an important part of the curriculum. A student may receive instruction in any one of the following fields: home economics, commercial art, printing, cabinet making, body and fender repair, spotting and pressing, business education, baking, electric motor rewinding, electric appliance repair, electronic assembly and horticulture.

One teacher position has been added in the 1962-63 fiscal year because of an enrollment growth of 13 students over the 1962-63 budget estimate (17 over the actual past year). The cost of this proposed new position will be partly offset by a reduction of 1 janitorial position which can be eliminated because of a realignment and consolidation of duties and a continued improvement in productivity of the custodial staff.

GENERAL ANALYSIS

Objectives

The purpose of vocational education is to provide training to develop skills, attitudes, and working habits; and to impart knowledge and information needed by workers to enter and progress in employment on a useful and productive basis.

Program and Performance

The vocational education program for California is based on a plan co-operatively approved and financed by local school districts, the State Department of Education, and the United States Office of Education. The available funds are expended for supervision and teacher training at the state level.

Federal funds available for vocational education under the Smith-Hughes and George-Barden Acts must be matched on an equal basis by local or state funds. The George-Barden funds may be used for the reimbursement of salaries, traveling expenses, and instructional equipment while the Smith-Hughes funds may be used for reimbursement of salaries only.

Five-tenths man-year temporary help was established administratively in the current year for workload on the Manpower Training Act. This position in Administration was fully reimbursed.

The Vocational Education Section conducts its basic program through the Supervision and Teacher Training unit which offers assistance and guidance to the local districts. These services include:

1. Agricultural education, which assists persons who are planning to enter, or have already entered the occupation of farming. In 1961-62 a total of 24,437 persons enrolled in such courses, which is an increase of 3,229 from 1960-61. The payments for cadet teachers, formerly budgeted under temporary help, is now included in the operating expenses part of the budget beginning in 1962-63.
2. Industrial education, which is designed to help the person who is contemplating entering a trade or public service occupation or has already done so. The 1961-62 enrollment in this activity totaled approximately 177,000, an increase of 32,000 from 1960-61.
3. Homemaking education, the largest of the 4 services, which operates a program of helping local school districts to assist persons engaged in the duties and responsibilities of the home. Enrollment in these courses for 1961-62 totaled 249,793, an increase of 2,338 from 1960-61.
4. Business education, which deals with the distributive occupations phase of business education. This program is conducted by part-time, day, and evening classes, the 1961-62 enrollment totaled 102,187, an increase of 3,737 from 1960-61. One-tenth man-year temporary help was added administratively in the current year for a temporary increase in workload.

---

[a] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

[b] Balance of this program reported under Vocational Education—Reimbursements to School Districts; See Local Assistance section of the budget.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS—Continued

Program and Performance—Continued

In addition to the basic vocational education program, there are 5 programs which augment the joint federal-state-local program. These are the Instructional Materials Apprentices Program, the Fire Training Program, the Area Vocational Education Program, the Manpower Development and Training Program and the Practical Nurse Training Program. These programs are discussed below.

Instructional Materials for Apprentices. This program prepares instructional materials for use by apprentices in trades in which there are a minimum of 100 apprentices. There are currently 30 such trades. The materials prepared include workbooks and testbooks and such instructional aids as examinations, progress charts, and teacher manuals. These publications are sold to the apprentice at a price sufficient to recover the direct costs of such publications. Exceptions to this pricing policy are made for certain nonapprenticeable trades with less than 100 apprentices. Federal funds are used to finance the excess costs when these exceptions are made.

Fire Training. This program provides service to local fire departments (almost exclusively volunteer fire departments) by conducting in-service training throughout the State, teaching the latest methods and techniques of firefighting, fire prevention, and fire investigation. During 1961-62, 187 schools were held and 5,197 men were instructed in classes taught by the 8 itinerant instructors on the staff. A total of 4,652 class hours of instruction were given. In addition, the annual arson seminar was conducted at the University of California at Berkeley with an attendance of 201, and the annual workshop was conducted in Fresno with an attendance of 222, also a fire prevention seminar was conducted at the University of California at Berkeley with an attendance of 168 persons.

The Area Vocational Education Program seeks to stimulate the technical education and training of technicians needed by industry. This program is responsible for the reviewing, approving, and processing of local school district applications for federal funds allotted to California for the purpose of technical education. Financing is entirely from federal funds under Title 8 of the National Defense Education Act. The workload involved in the administration of this program during the 1962-63 fiscal year increased to the point where it became necessary to establish a position of research consultant in the Education of Women function on a temporary basis. It is proposed to continue this position through the 1963-64 fiscal year.

The Manpower, Development and Training Act program is also administered by this section. The program has been enacted by Congress for the purpose of appraising manpower requirements and resources and developing and applying the information and methods needed to deal with the problem of unemployment resulting from automation, technological changes, and other types of persistent unemployment.

The allocations of federal funds to the State Department of Education for training in California during the 1962-63 fiscal year amounted to $1,727,100 for the reimbursements of training agencies for conducting training programs and $59,000 for State administration. All costs of this program will be financed from federal funds through the 1963-64 fiscal year. After this time, half of the costs would be borne by state funds on a matching basis.

Administration and supervision of this program will be accomplished primarily through the utilization of the existing organization and staff in the State Vocational Education Section. Five and seven-tenths man-years were established administratively in the 1962-63 fiscal year to handle the workload in this new program. Eight man-years are proposed in this budget to perform the workload not capable of being absorbed by the existing staff of this section. These new positions and the existing staff of this section will develop training programs designed to meet the needs of the particular groups to be trained, assist the schools in preparing the training proposals, and give general overall supervision to the operating training program.

The local schools and educational institutions conducting training programs will be reimbursed by the State from federal funds. Enrollment in these training programs will not be reported for average daily attendance purposes.

The Practical Nurse Training Program was instituted in 1956-57 by the Federal Government for the purpose of developing curricula and programs in this field. The program is being developed through contractual arrangements with the University of California.

GENERAL ANALYSIS

Objectives

The Vocational Rehabilitation Service program encourages and assists physically and mentally handicapped persons to achieve a maximum degree of self-support.

Program and Performance

The section offers diagnosis and evaluation, vocational guidance, and a series of services as needed to bring the disabled individual to the point of employment, with placement on a job as the final goal. These other services may include furnishing a prosthetic device, medical or psychiatric treatment, training and training supplies, aid in establishing selected individuals in small business enterprises and, when needed, maintenance and transportation concurrently with training or medical care. Other specialized activities include the Business Enterprise Program for the Blind, which establishes vending stands, snack bars, and cafeterias for qualified blind persons, either in public buildings or in private industrial establishments The section also conducts a fully federal reimbursed program involving the determination of disability of persons who have Social Security coverage, as well as a disabling physical or mental condition.

Demands for vocational rehabilitation services continue to increase at an accelerated rate. Nationwide publicity given to the dramatic results obtainable through modern rehabilitation methods have increased referrals from agencies who expect vocational rehabilitation services for their clients. Demands continue to increase for services to older persons and the more severely handicapped, many of whom could be rehabilitated through the use of rehabilitation centers and rehabilitation workshops.

Administration

This unit directs the program and operation functions of the section. In addition to the regular vocational rehabilitation

GENERAL ANALYSIS—Continued

Administration—Continued

program, the business enterprise program, and the disability certification program, three special extension and improvement projects are being conducted to seek improvements in the various services offered to the people of California.

As a part of administration there is again included the program of encouraging the establishment and operation of sheltered workshops for the disabled and retarded as authorized by Chapter 2030, Statutes of 1959. This program furnishes consulting experts from many fields of knowledge to community workshops to assist them in attaining more efficient operation and greater community participation in the rehabilitation of the disabled.

Vocational Guidance and Placement

This unit comprises the main body of the program. It is divided into 10 districts and 18 branch offices throughout the State.

In 1952 the Vocational Rehabilitation Section took steps to implement legislative intent by establishing a system of priorities for acceptance of eligible cases. Public assistance cases were placed high on the priority list and since that time a substantial number of recipients of public relief have been rehabilitated into employment.

In 1954 the section instituted statistical recording and reporting program and records have been kept since that time on the nature and characteristics of the people served. In the 8-year period ending June 30, 1962, the section rehabilitated 4,996 individuals and families who had been on public assistance. Since the average grant for these families was more than $1,500 (it had increased to $1,867 in the 1960-61 fiscal year and an estimated $1,900 in the 1961-62 fiscal year) the savings for 1 year would be $7,485,000 in relief payments.

The following table presents the movement of the active caseload during the fiscal years 1959-60 through 1961-62:

	1959-60	1960-61	1961-62
On hand beginning of year	8,945	9,215	9,737
Accepted during year	6,166	6,900	7,715
Total Active	15,111	16,115	17,452
Closed, rehabilitated	2,382	2,487	2,688
Closed unemployed after plan developed	827	1,050	1,192
Closed, other reasons	2,687	2,841	2,862
Total Closed	5,896	6,378	6,742
On hand end of year	9,215	9,737	10,710

As indicated by the above table, the backlog continues to show an increase. This increasing backlog has necessitated a more restrictive selection of cases.

While the number of rehabilitations accomplished by the Vocational Rehabilitation Section is numerically low compared to results in other states, evidence indicates that in many states the emphasis is placed upon serving only those disabled applicants who may be brought to employment most quickly and cheaply, often at the expense of more severely involved cases which have a greater need for service. The past experiences of the California program, when primary emphasis was placed on numbers served, created a condition where all staff efforts were directed toward bringing into the caseload persons whose needs were superficial and who might have been served through agencies such as the public employment service or community health services. California's present program gives priority to those cases whose need, broadly defined, is greatest and who, without assistance from the State, would become permanent public charges. Although such a policy is incompatible with the present national trend of serving large numbers of undifferentiated cases, the ultimate returns to this State are much greater.

1963-64 Program

The budget proposes an increased emphasis on serving industrially injured workers referred by the Department of Industrial Relations. Recent estimates indicate that only one-third of the need is presently being met. The budget for the Department of Industrial Relations (page 464) proposes an increased effort to identify those injured workers with a potential for vocational rehabilitation.

The following 17 new positions are proposed for the vocational guidance and placement program: 1 supervising vocational rehabilitation counselor I, 5 vocational rehabilitation counselors, 7 intermediate stenographers, 2 medical consultants and 2 psychologists. The 5 counselors are proposed on the basis of the counselor to population ratio (1 rehabilitation counselor to each 80,830 of the population between the ages of 16 and 64). The supervising vocational rehabilitation counselor I is requested on the established counselor to supervisor ratio. The 7 clerical workers requested represent the normal ratio of clerks to professional workers. The 2 psychologist positions proposed in 1963-64 represent no increase in the program. Equivalent services have been reduced in case-service funds for the purchase of such services. The 2 man-years medical consultant are included to handle the medical workload in the expanding program of the section.

An increase of some $47,000 in General Fund cost is also included in the 1963-64 fiscal year. This increase results from a change in the federal-state participation in the program from the present 51.51:48.49, to a new participation rate of 50.79:49.21 effective July 1, 1963.

Other increases are on a staffing and workload basis, including such items as retirement, merit salary adjustments, travel, and rent. There is also an increase of $193,854 in case-service funds for the purchase of services for clients. This represents an increase of some 6.6 percent in these funds and will, in part, allow for the price increases in the past several years which have been absorbed by the program at the cost of reduced levels of service. Also included is an increase of $6,000 for Gallaudet College student expense.

Business Enterprise Program for the Blind

This program assists blind persons to become self-supporting by providing equipment for the establishment of vending stands, snack bars, and cafeterias, in public buildings and industrial plants. Assistance is also furnished by a staff of Business Enterprise Officers to insure that such establishments are properly operated. A maximum allowance of $4,000 has been established to install any one stand.

One business service officer and related expenses are proposed new in the 1963-64 fiscal year on a workload basis. Experience in this program has shown that a business enterprise officer can most effectively supervise approximately 30 installations each month, particularly where a number of these are large snack bars or cafeterias. In Southern California one business enterprise officer is supervising 44 installations; another 27. The supervising business enterprise officer is also supervising 24 locations in addition to his supervisory responsibilities. The need to assist in promotion of cafeterias and snack bars in new locations is also a time-consuming part of the job. In Northern California one business enterprise officer is now supervising 48 stands, snack bars, and cafeterias; another 40, and the supervising business enterprise officer 27 locations.

Disability Certification Program

This program is completely financed from the Federal Social Security Trust Fund. It involves the disability certification program connected with Old Age and Survivors Insurance.

The addition of 1 district medical consultant is requested for this program. The need for this position results from the demands for more complete medical evidence on certain types of cases applying for cash benefits under the Social Security amendments of 1960. No expansion of this program is anticipated unless, in the coming Congressional session, Social Security disability benefits are further liberalized.

Extension and Improvement Projects

In addition to the base programs discussed, one extension and improvement project and two research and demonstration projects are being conducted. These projects are normally limited to the 3-year availability of the more favorable federal fund ratios of 3:1 or 4:1 General Fund dollars. All of the projects show great promise of effecting considerable savings in various General Fund programs and in local welfare funds. None of the projects will be requested for continuance as permanent programs unless the results of the projects indicate that savings of state, federal, or local funds can be effected on a long-term basis. A progress report on these special projects will be available by February 1, 1963.

GENERAL ANALYSIS—Continued

Extension and Improvement Projects—Continued

These projects are as follows:

Mental Hospital Program

This program was approved in the 1961-62 fiscal year. However, there was a delay of several months in getting under way, partly because of recruitment and also because of some problems of interdepartment project organization. This program is now fully staffed and well under way. It has as its major objectives 1) the expediting of referrals of mentally handicapped patients who may have a rehabilitation potential to Vocational Rehabilitation Service counselors working in the hospitals, 2) the early evaluation of these referrals and, 3) where there appears to be a rehabilitation potential, the beginning of early counseling and vocational rehabilitation services. A prime objective is to make the transition from the hospital to the community and continuing vocational rehabilitation services as smooth and expeditious as possible.

Rehabilitation Services to Recipients of Old Age and Survivors Insurance Project

This demonstration project was established in 1961-62, also, to determine if more intensive diagnosis and evaluation of Old Age and Survivors Insurance referrals who have been allowed disability payment grants may be rehabilitated. All who are served through this demonstration project would be high priority cases in the base program because of severity of disability, advanced age, and receipt of public assistance. Due to the high priority of these cases, the program is proposed for continuance in the 1963-64 fiscal year.

Rehabilitation Services to Recipients of Public Assistance Project

In recent years a considerable percentage of the normal caseload has been devoted to welfare recipients with the resultant welfare savings previously discussed. In examining the wlefare cases now being referred, it was found that only 44 percent of the 693 public assistance cases rehabilitated and removed from the relief rolls in 1961-62 were referred by public assistance agencies. The majority of cases found their way to the vocational rehabilitation program from other sources.

Based on studies of county cases it appears that there are many more cases of relief recipients who are potentially employable if it were possible for vocational rehabilitation counselors to spend sufficient time within the welfare department with the opportunity of reading cases and screening all new applicants. Working with the State Department of Social Welfare the Vocational Rehabilitation Section has developed an intensified program which it is believed will increase the number of relief recipients identified, evaluated, and placed in employment. The program will also be of great assistance to county welfare departments in assisting them in improving methods of identifying and evaluating disability problems among relief recipients with the resultant savings through proper treatment and services. The results will be presented to the Legislature in progress reports and at the conclusion of the 3-year study.

A budget of $334,232 was authorized for the 1962-63 fiscal year. This amount has enabled the agency to place 9 vocational rehabilitation counselors in selected county welfare offices, who together with supporting supervisory and clerical staff will operate the project.

These 9 counselors will carry a caseload and, in addition, will be accepting referrals and doing vocational rehabilitation evaluations for several hundred other public assistance recipients who will be further processed through the Vocational Rehabilitation Service district offices. The percentage of success with cases thus selected should be much higher than those selected by present methods, and it is hoped that when the program achieves maximum effectiveness at least 400 additional cases per year may be removed from the relief rolls, resulting in a savings of between six and seven hundred thousand dollars per year which will be considerably more than the cost of providing the services. It must be remembered that these estimated savings in relief funds are for a 1-year period and that if the program is successful, there will be an accumulative savings over the years many times the $600,000-$700,000 estimated.

GENERAL ANALYSIS

Objectives

The function of this system is to provide monthly allowances to public educational personnel who are qualified to retire for services or disability in accordance with the provisions of the Teachers' Retirement Act and policies established by the State Teachers' Retirement Board.

Program and Performance

The board consists of the State Board of Education plus 2 additional members who represent teachers in the system.

The present Teachers' Retirement System was established by Chapter 13, Statutes of 1944, 4th Extra Session, and is provided for in Section 13801 through Section 14415 of the Education Code. It is intended to provide retirement allowances for service or disability, and other related benefits for the California public school teachers.

The law provides for the collection of contributions from members by payroll deduction, from the counties, school districts, and other employing agencies. These funds consist of members' contributions which are based on an individual rate applied to the earned salary, and also employer contributions of $12 per year for each member employed, and an amount equal to 3 percent of the certificated payroll of each district or a lesser amount determined by applying an appropriate rate to the assessed valuation of the district's property. Additional members' contributions are received directly by the system for payments of redeposits and arrears, and for the purchase of additional annuities above those provided by the application of the normal retirement benefit formula to the individual case. The member's contributions are credited to his account to be used to provide a retirement allowance or to be refunded upon withdrawal from membership or death; they are invested in qualified securities in accordance with the system's investment program. The employer contributions, plus the appropriation from the General Fund, are used to pay current benefits to eligible persons.

This budget provides 1 general accountant II position to prepare and maintain the retirement roll for monthly benefit payment. One clerical position is provided to maintain general files of active members. Two clerical positions are provided to process correspondence with the increased membership in the system. A secretary position is also proposed for the executive office. These positions are provided to maintain the increasing workload at the existing level of service.

In addition 3.5 clerical positions are provided to perform computations of retirement allowances and options for members anticipating retirement. The level of service in this function has declined over a period of years to a point where undo financial hardship is put upon annuitants by lengthy delays in establishing benefit payments for retiring members.

---

GENERAL ANALYSIS

Objectives

The Donahoe Higher Education Act of 1960 requires the Co-ordinating Council for Higher Education to perform the following functions advisory to the governing boards of the institutions of higher education in California and to the appropriate state officials:

1. Review the annual support budgets and capital outlay requests of the University of California and the state colleges, and present comments on the general level of support sought;
2. Delineate the different functions of public higher education and counsel as to the programs appropriate to each segment;
3. Develop plans for the orderly growth of public higher education and make recommendations on the need for, and location of, new facilities and programs.

Program and Performance

The Co-ordinating Council for Higher Education was established by the Legislature in 1960, as a part of the Master Plan for Higher Education. The council consists of 15 members, 3 each from the University of California, the state colleges, public junior colleges, the independent colleges and universities, and representatives of the general public.

In addition to the continuing general requirements, certain specific tasks have been assigned to the council by the Legislature and the governing boards of public higher education. The following subjects are among those which have been examined and reported upon during the 1962-63 fiscal year:

1. A survey of California's needs in medical education.
2. An examination of the State's public adult education and extension programs.
3. An examination of factors affecting faculty recruitment, fringe benefits and retention.
4. Student fees at the University of California, the state colleges and the public junior colleges (out-of-state tuition).
5. With the co-operation of the educational segments, the development of methods by which comparable account classifications and data reporting can be employed.

Subjects currently under study and extending into the 1963-64 budget year include:

1. Review of support for the segments of public higher education.
2. Organization and promulgation of a major study, known as the Cost and Statistical Analysis for California Public Higher Education, to gather comparable data on costs in California's public higher education institutions.
3. A study of facilities utilization in the University of California, the state colleges and the public junior colleges.
4. Continuing examination of the differentiation of functions among the segments with particular emphasis upon the appropriate levels for technical and vocational programs and adult education.
5. Examination of admissions standards, transfer and retention of students among the segments of public higher education.
6. Need for new campuses and facilities.

During the past year, the council has developed and published its scope, functions and procedures to implement the statutory requirements placed upon the council. It has proceeded with the several studies mentioned above, while at the same time recruiting its permanent staff. This recruitment has gone slowly with full staffing not expected until the end of the 1962-63 fiscal year. While authorized positions provide adequate staffing for much of the council's work, it is necessary to retain the services of specialists from time to time in connection with many of the council's studies. An increase of $12,000 in contract services will help provide necessary funds for studies of dental education, paramedical education, higher educational library needs, adult education, and physical plant utilization standards.

DEVELOPMENT OF A MEDICAL EDUCATION PLAN

Chapter 1402, Statutes of 1961, appropriated $20,000 to the Co-ordinating Council for Higher Education to develop a plan for the expansion of medical education in the State of California during the next 10 years. The work is to be done in co-operation with the State Department of Public Health, the University of California, representatives of private medical centers, and representatives of the public. It is to take into account the several communities in California which afford opportunities for the establishment of new medical schools, the needs for physicians, the needs for grants-in-aid to increase enrollment in private medical schools, the need for scholarships and loans to selected financially needy students, and the possible assistance from the Federal Government. The work will be accomplished during 1962-63.

WESTERN REGIONAL HIGHER EDUCATION COMPACT

Objectives

Chapter 1694, Statutes of 1955, provided for California's participation in the compact which now includes 13 other western states, including Alaska and Hawaii, to promote better co-operation in higher education in medicine, dentistry, veterinary medicine, and public health.

Program and Performance

Three commissioners are appointed by the Governor for 4-year terms to the Western Interstate Commission for Higher Education. One commissioner must be engaged in the field of higher education in California. A report of activities is required to be submitted by the commission before January 15 each year to the Governor and Legislature. The expenditure amount represents California's share of the expenses of the Western Interstate Commission for Higher Education.

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
Pro rata share of Western Interstate Commission	$10,000	$10,000	$15,000	$5,000 (50%)
TOTAL EXPENDITURES	$157,164	$304,331	$319,025	$14,694 (4.8%)

RECONCILIATION WITH APPROPRIATIONS

General Fund

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
APPROPRIATIONS

GENERAL ANALYSIS

Objectives

The University of California is a statewide institution of higher learning which has 4 major functions.

These are:

1. Research directed toward advancing the understanding of the natural world and the interpretation of human history and of the great creations of human insight and imagination.
2. Instruction of able young people, by transmitting to them established knowledge and skills and by helping them to experience with their teachers the actual processes of developing and testing new hypotheses and fresh interpretations in many fields.
3. Training for professional careers—a training grounded in the understanding of relevant sciences and literature, and enlightened by some experience in the methods by which the boundaries of knowledge are pushed back.
4. Various sorts of expert public service.

Program and Performance

In keeping with these general purposes admission requirements at the University of California are more selective than those of the junior colleges and state colleges, even though the content of introductory courses at the freshman and sophomore levels may be closely comparable for students planning to go on to a bachelor's degree, by transfer or otherwise. The program of the University of California develops greater differences in the upper division, and goes on to levels of professional or general scholarly training not duplicated in other public institutions.

---

[a] See page 222 for explanation of net computation and page 223 for explanation of unit costs.

UNIVERSITY OF CALIFORNIA—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The University operates on 7 major campuses and a number of experiment stations. Major campuses are situated at Berkeley, San Francisco, and Davis in Northern California, and at Los Angeles, San Diego, Riverside and Santa Barbara in Southern California. Its full-time resident enrollment has been the largest in the country for a number of years. It reaches the people directly in all parts of the State through its agricultural extension service, including 4-H clubs, and through university extension classes, correspondence courses and conferences. It maintains off-campus services through which practicing doctors, lawyers, dentists, engineers, etc., may renew and deepen the value of their services to the public throughout life; a university press for the publishing and distribution of scholarly books; and diagnostic and treatment centers to which doctors may refer citizens of the State suffering from particularly dangerous or obscure ailments.

In carrying out these programs the University has attained a ranking that places it among the greatest institutions of learning in the world. As a natural part of this development the University has tended to devote its energies to advanced studies and large amounts of fundamental research. As a consequence the student body is heavily weighted in the upper division and graduate schools.

Effective September 1963, for the fall semester, the nonresident fee charged out-of-state students will increase $50 from $550 to $600 per annum. This increase was adopted by the Regents pending the determination by the Co-ordinating Council for Higher Education of the average teaching costs of the University and the State Colleges on an equivalent basis.

Effective September 1963, for the fall semester, the nonresident tuition fees in the Schools of Medicine and Dentistry will increase $25 from $700 to $725 per annum. This increase was adopted by the Regents upon the recommendation of the Co-ordinating Council for Higher Education that the University charge a rate approximate to the national average charged in other public universities. In 1961, the national average of total fees charged nonresident students in medicine was $928 and the median was $900. The increase in the University nonresident fee for medicine and dentistry from $700 to $725 will result (when added to the $150 incidental fee and the $25 Student Union membership fee) in bringing the total fee to the national median of $900.

1960-61	16,273	33.7	17,389	35.9	14,692	30.4	48,354	10.5
1961-62	18,414	34.8	18,072	34.1	16,475	31.1	52,961	9.5
1962-63 (Est.)	18,777	32.8	20,076	35.1	18,350	32.1	57,203	8.0
1963-64 (Est.)	20,802	33.9	20,973	34.2	19,502	31.8	61,277	7.4

The average year enrollments shown above indicate that the yearly percentage increase in total enrollment continues to decline from the high point experienced in 1960-61. The percentage of lower division students to total enrollment has not changed significantly over the last ten years, while the increase in the proportion of graduate students has been offset by a relative decline in the percentage of upper division students.

With the first undergraduates admitted in the Fall of 1964 at the San Diego School of Science and Engineering and the Irvine and Santa Cruz campuses planning the admission of undergraduates in the Fall of 1965, it is not anticipated that the percentage of undergraduate students in the University will decline appreciably in the immediate years ahead. The initiation of year-round operations at the larger campuses beginning in 1964-65 will also tend to result in the continuing enrollment of a high percentage of undergraduates.

GENERAL ANALYSIS—Continued

SUMMARY OF ACADEMIC POSITIONS AT UNIVERSITY OF CALIFORNIA

1953-54 THROUGH 1963-64

FISCAL YEAR	NO. OF POSITIONS	% INCREASE OVER PRIOR YEAR
1953-54	4,008.8	–
1954-55	4,203.8	4.86
1955-56	4,306.4	2.44
1956-57	4,588.3	6.55
1957.58	4,917.1	7.17
1958-59	5,225.3	6.27
1959-60	5,431.7	3.95
1960-61	5,735	5.58
1961-62	6,190.2	7.93
1962-63 (Est.)	6,717.6	8.51
1963-64 (Est.)	7,063.6	5.15

PART I—CONTINUING OPERATIONS

SUMMARY

General Administration	$556,058
Instruction and Research	4,042,489
Organized Activities	10,834
Organized Research	514,793
Libraries	661,015
Extension and Public Service	26,252
Maintenance and Operation of Plant	1,320,499
Student Services	242,568
Staff Benefits	1,859,230
General Institutional services and expense	41,281
Miscellaneous Provisions	3,038,339
Third term operation	—600,000
1962-63 range adjustment continuation costs	832,412
Budgetary savings adjustment	45,000
Budgetary savings realized	—612,641
Increased Program Cost 1963-64 Over 1962-63 *	$11,978,129

GENERAL ADMINISTRATION

Existing campuses	$237,458
Statewide administration	98,806
Administrative Planning:	
Irvine	99,496
Santa Cruz	120,298
Total	$556,058

The proposed increases for existing campuses allow a somewhat greater increase for administration in relation to enrollment than provided in 1962-63. This has been done to offset the increase in workload resulting from an increase in the number and size of federal contracts and grants for research. One-half of the overhead funds received from federal contracts is applied against the university's support appropriation.

At the Irvine campus, an additional position for a public information writer is included to develop and co-ordinate public relations and information. A planning analyst is requested to co-ordinate physical planning with academic planning and 8 positions will be required for construction supervision. The 8 positions for construction supervision will be recharged to the Capital Outlay project budgets.

At the Santa Cruz campus, although budgeted during 1962-63, business services are being handled by the San Francisco campus on a recharge basis. During 1963-64, it is proposed that these services be assumed by the Santa Cruz campus. Four positions are requested for business services and 6.5 positions for the staff engaged in physical planning and development of the new campus. Five of the new positions will be recharged to the Capital Outlay budget.

DEPARTMENTS OF INSTRUCTION AND RESEARCH

Enrollment Related Increases	$3,572,895
Academic Planning Increases:	
Irvine Campus	197,522
Los Angeles—Medical School of Dentistry	52,410
Santa Cruz Campus	74,862
San Diego—School of Humanities and Social Sciences	144,800
Total	$4,042,489

Enrollment Related Increases:

The workload increases related to the maintenance of the existing level of program support for an estimated increase of 4,074 students during the budget year 1963-64 provide for 237.25 additional faculty members and 68 teaching assistants in Departments of Instruction and Research. Fifty thousand dollars

---

* See pages 222 and 223 for distribution of funds and positions by campus.

UNIVERSITY OF CALIFORNIA—Continued

PART I—CONTINUING OPERATIONS—Continued

DEPARTMENTS OF INSTRUCTION AND RESEARCH—Continued

Enrollment Related Increases—Continued

additional is included to allow for some increase in level of support for faculty at the Riverside and Santa Barbara campuses. A Dean of Medicine position is proposed at the San Francisco Medical School and the equivalent of 1 full-time academic dean position is proposed at the Riverside campus to strengthen the offices of the Dean of Letters and Sciences and the Dean of the Graduate Division.

At the Berkeley campus 0.7 position is proposed as a supervisor in teacher education to handle the increased workload resulting from a shift in emphasis in teaching instruction towards the fields of science, math, and languages. One field work supervisor in Social Welfare is proposed in relation to the increasing number of graduate students being trained.

At the San Francisco Medical School, a quarter-time lecturer is proposed to strengthen course offerings in Oral Hygiene and a half-time position is being added to supervise interns assigned to the San Francisco General Hospital.

Academic Planning Increases:

1. Irvine Campus ____________________ $197,522

The 1962-63 Budget provides for an academic dean, 3 divisional chairmen, and 1 secretary, all on a half-time basis. The funds requested for 1963-64 will permit these 5 positions to be established on a full-time basis, will provide 2 additional nonacademic positions in the Dean's Office and 4 additional full-time division chairmen with secretarial support. The academic dean and 7 divisional chairmen will comprise the academic planning staff for the new campus and will recruit the teaching staff required for the opening of school in September 1965.

2. Los Angeles Medical School—School of Dentistry ______________ $52,410

Three associate professor II positions are proposed for the School of Dentistry as the second staffing increment to develop the instructional curricula of the school which plans to admit its first class in the fall of 1965.

3. Santa Cruz Campus _______________ $74,862

The 1962-63 Budget provides for 4 academic deans, all on a half-time basis. The funds requested for 1963-64 will permit these positions to be established full time to aid the architects in physical planning, to establish curricula in the various divisions and to begin faculty recruitment. A fifth dean (lead man in engineering) is requested for 1963-64, since engineering instruction will be added for the second or third year of instruction.

4. San Diego—School of Humanities and Social Sciences ______________ $144,800

Eight professor III positions are proposed to develop a staff nucleus in English, History, Anthropology, Linguistics, Economics, etc., as an essential step in preparing for undergraduate enrollments in the following year.

ORGANIZED ACTIVITIES ____________ $10,834

One position ($3,538) is proposed in the Field Service Center of the School of Education at Berkeley for the purpose of rendering greater professional service to local school districts. One scene technician position ($5,448) is proposed for University Theater to enable the theater to play an expanded role in the instructional program of the Department of Dramatic Art where enrollments have increased 37 percent this last year. $1,848 is proposed to pay partial costs of an augmentation of the Visual Aids staff at the San Francisco Medical School.

ORGANIZED RESEARCH

Enrollment Related Increases	$124,793
Institutes and Bureaus:	
Berkeley	26,750
Davis:	
Computer Center	5,000
Bureau of Governmental Affairs	5,000
Lick Observatory	10,000
Los Angeles	33,250
Agricultural Sciences:	
Davis:	
Agricultural Research	175,000
Riverside:	
Moreno Valley Ranch	20,000
Agricultural Field Station	15,000
Agricultural Research	100,000
Total	$514,793

One hundred twenty-four thousand, seven hundred ninety-three dollars is proposed for research grants and research travel for the 257.25 additional faculty members provided in Departments of Instruction and Research. This amount will continue the same level budgeted for this purpose in 1962-63, allowing for price increases, plus $20,000 for improved level of service at the Riverside and Santa Barbara campuses. Sixty thousand dollars is proposed at Berkeley and Los Angeles to meet the increase in workload of existing institutes and bureaus arising from the increase of graduate students advancing to doctoral candidacy.

The computer center at Davis was first established in 1962-63 and provides valuable training for graduate students as a laboratory research tool, as well as serving the faculty in diverse research programs. The Bureau of Governmental Affairs was provided limited

UNIVERSITY OF CALIFORNIA—Continued

PART I—CONTINUING OPERATIONS—Continued

ORGANIZED RESEARCH—Continued

funds in 1962-63 to establish this new unit for service and research in problems of government. Additional funds are proposed in the budget year for additional research assistance and for the acquisition of library materials. The Lick Observatory at Mount Hamilton has completed its second year of operation of the 120-inch telescope. The proposed increase covers identifiable cost increases, largely for photographic plates.

Agricultural Sciences	$310,000

1. Agricultural Research — Davis and Riverside ($275,000)—These funds will provide resources to enable the research staff to strengthen its level of service to the State. Particular attention will be given to arresting crop losses from insects, weeds and nematodes that, according to recent surveys, have exceeded three-quarters of a billion dollars. Of this amount $175,000 will be allocated to Davis to match an increase in University funds for research in agriculture by industry. The remaining $100,000 is budgeted in the statewide office for allocation to specific projects as the workload demands.
2. Moreno Valley Ranch ($20,000)—This 840-acre ranch was acquired in 1961-62 for additional research space near the Riverside campus. Operating funds are provided for 1963-64 in addition to some improvements in the Capital Outlay budget.
3. Agricultural Field Stations ($15,000)—The proposed augmentation will provide for an associate specialist as superintendent of the new Kearney Horticultural Field Station, for minimum supplies necessary to its initial operation, and for the expanding experimental acreage at the new West Side and South Coast Stations.

LIBRARIES

Existing campuses	$616,885
Irvine campus	19,134
Santa Cruz campus	24,996
Total	$661,015

The $616,885 proposed for libraries on existing campuses provides for workload increases related to enrollment increases and in addition allows the same amount of increase budgeted during 1962-63 for improvement in level of service towards the goals outlined in the University's library plan.

At the Irvine campus, in 1962-63 funds were appropriated for a University librarian, a librarian II, and a secretary-stenographer, all on a half-time basis. The budget request allows the establishment of these positions on a full-time basis. At the Santa Cruz campus, similar staffing is provided.

Six hundred thousand dollars is proposed in the Capital Outlay budget for the University to continue acquiring an initial library collection of 75,000 volumes for each of the 3 new general campuses.

EXTENSION AND PUBLIC SERVICE	$26,252

Seventeen thousand three hundred fifty-two dollars is proposed to continue the state support of the University extension at 9 percent of the operating costs, subject to whatever changes in the State's adult education program may be enacted by the 1963 Legislature in response to the Co-ordinating Council's study now in progress. Eight thousand nine hundred dollars is provided for agricultural extension to maintain the same level of service provided in 1962-63 and offset increased costs of printing agricultural publications.

MAINTENANCE AND OPERATION OF PLANT	$1,320,499

One million three hundred twenty thousand four hundred ninety-nine dollars is proposed to maintain 1,682,748 outside gross square feet of new physical plant. The unit rate cost per square foot statewide budgeted for 1963-64 is 83 cents compared to 84.3 cents budgeted for 1962-63.

STUDENT SERVICES

Enrollment related	$223,546
Irvine campus	7,250
Santa Cruz campus	11,772
Total	$242,568

Student services at existing campuses are requested in relation to enrollment increases. This amount will continue the same level of service authorized in 1962-63, although the unit cost per student will decrease slightly from $55.60 to $54.34 during the budget year.

STAFF BENEFITS

Carnegie Retiring Allowances	—$4,000
Regents Contributions to pre '54 Emerite	—22,000
State Teacher's Retirement	—2,980
State Compensation Insurance	—100,000
University of California Retirement System	2,108,230
State Employees' Health and Welfare Benefits	—120,020
Total	$1,859,230

See continuation of detailed explanation on page 224.

EXPLANATION OF INSTRUCTIONAL EXPENDITURES PER STUDENT SHOWN ON PAGES 215 AND 216

Total gross expenditures including contributions to the State Employees' Retirement Fund. Excludes expenditures, income, and enrollment, if any, for the following activities and functions:

(1) Summer sessions, extension and public service, organized research, student aid, auxiliary enterprises.
(2) Organized activities of educational departments such as the University Creamery at Davis, and the Optometry Clinic at Berkeley which are supported out of their own income. However, teaching hospital expenditures in excess of their income are included as well as expenditures in the University elementary schools both of which activities represent instruction.

Total net expenditures equal total state appropriations less those state funds attributable to those items excluded in gross expenditures above.

EXPLANATION OF INSTRUCTIONAL UNIT COST EXPENDITURES PER STUDENT SHOWN ON PAGES 215 AND 216

Unit costs developed for use in the Master Plan were based on information obtained from the Restudy conducted in 1953-54. This previous study provided the cost per student credit hour (SCH) for each level of instruction. By obtaining the total SCH's produced in 1960-61 and projecting those to be produced in 1961-62 and 1962-63 based on enrollment estimates, it was possible to prorate expenditures for each of the years in question by weighting the SCH's produced at each level of instruction by the same cost ratios that existed between them in the two previously mentioned studies.

Students who are *classed* as lower, upper, or graduate division students, do not take all their course work at the corresponding level of *instruction.* Therefore, in order to compute the cost per full-time student, a study was made at each campus of the University to determine the average annual number of course units taken at each level of *instruction* by each *class* of student. The cost per SCH was then extended by the course units undertaken at each level of instruction.

STAFF BENEFITS—Continued

The reduction for State Compensation Insurance is in line with the experience of actual premium requirements for 1961-62. Contributions to the University of California Retirement System will increase in accordance with the growth of staff employees eligible for membership. The reduction of Health and Welfare contributions is based on current cost experience which represents an average unit cost rate of $48.46 per employee as against $56.47 budgeted during the current year.

GENERAL INSTITUTIONAL SERVICES AND EXPENSE

Furniture Pool	—$24,560
Publications	30,611
General Liability Insurance	46,225
External Audit Fee	10,000
Consulting Actuary	3,000
Davis—Farming Operation	3,000
University Press	—26,995
Total	$41,281

The proposed increases will generally allow the same level of service to be provided during the budget year as is being provided during 1962-63. The increase in insurance is due to higher premium rates and broadened coverage. The increase in the cost of publications is related to increased enrollments and increased printing expense. The University Press subsidy is reduced due to the expanded volume of book sales income. The increase in cost of farming operations at the Davis campus is offset by General Fund income.

MISCELLANEOUS PROVISIONS

Merit increases and promotions	$2,738,339
Price increases	300,000
Total	$3,038,339

Provisions for academic and non-academic merit increases and promotions are continued at the existing level for 1963-64.

The provision for price increase is based on the Department of Finance price letter and does not duplicate increases requested elsewhere in the budget. It specifically includes $120,000 for a postage rate increase as anticipated by the Department of Finance. Other increases include allowance for departmental printing, gas and fuel oil, janitorial supplies, automotive repairs and operational expense, administrative travel and medical supplies.

THIRD TERM OPERATION —$600,000

$600,000 was budgeted during the 1962-63 fiscal year to finance the start of year-round operation during 1963. At this time it was estimated that $3,000,000 additional would be needed during the 1963-64 fiscal year for this change. In June 1962, the Regents directed the President to prepare for a full year school calendar beginning in 1964-65. It is now contemplated that it may be desirable to operate on one campus only in 1964-65 and to provide the same program on other campuses in succeeding years. Thus the additional operating and capital outlay funds required might first be used on the campus facing the most severe enrollment pressures.

The long-run advantages of year-round operation are substantial. It would make possible (1) the reduction of future requirements for capital outlay, (2) the instruction of more students in existing facilities through more intensive utilization of plant and equipment, and (3) the accelerated progress toward degrees for students who wish to take advantage of this possibility. However, the policy and fiscal implications will involve some additional increases in the operating support budget during 1964-65 and more substantially in 1965-66.

1962-63 RANGE ADJUSTMENT CONTINUATION COSTS $832,412

This amount represents the funds needed to finance the salary increase adjustment authorized by the 1962 session of the Legislature during the budget year. During the current year, the amount of $832,412 has been allocated from year end balances available to the university.

BUDGETARY SAVINGS ADJUSTMENT $45,000

This amount represents the reduction in the estimate of salary savings to be realized during the budget year. The university has typically achieved unexpended balances of between 3 and 4 percent of their General Fund appropriation. The budgeted level for 1963-64 after the $45,000 adjustment from the current year's level will approximate 3.5 percent of the General Fund appropriation.

BUDGETARY SAVINGS REALIZED —$612,641

This amount represents the salary savings achieved by the university from turnover during the current year between the time this budget was estimated in December 1961 and July 1, 1962.

PART II—PROGRAM AUGMENTATIONS

SUMMARY

Instruction and Research	$322,000
Organized Research	140,000
Libraries	76,000
Miscellaneous Provisions	250,000
Totals, Program Augmentations	$788,000

DEPARTMENT OF INSTRUCTION AND RESEARCH

Davis—Department of Applied Sciences __ $100,000

It is proposed to establish a Department of Applied Science at Livermore with an initial complement of 12 positions as a part of the College of Engineering at Davis. This department would make use of existing facilities at the Lawrence Radiation Laboratory, Livermore, for training graduate students in the following subjects:

Computing
Nuclear physics
Radiochemistry
Nuclear engineering
Materials at high temperatures and pressures
Magneto hydro-dynamics

In the first year it is planned to take 50 students and to add an increment of 50 until a total of 250 students is reached. The teaching program would be at the graduate level only, with both Masters' and Doctors' degrees being offered.

San Diego Medical School $222,000

It is planned to accommodate an entering class of 32 medical students in the fall of 1965. To be ready for students at that time, it is proposed in 1963-64 to recruit departmental chairmen as the cadre staff for the University's third medical school development. This will provide 5 departmental chairmen in the basic sciences and 5 departmental chairmen for the clinical departments.

ORGANIZED RESEARCH

Computer Center—Berkeley $50,000

To keep the University in the vanguard of computing technology and to provide for demands for advanced computing in instruction and research, funds are requested to expand to Berkeley Computer Center. It is estimated that about 80 percent of the funds to support the expanded center will come from federal grants and contracts. This requested augmentation will increase the University's support of free time for instructional and unsupported research use in recognition of additional faculty and graduate student research needs.

Institute of Urban and Regional Development—Berkeley $50,000

This new institute will co-ordinate existing interdepartmental research and will insure the marshalling of efforts to seek solutions to urgent national and international problems arising from population concentration and urbanization, including problems of development and use of natural and human resources. The Institute will concentrate on broad, fundamental aspects, and will embrace two subsidiary centers focusing on particular problems in the spheres of urban and regional development and real estate and urban economics. It is expected that extra-mural funds will be forthcoming for the support of major projects. The initial budget will include a Director of the Institute, a Chairman of the Center for Urban and Regional Planning and supporting staff. The Center for Real Estate and Urban Economics will not require core support in the initial year.

Computer Center—Santa Barbara $25,000

Santa Barbara has been the only general campus without a computer center. The proposed increase will support a small establishment which will offer training facilities for faculty and graduate students, and complement, rather than duplicate, the more sophisticated systems available at UCLA for the more complex research programs. The funds requested provide for a director and 2.17 positions of nonacademic supporting staff.

Wildland Research Center $15,000

These funds will initiate a new program of research projects for the preservation of California wildlands. Individual areas for research will be proposed by the University faculty, and will be directed principally toward minimizing the destructive effects of fire, insects and recreational usage. The need for greatly expanded wildland research has had added impetus in 1960 and 1961 because of the severe wildland and suburban wildfires, notably the catastrophic Bel-Air fire in Los Angeles, and continuing impairment of the native wildland of California by increasingly heavy recreational use.

LIBRARIES

San Diego Medical School $76,000

At San Diego, 13 positions are requested to allow the assembly of an adequate medical collection for the entering class in 1965.

In addition to this $76,000 for support, $150,000 is included in the Capital Outlay budget for 10,000 volumes to be purchased during 1963-64 to commence assembly of a reasonably adequate medical collection for the entering class in 1965.

MISCELLANEOUS PROVISIONS

Increased cost of 1962-63 range adjustments $250,000

A special amount of $250,000 is included as a one-time cost of continuing the new academic salary schedule adopted effective July 1, 1962, through the 1963-64 Budget year.

UNIVERSITY OF CALIFORNIA—Continued

DETAIL BY CAMPUS

STATEWIDE ADMINISTRATION

This function is concerned with the co-ordination of separate campus activities into a university program, for management of endowments and University funds, and for co-ordination with nonuniversity groups. The Regents set the policies for operation of the University, the president and statewide staff officers carry out these policies on a statewide basis, with each local campus being administratively self-sufficient in carrying out the policies on their campus. Statewide administration includes the president, who is the administrative head of the University, the vice president of the University, who is the chief academic officer. Other vice presidents are provided for legal advice, for business operations and construction, for budgetary and accounting control, for governmental relations and projects, and for university relations.

BERKELEY

The Berkeley campus, oldest and largest in enrollment in the multicampus, statewide University of California, is located in the city of Berkeley. Instruction and degrees are offered in schools and colleges, as follows:

agriculture
business administration
chemistry
criminology
education
engineering
environmental design
forestry
law
letters and science
librarianship
optometry
public health
social welfare

In addition, programs of research are conducted in schools, colleges and institutes, in part as follows:

business administration
education
engineering
letters and science
institute of basic research in science
institute of human development
institute of industrial relations
institute of international studies
institute of personality assessment and research
institute of social science
institute of transportation and traffic engineering

The campus academic plan for the decade of the '60s encompasses the following broad goals:

(1) to maintain and augment competence in all basic fields of human knowledge now represented in instructional and research programs.
(2) to establish leadership in selected new major areas of instruction and research such as biophysics, geography, radio-astronomy, nuclear engineering, Slavic studies, and urban and regional development.
(3) to foster interdisciplinary research and to increase research opportunities for graduate students in organized research units.

Present campus enrollment with approximate equal distribution between lower division, upper division, and graduate students, are expected to change significantly by 1970 to approximately 21.8 percent lower division students, 34.6 percent upper division, and 43.6 percent graduate in a total projected student body of 27,500.

UNIVERSITY OF CALIFORNIA—Continued

DAVIS

The Davis campus, 13 miles west of Sacramento, occupies 3,000 acres. It is a general campus and the University's principal campus for teaching and research in the agricultural sciences and veterinary medicine. Instruction is also offered in engineering and letters and science. A planned maximum of 15,000 total enrollment is anticipated between 1975 and 1980.

IRVINE

The Irvine campus is in Orange County near Newport Bay and comprises a 1,000 acre gift from the Irvine Company.

Academic and physical planning, in anticipation of the admission of the first students in the fall of 1965, are proceeding under direction of the Chancellor appointed by the Regents in January 1962.

The 1963-64 Budget has been planned on the following premises:

(1) That the campus will open to 500 students in September 1965 in permanent buildings to be constructed for a 2,000-student capacity.

(2) That the campus will be staffed with 65 teaching personnel, and have its own operating capability prior to the opening of school, and

(3) That the library will have 75,000 volumes when instruction begins in fall of 1965.

LOS ANGELES

The Los Angeles campus, located in the City of Los Angeles, encompasses 410 acres in the foothills of the Santa Monica Mountains and includes a general campus and a medical center.

The instructional curricula includes colleges and schools as follows:

- agriculture
- architecture
- business administration
- education
- engineering
- fine arts
- law
- letters and science
- library
- social welfare
- dentistry
- medicine
- nursing
- public health

Agriculture is in process of transfer to the Riverside campus. Organized research which provides graduate instruction while increasing basic knowledge is conducted in the following subject fields:

- business administration
- engineering
- letters and science
- business and economic research
- government research
- geophysics
- industrial relations
- transportation and traffic engineering

Los Angeles Medical Center:

The center for the Health Sciences is based on the concept of interdisciplinary co-ordination, and consists of the Schools of Dentistry, Medicine, Nursing and Public Health, Major support for the teaching and research program is provided by the following:

- Teaching Hospital
- Neuropsychiatric Institute
- Biomedical Library
- Brain Research Institute
- Rehabilitation Center
- Laboratory of Nuclear Medicine and Radiation Biology

The long-range plan for the Medical Center provides for increasing size of classes from the present 72 medical students to 128, and for training of 96 dental students per class. The School of Dentistry, now in the planning stage, will accept its first students in the fall of 1965.

RIVERSIDE

The Riverside campus in the City of Riverside is a general campus and also the Citrus Research Center and Agricultural Experiment Station for agriculture in Southern California. The curricula includes colleges of agriculture and letters and sciences. Enrollment is planned to reach 10,000 students by about 1980.

Since its origin in 1907 The Citrus Research Center has conducted research in virtually every aspect of agriculture represented in Southern California. A considerable portion of its staff constitutes the faculty of the newly established College of Agriculture. The campus research program includes an Air Pollution Research Center and The Philip L. Boyd Desert Research Center.

SAN DIEGO

The San Diego campus provides instruction in a school of science and engineering, and conducts organized research which also provides graduate instruction in the following:

Scripps Institution of Oceanography
Marine Life Research
Institute of Geophysics
Institute of Marine Resources

Planning is underway for establishment of a new medical school at San Diego.

The School of Science and Engineering admitted its first graduate students in 1960 and will expand to 220 graduate students in 1963-64. The first undergraduates will be admitted in the fall of 1964, as a step toward building to a student body of 4,000 by 1970. The San Diego campus is planned eventually to become a large, general campus, capable of accommodating 27,500 students.

SAN FRANCISCO

The San Francisco campus encompasses professional schools of dentistry, medicine, nursing and pharmacy, a teaching hospital and ancillary services supporting one of the nation's major medical centers.

Research in the health sciences is carried on under a wide variety of programs of which the following draw support from state funds:

Institute for Cardiovascular Research
Hooper Foundation
Hormone Research Laboratory
Cancer Research Institute
Metabolic Unit—Research in Arthritis and Allied Disease
Neurology—Multiple Sclerosis
Radiological Laboratory
Radioactivity Research Center

The fourth-year class of The School of Dentistry is being increased from 64 to 75 students. The School of Medicine with 100 students in each of the 4-year classes of The M.D. curriculum will expand the number of post doctorals (i.e. interns and residents) from 470 to 485 and the graduate academic category from 83 to 98. Enrollment in The School of Nursing, however, are not now expected to reach the previous estimate of 343, and in 1963-64 only 255 students are forecast. Enrollments in Pharmacy will continue at the level of 340 students.

UNIVERSITY OF CALIFORNIA—Continued

SANTA BARBARA

The Santa Barbara campus is situated on the seashore, adjacent to the community of Goleta, 7 miles northwest of the City of Santa Barbara. Its instructional program includes a college of letters and science and schools of education and engineering. A planned enrollment of 15,000 students probably will be reached between 1975 and 1980.

SANTA CRUZ

The Santa Cruz campus is located within and adjacent to the western boundary of the City of Santa Cruz, and comprises 1,994 acres acquired in 1962. It is planned to construct and open facilities in 1965 for 500 students and provide for 5,000 students by 1972, with an eventual planning size of 27,500.

The long-range plans are aimed at the development of a campus which will

1. Seek special distinction in fields not emphasized by other campuses
2. Fit the academic program to its environment in the North Central Coast Area, and
3. Seem small as it grows large.

It is proposed to establish a residential college plan, with a balanced offering in the liberal arts, as a means of developing a campus embodying these qualities. The residential college plan would combine the advantages of a small college (such as close relationships between instructor and students) with the superior library, laboratory and other facilities of a modern university. Undergraduate teaching will be emphasized and its importance to the educational program recognized.

UNIVERSITY EXTENSION

Since its beginning in 1891, University Extension has become a major service activity of the University. It extends the resources of the University to the adult population of the State by providing evening classes, short courses, conferences, correspondence courses, and special programs. State support is continued at 9 percent of the program, with fees covering the balance of costs.

UNIVERSITY PROGRAMS AND PROVISIONS

These accounts include certain activities not assigned to campus administration together with all of the central lump sum provisions which later will be allocated to campus budgets.

These provisions cover such costs as retirement and health and welfare, merit salary increases, promotions, sabbatical leave replacement, removal expense, and contingencies.

GENERAL ANALYSIS

Objectives

Hastings College of Law is a fully accredited institution offering systematic and thorough instruction in those branches of law which will best prepare the student for practice of the profession of law.

Program and Performance

Hastings College of Law has its own board of directors. It is designated by statute as the law department of the University of California, and degrees are issued in the name of the Regents of the University of California.

The college was founded in 1878 by S. C. Hastings with a grant of $100,000 to the State. By stipulation in the original agreement, the State must pay to the school the sum of 7 percent per annum on the grant or repay the $100,000 in full to the Hastings' heirs.

One of the noteworthy parts of the program at Hastings is the "Sixty-Five Club." Many faculty members are former deans of other law schools or are renowned teachers who have been obliged to retire upon reaching retirement age. A very distinguished faculty has been assembled at Hastings by employing these men.

The reduction of $37,788 in authorized positions in the current year budget can be attributed to the postponement of the originally planned extra section of the first-year class, the need for which has been met by temporarily overloading first-year classes and scheduling on a double-session basis.

The budget for 1963-64 includes 4.2 additional teachers, most of whom will be required to teach subjects in an additional section of the third-year class, which will be required based on the anticipated increases in enrollment. In addition, the 1963-64 budget includes 0.4 of a substitute teacher for emergencies and one additional student janitor in order to provide maintenance services for the additions to the building which will be completed in the fall of 1963.

GENERAL ANALYSIS

Objectives

As defined in Education Code. Section 22606, the primary function of the state colleges is the provision of instruction for undergraduate students and graduate students, through the master's degree, in the liberal arts and sciences, in applied fields and in professions, including the teaching profession. The doctoral degree may be awarded jointly with the University of California. Faculty research is authorized to the extent that it is consistent with the primary function of the state colleges and the facilities provided for that function.

Program and Performance

The Trustees of the California State Colleges provide the policy determination and central administration of the California State Colleges. The current fiscal year is the second year of operation under the Trustees, who on July 1, 1961 succeeded to the powers, duties, and functions previously vested in the State Board of Education and the Director of Education with respect to the administration of the state colleges.

The California State Colleges consist of 17 colleges. Two of these colleges, San Bernardino-Riverside State College and South Bay State College, are in the planning phase. One hundred eighteen thousand seven hundred eighty-eight individual students, or 86,405 full-time equivalent students, will be enrolled in the state colleges in 1962-63. In 1963-64 an estimated 129,340 individuals, or 94,840 students (FTE), will be enrolled; this represents an increase of 9 percent over the 1962-63 enrollment.

Enrollment Trends

The following table reflects the growth in full-time-equivalent (FTE) enrollments in the state colleges during the period 1951-52 through 1963-64. (Full-time-equivalent enrollments are computed on the basis of 15 semester units of instruction representing 1 unit of full-time-equivalent enrollment.)

Annual Full-Time-Equivalent Enrollment of Regular and Limited Students in California State Colleges, Regular Sessions 1951-52 Through 1963-64

(Does Not Include Summer Quarter at State Polytechnic College)

Academic Year	Regular FTE	Limited FTE	Total FTE
1951-52	22,584	1,666	24,250
1952-53	23,638	2,147	25,785
1953-54	26,777	2,804	29,581
1954-55	31,269	3,236	34,505
1955-56	36,326	3,808	40,134
1956-57	41,374	5,086	46,460
1957-58	45,755	6,228	51,983
1958-59	49,061	7,284	56,345
1959-60	53,162	8,168	61,330
1960-61	61,198	7,891	69,089
1961-62	68,522	8,560	77,082
1962-63 (Est.)	76,620	9,480	86,100
1963-64 (Est.)	84,560	9,960	94,520

---

[a] 1963-64 cost per student includes cost of new program augmentations.

[b] After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the colleges.

[c] After deduction of expenditures for summer session, extension, and special projects—reimbursed.

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

GENERAL ANALYSIS—Continued

Distribution of Annual Full-Time-Equivalent Enrollment by Level of Instruction

Academic Year	Lower Division	Percent of Total FTE	Upper Division	Percent of Total FTE	Graduate Level	Percent of Total FTE	Total
1957-58	22,363	43.0%	27,260	52.4%	2,360	4.5%	51,983
1958-59	23,952	42.5%	29,739	52.8%	2,654	4.7%	56,345
1959-60	27,733	45.2%	30,824	50.3%	2,773	4.5%	61,330
1960-61	32,589	47.2%	33,460	48.4%	3,040	4.4%	69,089
1961-62	37,115	48.2%	36,491	47.3%	3,476	4.5%	77,082
1962-63 (Est.)	42,190	49.0%	40,000	46.5%	3,910	4.5%	86,100
1963-64 (Est.)	47,260	50.0%	42,970	45.5%	4,290	4.5%	94,520

The distribution of enrollment by level of instruction reflects an increasing percentage of lower division students, a decreasing percentage of upper division students and a constant percentage for the graduate level.

Degrees Granted and Graduate Programs

There has been an increase in the number of degrees granted, roughly corresponding to the increase in enrollments. There has also been a marked growth in number and types of graduate programs in the state colleges since 1951-52.

In 1961-62 the state colleges awarded 15,567 degrees, representing an increase of 10% over the previous year. Almost 15% of the total degrees awarded are graduate degrees.

Number of Undergraduate and Graduate Degrees Granted in California State Colleges 1951-52 Through 1961-62

Year	Undergraduate Degrees	Graduate Degrees	Total Degrees	Percent Graduate
1951-62	5,691	434	6,125	7.1
1952-63	5,272	653	5,925	11.0
1953-54	5,423	752	6,175	12.2
1954-55	5,840	975	6,815	14.3
1955-56	6,878	1,270	8,148	15.6
1956-57	8,709	1,447	10,156	14.2
1957-58	9,737	1,761	11,498	15.3
1958-59	10,770	1,668	12,438	13.4
1959-60	11,034	1,911	12,945	14.8
1960-61	12,027	2,062	14,089	14.6
1961-62	13,284	2,283	15,567	14.7

Programs Offered

The following table indicates the scope of the programs offered in the state colleges and shows their relative size expressed in terms of full-time-equivalent enrollments for the spring term, 1961 and 1962:

Full-Time Equivalent Enrollment by Subject Field California State Colleges, Spring Term, 1961 and 1962

Subject Field	1961 Enrollment	1961 Percent	1962 Enrollment	1962 Percent
Agriculture	1,283	1.9	1,305	1.7
Business	5,602	8.2	5,986	8.0
Education	9,021	13.2	9,426	12.6
Engineering	3,034	4.5	4,207	5.6
Home Economics	745	1.1	879	1.2
Humanities and Languages				
Art	2,348	3.4	2,660	3.6
English—Literature	6,046	8.9	5,602	7.5
Foreign Language	1,214	1.8	1,702	2.3
Humanities	511	0.8	595	0.8
Music	1,902	2.8	2,035	2.7
Philosophy	1,240	1.8	1,478	2.0
Radio—TV	71	0.1	82	0.1
Speech and Drama	2,092	3.1	2,405	3.2
Industrial Arts and Technology	941	1.4	1,049	1.4
Military Science	150	0.2	160	0.2
Physical Education				
Health	1,209	1.8	1.230	1.6
Physical Education	2,462	3.6	2,707	3.6
Recreation	245	0.4	258	0.3

Health Science	393	0.6	523	0.7
Mathematics	3,549	5.2	3,710	5.0
Natural Resources	233	0.3	191	0.3
Physical Sciences	4,265	6.3	4,705	6.3
Social Science	12,039	17.7	13,605	18.2
Totals	68,098	100.0*	74,845	100.0*

---

* Totals may not add to 100.0 due to independent rounding.

Certain trends are apparent with respect to subject field enrollments. For example, the percentage of students enrolled in the social sciences and engineering is increasing while the percentage of students enrolled in education is declining. The enrollment percentages in the humanities and languages and in the sciences remained constant from 1961 to 1962.

Teacher Education Programs

The state colleges are the most important source of trained public school teachers in the State of California. The following table, based on data from the Credentials Office, Department of Education, illustrates the importance of the state colleges in the field of teacher education:

Number and Percent of Credentials Issued on Formal Institutional Recommendation by Types of Accredited Institutions in California, 1951 Through 1960-61

Academic year	State Colleges		University of Calif.		Independent Institutions		All Institutions	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

GENERAL ANALYSIS—Continued

State College Faculty

The number of full-time, part-time, and full-time-equivalent faculty members needed to carry on the instructional programs of the state colleges for the years 1951-52 through 1961-62 are shown in the following table:

**Teachers in California State Colleges
1951-52 Through 1961-62**

Academic year	Individuals			F. T. E. Teachers	
	Full-time	Part-time	Total	Total	Increase prior-year
1951-52	1,306	406	1,712	1,436	43
1952-53	1,343	505	1,848	1,494	58
1953-54	1,553	539	2,092	1,674	180
1954-55	1,689	556	2,245	1,845	171
1955-56	2,037	726	2,763	2,231	386
1956-57	2,501	833	3,334	2,729	498
1957-58	2,991	665	3,656	3,197	468
1958-59	3,282	903	4,185	3,569	372
1959-60	3,743	970	4,713	4,081	512
1960-61	3,958	1,200	5,158	4,394	313
1961-62	4,319	1,664	5,913	4,891	497
1962-63 (Est.)	4,576	1,768	6,344	5,200	309
1963-64 (Est.)	5,108	1,974	7,082	5,805	605

Student Teacher Ratio

The student teacher ratio reflects faculty productivity and other factors. The following table reflects the ratio since 1951-52. Although the ratio varies from one year to another it has remained fairly constant throughout this period.

Year	Total F.T.E.*	F. T. E. Teachers	Ratio
1951-52	24,250	1,436	16.89 to 1
1952-53	25,785	1,494	17,26 to 1
1953-54	29,581	1,674	17.67 to 1
1954-55	34,505	1,845	18.70 to 1
1955-56	40,134	2,231	17.99 to 1
1956-57	46,460	2,729	17.02 to 1
1957-58	51,983	3,197	16.26 to 1
1958-59	56,345	3,569	15.79 to 1
1959-60	61,330	4,081	15.03 to 1
1960-61	69,089	4,454	15.51 to 1
1961-62	77,082	4,891	15.76 to 1
1962-63	86,100	5,200	16.56 to 1
1963-64 (Est.)	94,520	5,805	16.28 to 1

* Does not include summer quarter at State Polytechnic College.

PART I—CONTINUING OPERATIONS

The total increase in 1963-64 over the revised amounts budgeted in 1962-63 for the State College System is $7,174,689 or 7.9 percent. The Board of Trustees support expenditures increased by $54,318. The major portion of the State college support expenditure increase of $7,120,371 results from increased workload arising from an estimated enrollment growth of 8,420 full-time equivalent students and the addition of approximately 1,206,552 square feet of new facilities in 1963-64. This increase can be outlined as follows:

Personal Services:	
Additional teachers per faculty staffing formula	$4,098,176
Professional, technical and clerical personnel for enrollment growth in accordance with staffing standards	1,299,874
Maintenance personnel for new facilities in accordance with accepted staffing standards	747,600
Net increased cost in authorized positions due to full-year costs of positions authorized during current year and academic promotions	2,418,369
Administrative and workload adjustments resulting from enrollment adjustments, discontinuation of special allowances and administrative adjustments necessary to meet new workload requirements	—664,031
Operating Expenses:	
Price increases, enrollment growth, and occupying new facilities	823,619
Computer expense	30,000
Equipment	19,936
Decrease in contributions to State Employees' Retirement	—405,488
Increase in contributions for State Employees' Health and Welfare	51,704
Increased reimbursements	—1,245,070
Increased Program Cost 1963-64 over 1962-63	$7,174,689

Each state college, except for the 4 newest schools, charges employees and students a parking fee which has been established by the Trustees of the California State Colleges. Sonoma and Stanislaus are operating on rental property; South Bay and San Bernardino-Riverside are not yet activated. An estimated amount of $1,231,901 will be collected in the 1963-64 fiscal year. Expenditures of $404,012 are budgeted for the complete operation of these facilities and includes security personnel, garage attendants, rental and/or purchase of automatic control devices, maintenance and repair of parking areas, the collection and accounting of fees and other miscellaneous expenditures. The net reimbursement reduces the General Fund support expenditures for the colleges. The Capital Outlay budget for the colleges includes a parking program in the approximate amount of the net reimbursement.

The Board of Trustees has approved an application fee of $5 and raised the out-of-state tuition from the current $360 per year level to $500 per year. These

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART I—CONTINUING OPERATIONS—Continued

actions increase reimbursements by an estimated $561,688. The application fee will apply to all new students applying for admission to the California State Colleges. This fee should minimize the practice of "shopping" for admission and possibly reduce the workload in the college student admissions offices. The tuition fee for out-of-state students, exclusive of foreign students, is increased in order to reimburse the direct teaching expenses of the state colleges.

Approximately $12,500 for each of the 2 new schools, San Bernardino-Riverside and South Bay State Colleges. These funds are needed to add a building coordinator and clerical position to the existing planning staffs to provide help in the development of the colleges' first major buildings and equipment lists.

Student fees for materials and services provide $8,353,512 in reimbursements in 1963-64. This is computed on the basis of $76 for regular individuals and $39 for limited individuals.

These fees are designed to cover general expenses in the instruction function, health services, counseling and testing services, placement services and student activities including administration of the housing program. Budgeted expenditures for these purposes in 1963-64 amount to $8,789,520. This total is composed of $5,424,515 in personal services, an allowance of $3,021,249 for general expense under the instruction function, $267,780 for general expense under health service and $75,976 for equipment.

The apparent difference between reimbursement and expenditures is offset by surplus reimbursements reported in prior years.

An amount of $30,000 is budgeted for the rental of 3 electronic computers at 3 state colleges—Fresno, Long Beach, and the Kellogg-Voorhis Campus of State Polytechnic College. These computers are for the instructional program and are justified on the basis of well-developed instructional programs in the fields of business administration, mathematics, engineering and/or the sciences.

The trustees will continue to contract with the Division of Architecture and various private architects for master planning service. This will permit each campus to have an architect continually available for campus planning and development on a long-range basis. The expenses for the initial master plan of the new state colleges is included in the Capital Outlay budgets.

Other increases were budgeted under operating expenses to provide for price increases and to allow for the additional expenses for operation of new facilities.

PROPOSED NEW POSITIONS FOR STATE COLLEGES

COLLEGE	ADMINISTRATION AND BUSINESS MANAGEMENT	INSTRUCTION					STUDENT SERVICES			PLANT OPERATION	SUMMER SESSION, EXTENSION, SPECIAL PROJECTS—REIMBURSED	TOTAL POSITIONS
		Teachers	Agriculture	Supervision	Technical and clerical	LIBRARY	Student Personnel	Admissions and Records	Health Services

† Includes 2 teachers at Off-campus Center.

‡ Includes 1.5 teachers at Off-campus Center.

[a] This total includes the 605 teachers authorized by the faculty staffing formula for 1963-64. The remaining positions are for sabbatical leave and substitute teacher requirements.

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART I—CONTINUING OPERATIONS—Continued

PROPOSED NEW POSITIONS FOR STATE COLLEGES—Continued

Positions are budgeted on the basis of staffing formulas and standards which have been developed by the state colleges and implemented in previous budgets. Workload units are applied to the formulas and standards and resulting increases are presented as proposed new positions. Approximately 90 percent of the positions in this budget are measured by formulas and standards which provide a means of measuring and evaluating work performance.

ADMINISTRATION AND BUSINESS MANAGEMENT

Thirty-one and seven-tenths new positions are added in the executive and business management function in order to provide professional, technical, and clerical assistance. These positions are justified for a variety of functions including the processing of personnel and fiscal documents, operation of switchboards, and general clerical duties.

INSTRUCTION FUNCTION

Teachers:

The need for teachers is determined by application of a faculty staffing formula which was first adopted as a budgetary tool in 1953-54. The formula determines the number of full-time teaching positions based upon a 45-hour workweek for instructors. The formula allows 9 hours a week for nonteaching assignments (such as student advising, committee work, administrative duties, etc.) and 36 hours per week for teaching assignments including class preparation as well as actual instruction. The number of hours of actual instruction in relation to class preparation varies between 12 and 24 hours per week depending upon the type of instruction; e.g., lecture, activity, and laboratory.

In order to compute the need for teachers, the number of sections is determined based upon distribution of the total estimated campus enrollment among the various subject offerings. This distribution is determined on the basis of past experience, anticipated shifts in program emphasis, and expansion of curricular offerings. According to the formula, a total of 605 additional teachers are required to meet the instruction demands in the budget year for the state colleges. This includes 4.7 teachers in agriculture at Chico and Fresno State Colleges and 3.5 teachers at the Off-Campus Centers maintained by Fresno State College at Bakersfield and by San Diego State College in Imperial Valley.

The faculty staffing worksheets were prepared by the colleges and subsequently reviewed by the Academic Planning Section of the Trustees of the California State Colleges.

Supervision:

Thirty-one and four-tenths division chairman, curriculum supervisors, evaluators, and coordinators are added in the budget and have the responsibility of supervising various aspects of the instructional program. The need for each division chairman is measured by the number of teaching positions within a homogeneous grouping of curricula. One division chairman is allowed by formula for each 25 teachers. Curriculum evaluators, coordinator and supervisors are fractional teaching positions released from instructional responsibilities in order to develop a new curricula or supervise the offerings in a large existing curriculum. They may also supervise students doing internship work away from the college the majority of which are practice teachers.

Technical and Clerical:

Technical and clerical positions are budgeted on a ratio to teachers and supervisory academic positions. One hundred sixty-two and two-tenths new positions are required for these responsibilities. These positions provide the auxiliary support operations for the direct teaching activities and include such activities as:

1. Staffing the stock and issue rooms.
2. Operation and maintenance of technical equipment.
3. Clerical operations including typing, filing and other office duties.
4. Reproduction of testing and other materials and more direct instructional activities such as limited student reader services.

The number of these positions is based on a formula which provides .22 positions per teacher.

Library:

Seventy-five and five-tenths professional and clerical positions are added based upon the library staffing formula. This formula allocates staff on the basis of accepted workload standards for technical processing of new volumes; mending, inventorying and discarding existing volumes; sorting and shelving volumes; and manning public service desks and checkout points. The formula for processing of new volumes is based on the workload standard that one position will process 1,600 volumes in one work year.

STUDENT SERVICES

Fifty and five-tenths new positions are justified in the student services function. Staffing in this function is closely allied to increases in enrollments. The new positions consist of the following increases by function:

Student personnel	14.5 positions

This area includes student placement, counselling and testing, supervision of off-campus housing and other student activity functions. Examples of the formulas for these functions are as follows:

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART I—CONTINUING OPERATIONS—Continued

PROPOSED NEW POSITIONS FOR STATE COLLEGES—Continued

STUDENT SERVICES—Continued

Counselor	1 per 1,000 regular individual students over the first 1,000.
Activities adviser	1 per college below 5,000 regular individual students, and 1 additional for 6,000 to 10,000 regular individuals, and 1 additional for 11,000 to 15,000 regular individuals.
Placement interviewer and supervisor	1 per college having 1,000 to 3,000 regular individual students, add 1 for 3,000 to 5,000 regular individual

Admissions and records ____________15.1 positions

Associate dean	1 per college
Registrar	1 per college
Admissions officer	1 per college over 5,000 FTE
Evaluation technician	1 per college, others included within technical-clerical allowance
Clerical and technician	2 per 800 total individuals plus 1 per 1,000 limited individuals

Health services __________________20.9 positions

Medical officer and nurse	1 per 1,000 regular individual students (first two positions on 12 month basis)
Technician	1 per 2,000 regular individual students (first position on 12-month basis)
Clerical	1 for first 1,500 regular individual students, 1 additional for next 1,500 plus 1 for each additional 2,000 regular individuals

PLANT OPERATION

One hundred seventy-eight new positions are budgeted to provide maintenance of grounds and the 1,206,552 square feet of new facilities which will be added to the State Colleges' physical plant in 1963-64.

The two formulas which account for the majority of these positions are for custodians and groundsman.

Custodians	1 per 15,000 sq. feet of building area (outside gross), plus 1 per 60,000 sq. feet of adjacent area cleaned by custodian, plus day coverage, sick leave and vacation coverage (1 per 12 custodians; and rest room coverage based on need).
Groundsman	1 per 7 acres of campus area improved with sprinklers 1 per 5.5 acres of campus area improved without sprinklers 1 per 55 unimproved acres 1 per 25 acres with ground cover and trees Additional allowance for P.E. facilities and 1 per 12 groundsmen for sick leave and vacation

SUMMER SESSION, EXTENSION, SPECIAL PROJECTS—REIMBURSED

Thirty-two and nine-tenths new positions are included in the budget for reimbursed programs. Twenty-six and seven-tenths of these positions are in the summer session and extension programs and are fully financed by students' fees. The remaining six and two-tenths new positions are in special projects which are fully reimbursed.

PART II—PROGRAM AUGMENTATIONS

I. Research Program for State Colleges	$500,000
II. Increase in out-of-state travel for faculty	55,000
III. Library book augmentation to improve college libraries	898,000
IV. Library book processing cost for capital outlay book program	300,320
V. Increased personnel in admissions and records	72,966
TOTAL	$1,826,286

DISTRIBUTION BY PROGRAM

I. RESEARCH PROGRAM	*No. of Positions*	*Total*
Temporary help	59	$250,000
Operating expense		200,000
Equipment		50,000
Totals		$500,000

This program is designed to support departmental, or faculty research within the provisions of Section 22606 of the Education Code. All such research will be of the kind that supports the approved instructional programs through the discovery of new related information and through its supplementation of regular classroom exercises and projects. It is estimated that one-half the instructional departments in the state colleges, which would include approximately one-half the total number of faculty members in the system, will be prepared to engage in departmental research programs during 1963-64. The research funds requested for 1963-64 will provide about $200 per full-time faculty member which is estimated to be a minimal support level. The Co-ordinating Council for Higher Education has reviewed this program and has recommended approval.

Expenditures will be made for the following: technical and clerical assistance needed to sustain high quality research; student assistants to help in the actual carrying out of the research projects; travel funds to enable participants to obtain data and counsel from outside sources; equipment and supplies required in the projects which are not available in the regular support budgets; and other material currently not available for departmental research activities.

The distribution of the funds to the colleges is based on the relative size of the college's faculty and its ability to carry on research with existing facilities.

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

II. OUT-OF-STATE TRAVEL

Operating expense	$55,000
Total	$55,000

An additional amount of $55,000 for out-of-state travel for state college faculty is proposed. The colleges do not generally pay the entire expense of a faculty member's trip. A considerable number of the faculty who attend professional meetings outside the State do so by paying the entire expense of the trip from their own resources.

This program has special significance in that a high percentage of the college faculties are recruited in the Midwest and East. Faculty members from these areas develop strong ties with professional organizations. Maintenance of these ties through attendance at professional meetings is regarded as a condition of employment. As the colleges develop their graduate programs and the need for specially qualified faculty grows, improvement in this program area becomes imperative. For these reasons the Co-ordinating Council for Higher Education has recommended approval of this program.

III. IMPROVEMENT OF COLLEGE LIBRARIES

	No. of Positions	*Total*
Temporary help	53	$255,317
Library books		510,641
Operating expense		132,042
Totals		$898,000

The 1962 Legislature requested that the Board of Trustees study the library collection in the California State Colleges and present a report at the 1963 session. The study has been made and the Board of Trustees has accepted the findings and recommendations.

This budget includes a special library book allowance program at the same general level as was included in the 1962-63 budget. The distribution of the total amount has been made in accordance with the study made by the Board of Trustees.

The capital outlay library book purchase program described below is an additional improvement program.

IV. CAPITAL OUTLAY BOOK PROCESSING COST

	No. of Positions	*Total*
Temporary help	22	$103,500
Operating expense		185,820
Equipment		11,000
Totals		$300,320

The Trustees of the California State Colleges have adopted a policy of starting new state colleges with a minimum complement of 50,000 books. Capital outlay funds are used to provide these initial complements of books and support funds are used to provide the staff, operating expenses, and equipment. The expenditures proposed here are necessary to process $421,500 initial complement of library books for San Bernardino-Riverside, Sonoma, South Bay and Stanislaus State Colleges.

San Bernardino-Riverside and South Bay State Colleges will each receive $150,000 in capital outlay funds for books in 1963-64 and will require $100,000 each to process the books. Of that amount $50,000 is budgeted at each college for initial book processing by a commercial firm; $18,750 is budgeted for staff to complete book processing at each college; $25,750 is budgeted for operating expenses including $7,500 for rental of storage space; $5,500 is budgeted at each college to purchase shelving and other equipment needed to process and store books. It is estimated that these expenditures will provide 25,000 volumes in each of the new state college libraries.

Sonoma State College will have an estimated 31,647 volumes at the end of the 1962-63 fiscal year. It will receive $110,000 in capital outlay funds to purchase 20,000 volumes in 1963-64 to complete its initial complement of 50,000 volumes. Support expenditures in the amount of $91,200 are provided to process the books. Of that amount $60,000 is for staff and $31,200 is for operating expense items.

Stanislaus State College will have an estimated 48,080 volumes at the end of 1962-63 fiscal year. It will receive $11,500 in capital outlay funds for books and will require $9,120 to process the books. Of that amount $6,000 is for staff and $3,120 is for operating expense items. These expenditures plus those anticipated in the college's support budget will complete the initial complement of 50,000 volumes.

CHANCELLOR'S OFFICE

Objectives

The Trustees of the California State Colleges provide the policy determination and central administration for the California State Colleges. The state colleges have as their primary functions the provision of instruction for undergraduate and graduate students through the masters degree. Doctorate degrees may be awarded jointly with the University of California. The colleges provide instruction in the liberal arts and sciences, in applied fields and in certain professions, including the teaching profession. Faculty research is authorized to the extent that it is consistent with the primary functions of the state colleges.

Program and Performance

The Board of Trustees was established by Chapter 49, Statutes of 1960, First Extraordinary Session, and took over the administration of the state colleges on July 1, 1961. The board

[a] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

[b] Gross personal services = salaries and wages $680,023; salary saving —$2,900 (—0.5 pos.); state employees' retirement $4,260; and state employees' health and welfare $400. Salary savings, retirement, and health and welfare are applicable to the admissions and records program only.

State Colleges

TRUSTEES OF THE CALIFORNIA STATE COLLEGES—Continued

CHANCELLOR'S OFFICE—Continued

Objectives—Continued

is composed of 20 members, 4 of which are ex officio, and it is charged with the responsibility of setting policies for the governance of the 17 state colleges. The Office of the Chancellor provides research and studies for the systematic development of the policies affecting the state colleges and provides administrative support for them.

1962-63 was the second year of operation under the trustees. Recruitment of staff for the Chancellor's Office, a serious problem in 1961-62, resulted by the end of 1962 with the filling of almost all key administrative positions. A new administrative area, Institutional Relations and Student Affairs, was established and staffed to deal with the problems relating to articulation of state college programs with other levels of public education, and to develop policies for the guidance of student personnel officers and student organizations within the system.

Under mandate of the trustees, the Chancellor's Office conducted exhaustive studies, in conjunction with the individual colleges, on the development of a master curricular plan designed to prevent unnecessary duplication of high cost curricula and to act as a guide to the trustees in capital outlay planning. It is anticipated that the plan will be partially implemented in 1963-64.

A unique self-supporting study abroad program, at no additional cost to the State which would utilize the facilities and faculties of foreign universities was adopted by the trustees and is scheduled to go into operation in the fall of 1963. A 10-year program of library development was also approved.

Considerable progress had been made by the end of 1962 in the structuring of a statewide academic senate which would act as an advisory body to the Chancellor in the development of academic policies. Pending approval by the trustees and the faculty, the senate may become operative in 1963-64.

Since the Office of the Chancellor has the responsibilities for college employees previously exercised by the State Personnel Board, a set of personnel regulations relating to tenure, layoff, leave of absence, etc., were adopted by the trustees and became operative July 1, 1962, as part of Title 5, Chapter 6, Articles 1-16. An in-depth study covering key administrative positions at all of the colleges in the system was almost completed by the end of 1962.

Among other programs initiated was a college accounting changeover study designed to give the state colleges the same type of accounting procedures as the majority of other universities. When instituted, the changeover will facilitate cost comparisons. Master plans for each campus in the system to provide economy in development were also begun in 1962-63, and the trustees adopted a student union program based on the use of nonstate funds.

Among studies currently being undertaken by the Office of the Chancellor, the following received top priority in order to comply with recommendations of the master plan and subsequent requests from the Legislature: admissions and retentions, utilization of existing plant facilities, faculty salaries and benefits, student fees, nonresident tuition, faculty productivity, and programmed learning. The trustees are co-operating with the Coordinating Council for Higher Education in developing these studies.

The 1963-64 Budget reflects the new organizational structure which eliminates 5 positions authorized in the 1961-62 fiscal year. This reduction is offset by provision for personnel services.

NATIONAL DEFENSE EDUCATION ACT TITLE II, STUDENT LOAN PROGRAM

Objectives

Title II of the National Defense Education Act provides loans to worthy and needy students in institutions of higher learning. By means of forgiveness of a portion of the loans to those who engage in the profession of teaching, there is a special emphasis to encourage students to enter the field of teaching.

Program and Performance

In order to continue the Student Loan Program authorized by Chapter 952 Statutes of 1959 and under authority given in Education Code 24001, $200,000 is required in the 1963-64 Budget. This amount represents approximately one-ninth of the amount of federal funds which it is estimated will be made available to the California State Colleges for student loans in accordance with the National Defense Education Act.

The appropriation of $200,000 for 1963-64 fiscal year is the same as that appropriated in the 1961-62 and 1962-63 fiscal years. The application for allocation of federal funds is made by the college to the Federal Government and is co-ordinated by the Chancellor's office. Federal funds are forwarded to the Chancellor's office of California State Colleges and actual disbursement of both state and federal funds is made by this office. The costs of administering this program are contained within the budgets of the individual colleges with the exception of the co-ordination costs which are borne by the Chancellor's office.

GENERAL ANALYSIS

Objectives

The State College for Alameda County, established by Chapter 1681, Statutes of 1957, offers programs in teacher education, occupational and preprofessional curricula, and the liberal arts designed to meet the needs of Alameda County and portions of San Mateo and Contra Costa Counties.

Program and Performance

The State College for Alameda County, offered classes for the first time in the fall of 1959 in rented facilities of the Hayward Union High School and will continue to use these facilities until the completion of their permanent buildings on their new campus in the fall of 1963.

The reduction of 2 teaching positions in 1962-63 and in 1963-64 is based on an enrollment decrease of 30 students (FTE). The reduction of 8 positions in the library in 1963-64 is due to the discontinuation of a special library book allowance and a corresponding reduction in the library's book processing staff. The reduction of 1 position in 1963-64 in the plant operation function is based on the shift of the college's operation from temporary to permanent facilities and the subsequent need for trade positions rather than general maintenance positions.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (see pages 243-247).

GENERAL ANALYSIS

Objectives

Chico State College is a 5-year fully accredited college with programs in teacher education, liberal arts, sciences, and occupational and preprofessional curricula designed to meet the needs of 8 counties in the upper Sacramento Valley and contiguous mountain regions in the northeastern region of California.

Program and Performance

Chico State College was founded as a normal school in 1889, and is the second oldest of California's state colleges. The college offers a broad selection of curricula in the liberal arts and general education, occupational fields such as agriculture, nursing, business, engineering, and social work, and preprofessional training for such fields as medicine, law, and architecture. A strong emphasis is placed on the education of teachers for the public schools of California. Its effectiveness in this respect is demonstrated by the fact that approximately 50 percent of its students are enrolled in courses with teacher education objectives.

The agriculture program has expanded from an original terminal 2-year program to a 4-year degree program and is utilizing a farm site consisting of 645 acres.

The addition of 1 position in 1962-63 in the business management function is due to the development of an unanticipated workload for which it was necessary to make immediate provision.

The increase of 5 teaching positions in 1962-63 is based on an enrollment increase of 190 students (FTE).

The increase of 1.8 positions in 1962-63 in the extension and summer session programs is due to an increase in program requirements and is offset by a corresponding increase in reimbursements.

Workload fluctuations since the preparation of the 1962-63 Budget results in the reduction of 1 position in the plant operation function.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (see pages 243-247).

GENERAL ANALYSIS

Objectives

Fresno State College established in 1911, is a 5-year, fully accredited college, with programs in the liberal arts and sciences, in applied fields and in the professions, including the teaching profession, designed to meet the needs of the 7 counties in the Southern San Joaquin Valley.

Program and Performance

Fresno State College is located on sites totaling 1,428 acres on the northeast side of the City of Fresno. At this new site the college continues to carry out its traditional functions, but in recent years has expanded its program to include several important new curricula and community services including an off-campus center in Bakersfield for teacher education and extension programs in Fresno and Visalia, and a federally sponsored teacher education project in the Sudan.

The 3 most important programs at Fresno State College, from the standpoint of number of students, are teacher education, business, and engineering. Approximately one-third of the total enrollment of the college can be credited to the various teacher education programs. Agriculture is fourth in order of enrollment. Other programs of significance in the total offerings of the college include biology, criminology, fine arts, home economics, humanities, industrial arts, nursing, physical education, and social science.

Since 1961-62 the college has been co-operating with the United States Agency for International Development in a special project in the Sudan to improve teacher education for elementary schools in that country. This program is fully reimbursed from federal funds.

The increase of 6 teaching positions in 1962-63 is based on an enrollment increase of 370 students (FTE). The extension of 0.4 position in 1962-63 is based on the continuation of reimbursed special projects initiated in 1961-62.

Workload fluctuations since the preparation of the 1962-63 Budget results in the reduction of 4 positions in various functions.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (see pages 243-247).

GENERAL ANALYSIS

Objectives

Humboldt State College is a 5-year, fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the northwestern counties of the State.

Program and Performance

Humboldt State College was established in 1913 as a 2-year normal school and has experienced changes parallel to other such institutions until it was established as a state college with the duty to educate teachers and offer curricula in liberal arts; science, engineering, and mathematics; occupational and preprofessional courses.

Due to its unique geographical location, Humboldt State College offers vocational training in fisheries, game and forestry management. One-fourth of the total enrollment (FTE) of the college is enrolled in science laboratory classes. The college also has strong curricula in fine and applied arts, business, language arts, social sciences, and physical education.

The increase of 1.8 positions in 1962-63 for reimbursed salaries and wages as based on an increase in program requirements and in corresponding increase in reimbursements.

The decrease of 0.1 position in 1962-63 and 1963-64 in special projects is due to reduced workload in services to residence halls.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State College (See pages 243-247).

GENERAL ANALYSIS

Objectives

Long Beach State College, established in 1949, has as its primary function the provision of instruction for undergraduate students and graduate students, through the master's degree, in the liberal arts and sciences, in applied fields and in the professions, including the teaching profession.

Program and Performance

Since its establishment, Long Beach State College has grown to one of the largest of the state colleges and now offers a wide variety of courses.

The college now offers programs in the area of engineering, biological science, business, industrial arts, physical education, social science, and sociology.

The increase of 3.2 positions in 1962-63 in special projects—reimbursed is based upon expanded programs in this area and is offset by a corresponding increase in reimbursements. The reduction of 1.2 library positions in 1963-64 is due to a reduction in library book processing staff owing to discontinuation of a special book allowance.

For new or expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

The Los Angeles State College of Applied Arts and Sciences, established in 1947, is a 5-year fully accredited multipurpose institution offering a wide variety of curricula in liberal arts education, occupational education, and teacher education designed to meet the needs of the metropolitan Los Angeles area.

Program and Performance

Los Angeles State College has one of the largest teacher-training programs in the country and a graduate program involving almost half of its students. In addition, one of the primary functions of the college is the training of students for gainful occupations in the arts and sciences as related to business and industry.

LOS ANGELES STATE COLLEGE OF APPLIED ARTS AND SCIENCES—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The equipment technician II and intermediate stenographic position shown as additions to the instructional television area were previously authorized (Chapter 11, Statutes of 1960) but identified functionally in previous budgets under teaching. The teacher, television engineer, and student assistant positions are being added in 1962-63 and 1963-64 on a workload basis but represent no increased expenditure of funds since they are being financed by a transfer of funds from television operating expense. These adjustments do not constitute an expansion of the television program previously approved at this college.

The addition of 4 positions in plant operation in 1962-63 is based on increased utilization of the college's parking facilities and the subsequent necessity to provide increased traffic enforcement personnel. The increase of 14 positions in special projects and summer session programs is based upon expanded programs in these areas and are offset by corresponding increases in reimbursements. The reduction of 10 teaching positions and 2 technical and clerical positions is due to an enrollment decrease. The reduction of 7 positions in the library is due to the discontinuation of a special book allowance and a corresponding reduction in the library book processing staff.

For new and expanded program affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

Orange State College established by Chapter 1681, Statutes of 1957, is a 5-year institution offering programs in business administration, education, social sciences, fine arts, speech and drama, science and the humanities. The college serves a primary enrollment area consisting of portions of Orange, Riverside, and Los Angeles Counties.

Program and Performance

A program for first-time freshmen will be offered in the 1963-64 fiscal year. The operation of the college is currently on the permanent site and an expanded educational program will be possible with the opening of the 320,000 square foot science building in September of 1963. This budget reflects the new instructional programs and operation in the expanded physical facilities.

The reduction of 7.5 positions in the library in 1963-64 is due to the discontinuation of a special library book allowance and a corresponding reduction in the library's book processing staff.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

Sacramento State College established in 1947 is a 5-year, fully accredited college with programs in teacher education, liberal arts, occupational and preprofessional curricula designed to meet the needs of the 13 counties in the southern Sacramento Valley and central mountain regions of California.

Program and Performance

Sacramento State College offers a variety of teacher education curricula, liberal arts programs and professional occupational curricula. Its undergraduate program is expanding, and currently it is also offering master of arts degrees in many liberal arts and professional education fields, as well as the master of science degree in business and public administration. The increase of 10 teaching positions in 1962-63 is based on an enrollment increase of 360 students (FTE). The increase of 4.5 positions in 1962-63 in special projects and summer session is due to an increase in program requirements and is offset by a corresponding increase in reimbursements. The decrease of 3 positions in the library in 1963-64 is based on discontinuation of a special book allowance and a corresponding reduction in the libraries book processing staff.

For new and expanded programs affecting this college, see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

---

[a] A program fully reimbursed from student fees.

GENERAL ANALYSIS

Objectives

San Bernardino-Riverside State College was established by Chapter 64, Statutes of 1960, First Extraordinary Session and is scheduled to become a fully accredited 5-year state college with programs designed primarily to meet the needs of San Bernardino and Riverside Counties.

Program and Performance

It is now planned to open this college in 1965 in temporary facilities on the permanent site.

The 1963-64 Budget continues the planning staff nucleus to organize the program of the college and prepare for its opening. The initial curriculum offerings will be in the liberal arts fields. In accordance with the trustee's policy, the first enrollments will be for lower division students.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

---

[a] A program fully reimbursed from student fees.

GENERAL ANALYSIS

Objectives

San Diego State College, established in 1897, is a 5-year fully accredited college with programs in teacher education, occupational, and pre-professional curricula designed to meet the needs of the southern counties of the State.

Program and Performance

San Diego State College has a long history of providing teachers for the public schools of the State of California. Other than teacher training, the important offerings at San Diego State College include accounting, business administration, engineering, liberal arts, physics, psychology, and social science.

San Diego State College is one of two state colleges which has been authorized to conduct an off-campus resident center. It is located in Imperial Valley at El Centro and offers programs for resident credit in elementary teacher education only. The enrollment anticipated at the center for the 1963-64 fiscal year is estimated at 210 individual students or a total full-time equivalent of 80.

The reduction of 3.3 positions in the library function is based upon the discontinuation of a special book allowance and a corresponding reduction in book processing staff.

For new and expanded program affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

San Fernando Valley State College is a 5-year institution offering programs in teacher training, the liberal arts, science and engineering as well as occupational and preprofessional curricula designed to meet the needs of the San Fernando Valley portion of Los Angeles County, Ventura County and southern portions of Santa Barbara and Kern Counties.

Program and Performance

San Fernando Valley State College began operation as a separate state college July 1, 1958. Prior to this date the institution conducted classes on its present site as the San Fernando Valley Campus of Los Angeles State College.

San Fernando Valley State College is continuing to experience extremely rapid growth. Full-time equivalent enrollment in 1963-64 will rise from 5,860 to 6,840 students (FTE).

The reduction of 8 teaching positions in 1962-63 and 1963-64 is based upon an enrollment decrease of 270 students (FTE) in 1962-63. A reduction in clerical help associated with the teaching positions is also being made amounting to 1.8 positions in 1962-63 and 1963-64. The reduction of 8.8 positions in the library function in 1963-64 is due to a reduced book processing workload resulting from discontinuation of a special book allowance made in previous years. The reduction of 2.5 positions in 1963-64 in the plant operation function is due to a decrease in the total unimproved area on the campus because new buildings are under construction.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

San Francisco State College is a 5-year fully accredited college with programs in teacher education, in occupational curricula and in the liberal arts fields designed to meet the needs of the counties in the San Francisco Bay and Peninsula areas.

Program and Performance

Started as San Francisco Normal School in 1899 the college was named San Francisco State College in 1935. Operations were conducted at a downtown location prior to a move in 1954 to a new campus near Lake Merced. Training of teachers remains a major function although increased demand for higher education has led to many pre professional and occupational programs for training in the liberal arts and sciences. Active contact with the community is maintained through the operation of a Downtown Center extension program and the School of World Business in the central business district.

A reputation of pre-eminence in several fields of the expanded offerings has been realized through programs in business, creative arts, education, language and literature, economics, geography, government, and international relations.

The addition of 35.3 positions in 1962-63 in special projects is due to an increase in program requirements and is offset by a corresponding increase in reimbursements.

Workload fluctuations since the preparation of the 1962-63 budget results in the reduction of 8 positons in the instruction, student services, and plant operation functions in 1962-63 and 1963-64.

The reduction of 5.5 positions in the library area in 1963-64 is due to a reduced book processing workload resulting from discontinuation of a special book allowance made in previous years.

For new and expanded programs affecting this college see Part II, Program Augmentations -Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

San Jose State College, established in 1857, is the oldest public institution of higher education in California and is a 5-year fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of Monterey, San Benito, Santa Cruz, Santa Clara, and San Mateo Counties.

Program and Performance

Bachelor's and master's degrees are conferred in 141 major areas of specialization and courses are offered which lead to 33 major public school credentials.

The addition of 4.6 positions in 1962-63 to the summer session program is based on increased enrollments and is offset by a corresponding increase in reimbursements. The reduction of 10 teaching positions and 2 student assistant positions in 1962-63 and 1963-64 is due to decreased enrollments in the regular session. The reduction of 5.5 positions in the library is due to the discontinuation of a special book allowance and a corresponding reduction in the library book processing staff.

For new and expanded programs affecting this college, see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

Sonoma State College, established by Chapter 66, Statutes of 1960, First Extraordinary Session, offers educational programs to serve Marin, Napa, and Sonoma Counties.

Program and Performance

Sonoma State College began offering instruction in 1961. The trustees have indicated that its primary function is to provide strong programs in the liberal arts and sciences, together with the teacher education responsibilities traditional with the state colleges. Such professional programs as teacher education and business administration will be firmly grounded in the liberal arts majors. With the admission of freshmen as well as upper division students in 1962, the college will be prepared to support a limited number of complete curriculums in the 1963-64 school year.

The addition of 1 position in 1962-63 and 1963-64 was necessary due to a negotiated change in the college's lease for its temporary facilities which shifted the responsibility for custodial services from the lessor to the college.

The reduction of 6 positions in 1963-64 in the library is due to a reduced book processing workload resulting from discontinuation of a special book allowance made in previous years.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

South Bay State College is scheduled to become a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve.

Program and Performance

South Bay State College was established by Chapter 64, Statutes of 1960, First Extraordinary Session. This budget provides for continuance of the planning staff during the 1963-64 fiscal year. It is now planned to open this college in 1965 in temporary facilities on the permanent site.

For new and expanded programs affecting this college, see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

---

[a] A program completely reimbursed from student fees.

GENERAL ANALYSIS

Objectives

Stanislaus State College, established by Chapter 2172, Statutes of 1959, offers general upper division programs designed to meet the needs of a primary enrollment area composed of the counties of Stanislaus, San Joaquin, Merced, Calaveras, Tuolumne, and Mariposa.

Program and Performance

The 1962-63 Budget estimated an enrollment of 400 students (FTE) for the academic year beginning September 1962. Re-estimates indicate that the enrollment in 1962-63 will be 300 students (FTE). The instructional program of this college is currently limited to upper division students in the fields of teacher education and business. The instructional program will continue in temporary facilities during the 1963-64 fiscal year.

The reduction of 2.5 teaching positions in 1962-63 and 1963-64 is based on an enrollment decrease of 100 students (FTE). The reduction of 6 positions in the library in 1963-64 reflects the discontinuation of special library allowances.

The transfer of 1 student assistant position from the admissions and records to the executive function was necessary to provide intermittent clerical help on workload related to the building program.

For new and expanded programs affecting this college, see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

California State Polytechnic College is a 4-year college with programs in agriculture, engineering, arts and sciences, and business. Because of the unique programs offered by the college, the objectives are different from the other state colleges. It fulfills a statewide responsibility and draws students to its 2 campuses from all counties of the State.

Program and Performance

The combined undergraduate enrollment in agriculture at the 2 campuses of California State Polytechnic College is the largest in the United States. The college ranks second in the 11 western states in undergraduate engineering enrollment. Agriculture, engineering, arts and sciences, and business programs are designed to meet the needs of the entire State and emphasize the learn-by-doing approach. The Kellogg campus has similar programs. Throughout its occupational curriculum, the college uses the "upside-down" approach by which the student begins work in his major department in his freshman year and is given instruction in the practical phase of his field of specialization during the first 2 years of his program. California State Polytechnic also provides nondegree technical programs at its San Luis Obispo campus in all agricultural fields.

The establishment of 0.5 stock clerk in 1962-63 in the administration function is based on workload and is offset by the reduction of 0.8 student assistant position in the same function. The addition of 10 teaching positions in 1962-63 in the instruction function is based on increased enrollments. The addition of 4 positions in 1962-63 in plant operation is due to the completion of new facilities at an earlier date than was originally anticipated. The addition of 1 position in special projects is based on expanded programs which are fully reimbursed. Workload fluctuations since the preparation of the 1962-63 budget results in the reduction of 1 teaching position in 1962-63 in the instruction function. In the budget for the Kellogg-Voorhis campus, the addition of 1 position in 1962-63 in special projects is based on expanded programs and is offset by a corresponding increase in reimbursements. The reduction of two teaching positions in the current year and in 1963-64 is due to reduced enrollments. The reduction of 1 position in 1962-63 and 4.6 positions in 1963-64 is due to discontinuation of a special library book allowance and corresponding reduction in library book processing staff.

For new and expanded programs affecting this college see Part II, Program Augmentations—Summary of California State Colleges (See pages 243-247).

GENERAL ANALYSIS

Objectives

The Maritime Academy trains qualified young men to become licensed officers in the Merchant Marine. The program is 3 years in length and leads to the Bachelor of Science degree with a specialization in either the deck or engineering fields.

Program and Performance

The 3-year training program, during which the student attends school 11 months of each year, is culminated by the United States Coast Guard examination for a license as either third mate or third assistant engineer. A student must pass the license examination before he can receive a degree.

The program at the academy is supplemented by a training cruise each year of 3 months' duration aboard the Golden Bear, a merchant-type ship loaned to California by the Federal Maritime Administration. An accepted schedule of cruises has been developed on a 3-year cycle. This cycle includes a cruise to the west coast of South America, one to the mid-Pacific Ocean area, and one through the Panama Canal into the Caribbean Area. These cruises provide training in celestial navigation, in both the northern and southern hemispheres, piloting, and midocean ship operation. The 1963-64 Budget provides funds for a cruise in the Pacific Ocean area.

The Maritime Academy Act of 1958 revised the method by which federal grants and subsidies are made to the various state-supported maritime academies. The new law permits an outright grant of $25,000 to academies operating in accordance with prescribed standards and an additional payment of $50,000 for academies that accept out-of-state students. The act also provides for payments of $600 per student per academic year to assist in defraying the cost of uniforms, books, and subsistence for each student. Of the total of $600 the State receives $400 and the remaining $200 goes to each midshipman.

In addition to providing the ship for the training cruise, the Federal Government also provides for the annual drydocking, overhaul and major repair of the Maritime Academy ship at an estimated cost of $50,000. This amount, however, is not reflected in the budget.

GENERAL ANALYSIS

Objectives

The State Scholarship Commission, consisting of 9 members appointed by the Governor, administers a statewide program of competitive scholarships enabling a group of academically able students to attend the college of their choice. These students, because of financial considerations, would not have the freedom of college choice without the scholarship program. The program has encouraged independent institutions to expand enrollment facilities and absorb a large proportion of the student's educational cost without a burden on the taxpayers for capital investment in instructional facilities and operating costs.

Program and Performance

Under provisions enacted by the Legislature in 1960, the number of authorized scholarships for 1963-64 academic year is increased from 3,840 to 4,480. Six hundred forty additional scholarships will be added in subsequent years until a maximum of 5,120 is reached. Scholarship grants vary from $300 to $900 in $100 amounts but in no case in excess of tuition and fees. Students who win state scholarships but elect to attend a junior college will have their scholarships held in trust for them by the commission as Junior College Reserve Scholarships.

The awards are made on the basis of scholastic ability, academic potential, and the need for financial assistance to enable a student to attend the college of his choice. Academic aptitude is measured by means of the Scholastic Aptitude Test of the College Entrance Examination Board. Academic achievement is measured by a minimum performance in high school, and need for financial assistance is determined by a widely used need-evaluation system and by the judgment of college admissions and scholarship directors employed by the commission on a temporary basis.

Based upon an increase in the total number of units of work as measured by applications received and award winners, 2 additional clerical positions and temporary help for evaluation of need are necessary.

Because of increasing college costs, it is estimated that the average award will approximate $630 per scholarship for a total of $2,822,400.

The State Agricultural Scholarship Program now in its fourth year has 400 scholarships authorized by law. It is anticipated that no more than 75 of these awards will be utilized in the 1963-64 academic year. Funds for 75 at an average of $150 are included in the budget.

Fifty thousand dollars is proposed for a study of student aid in order to have an informed basis for appraising the student aid (scholarship, loans, and employment) needs of the State. The study is to include a plan for student assistance developed in consideration of increasing enrollments and college costs.

GENERAL ANALYSIS

Objectives

The board makes rules and regulations governing the presentation and auditing of claims, allowances for traveling on official business, and the issuance of merit awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made, and hearing appeals in accordance with the purchasing procedure under the provisions of Section 13391 of the Government Code.

Program and Performance

The board consists of the Director of Finance, the State Controller, and 1 other member appointed by the Governor.

The board appoints members to the Merit Award Board on a 2-year basis and monthly considers the recommendations for awards of that board. In addition each year the board considers claims arising because no appropriation is available or because the settlement of the claim was not otherwise provided for by law. At current levels this amounts to approximately 1,500 claims annually. Claims approved by the board are, with the sanction of the Governor, referred to the next session of the Legislature with a recommendation that an appropriation be made in payment thereof. The board subsequently pays all claims for which funds have been provided and the Governor has approved. The board meets semimonthly to conduct business, consider appeals, establish rules and regulations concerning state travel and per diem expenses, and hear claims.

One clerical position is proposed to accommodate a workload which has steadily grown since 1950 without the benefit of any staff adjustment.

GENERAL ANALYSIS

Objectives

The State Controller is the accounting and disbursing officer of the State. As the State's fiscal officer he maintains the accounts of all funds and appropriations, which involves determination of the legality of all receipts of moneys by the State and all payments withdrawing moneys from the Treasury; makes various apportionments of state revenues; administers the state payroll system, including the United States Savings Bond program; accounts agency trust moneys in the custody of the Treasurer; supervises the administration of state inheritance and gift taxes; accounts and collects motor vehicle fuel license tax, motor vehicle transportation license taxes, petroleum and gas assessments, and insurance premiums tax; administers the tax refunds to nonhighway users of motor vehicle fuel; collects state and county sales and use taxes on fuel not used on a public highway; administers laws concerning county budget procedures; reports state, county, city district, and street and highway financial transactions; prescribes the scope and content of the annual audit made of all California special districts; supervises the general procedures concerning delinquent property taxes and administers property tax-deeded to the State; and, field audits expenditures by local governments for programs involving state subventions.

Program and Performance

The State Controller serves on 18 boards and commissions. Staff service is supplied by his Administration Division in respect to these duties.

In addition to the Administration Division, there are 7 other major divisions which assist the State Controller in carrying out his duties and responsibilities. Activities currently of special interest are as follows:

1. The Division of Accounting, among its various duties, administers the unclaimed property program which was revised by the Legislature in 1959 from an escheat law encompassing a small group of organizations to a custodial law affecting many types of organizations. As a result, procedures have been made operative which are economical and yet provide the especially high degree of custodial care and accountability which is essential in this program. During 1960-61, procedures for the reporting of unclaimed contents of safe deposit boxes and safekeeping items were developed. In the initial reports due November 1, 1960, 39,986 boxes were reported, which represented all items which had been unclaimed for 7 or more years as of the preceding June 30. In November, 1961, an additional 1,356 boxes were reported; and it is estimated that a total of 1,000 boxes will be reported in both the 2 following years. During 1961-62, procedures were developed covering the receipt and processing of the contents of the boxes; and the contents of 12,624 boxes and safekeeping items were inventoried, examined, and either destroyed or deposited in the State Treasury. During 1962-63, the first full year covered by such operations, it is estimated that 28,718 boxes will be processed, covering the remainder of items reported in 1960-61 and 1961-62. Thereafter, the staff of temporary help engaged in this program will no longer be required; and subsequent operations will be conducted by the permanent staff of the Division's Bureau of Unclaimed Property.

   During the 1959-60 fiscal year, a total of $1,525,857 was received from various classes of abandoned property and deposited in the Unclaimed Property Fund. In 1960-61, receipts from this source totaled $1,087,017; and in 1961-62, $1,561,821.

   In 1959-60, $672,935 representing abandoned property suspense items were deposited in the Special Deposit Fund. A major portion of this amount is held pending litigation. In 1960-61, receipts of such suspense items totaled $362,419; and in 1961-62, $186,148. In addition, approximately $1,900,000 has been withheld from payment to the State Controller pending litigation.

   It is estimated that receipts of abandoned property in 1962-63 and 1963-64 will be aproximately $652,000 and $607,000, respectively, and that receipts of suspense items to be placed in the Special Deposit Fund will total $50,000 in both years.

   All cash and proceeds received under the Uniform Disposition of Unclaimed Property Act are deposited in the Unclaimed Property Fund to the credit of the Abandoned Property Account; and all such money in excess of $50,000 retained to cover claims is transferred to the General Fund.
2. The Disbursements Division employs electronic computers to make all disbursements and issue the State's payroll warrants. The division also performs electronic data processing services for the State Controller's other divisions and certain other State agencies such as the State Employees' Retirement System and Franchise Tax Board. The electronic data processing system was installed in 1960-61, and was expanded in 1961-62 due to extensive new program workloads (Medical Care Act and integration of coverage of State employees under the Old Age and Survivors Disability Insurance Act and the State Employees' Retirement System). Because of the ability of the electronic data processing system to bear these workload increases with lower unit costs, the division now forecasts the probability of ultimately accomplishing savings of approximately $450,000 annually. This is an additional savings of $100,000 annually over the estimates reported at the time the installation was originally approved.
3. The Inheritance and Gift Tax Division in 1961-62 instituted a test of an audit program to enforce the reporting of taxable gifts and the collection of gift tax revenues. The existing gift tax auditors and other staff process and audit gift tax returns filed as a result of this program.

   A research project was initiated in the 1961-62 fiscal year, and is being continued, to analyze the incidence of the inheritance and gift taxes, develop information about tax avoidance features of the present law and provide statistics for evaluation of legislative proposals concerning inheritance and gift tax law modifications. The cost of the project has been modest in view of the potential advantages to be derived from it. Recoveries to June 30, 1962, have been at a ratio of $2.91 per $1.00 of expense and additional recoveries are expected to raise the ratio, on a going basis, to $5.00-$6.00 per $1.00 of expense. Moreover, this enforcement was one of several factors contributing to the sharp rise in gift tax filings and revenues in 1961-62—an increase of $1.9 million (51%) over the prior year.

---

[a] Expenditures from bond funds are not included in overall budget totals.

STATE CONTROLLER—Continued

ADMINISTRATION DIVISION

Objectives

This division provides general administration of the State Controller's office and staff assistance to the State Controller pertaining to his responsibilities as a member on boards and commissions. It also performs the auxiliary services for the entire State Controller's office.

Program and Performance

The State Controller's general administrative staff is responsible for the general administration of 7 divisions; for legal, research, personnel, accounting, and miscellaneous auxiliary services. Increased workload in the personnel and mail sections will require the addition of 0.6 man-year of temporary help in the 1962-63 and 1963-64 fiscal years.

ACCOUNTING DIVISION

Objectives

The principal functions of the Accounting Division are to maintain the control accounts covering the receipts, disbursements, and balances of all state funds; to audit and designate the fund for all deposits into the State Treasury; to prepare the various financial statements and reports covering the State's financial condition and operations; to administer the Judges' Retirement System; to make various apportionments of revenue to local government; to administer the Uniform Disposition of Unclaimed Property Act and various laws relating to unclaimed money or other property in estates of deceased persons.

Program and Performance

In addition to the administrative staff, the Accounting Division comprises the following organization units: Bureau of Control Accounts, Bureau of Financial Analysis, and Bureau of Unclaimed Property.

The Bureau of Control Accounts maintains the control accounts covering all funds in the State Treasury. In these accounts are recorded all transactions covering approximately 150 funds. It is also the responsibility of this bureau to audit all remittance advices covering deposits into the State Treasury to determine the legality of the receipt of the money and its proper disposition. The bureau maintains accounts for all funds of state agencies, which are deposited in trust with the State Treasurer. It superintends the collection of the State's share of fines and forfeitures levied by judges under various state laws. The bureau maintains both control and detailed subsidiary investment accounts covering the bond investments made from various state funds and from Treasury Pooled Money, as well as accounts covering the various interest-bearing bank deposits.

It is a major responsibility of the Bureau of Financial Analysis to prepare the annual report of the State Controller. It also prepares the preliminary annual report, the month-end statement setting forth the revenues derived from all major taxes and the receipts and expenditures of the General Fund and school construction funds, and several periodic reports on special topics. The bureau compiles data and makes computations for the apportionment to local agencies of various revenues, such as highway users taxes, motor vehicle license fees ("in-lieu" tax), and moneys received from the Federal Government. It compiles estimates of future cash receipts and expenditures for use of the Pooled Money Investment Board in determining amounts available for investment under the Pooled Money Investment Program. In addition to the foregoing functions, the bureau administers the Judges' Retirement System.

The Bureau of Unclaimed Property administers the Uniform Disposition of Unclaimed Property Act and laws relating to unclaimed estates of deceased persons. With the completion of the processing of the accumulated backlog of unclaimed safe deposit boxes, the bureau will be able to reduce temporary help requirements by 12 man-years in 1963-64. These positions had been added administratively in the current year. In addition it is proposed that 2 positions be continued permanently in 1963-64 to process the continuing number of boxes being reported and enforce the provisions of the law related to this program. These workload factors are discussed more fully in the general analysis section of the budget.

AUDITS DIVISION

Objectives

The Audits Division administers the State Controller's responsibility of assuring that public money is expended for the purposes for which appropriated. The Constitution and statutes require the State Controller to determine the legality and validity of all payments from the State Treasury.

The division passes upon the legality and propriety of state expenditures before disbursement from the treasury. It approves the payment of expenditures found to be correct and valid and refuses to allow any withdrawals which are contrary to law or public purpose. Under various statutes which establish subvention programs for assistance to local jurisdictions by the State and by the Federal Government through the State, funds are advanced to such local agencies by the Controller. Claims presented often contain only information necessary to authorize an advance. The division makes post audits of the accounts of local agencies in order to determine that accountability has been established for the funds advanced and that expenditures were legal and proper.

Program and Performance

During the 1963-64 fiscal year the Bureau of Claim Audits will audit 2,426,114 claims, 4,984 contracts and contract changes, and will verify 175,464 contract claims. This steadily increasing workload will require one additional auditor position which is proposed for 1963-64. With the inclusion of this position, the average number of claims audited annually per audit position will have increased over the 6-year period of 1958-59 through 1963-64 from 103,631 to 142,712, an increase of 39,081 claims per auditor per year or 38 percent.

The Bureau of Field Audits will experience only minor offsetting changes in the program subject to field audit. Accordingly, no change in staff is contemplated.

DISBURSEMENTS DIVISION

Objectives

This division issues the Controller's warrants drawn on the State Treasury and maintains the records of outstanding warrants; administers the Uniform State Payroll System including the United States Savings Bond deduction program; and provides electronic data processing service for the gas tax refund program, the unclaimed property program, and maintenance of the State's central control accounts and the treasury trust accounts. In addition, under reimbursed programs the division performs electronic data processing service for other state agencies.

Program and Performance

The total workload of the division for the 1963-64 fiscal year will exceed that of previous years by substantial volumes. The number of payroll transactions originally estimated for the 1962-63 fiscal year has been revised upward approximately 220,000 based on actual experience during the first 6 months of operations under the provisions of the Meyers-Geddes State Employees' Medical and Hospital Care Act and the legislation which provided for employees' retirement coverage under an integrated plan involving participation in the Federal Old Age Survivors and Disability Insurance (OASDI) and the State Employees' Retirement System. This major workload factor which is proportionately shared by the 3 district disbursing offices has also been increased by legislative changes effective July 1961, whereby eligible employees become members of the State Employees' Retirement System on the first of the month next following their appointment rather than the first day of the sixth month following their appointment. The division has successfully performed all required functions of the new programs which are related to payroll accounting and disbursement operations; however, this was made possible only through the addition of staff to correspond to the substantial increase in workload. Forty-eight and one-tenth positions were required in the current year in various field office locations to process the increased payroll transactions which were generated by these programs. Now that experience continues to demonstrate that the workload is permanent, it is proposed that 42 positions be continued in 1963-64. The 6.1 remaining positions are discontinued in 1963-64 due to the completion of the reconciliation of OASDI accounts for the retroactive period of January 1956 through December 1961. In addition, 2 existing programmer positions are being abolished as the workload lessens in this phase of the electronic data processing installation.

It must be noted that the impact of the tremendous workload increase created by the new programs which had to be planned in detail and made operational by January 1, 1962, necessarily delayed further planning toward improvements of the newly instituted electronic data processing methods and has further complicated the future planning and adoption of improved methods by the addition of new information and the basic payroll records and revisions of pay computation formulas.

In addition to the above workload increases, the division will continue to provide machine accounting services to other divisions of the State Controller's Office for programs which are also expanding in volume, including: (1) the Tax Collection and Refund Division under a plan for automated auditing and refund processes in connection with claims for refunds of Motor Vehicle Fuel Tax; (2) the Accounting Division for the performance of duties related to the administration of the Unclaimed Property Laws; and, (3) the Accounting Division for the investment accounting operations including the scientific amortization of premium, discount, and interest. Under reimbursed programs the division anticipates providing electronic data processing services for the State Employees' Retirement System approximately 4 hours each day and for the Franchise Tax Board a total of approximately 600 hours in each fiscal year.

INHERITANCE AND GIFT TAX DIVISION

Objectives

This division administers the State Inheritance and Gift Tax Laws.

Program and Performance

The division represents the State's interest at the local level and, through centralized supervision, controls the receipt and deposit of inheritance and gift tax moneys into the State Treasury. It also affords the taxpayer an opportunity to have his case heard in the local courts.

There has been a continuous increase in the workload of this division. In 1961-62 the last completed fiscal year, the inheritance tax revenues for the State were $72,972,322 and gift tax revenues for the State were $5,656,398 with the combined total being $78,628,720 representing an increase of $7,000,000 or 9.8 percent over the prior year.

As a necessary consequence, tax determinations issued, correspondence, and filing activities have steadily increased requiring one additional clerical position as proposed in the budget year.

An auditor position and a clerical position are proposed for the gift tax enforcement program. This is an audit program to determine the current degree of compliance with the gift tax law and the potential revenue that might be realized from improved enforcement. These two positions were originally approved on a temporary basis in the 1961-62 fiscal year and were extended administratively in the current year. They have since demonstrated a high recovery rate and have been one of the factors contributing to the sharp rise in gift tax filings and revenues.

LOCAL GOVERNMENT FISCAL AFFAIRS DIVISION

Objectives

This division administers the laws relating to county budgets; the reporting of city, county, and district financial transactions; provisions of the Collier-Burns Highway Act requiring local jurisdictions to report city and county street and road financial transactions; and prescribes uniform accounting procedures for counties.

Program and Performance

The staff of this division collects, reviews, compiles and publishes information concerning financial transactions relating to streets and roads of cities and counties in California.

They collect, compile and publish information concerning all financial transactions of cities and counties, all financial transactions of special and irrigation districts, all financial transactions of school districts, and assessed valuations of local jurisdictions.

This division certifies irrigation and water district bonds for the State Controller in accordance with statutory requirements. They prescribe forms for the use of county auditors in compiling their budgets, and make semiannual settlement of financial accounts between the State and the counties.

Under the Collier-Burns Highway Act of 1947, the Controller is responsible for reviewing and reporting on the use of state gas tax funds apportioned to local government to insure an adequate accounting from the cities and counties.

Under Section 30200 of the Government Code, the Controller must devise and supervise the installation of uniform accounting procedures for all counties.

Assisting the division is a 7-man "Advisory Committee to the State Controller on Financial Reports" and a 10-man "Controller's Committee on County Accounting Procedures." The members of these committees are all representatives of local government and serve without pay.

Although the normal growth in existing programs has continued and is expected to continue during the budget year, no increase in staffing needs will be required. This is attributable to more efficient operations as a result of the reorganization of the division in March 1960. The transfer of 1 unit of personnel to the Los Angeles office on special district work has contributed to efficiency by expediting this work and reducing travel time.

TAX COLLECTION AND REFUND DIVISION

Objectives

This division administers the refund of motor vehicle fuel license taxes (gasoline tax) to nonhighway users, collecting, in the process, state and county sales and use taxes on the purchase subject to such taxes; and enforces the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax Act, the Insurance Tax Act, the petroleum and gas production assessments and the assessments under the Subsidence Abatement Act.

Program and Performance

Through this division with offices in Sacramento, Los Angeles, Fresno and San Francisco the State Controller carries out two major functions:

1. Refunding fuel taxes paid for off-highway use of fuel. This division audits claims and carries on a program of education and enforcement. In processing such refunds the amount of state and county sales taxes on the net cost of the gasoline involved is computed and deducted therefrom on behalf of the Board of Equalization.

   All claims receive an office audit for legality and required documentation. The claimant's computations are checked by electronic computer. Selected claims are referred to the field for audit of claimant's records and operations to verify the legality and correct amount of refund to be paid.
2. Collecting 5 major classes of revenue to the State which are assessed by other agencies—the motor vehicle fuel license tax and the motor vehicle transportation license tax, assessed by the State Board of Equalization; the insurance premium tax, self-assessed by insurance companies; petroleum and gas assessments, levied by the Department of Conservation; and the subsidence abatement assessments levied by the Department of Conservation. Under these tax laws, the Division of Tax Collection and Refund enforces the collection provision, keeping an account with each individual taxpayer. The motor vehicle fuel license tax is the 6 cents per gallon gasoline tax imposed on distributors. This revenue is earmarked for construction of state highways and roads.

A decrease in the gasoline tax refund claim load and increased efficiency through the use of electronic data processing accounts for a reduction of 3 positions in 1962-63 and 2 additional positions in 1963-64.

STATE CONTROLLER—Continued

TAX-DEEDED LANDS DIVISION

Objectives

This division is concerned with the restoration of tax-deeded property to local tax rolls as soon as possible. It advises and offers technical assistance to counties in attaining uniform and effective interpretation and application of the laws relating to property taxation and the collection of property taxes. The division also strives to assure sound and marketable tax title through proper application of the law regarding tax sales and tax deeds and, in addition, to obtain income for local taxing agencies in lieu of taxes lost while properties are off the tax rolls. This latter function is accomplished primarily through securing maximum rentals and reasonable proceeds at public auction of tax-deeded property.

Program and Performance

The State Controller has general supervision over the general procedure for tax sales, tax deeds, and redemptions and, to this end, may make any rules and regulations he deems advisable.

The program provides for regular scheduled trips to all 58 counties of the State to advise and technically assist the local officials in the interpretation and application of the property tax laws. It establishes uniform procedures in the district offices for a more effective approach to restoring tax-deeded property to the tax rolls and preventing property being deeded to the State. It provides continued work with the individual counties in installing a control system for tax delinquent property, including compiling abstracts and indexes of tax-sold property. Active supervision and training of the field staff is provided in connection with the outlined program.

One-half position is being abolished in the Fresno office in view of clerical workload decreases.

GENERAL ANALYSIS

Objectives

The board hears appeals from actions of the Franchise Tax Board on personal income and bank and corporation taxes. It administers, collects, and distributes to local governments one of their major revenue sources—the Sales and Use Tax. Its local property tax responsibilities include the assessment of utility properties, assistance to the counties in assessment of all locally taxable properties, and equalization of the average assessment levels between the counties.

The board administers the following General Fund tax revenue sources: the Sales and Use Tax, the Cigarette Tax, the Alcoholic Beverage Excise Tax, and the Private Car Tax. It administers 3 Highway Users Tax Fund revenues—the Motor Vehicle Fuel (gasoline) License Tax and the Motor Vehicle Transportation License Tax with assistance from the Controller, and the Use Fuel (diesel) Tax in its entirety. It participates in the administration of the insurance company taxes.

Program and Performance

The State Board of Equalization is composed of 4 members elected from areas of the State known as equalization districts and a fifth, ex officio member, the State Controller. The board members are assisted in their responsibilities by a staff of approximately 2,300 employees.

The Board of Equalization, acting as a board, usually meets on an average of 5 days per month. Most meetings are held in Sacramento, others being held in Los Angeles, San Francisco, San Diego, and Fresno. These meetings are devoted to hearing appeals from actions of the Franchise Tax Board, and proposed actions by its own staff on tax deficiencies, consideration of matters of general policy and at certain times of the year, the equalization of local property tax assessments, valuation of public utility properties and assessment of the taxes on insurance companies and private cars.

Each board member investigates the administration, enforcement and operation of the tax programs of the board within the equalization district from which he is elected. For purpose of business tax administration the State is divided into 10 districts which consist of a county or a group of counties within each equalization district. In addition, an out-of-state district with headquarters in Sacramento and offices in New York City and Chicago administers the tax programs with respect to out-of-state persons or businesses doing business in California.

The proposed budget provides for 1 new position in the intercounty equalization program, and provides for the continuation of 24 positions which are presently limited to June 30, 1963. The budget also reports on an evaluation of the compliance problems in tax administration. To cope with these problems an adjustment in the level of audit and compliance staffing is proposed. All of the foregoing budget year proposals are discussed under their proper organizational headings.

ADMINISTRATION

Program and Performance

This division provides staff assistance for the elected board members and the executive secretary. In addition the division provides administrative and supply support to other divisions. Its services include legal, personnel, internal audit, administrative analysis, research and statistics, fiscal, electronic data processing, and general service functions.

The Legal, Internal Audit, Personnel and Training Sections, and the Administrative Service Division operate under the direct supervision of the executive secretary. The Administrative Service Division includes Fiscal Services, Electronic Data Processing, Administrative Analysis, Research and Statistical, and General Service functions for the board.

Although no proposed new positions were added in 1962-63, the conversion of some programs to electronic data processing resulted in the shift of 27 personnel from replaced manual operations to data processing functions. Increases in tabulating machine operation expenses are partially offset in 1963-64 and are intended to be fully offset thereafter by the abolishment of 2 positions in Property Taxes and 5 positions in Business Taxes.

During the budget year 13 previously authorized positions which terminate as of June 30, 1963 are proposed for continuation. These positions are required for continuing workload needs as follows:

(1) In the Legal Section a supervising stenographer I and a senior legal stenographer are proposed for continuation. The supervising stenographer I position is a reclassification from an intermediate stenographer-clerk position. The position was transferred to Legal from the typing pool in Business Taxes. The workload of the legal staff was such that prior to obtaining this position, it was necessary for overflow work to be done in the Business Taxes pool. The position transfer reflected no change in the work being done, but merely an organizational transfer to the Legal pool for purposes of necessary control and supervision. The senior legal stenographer which is proposed for continuation was a routine reclassification of a senior stenographer position in the same unit doing the same work. It is customary to reclassify stenograph positions to legal stenograph positions when the incumbent qualifies as a technical legal stenographer. The workload need for both positions remains the same.

(2) In the Personnel Section a supervising clerk I is proposed for continuation. By a centralization of the personnel functions, the position which was previously maintaining attendance reports and position information in Business Taxes Headquarters was transferred to the Personnel Office to gain the efficiency and economy of time inherent in the centralized or pool concept. The need for this position continues because all Business Taxes position information is now maintained in the central Personnel Office.

(3) In the Administrative Section a supervising stenographer I is proposed for continuation. This position was reclassified from senior stenographer to recognize the supervisory duties over the clerical positions in the reception area. The basic workload of this position remains. The position is changed only to the extent of the additional supervision over the receptionists.

(4) In the Administrative Analysis Section a senior clerk, and a varitypist position are proposed for continuation. These 2 positions reflect a transfer within the same division (Administration) from General Services to Administrative Analysis. These positions are involved in forms and publications preparation. There is a continuing workload need for these positions.

(5) In the Statistics Section an associate statistician and a junior-intermediate stenographer position are proposed

BOARD OF EQUALIZATION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

ADMINISTRATION—Continued

Program and Performance—Continued

for continuation. The associate statistician is a reclassification from assistant research technician to reflect proper classification of the same duties performed. The stenographer position reflects a change in payroll code only. Neither the position nor the incumbent is changed. This is the only stenographic position in the Research and Statistics Unit and provides the dictation, typing, and clerical support for the statistical staff. There is a continuing workload need for these 2 positions.

(6) In the Fiscal Section an accounting officer III position is proposed for continuation. This position heads the accounting unit under the fiscal officer and was previously filled at the same level by an associate budget analyst. Establishment of an accounting officer III reflects only reclassification of civil service class in the same job. The workload need for this position continues.

(7) In the Tabulating Section an accounting tabulating machine supervisor I, a senior tabulating machine operator and 2 tabulating machine operators are proposed for continuation. The accounting tabulating machine supervisor I position is a reclassification of a position transferred from business taxes headquarters for programming of sales tax returns on electronic data processing. The transfer of this processing to electronic data processing directly offsets the need for this position in the file unit. The senior tabulating machine operator is a reclassification in the same tabulating unit from senior account clerk. The workload and duties involved have not changed. One tabulating machine operator is a reclassification from intermediate clerk in the same tabulating unit. The duties and workload have not changed. The other tabulating machine operator is a reclassification from an intermediate clerk transferred from the addressograph unit in general services. The corresponding workload has been procedurally changed to the electronic data processing operation. This involves the addressing of sales tax returns no longer done by the addressograph unit. There is a continuing workload need for these positions.

BUSINESS TAXES

Program and Performance

Business Taxes administers the Sales and Use Tax Law, the Bradley-Burns Uniform Local Sales and Use Tax Law, the Cigarette Tax Law, the Use Fuel Tax Law, the licensing and assessment provisions of the Motor Vehicle Transportation License Tax Law, and the Motor Vehicle Fuel License Tax Law.

The board's administration of state taxes as of June 30, 1962, involved the licensing of 329,598 sellers of tangible personal property operating at 355,403 outlets, and of 2,442 certificates of registration-use tax as well as the 42,594 highway-users and members of the petroleum products industry and 291 licensed cigarette distributors. Tax return forms are distributed to, and tax remittances are received from these licenses and from 1,771 licensed manufacturers and wholesalers of alcoholic beverages. Thirty-seven thousand seven hundred thirty-three taxpayers were audited in the 1961-62 year. Collections are enforced when not voluntarily tendered (with assistance from the Controller in the case of the motor vehicle fuel license and motor vehicle transportation license taxes).

As a part of the continuing program of conversion of certain operations to data processing this budget makes provision for the abolishment of 5 positions effective March 30, 1964. In addition during the budget year 10 previously authorized positions which terminate as of June 30, 1963, are proposed for reinstatement. Brief statements on each of the positions follow:

(1) Two auditor III positions in Headquarters were transfers from districts for purpose of the central review function. They have offset audit review time performed in the districts and reflect only centralization of this function. The workload need for the 2 positions remains the same.

(2) Transfer of workload to the Compliance Planning Unit from Administration necessitated the transfer of an intermediate stenographer-clerk. The workload need for the position remains the same.

(3) Two tax compliance supervisor II positions in the districts represent promotional reclassifications and reflect no change in workload. The third tax compliance supervisor II was established by reclassification of a tax auditor II position to reflect the duties performed in the subdistrict office. The workload need for these 3 positions continues.

(4) Two senior stenographer positions proposed as reinstatements in the districts were reclassifications from intermediate stenographer. The workload need for these 2 positions continues.

(5) The senior typist-clerk position in the districts was a reclassification from intermediate typist-clerk. The workload need for this position continues.

(6) The intermediate typist-clerk position was a transfer of a position from the File Unit in Business Taxes Headquarters to the Out-of-state District. The corresponding files and workload had been transferred in the reorganization of the Out-of-state District. The workload need for this position continues.

As a part of the continuing appraisal of the tax program the board is reviewing the balance between the audit and compliance functions. Planning and evaluation effort by management is concerned with an apparent increase in compliance manpower needs. Collection workload appears to be a growing problem. Of particular concern is the difficulty in discovering possible hidden assets in distressed businesses. Consideration is being given to the board's own staffing needs as well as a joint effort with other State tax agencies and the Department of Justice in order to most effectively protect the State interest in the compliance areas.

In order to accomplish this program when it is formulated without commensurate increases in the level of staffing a reclassification of existing positions within the agency is planned. Auditor positions in the past have represented difficult recruitment problems. It is believed that compliance staffing will be less difficult and will be rewarding in terms of increased revenue yield to the State.

PROPERTY TAXES

Program and Performance

The major property tax programs are represented by 3 operational divisions. The Division of Assessment Standards assists, advises, and directs county assessors in the development of efficient and acceptable assessment procedures, and promotes uniformity in the ratio of assessed value to market value of all locally assessable properties within a county (intracounty equalization). The Division of Intercounty Equalization makes annual estimates of the ratio of total assessed value to total market value of locally assessable property in each county for the board's use in performance of its intercounty equalization duties. The Valuation Division provides the board with the data required for the assessment of state-assessed property and administers the Private Car Tax Law.

The board assesses property that produces property taxes and ad valorem special assessments amounting to $325,000,000 a year; and it assists county assessors who are responsible for the distribution among property owners of an additional $2,415,000,000 of taxes and ad valorem special assessments. It also makes some 6,000 appraisals of secured and unsecured property holdings each year, involving over 5,000 parcels of real property and 3,000 personal properties, to test the assessment levels of approximately one-third of the counties and estimates the assessment levels of the remaining counties by reference to the results of prior year appraisals.

As a part of the continuing program of conversion of certain operations to data processing, this budget makes provision for the abolishment of a statistician effective April 30, 1964, and a clerical position March 30, 1964.

One position is added to relieve the overtime involved in accomplishing the appraisals conducted by the Intercounty Equalization Division. In addition a previously authorized senior statistician which terminates as of June 30, 1963, is proposed for reinstatement. This position reflected an organizational transfer from Intercounty Equalization to Property Tax Administration. The same duties are involved, but the position was placed directly under the supervision of the assistant executive secretary. The workload need for this position continues.

Mapping and timber appraisal services are provided on a fully reimbursable basis to counties wishing to contract for the service. Provision is made for a contract with Lassen County for mapping services during the last half of the 1962-63 fiscal year and in the budget year. The contract costs will be repaid over the next 6 years.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

Objectives

The Department of Finance has general supervision over all matters concerning the financial and business policies of the State. In addition, numerous services are performed centrally for the various other departments, offices, boards, and commissions.

The director is immediately responsible to the Governor. He acts as adviser on fiscal matters, assists in the formulation of administrative policies, and is charged with responsibility for the execution of the State Budget. In addition, the department performs services for other state agencies, such as centralized purchasing, real property acquisition, automotive management, printing, and office building maintenance.

The Director of Finance is also a member of several boards and commissions.

Program and Performance

The director is assisted in his administration of the department by 3 deputy directors and 3 assistant directors. One deputy has general responsibility for the management research, physical, and economic planning function of the department (Organization and Cost Control Division, State Office of Planning and the Economic Development Agency). One deputy is assigned to Washington, D.C., and represents the State's interests before the Federal Government. The third deputy, with the aid of 2 assistant directors, is responsible for the administrative and general service function, the Building Standards Commission, and the Office of Administrative Procedure. One assistant director co-ordinates the activities of the Building and Grounds, Communications, Printing, Purchasing, and Property Acquisition Divisions. The other assistant director co-ordinates the activities of the Administrative Adviser, Administrative Service Office, Insurance Office, State Lands, and the State Fair. A third assistant director, reporting directly to the Director of Finance, is responsible for the fiscal affairs functions (Audits, Budget, Fairs and Expositions, and Local Allocations Divisions).

The Commission on California State Government Organization and Economy is in the Department of Finance for administrative services only.

The budget for the Service Revolving Fund appears in the appendix.

EXECUTIVE OFFICE

Objectives

This office provides overall administrative direction and coordination for the department and a number of specialized advisory services to other divisions of the department and agencies of state and local government.

Program and Performance

Under the law, the Director of Finance is responsible for approval and execution of many types of contracts, property transactions, and other legal documents. An administrative adviser assists with this function, and provides advice in legal matters involving the department.

The Director of Finance assumes the responsibility for the conduct of the State's insurance program. This involves the procurement of insurance and public official bonds for the State's protection. He is assisted in this function by an insurance officer.

One additional position was established in the current year for the Insurance Section and is proposed new in 1963-64 to meet the increased workload of this unit. One assistant counsel position authorized to June 30, 1963 for the State Building Standards Commission is requested to be continued. This position has been assigned to the Administrative Adviser's Staff.

DEPARTMENT OF FINANCE—Continued

ADMINISTRATIVE SERVICE OFFICE

Objectives

This division provides centralized administrative services for the department. These include administration of the department's support, Service Revolving Fund and Capital Outlay budgets; accounting for the above plus the Public Building Construction Fund, State School Building Aid Fund, Urban Planning grants and the general pro rata fiscal charges; personnel management; data processing; and library services.

The office also provides accounting and personnel services to 21 small state agencies.

Program and Performance

An assistant personnel analyst position was established in the current year in lieu of contracting for this service with the Personnel Board. It is requested that this position be authorized on a permanent basis to maintain the department's personnel program affecting more than 3,200 employees.

An administrative analyst position is requested to develop better internal methods and procedures.

Nine positions in the Data Processing Section were authorized through June 30, 1963, 1 of which is being abolished in 1962-63. The 8 remaining are requested on a permanent basis. Included in the workload anticipated for the Data Processing Section is requisition work formerly done by clerks in Central Stores and trip mileage computation primarily done by State Garages. Mechanization of these processes has also permitted the abolishment of 2 clerical positions in Central Stores as well as having eliminated the need for additional clerks in the State Garages. The budget for these two functions appears in the Appendix under the Service Revolving Fund. This section has been working closely with the Organization and Cost Control Division in establishing personnel and equipment needs.

Provision is made during the current and budget years for the staff and expenses of the Television Advisory Committee pursuant to Chapter 2065, Statutes of 1961.

An increase in temporary help was provided in 1962-63 and proposed for 1963-64 to provide consultant services for broad review of statewide programs.

A senior maintenance man and 1 clerical position are also proposed new and are being converted from temporary help funds already provided for support of Devonshire Downs.

AUDITS DIVISION

Objectives

This division examines and verifies the accounts of every state agency as well as all district and county fairs after transactions are completed. The purpose is to discover and report any unauthorized, illegal, or irregular expenditures; any financial practices that are unsound; and whether the agencies have faithfully discharged their responsibilities.

Program and Performance

In addition the division supervises the examination of records of all school districts, and makes special audits at the request of the Legislature, the Director of Finance, or other state officials. It authorizes destruction of records and occasionally renders expert accounting assistance to state agencies on a contract basis. There is continuing co-ordination between the Audits Division and the Auditor General in order to avoid duplication.

Three additional professional auditing positions are requested to meet the increased workload. The staffing required is based on estimates of time required to complete the necessary audits during 1963-64.

BUDGET DIVISION

Objectives

This division is responsible for the preparation and administration of the annual budget.

Program and Performance

The service and control functions affecting budgetary activities in all state agencies are performed by this division. Each state agency prepares detailed estimates of proposed expenditures and anticipated revenues for the coming fiscal year which are analyzed by the division staff in terms of policies set by the Governor and the Director of Finance. After legislative action on the budget this division continuously reviews and approves each agency's financial operations. The budgetary process and the operations of the division receive continuing management review from a policy viewpoint by a procedures unit established within the Budget Operations Section.

Another unit of the division conducts economic and population research, prepares the budget estimates of revenue from major taxes and licenses, and provides the basic data on population and income essential for long-term financial planning. Under the provisions of Section 194.2 of the Streets and Highways Code, local governments may request the Department of Finance to prepare estimates of population and pay the minor expenses incidental to this work in lieu of conducting special censuses. The resulting population estimates are certified to the State Controller and used as a basis for future distribution of motor vehicle fuel and vehicle license fee revenue.

Three positions are requested for the Budget Operations Section to work more effectively with state agencies and to provide proper overall supervision of the State's fiscal program.

These positions will permit a more adequate review and analysis of proposed and expanding state programs. Additional emphasis is particularly needed in the Education, Resources, and Health and Welfare areas. A greater amount of state, as well as federal funds are being allocated to local governments particularly in these fields. The legal and administrative provisions granting such funds should receive greater analysis than is possible with the present staff. Also with additional federal moneys becoming available it becomes more important for the staff to critically review legislation at both the state and federal levels.

A demographer position is requested to develop population estimates of small cities and sparsely populated areas.

An account clerk position is requested for the Financial and Population Research Section to handle the increasing amounts of data required by the office.

Subject to the approval of proposed legislation, a major review of state and local tax structures will be initiated in 1963-64. Funds are included for the establishment of a Joint Tax Commission to explore the entire spectrum of tax problems being experienced by all governmental units in the State. It is intended to identify inequities and recommend corrections to major areas where duplications and outmoded provisions exist. Appraisals will be made of the types or taxes levied, the various jurisdictions which utilize them and proper methods of administration.

DEPARTMENT OF FINANCE—Continued

BUILDINGS AND GROUNDS DIVISION

Objectives

This division is responsible for maintaining and operating all state-owned buildings under the jurisdiction of the Department of Finance, in addition to other privately owned buildings in which the State has rented office space for the several agencies in connection with the various operations involved. Currently it is responsible for maintaining and operating 56 buildings with a total floor space of approximately 6,500,000 square feet, including some 60 acres of grounds in Sacramento, Fresno, Oakland, San Francisco, and Los Angeles. In addition, there are a number of other locations both state-owned and leased where the division is called upon from time to time to perform miscellaneous services.

Program and Performance

A professional staff in the Space Utilization Sections of this division analyzes and determines space requirements including types, amounts, and special facilities; studies space requirements for state agencies for long-range building programs and prepares programs for design and construction of state office buildings; co-ordinates space needs, allocates and assigns space to state agencies occupying state buildings; prepares lease exhibit plans and specifications for construction of new leased facilities and also for alteration and improvement of existing leased office areas, and negotiates leases.

Through this division the California State Police provides protective service in the various locations set forth above. Additional police service is provided upon request.

The division also has responsibility for maintenance of the Governor's Mansion and the telephone exchanges in state buildings in Sacramento, San Francisco, Oakland, Los Angeles and Fresno.

The budget for 1963-64 reflects the conversion of the present dial switchboard in Sacramento to a centrex system. This system permits parties calling from off premises telephones to dial the extension desired directly without the services of an operator. Further growth of the present system is impractical because it is approaching its maximum efficient capacity and because of lack of space in the telephone equipment room. Twenty-one positions will be abolished as a result of the centrex system conversion, including 4 positions which resulted from the Los Angeles installation initiated in a prior year.

In addition 26.5 custodial positions are being reduced statewide because of savings produced by management in improving the efficiency of the existing staff and to the renegotiation of leased buildings to include these services in the building rental. The reduction of 5 temporary man-years of janitorial services is anticipated in the Capitol Building due to a Budget Session of the Legislature in 1963-64. The automation of elevators is anticipated to eliminate the need for 2 operators.

An electrician position is requested in Sacramento because of the backlog of electrical maintenance work which must be done. Two stenographers, established temporarily in the current year are requested to provide clerical assistance to the Sacramento building managers. A land agent and a clerk are requested for the leasing section because of the increase in leasing activities throughout the State. Four and one-half man-years of temporary help increases are requested to provide vacation and sick leave relief for staff at newly opened buildings. Ninety-eight and three-tenths positions are requested to staff the Retirement Building. An additional 18.8 positions were established temporarily in 1962-63 to service various leased buildings and buildings owned by other agencies of which 13 will be required on a permanent basis in 1963-64.

Within the operating expense category, are included Sacramento agency telephone toll charges. These charges had previously been paid directly by agencies, however with the installation of the centrex system discussed above, the Department of Finance will meet this cost and be reimbursed by using agencies.

COMMUNICATIONS DIVISION

Objectives

This unit provides technical assistance relative to the co-ordination and operation of communications systems used jointly by public agencies in the State, as well as those systems operated by individual state agencies. Arrangement for adequate representation of these agencies before the Federal Communications Commission in matters affecting them is a further responsibility of the division.

Program and Performance

An important part of the division's work is to assist in solving engineering and technical problems relating to installation and operation of publicly owned radio, telephone, and teletype systems. The findings and recommendations of the staff are made available both to the board and to the public agencies concerned.

The division also provides centralized maintenance service on a reimbursable basis for most state agencies utilizing radio equipment. The budget for this activity appears in the appendix under the Service Revolving Fund. The 1963-64 budget continues the same level of service as in the current year.

ECONOMIC DEVELOPMENT AGENCY

Objectives

To provide industrial and commercial expansion and fuller employment for California's growing population through vigorous promotion of business within the State.

Program and Performance

This agency investigates, studies and undertakes ways and means of promoting and encouraging the prosperous development of business, industry and commerce. The agency, headed by a commissioner appointed by the Governor, promotes and encourages the expansion of markets for California products, and the development of new business in the State. It studies conditions affecting California business, industry and commerce, plans and develops an effective business information service, encourages and develops commerce with other states and foreign countries, and makes periodic reports and recommendations to the Governor and the Legislature for improvement of conditions affecting the development of business, industry and commerce.

An assistant commissioner position has been established temporarily and is proposed to be continued on a permanent basis. An information officer is proposed to develop material on the State's industrial potential, primarily for publication in out-of-state news media to stimulate business interest.

FAIRS AND EXPOSITIONS DIVISION

Objectives

This division provides general fiscal supervision over 50 district, 24 county and 2 citrus fairs throughout the State.

Program and Performance

The division prepares a master premium list and approves the operating budgets and premium lists of the individual fairs; prepares claims for distribution of appropriated funds; and advises the Director of Finance and the State Public Works Board as to allocations of money from the Fair and Exposition Fund to fairs for capital outlay purposes. The division also assists local fairs with construction problems.

A clerical position is requested for one year only. This position is necessary because 1959 amendments to the Horseracing Law and to the Agricultural Code relating to financing of fairs have increased the work of the division in preparing construction plans and specifications, filing claims, receiving contracts, and making inspections.

LOCAL ALLOCATIONS DIVISION

Objectives

This division serves as the technical staff to the Director of Finance and the State Allocation Board in the administration of several programs of state aid to local government agencies.

Program and Performance

The major programs are: to review and analyze applications for state aid and related documents to determine that eligibility requirements have been met; prepare reports and make recommendations to the Director of Finance and to the State Allocation Board in respect to these programs; maintain records of official actions of the Director of Finance and the State Allocation Board; administratively approves construction contracts and release of funds in accordance with the rules of the State Allocation Board, and performs other functions authorized by the Director of Finance.

Subject to the passage of proposed legislation, a housing unit is provided in this division to initiate a program providing a wider choice of suitable housing for low-income California residents. Nine proposed new positions will administer a $2,000,000 interest guarantee program to accomplish this purpose. It is anticipated that such guarantees will be offered in co-operation with private, local and federal programs to stimulate low-income housing construction and thereby provide better housing at a lower purchase price or rental cost. The State's continued growth has generated a marked need for adequate housing particularly among the elderly, minority groups, agricultural workers and low income groups generally.

ORGANIZATION AND COST CONTROL DIVISION

Objectives

This division provides consultation services on management problems and makes studies of organization, procedures, administrative policy, records management, and accounting systems, as requested by any state agency or as determined by the director. Results of its surveys are usually submitted to the requesting agency as a written report with recommendations for improvements. Over 100 surveys are made annually to find better ways to do the government's work.

Program and Performance

In the field of accounting, the division prescribes the State's uniform accounting system based on studies of methods and procedures ranging from relatively simple accounting systems applications to large and complex automated data processing systems.

The division prepares and maintains the State Administrative Manual which serves as a reference source for policies, procedures, regulations, and informaiton on management responsibilities.

Some of its staff are assigned to full time under contract to other state agencies to provide them management research and advisory services.

The staff of the Merit Award Board is also a part of this division. Employees' suggestions received by the board are processed for evaluation. Awards are given to employees for suggestions that are adopted.

One position was established administratively during 1962-63 to perform data system studies for the Department of Water Resources and the Department of Motor Vehicles under contract. Another position was established administratively to perform fiscal management research for the Department of Veterans Affairs also under contract. In 1963-64 2 data processing systems analysts are proposed to meet the increased demand for review of agency proposals for data processing systems. Assistance is given to agencies in organizing studies and cost analyses for conversion and installation of data processing systems.

COMMISSION ON CALIFORNIA STATE GOVERNMENT ORGANIZATION AND ECONOMY

Objectives

The Commission on California State Government Organization and Economy was established by the 1961 State Legislature as a permanent commission composed of 4 legislative and 7 citizen members. Its purpose is to provide continuing assistance to the Governor and the Legislature in promoting economy, efficiency and improved service in the transaction of public business by the executive branch of the State Government and in making the conduct of such activities more directly responsible to the will of the people as expressed by their elected representatives.

Program and Performance

In its first year of operation, the commission undertook an evaluation of the "Agency Plan" of executive organization as implemented to date and contemplates analyzing and reporting on additional executive reorganization proposals as they are submitted by the Governor to the State Legislature.

The commission has reviewed the reorganization history of the State Government and has conducted a series of meetings on the current reorganization program receiving testimony from interested private citizens as well as many public officials.

PLANNING OFFICE

Objectives

This office is responsible for the administration of Chapter 1.5, Title 7 of the Government Code which provides that the office will prepare, maintain and periodically revise a comprehensive state development plan; co-ordinate the public works programs undertaken by the State, federal and local agencies; give planning assistance to local, district, and regional planning agencies and to other public agencies upon request; and undertake such other physical planning and co-ordination studies and activities as will implement the policies and intent of the Legislature.

Program and Performance

The State Planning Advisory Committee provides advice and guidance to the office in the planning function. This committee is appointed by and serves at the pleasure of the Governor; however, appointments must be made from the ranks of local legislative, planning, and school officials.

The State Development Plan is to be based on studies of physical, social, economic and governmental factors, conditions and trends. The plan is aimed at the co-ordinated physical development of the State. It will embody state policy regarding the State's physical growth and development and will include by discussion and agreement between the agencies involved, the projects and other improvement proposals of the departments and divisions of the State Government, the projects and improvements proposed by the Federal Government, and the major aspects of master or general plans of regional and local agencies of government. Upon approval by the Director of Finance and the Governor, the plan is to be transmitted to the Legislature for adoption in principle. A biennial report to the Legislature on the status of the plan is required.

Phase I of the preparation of the plan is taking place during 1962-63 with a federal grant of $376,636. The Federal Government pays two-thirds of the cost of the project. The State contribution, $188,212 is made up of services of several state agencies doing work which will contribute to the plan. Studies will be made to determine the factors which influence land use, urbanization, availability and utilization of natural resources, population growth and migration, and public and private capital outlay investment; and to project the results of present policies in these areas for a 15-year period. A clerical position was added temporarily to work on the plan during the current year and was financed from the grant funds.

Phase II of the plan is an 18-month program which will complete the State Development Plan. It is anticipated that the Federal Government will contribute two-thirds, $875,275 of the project cost over the 18-month period. Phase II will complement the Phase I studies by considering alternate development proposals concerning land use, natural resources, recreation, and transportation. The plan will identify the means which the State can use to guide the development and growth of California. Six positions, 3 planners, 1 delineator, 1 research technician and 1 clerk, are requested for 18 months to work on the development plan.

The following table relates the various elements of the plan and the sources of financing through to completion in December 1964:

In addition to the State Development Plan, this office is assigned the responsibility of ascertaining from each state department, board or agency, from each local jurisdiction, and where possible, from federal agencies all proposed public improvements or projects which are of statewide concern. The office is to encourage conferences between state and federal agencies contemplating projects within the State and the local planning agencies having jurisdiction over the territory in which such projects will be located. Whenever conflicts in proposed public works projects are determined to exist, the office is to notify the agencies concerned and recommend appropriate action to eliminate such conflicts.

The office encourages regional planning and, in accordance with the recommendations of the State Planning Advisory Committee, divides the State into regional planning districts.

The office also maintains a file of all plans and reports pertaining to the physical growth and development of the State and prepares an annual report on planning for distribution to state and local agencies.

During 1963-64 it is anticipated that 72 applications for grants will be received and 60 in 1962-63 compared with 47 which were received in 1961-62. One planner and 2 clerical positions are proposed to handle federal planning grants to local jurisdictions. One clerical position was temporarily established during 1962-63 to help close out completed projects.

PROPERTY ACQUISITION DIVISION

Objectives

This division is responsible for various real estate procurement, management and disposal activities of the Department of Finance. It also functions as the overall secretariat of the Public Works Board of which the Director of Finance is chairman.

Program and Performance

Properties acquired by the State in anticipation of later building activity are managed by the division. When such property is needed for a construction project, the unit arranges for termination of tenancies and for the sale by bid or auction of improvements on the site.

The division also is responsible for implementing the surplu real property disposal program. State-owned properties no longe needed are reported to the Legislature, and when authority t sell them has been obtained, the division supervises their sal and return to local tax rolls.

Nine positions were added administratively during the curren year and are proposed for continuation to do negotiating an appraisal work previously done by contract fee appraisers Savings produced by this program are reflected in the reduce cost of land acquisition in the Capital Outlay portion of thi budget.

DEPARTMENT OF FINANCE—Continued

PURCHASING DIVISION

Objectives

The State Purchasing Agent has sole authority to contract for the purchase of supplies for every state department, commission, board, institution, and official, with the exception of the State University.

Program and Performance

Bids are requested from dealers, jobbers, and manufacturers who are engaged in the various lines of business, and award is made to the lowest responsible bidder meeting minimum specifications, taking into consideration price, quality and fitness.

A program of quality control and standardization has been developed for materials purchased by the State which has permitted negotiation of contracts for many commodities purchased in quantity. Service to the many departments and institutions has been further improved by delegating authority to place direct orders for limited amounts, noncompetitive items, and emergency supplies, in addition to contract items.

Specifications are prepared and deliveries are carefully checked on all foodstuffs purchased for the patients at the state hospitals. Items purchased for the state agencies under standard specifications are checked at the Testing and Research Laboratory of the Division of Highways at Sacramento.

A traffic management office is established in this division to develop and conduct a central traffic management program to effect economies and efficiencies in the movement of state freight.

Central store warehouses are maintained in Sacramento, San Francisco, and Los Angeles, from which supplies are shipped to the various agencies of the State. These supplies are purchased in large quantities at advantageous times, thus assuring prompt deliveries of stocks when needed, and also giving the agency the benefit of large wholesale purchases.

The division manages state-owned automobiles in a pool from which a State Agency can obtain a state car for state use. Cars are maintained in San Francisco, Sacramento, Oakland, Berkeley, Fresno, San Diego, Los Angeles, Eureka, San Luis Obispo and Redding. Control is exercised over type and number of automobiles purchased, and the use of state garage and parking facilities. Reports are received to assure state automobiles are used only for official business purposes.

The budget for the central stores, automotive pool and garage, central reproduction, and the office machine repair operation of the Service Revolving Fund is shown in the appendix. These activities are managed by the Purchasing Division.

One and a half positions have been transferred to the central reproduction unit in the Service Revolving Fund to increase the capability of that function available to Sacramento agencies.

Two buyer positions and 3 clerical positions are requested due to increased workload.

OFFICE OF ADMINISTRATIVE PROCEDURE

Objectives

This office, headed by a presiding officer appointed by the Governor, is responsible for co-ordinating and improving the quasi-judicial functions of various state agencies. It furnishes trained hearing officers to any agency conducting disciplinary proceedings, and it compiles and publishes the California Administrative Code, consisting of agency rules and regulations.

Program and Performance

An associate counsel and clerk are proposed to study the subject of administrative law and procedures assigned to the office by Government Code section 11370.5. This study has been recommended by the Judicial Council.

An administrative assistant position has been established temporarily and is proposed for continuation in 1963-64 to relieve the presiding officer of routine administrative tasks and establish procedures and methods which will improve service to state and public agencies using the office. Two additional clerical positions have been administratively established in 1962-63 for workload purposes. These positions are proposed for continuation in 1963-64.

The agency workload is indicated by the following figures:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

STATE BUILDING STANDARDS COMMISSION [c]

Objectives

The State Building Standards Commission, which consists of the Director of Finance and 6 members appointed by the Governor, was established by the Legislature to screen building regulations for conflict, duplication and overlap. The commission also is to write a complete code which will supersede all building regulations by other state agencies. The commission was transferred to the Department of Finance in 1962 as a result of legislation during the First Extraordinary Session, 1962.

Program and Performance

There are 23 administrative agencies in the State, 17 of which write and enforce building regulations and standards. There are 10 state statutory code provisions dealing with building regulations and 19 general laws. A workable program has been established by the commission to consolidate the various state codes into a single uniform code.

No increase in services is contemplated in 1963-64 over the budget for 1962-63. Two positions were authorized until the code is completed but these are now requested on a permanent basis because recent legislation has enlarged the role of the commission by giving the commission authority over all regulations rather than proposed new regulations. One position was established in the Administrative Adviser's office rather than within this division and is proposed new in that section of the department's budget.

GENERAL ANALYSIS

Objectives

The Capitol Building and Planning Commission was created by Chapter 1952, Statutes of 1959. The duties of the commission are to establish a master plan for the orderly development of future state buildings and other facilities in the capitol area of the City of Sacramento.

The commission is required to submit at each general session a report on projects completed or initiated and may recommend revision of the master plan adopted by the Legislature.

Program and Performance

The commission consists of 13 members appointed by and serving at the pleasure of the Governor. Three members are nominated by the City of Sacramento and 3 members by the County of Sacramento.

The State Office of Planning is providing necessary staff assistance to the commission.

The 1963-64 budget provides for preparation of the commission's report to the Legislature and general office expense of the commission.

GENERAL ANALYSIS

Objectives

This agency conducts the annual State Fair and Exposition and during interim periods makes full utilization of the grounds for other activities.

Program and Performance

The Agricultural Code directs that the State Fair Board, subject to the approval of the Department of Finance shall "provide for and manage an annual fair or exposition at Sacramento of the industry and industrial products of this State and of the commercial products exported and imported through the ports of this State." There is a 12-day fair held for this purpose in the latter part of August and the first part of September each year. In addition, provision is made for a California Spring Fair which consists of a division of the annual State Fair and the annual fair of the 52nd District Agricultural Association. This latter program is conducted on the State Fairgrounds as a co-operative effort. The event was first staged during the spring of 1961. The California Spring Fair provides some exhibitors a much better opportunity to present their products for public inspection and provides more entries for the horse show due to its less competitive timing in the spring.

Since inception of the State Fair in 1854 there has been continuous growth. Economic interests represented include livestock, poultry, rabbits, dairy, and other agricultural products, the arts, home economics, junior division, horse show, rodeo, fashions, and fabrics, wines, horseracing, and many others. This fair portrays California as a whole, and shows its economic, governmental, and social life and its relationship to the world. In this respect foreign countries have exhibits at the fair.

The use of the fairgrounds for nonfair activities is growing and conventions, dances, roller rink, auto racings, cattle sales, winter quartering of racehorses, rental of equipment, and storage use contribute to the fair's revenues and help affect the maintenance and upkeep cost of the fairgrounds.

The Budget Act makes provision for a General Fund transfer to the State Fair Fund of $278,777 to provide the additional operational resources required to support the continuing program of the State Fair. In addition, revenue estimates are increased slightly in the 1963-64 fiscal year based on anticipated increased attendance for the fall division.

The program provided for in the budget year will include both the principal State Fair fall division and the spring division show. In addition to the normal fall fair attractions, which are provided for in this budget presentation, planning consideration is being given to the development of a major evening attraction to be presented. It is felt that the major attraction, which will be programmed as a completely self-supporting venture, will enhance all phases of the fair operations.

This budget also provides for a publicity representative position which is partially funded from a reduction in temporary help. The publicity representative function was formerly funded from this source. In addition, an assistant chief, bureau of exhibits position is added as a 6-month understudy for the key position of chief exhibit supervisor. The latter position will be vacated during 1963-64 through retirement of the long-time incumbent. The proposed supervisor of concessions position is funded by a conversion of technical supervision money and carries on the same level of service now authorized. The administrative assistant position was abolished December 31, 1962, in accordance with the program outlined in the 1962-63 Governor's Budget. However, after further review of the problem by fair management, this position is considered necessary and is therefore proposed as new. Temporary help for Direct Fair is increased 1.2 man-years to handle parking during the fair and is funded through increased revenues. Heretofore, parking has been handled under a contract with the fair receiving a percentage of the gross. Temporary help for nonfair or interim activities is increased 1 man-year for workload in this activity area.

GENERAL ANALYSIS

Objectives

The California Museum of Science and Industry is a state educational institution administered by a 9-member board of directors appointed by the Governor. The museum was established under the provisions of Chapter 69, Statutes of 1880 to administer, manage, operate, and maintain permanent facilities located in Exposition Park, upon land held in trust by the museum.

Program and Performance

The California Museum of Science and Industry contains permanent and changing special audio-visual and public-participation educational exhibits demonstrating the industrial and scientific progress of the State of California. Such exhibits, through their "story-telling approach" illustrate the importance of science, industries, industrial enterprises, resources, and products as a vital factor in the economy of the community and the State of California. The museum maintains a schedule of approximately 24 changing special exhibits a year. These exhibits have ranged in tenure from 5 days to 8 weeks and have varied from semiartistic exhibits to educational contemporary playground equipment. The special exhibit program is sponsored jointly by state and private sources. The purpose of this type of activity is to attract and maintain diversified audience and industry participation commensurate with the rapidly changing scientific, industrial, and nontechnical fields.

The phenomenal growth in exhibits and attendance at the California Museum of Science and Industry has made it the second largest institution of its kind in the United States. In excess of one million visitors annually come to this unique museum.

A survey of museum visitors indicates the following ratios: 30.5 percent from the City of Los Angeles and 69.5 percent from outside the city. Of the latter amount, 47 percent are Californians, 35 percent are from other states and 18 percent are foreign visitors. This ratio appears to be changing with the number of out-of-state visitors increasing more and more.

Financial support from the aviation industry enabled the museum to complete a major portion of the 3,300 square foot permanent exhibit on the phase I science of aviation in 1962. This exhibit is being financed jointly by the State and private industry on a matching fund basis. Indications are that the entire exhibit will be completed in the current fiscal year.

Opening of the new permanent Federal Aviation Agency exhibit in October 1962 within the science wing was a major step in the continued development of the museum complex. This is the first public showing of the exhibit in the United States. This exhibit, together with the already existing mathematics display constitute two of a total of six permanent exhibits scheduled for the science wing area. It is anticipated that the remaining four will be opened to the public during 1963. They relate to electricity, electronic communication, mechanical sciences, and physics and chemistry. When completed, these will form a "walk-through" encyclopedia of the fundamentals of physical science. Each of these exhibits will be financed by private benefactors, foundation grants and industry.

A portion of the museum-owned National Guard armory was remodeled in 1962 in accordance with the museum master plan to facilitate its use as a permanent space age museum. Arrangements with major aerospace company sponsors for the design, construction and opening of a permanent space display are progressing. During the interim, the structure is being utilized as the site of major temporary space exhibits such as the NASA space exhibit from the Seattle World's Fair.

The museum provides an outstanding resource for the enrichment of the local school program. Since educating and stimulating young people to pursue the fields of science and industry are the primary aims and objectives of the museum, a complete science education program is being developed. The California Museum Foundation, through private funds, sponsors the entire educational program which continues to grow in service to the public. During the year an ambitious lecture series featuring full evening presentations by four distinguished California scientists was inaugurated. Continuing educational projects

---

[b] Transfers from the General Fund reported as General Fund expenditures.

Department of Finance

CALIFORNIA MUSEUM OF SCIENCE AND INDUSTRY—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

Program and Performance

include an annual math seminar, numerous teacher institutes, a daily film series and guide tour program, and guided school tours for some 60,000 students.

In accordance with the museum master plan, remodeling of the museum entrance has been completed and the main museum building has been repainted to match the exterior of the science wing.

Bids were requested and received from petroleum companies to determine interest in test drilling within Exposition Park for the possible presence of oil and gas. The total of funds which may be realized from this source by the museum is as yet undetermined, awaiting the results of test drilling.

Exposition Park consists of 104 acres owned by the Museum partly under lease to the Coliseum Commission (Los Angeles Memorial Coliseum and Los Angeles Memorial Sports Arena), the County of Los Angeles (Museum of Art, History, and Science), and the City of Los Angeles (Swimming Stadium and Rose Garden); the remainder being under the immediate control and jurisdiction of the museum. Each tenant assumes entirely or shares jointly in the cost of maintaining the park grounds.

The museum owns approximately 26 acres surrounding the Park which are operated as public parking lots for patrons of the Coliseum, Sports Arena, Swimming Stadium and museums. The land was acquired and facilities developed from capital outlay funds advanced by the General Fund and the State Beach and Park Fund (General Fund). These loans are being repaid with interest from receipts from the use of the parking lots. The operation of the parking lots by the museum in lieu of concessionaire agreement continues to produce substantial savings.

This budget provides one proposed new administrative assistant position to provide added supervision of the existing staff. This position was recommended by Organization and Cost Control Division as a result of their management study of this agency. An additional janitor position is also included to perform the increased workload resulting from the new exhibits and to assist in the supervision of the existing janitorial staff.

GENERAL ANALYSIS

Regional agricultural societies first received financial assistance from the State in 1861. After the adoption of the new Constitution of 1879, the regional agricultural societies were succeeded by district agricultural associations authorized by the Legislature of 1880 as state agencies. Section 80 of the Agricultural Code fixes the boundaries of 51 agricultural districts. There are 50 districts organized and holding fairs in addition to the California Museum of Science and Industry which maintains a permanent exhibit in Los Angeles.

Each of the district agricultural associations is a state institution administered by a board of 9 directors appointed by the Governor. The organization and operation of district agricultural associations are governed by Sections 80 to 97 of the Agricultural Code. District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. District fairs are conducted under budgets approved by the Department of Finance and the Audits Division of the Department of Finance audits the premium awards made at the fairs and makes post-audits as well.

Revenues received by the California Museum of Science and Industry, Los Angeles, are deposited in a special fund in the State Treasury and this agency operates out of this special fund under appropriations by the Legislature. This agency does not receive an allocation under the provisions of Section 19627 of the Business and Professions Code.

The 1-A District Agricultural Association, San Francisco, receives an annual appropriation of $250,000 and the 48th District Agricultural Association, Los Angeles, receives an annual appropriation of $125,000 under the provisions of Section 19622 of the Business and Professions Code. Neither of these associations receives an allocation under the provisions of Section 19627 of the Business and Professions Code.

The remaining 48 district agricultural associations receive annual allocations on the basis of premiums paid at their respective fairs and upon showing of their need for financial assistance.

Provision is made to transfer savings from the appropriation made by Business and Professions Code Section 19627 for encouragement of agricultural fairs to augment the appropriation for Capital Outlay at district, county and citrus fruit fairs.

GENERAL ANALYSIS

Objectives

The division administers policies established by the State Lands Commission in managing the public lands belonging to the State, which consist of school land, swamp and overflowed land, salt marsh, tide and submerged lands and other sovereign lands comprising approximately 3,500,000 acres.

The principal revenue-producing function is the leasing of the public lands for the extraction of oil, gas and other minerals.

Program and Performance

The commission is composed of the Director of Finance, the Lieutenant Governor and the Controller.

Activities in the administration of State lands have increased in scope and value with passing time, ranging from the original activity of selling and leasing proprietary lands to the present duties, which include oil, gas, mineral, grazing, agricultural, commercial and recreational leasing and leases for use and occupancy of swamp, overflowed and tide and submerged lands.

The Public Resources Code authorizes the leasing of the State's tide and submerged lands for oil and gas production. Leases may be let on either a cash bonus or a royalty bid basis, whichever is anticipated to return the greater revenue to the State. Five leases were let during 1958 in Santa Barbara County. Four of these are now on production. At the end of the 1961-62 fiscal year a total of 11 leases had been let in the current program begun in 1958. Total cash bonuses for leases awarded during the past fiscal year amounted to $6,655,518. The commission has adopted a policy of offering parcels of tide and submerged lands for lease on a continuous sequential basis. As a result, cash bonus royalties may be anticipated during each fiscal year in the future. Active wells on production in Orange, Ventura, and Santa Barbara Counties total 877, an increase of 51 during the past year. Five rigs are presently drilling in the Santa Barbara area.

The development and administration of new leases has created unique problems, such as the control of production from offshore structures and ocean-floor well-head completions. Royalties from oil and gas during 1961-62 fiscal year totaled $11,266,763 and are estimated at $15,500,000 for 1963-64.

The commission also accounts for the state's share of oil and gas revenues derived from tide and submerged lands granted to the City of Long Beach. This is a major program involving complex engineering, auditing, and legal problems. Revenues from this source for the past year totaled $6,741,966, an increase of $362,000 over the previous year. The City of Long Beach has been engaged in an intensive program of water repressurization, designed to improve petroleum production and to alleviate subsidence. Capital expenditures for this program, approximately $14 million, are virtually completed. Secondary oil recovery and the elimination of further capital costs should result in an increase in revenues from this source during the current and budget year.

The revenue schedule for the division anticipates a change in the budget year distribution of tideland oil revenue between the General Fund and the California Water Fund. Subject to the passage of proposed legislation, Water Fund receipts will be fixed at $9,000,000. This amount represents the projected annual requirement of the fund from this source for the long-range financing of the California Water Program.

Income from sales of public lands amounted to $253,593 despite the effects of a commission moratorium that had been placed on new applications for the sale of these lands. A new management program is being developed which will be in full operation in the budget year.

Fourteen statutes were passed at the 1961 session of the Legislature providing for grants of tide and submerged lands to political subdivisions of the State. Section 6359, Public Resources Code, requires that such grants be surveyed, monumented, and a plat of the granted lands recorded in the county where the lands are located prior to the grant becoming effective. Twelve of the granting statutes also require that substantial improvement be made of the area by the grantee within a 10-year period. These statutes assigned the commission responsibility for seeing that such improvements are made; alternatively the granted areas revert to the State. As a result a substantial civil engineering workload is now being undertaken. The discharge of these assignments will carry into the 1963-64 fiscal year.

Applications for the leasing of lands for use and occupancy continue to grow in volume. Revenues from this source totaled $279,822 during the past fiscal year, and show a continual increase.

Paramount among the litigatory actions the State Lands Commission is defending is U.S. vs. Anchor Oil, et. al., in which the United States is suing the City of Long Beach, the State, and numerous oil producers for claimed irreparable damages in the amount of $70 million to the Long Beach Naval Shipyard. Trial on issues other than causation and damages commenced October 2, 1962.

Legislative grants of tide and submerged lands discussed above, account for the establishment of 4 positions in the current year to provide the necessary survey work on a reimbursable basis; and the addition of $10,400 for current year temporary help represents the transfer of funds originally budgeted in operating expenses. The funds were provided the commission to reimburse them for services rendered the Colorado River Boundary Commission.

Workload increases within the division account for the addition of 11.2 proposed new positions in the budget year. An administrative assistant is included in the executive office to help meet the increased volume of administrative detail. With the expanding and increasingly complex programs of the division the 2-man executive office needs this type of assistance on the more routine problems so that they may devote full time to management considerations. Four additional engineers are also proposed, 3 of these engineers are required for new oil and gas lease development throughout the State. The fourth position will be concerned with granted tidelands in the Long Beach area where it is estimated that several thousand acres will be newly opened for oil and gas recovery. In connection with the granted tidelands in the Long Beach area an auditor position will be required to meet the State's additional responsibilities of expenditure review.

The expansion of oil and gas activity in the Santa Barbara area will require the addition of 1 production inspector and 1 gauger position to administer and account for production under these new leases. The production inspector position was requested last year; however, the inspector was not included in the final budget as a result of the legislature suggesting the position recently established in Rio Vista be considered for transfer to Santa Barbara to meet the increasing workload in that area. A re-examination of the Rio Vista workload, particularly in light of increasing gas recovery and storage operations, proved this solution to the staffing problem to be impractical. The previously authorized position therefore was retained for work in the Rio Vista area and is headquartered in the Sacramento Office. The new position is being requested for Santa Barbara.

Clerical workload increases account for the inclusion of 1 position in the Administrative Services Office for filing and typing duties. One additional clerical position in the Land Sales and Records Office will be required when the present moratorium on land sales is removed.

Temporary help is also increased 0.2 man-year equivalents to meet increased gauging activity in the Huntington Beach area, and 1 man-year for the continuation of reimbursable consulting engineering services to the Colorado River Boundary Commission discussed above.

Returns Filed:	1960-61	1961-62	1962-63	1963-64	Increase
Personal income tax	4,576,979	4,725,000	4,900,000	5,085,000 [d]	185,000
Bank and corporation tax	107,000	113,000	118,000	125,000	7,000
Totals	4,683,979	4,838,000	5,018,000	5,210,000	192,000

---

[a] A nonexpendable trust fund held for public school purposes only. These revenues are not included in overall budget totals.

[b] Fund abolished June 30, 1961, by Chapter 892, Statutes of 1961.

[c] Transfers to the General Fund reported as General Fund revenue.

[d] The actual number of returns to be filed is expected to increase as indicated even though legislation to be proposed will have an effect on the number of taxpayers who will be required to pay tax. For compliance purposes the requirement to file will be retained even though the tax liability is modified.

FRANCHISE TAX BOARD—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS

Objectives

The board receives all personal income taxes, bank and corporation franchise taxes, and corporation income taxes. In addition, the board audits and assesses additional taxes where deficiencies occur, and collects delinquent taxes in accordance with the Bank and Corporation Tax Law and the Personal Income Tax Law.

Program and Performance

The Franchise Tax Board is composed of the State Controller, the Director of Finance, and the Chairman of the State Board of Equalization. The board guides and reviews the overall operations of the department through an executive officer.

A revision of the tax laws administered by the board is to be submitted to the 1963 Legislature. A significant feature of the proposal as it affects the personal income tax is the reduction in the State tax burden on people with lower incomes. This reduction is accomplished by eliminating the personal income tax where the tax liability is less than $5 in the case of a single individual and less than $10 for a married couple.

The recommended revenue program also involves the adoption of a current payment plan for both individuals and corporations beginning in 1964-65. This will entail the use of a withholding tax on salary and wage payments above specified minimum amounts and an estimated tax return for individuals with more than nominal income from sources other than salaries and wages. Corporations with incomes above $25,000 a year will also file an estimated tax and make payments on this current income beginning in 1965.

The proposed program will also include the elimination of the installment payment privilege effective with returns filed in 1964 on income earned in 1963. Coupled with the revised program is the contemplated forgiveness of 25 percent of the tax liability on 1964 income payable in 1965. Action will also be taken to achieve conformity with certain features of the federal tax program to close existing loopholes. Action has already been taken administratively to put into effect the revised depreciation guidelines recently adopted by the Internal Revenue Service.

A major workload impact on the board will be experienced in a revision of the revenue program. This budget anticipates the administrative and organizational needs of such a system. Two major elements in this new procedure will affect the work programs of the Franchise Tax Board. First, there will be additional account records for individuals, required both for the quarterly payment of estimated tax and for refunds of overpayments. In addition it will be necessary to keep a record of employer-withheld tax and there will be related compliance problems in enforcing this new fiduciary relationship. Second, it will be possible within the course of 2 or 3 years to reduce 2 enforcement programs now carried on. These programs are the federal comparison program and the information at source program. This will offset a substantial part of the initial expense of the withholding and estimated tax plans.

ADMINISTRATION DIVISION

Objectives

This division provides cashiering and accounting services, statistical analysis, and bank tax computation services. In addition, the division provides legal functions, hearings on appeals by taxpayers from staff decisions, and special investigations as well as overall supervision of the activities of the board.

Program and Performance

A major problem confronting the board is the increasing volumes of returns and related transactions involved in the administration of personal income and bank and corporation taxes. This impact includes the physical handling of the material as well as the subsequent storage and reference problem. To cope with this situation the board proposes to refine their existing methodology. This will involve development of an electronic data processing configuration which will have the necessary capacity to handle the various processes now accomplished manually or by unit record punch card equipment.

At the present time by unit record punch card equipment the board maintains extensive records of accounts receivable, they make statistical evaluation of tax programs, they handle a complex bank tax rate computation, and they maintain delinquency control for the franchise tax. All of these processes are adaptable to a refined electronic data processing system at an ultimate savings in personnel, storage space, and time.

The electronic data processing configuration is also well suited to the needs of the board for an integrated addressing operation and compliance verification program. The board is presently utilizing information available from the federal taxpayer records supplied by the Internal Revenue Service to accomplish the addressing needs. This information is made available on magnetic tape and the board utilizes machine time in the State Controller's office to prepare the return addressing media. This program also gathers information for the Personal Income Tax compliance program. By developing their own machine configuration this program will be under control of the board and they will achieve more benefits from automation of the delinquent taxpayer collection program. The automation will also provide a means for interest and penalty computation by machine.

As the foregoing programs are converted to electronic data processing the board will gain the necessary administrative and programming experience to adapt to future legislative changes in revenue program. The potential for growth of an electronic data system is such that revisions of the revenue program will be accomplished with a minimum of disruption. Experience has shown that the lead time on a complex system is approximately 18 months to develop a smooth transition from manual to machine operation.

To accomplish the foregoing it is proposed to consolidate both physically and organizationally the 3 presently separated tabulating units of the board. The Franchise Tax Board presently operates such units in the Accounting Section and the Statistical Section of the Administration Division and in the Operations Division. The present organization is unwieldly in view of changing program needs. It is now more economical to budget equipment and manpower as a single integrated unit. The initial cost increase consolidating the present capacity of the board and making available new program potential will be approximately $225,000 in the budget year. This amount represents the one-time costs of setting up the system and programming for present and future work. Nine positions are to be added temporarily for the latter part of 1962-63 to prepare for the equipment expected early in the 1963-64 fiscal year.

Ten positions costing $75,698 will be required in 1963-64. This staff will be used to convert certain present workload to the proposed data processing system and to program future workload to be handled by this equipment. Machine rental for this system will increase $142,351 over the present level and $5,000 in equipment will be needed.

Additional personnel savings in the 1964-65 fiscal year are anticipated by elimination of some manual operations. When

FRANCHISE TAX BOARD—Continued

ADMINISTRATION DIVISION—Continued

Program and Performance—Continued

accomplished, these savings will further offset the increased cost of this system in 1963-64. It is noted that part of the proposed equipment rental is budgeted for only a portion of the year in 1963-64 and that 1964-65 full-year costs will be increased by an additional machine rent of approximately $96,000. It is expected that such a program would yield a very substantial net increase in revenue.

A summary of the program of the division must give consideration to several units. The Accounting Section keeps the fiscal records for the agency, performs the cashiering function, maintains the corporate and individual tax receivable ledgers, and performs the service and supply function. In the current year 13 man-years of temporary help were added administratively for second shift operation of the data processing unit. A total of 19.3 man-years of additional temporary help are proposed for 1963-64 to handle the expected increase in workload in the Accounting Section.

The Statistical Section is responsible for computing annually the rate of tax applicable to banks and financial corporations. In addition, the section gathers and analyzes statistical data relating to the taxes administered by the board.

The Legal Section acts as the attorney for the board in the interpretation of the statutes and provides legal service in the proper framing of regulations. The section represents the board in actions which are subsequently appealed to the State Board of Equalization and assists the Attorney General in matters that are carried to the courts.

The Appeals and Review Section acts on formal taxpayer protests against notices of proposed assessments which have their origin in the audit activity.

The Special Investigations Section investigates criminal violations of the income tax laws. In addition to investigating criminal violations of the income tax laws, the unit procures evidence of illegal gambling activities to support the assessment of additional taxes under the so-called "Illegal Activities Sections" of the Revenue and Taxation Code (Sections 17297 and 24436), which provide for a disallowance of all deductions from income received from certain illegal gambling activities.

One administrative analyst position is added to handle the constant workload of procedural and special studies inherent in an increasingly complex organization. One personnel officer position is added to direct the personnel and training programs of the board. In the past these functions have been accomplished by various supervisory personnel. By using a trained personnel officer the function will be performed at less cost and more efficiently. One clerical position is added in personnel on a workload basis. Two general accountant positions and one clerical position are proposed for an internal audit unit. The function of internal audit was recommended by the Auditor General for the purpose of keeping the chief administrative officer and the board informed that management policy is being carried out. The internal auditor would also review program for effective and efficient accomplishment of such policy and plans. One clerical position is added to the Legal Section on a workload basis.

OPERATIONS DIVISION

Objectives

This division handles the general administration of the Bank and Corporation Tax Law and the Personal Income Tax Law by performing the line functions relative to the responsibilities of the board. These responsibilities include the clerical processing of tax returns and related reports, desk and field auditing of such returns, and the computation of additional assessments and refunds where proper. The division is responsible for the administration of compliance programs to insure filing by those having a liability to do so and is also responsible for the collection of delinquent taxes.

Program and Performance

In addition to the headquarters office in Sacramento, the division maintains regional offices in Los Angeles and San Francisco and branch offices in the larger cities throughout the State. The branch offices are grouped under the regional offices. The division also maintains offices in New York and Chicago. The 2 out-of-state offices are primarily concerned with the bank and corporation tax audit program. The out-of-state auditing is presently performed by a staff of 38 auditors of which 19 are stationed in New York and 19 in Chicago. Each of these offices handles work within a radius of 1,000 miles of the offices. The program involves field auditing of larger corporate returns with primary emphasis upon proper application of the allocation formula to the corporate tax base.

After initial receipt by the board, the handling of returns within the division includes review by the preliminary examination unit. All corporation returns and selected portions of personal income tax returns are reviewed for mathematical accuracy at this stage. Net assessments from this activity totaled $1,454,752 during 1961-62 of which $831,411 was from personal income tax work and $623,372 from bank and corporation tax work. The personal income tax recovery by the preliminary examination unit was $3.04 per dollar of cost and the bank and corporation tax recovery was $9.93 per dollar of cost.

The audit program includes both desk and field audit of returns, the type of audit work depending upon the needs of the particular situation. During 1961-62 personal income tax auditing produced $4.67 in net assessments for each dollar of cost, while bank and corporation tax auditing produced $21.87 for each dollar of cost.

Total net revenue from the audit program for 1961-62 was $36,608,000 of which $8,347,927 was from personal income tax auditing and $28,260,073 from bank and corporation tax auditing.

The personal income tax compliance program is carried out by the unit processing information at source returns (Form 599) and by the regional offices. The programs involve the comparison of reports of income payments with state filings. Where returns are not found, appropriate action is taken to obtain returns or issue assessments. The same procedure is followed in respect to the federal comparison project. These programs produced net assessments of $6,888,000 during 1961-62 or $3.60 in assessments per dollar of cost.

The bank and corporation tax compliance program produced $640,000 during the year, recovering $31.10 for each dollar of cost.

As previously reported the State is pursuing a joint venture with the Internal Revenue Service of the United States Treasury Department. In the spring of 1959, it was found that the Western Service Center at Ogden, Utah, was maintaining punched card records which would permit the board to identify all persons filing federal returns in California and to ascertain the name, address, marital status, adjusted gross income, deductions, and exemptions for all taxpayers with adjusted gross income of less than $10,000 and name and address for all others. Information on returns with adjusted gross income in excess of $10,000 is obtained through other media. Permission was obtained from the Commissioner of Internal Revenue to acquire cards on all federal filings in California where a California filing requirement was indicated. The Federal Government has changed the media used in data processing from punched cards to electronic tape. In order to continue to use the federal source of information, the State has also converted form card to tape.

The budget proposes a reduction of 26.4 man-years in temporary help funds for the headquarters office. To accomplish the workload accomplished by these positions the budget proposes the addition of 23 permanent positions. An additional 8 man-years are requested for programs not now accomplished by temporary help. The latter group of 8 positions include 1 tax representative position which is proposed in collections for the growing workload in personal income tax compliance cases. The proposed position would review standards for field referral to expedite work both at headquarters and in the field. Such review would depend on the experience of the tax representative with various types of compliance situations. In the drawer audit unit it is proposed to add 6 senior account clerks to perform a desk audit of individual income tax returns. The returns involved are those with moneys of less than $15,000 if entirely from salaries and wages, and $12,000 if composed partially of nonsalary and wage income. The proposed clerks will verify income and allowable deductions on the simplest cases, referring any complicated cases to the auditors. The addition of this clerical personnel should relieve auditor personnel from routine work to concentrate on the more complex returns in the higher income categories. It is also proposed to add a typist-clerk position to help with the workload created by increased activity in preparation of feasibility studies for conversion to data processing.

As mentioned previously 23 proposed new positions represent conversion of temporary help man-years to a permanent base. Two of these positions are clerical positions in the federal comparison section as assistants to the programmers. In addition an accounting tabulating machine supervisor is proposed for conversion from temporary help as part of the continuing needs of of the federal comparison program. The remaining 20 positions proposed for conversion from temporary help are in the general clerical services area.

Six man-years of additional clerical help is proposed in the budget year for the regional office in Los Angeles. The inventory of collections workload in Los Angeles has increased by more than 50 percent over the past 3 years and this trend in workload will probably continue. Auditor personnel who have been forced into compliance activity due to workload demands are to be replaced for work at a higher classification by the addition of 6 clerical positions. In addition the establishment of two additional branch offices in the Los Angeles area is proposed. These offices will be located in Van Nuys and in Santa Ana. The staff for each of these offices will include 6 auditors, 2 tax representatives, and 2 clerical positions. The staff will be provided by transfer from the Los Angeles Regional Office.

GENERAL ANALYSIS

Objectives

The State Treasurer is charged with the responsibility for the custody of all money and securities belonging to or held in trust by the State; investment of surplus General Fund moneys, and other designated surplus funds, together with funds of the State and public agencies deposited in court under condemnation proceedings; administration of the sale of state bonds, their redemption, and interest payments; and payment of warrants drawn by the State Controller and state agencies.

Program and Performance

The Pooled Money Investment Program is administered by the State Treasurer under the broad policies set out by the Pooled Money Investment Board. Members of the board are the State Treasurer as chairman, the State Controller, and the Director of Finance.

Earnings on the various resources of the Pooled Money Investment Program for the fiscal year 1961-62 were $26,521,000.

Redemption of warrants and checks issued by the State Controller and state agencies is estimated to increase from 4,441,066 items in 1961-62 to 4,736,400 items in 1962-63 and 5,051,370 items in 1963-64.

The treasury vault staff is engaged in the trust activity of safeguarding those securities owned by the State, those deposited by banks to secure bank deposits, and those deposited as other pledges. Approximately $4,153,000,000 in securities were held for safekeeping during the 1961-62 fiscal year. This amount will increase to an estimated $4,500,000,000 in 1962-63 and $5,000,000,000 in the 1963-64 fiscal year.

The treasury bond and coupon servicing section accounted for the redemption of 4,761,372 bonds and coupons in the 1961-62 fiscal year. This volume is expected to increase to 5,606,438 in the 1962-63 fiscal year, and 6,610,214 in 1963-64. This increase in bond and coupon redemptions coupled with the steadily increasing activity in the deposit section will require an additional senior clerk position in the budget year.

GENERAL ANALYSIS

Chapter 2037, Statutes of 1961, established the organizational unit of Health and Welfare Agency and authorized the appointment of an Administrator. Within this organization, the Administrator is responsible for the supervision over and the operation of the Departments of Social Welfare, Public Health, and Mental Hygiene. He is the chief adviser to the Governor in these areas and as such participates in the development of administrative policy and insures that such policies are put into effect.

The agency concept was implemented for the first time in October 1961 with all costs of the office being a pro rata charge against the component departments. A position of administrator was established with minimum clerical help. Other assistance as needed was provided by the departments involved within their then authorized budgets.

It is proposed in the 1963-64 Governor's Budget to appropriate for the operations of this office directly and to strengthen the staff of the office. To this end one additional professional staff member and a clerk are proposed in this budget. Many of the housekeeping activities such as accounting will continue to be performed by the departments within the agency.

PART I—CONTINUING OPERATIONS

Objectives

The objectives of the Department of Mental Hygiene are to care for, treat and rehabilitate mentally ill, mentally retarded, and emotionally maladjusted patients so that they may return to society as productive citizens, and to prevent mental illness through an active program to foster mental health.

Program and Performance

The present Department of Mental Hygiene was established as a separate entity in 1945, and since then has developed a diversified program of care and treatment, research and training, and mental health education. The program that today provides treatment specifically designed for the clinic patient, the mentally retarded patient, and the mentally ill patient is one that has been a gradual development in which the old custodial concept has been abandoned.

Two institutes are operated by the department in conjunction with the University of California as teaching and research centers for both the university and the department and provide care and treatment for patients with early curable types of mental disorders. To carry out such a program, they care for and treat a limited number of inpatients and operate a large outpatient program as part of the teaching and research programs.

In the hospitals for the mentally retarded, the program is based on the knowledge that mental retardation alone does not produce a socially unacceptable person, and that many of the mentally handicapped can be integrated into society. With treatment and habit and character training in this controlled environment, the patient develops to the fullest his intellectual capacities, and many are capable of returning to their homes and communities as self-supporting, or partially self-supporting citizens.

The treatment programs in the hospitals for the mentally ill show a marked emphasis on active therapy, bringing more treatment to more patients. In modern treatment units, newly admitted acutely ill patients are provided the intensive treatment most effective during the onset of mental illness. Increasingly, active therapy has reached all wards.

Children's units at Camarillo and Napa State Hospitals provide the special type of care needed by children suffering from mental disease or severe be-

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART I—CONTINUING OPERATIONS—Continued

Program and Performance—Continued

havior disorders. They also operate as facilities for observation and treatment requested by the State's juvenile courts or Youth Authority.

Special treatment and facilities for tuberculosis patients are provided at Patton State Hospital in Southern California, and Napa State Hospital in Northern California.

Alcoholics and drug addicts are provided special treatment throughout the hospitals for the mentally ill.

Special treatment for the rehabilitation of sexual psychopaths is provided at Atascadero, the maximum security hospital. The population includes both those persons diagnosed as criminally insane and those committed by the courts for observation.

The department conducts a research program supported from special state research appropriations which began in 1956. The state funds for this program are divided between research at the hospital and that done under special projects to insure a comprehensive program that includes both applied and basic research. Research units at 7 hospitals carry out their own research projects in the hospital and assist other staff members with their investigations. The balance of the funds are used to support research investigations undertaken by departmental, hospital, and clinic staff personnel. In addition to the State-supported program, grants of federal funds from the National Institute of Mental Health are received to carry out new projects and to extend and broaden investigations begun under the state program.

The expansion of community-based resources for diagnosis, treatment and rehabilitation has been one of the most important recent developments in the State's mental health program. These resources range from extramural services, designed for release of patients as soon as they have received maximum benefit from hospital inpatient services, through 3-day treatment center operations, 7 state mental hygiene outpatient clinics, and 20 community mental health programs operating under the Short-Doyle Act which are aimed at providing treatment and precluding the necessity of state hospital commitment. The Short-Doyle program is expected to be of special significance in the department's long range plans for mental health services in California. Under the act, cities and counties can set up local programs with practical assistance from the State that includes reimbursement on a matching basis for local money expended. Ultimately, these local mental health services are expected to prevent large numbers of citizens from ever having to leave their home communities because of mental illness or handicap.

The financial soundness of all of these philosophies and programs was illustrated when the number of mentally ill patients treated and released increased to a point of balance with admissions. The end of fiscal 1957 saw the first small but significant drop in patient population in the hospitals for the mentally ill. This occurred despite the increasing rate of general population in the State, and increasing admissions to the hospitals. This same balance between admissions and releases has been estimated to continue in the 1962-63 and 1963-64 fiscal years with releases estimated to exceed admissions by approximately 500 in each year in the hospitals for the mentally ill. The continued success of the department in effecting population reductions is enforced by the department's ability to enrich their nursing care and treatment staff to the extent population reductions occur. The admissions and release factors are a measure of the total performance of the department and are set forth in tabular form as follows:

HOSPITALS FOR GENERAL PSYCHIATRY POPULATION MOVEMENTS BY FISCAL YEAR

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART I—CONTINUING OPERATIONS—Continued

The all-out modern attack on mental illness is made on 4 basic fronts—treatment, training, research and prevention. Past increases in the department's budget have of necessity gone into improving the treatment program and keeping abreast of the state population growth, essentially by providing additional numbers of physicians, therapists, social workers, nurses, technicians and psychologists, food personnel and others. Because of the interrelationship of these methods of attacking the problem, recent budgets have placed a greater emphasis on research, training, and community development of mental hygiene resources. The 1963-64 Budget proposes to continue this emphasis and at the same time provide for further improvement of the care and treatment programs at the hospital level. These proposals are discussed in detail in the following section of the budget.

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS

The supplemental program of the Department of Mental Hygiene for 1963-64 continues the further development of services offered through existing facilities, both inpatient and outpatient, community as well as state facilities, and pre- and post-hospital services in an attempt to lower the number of admissions to the state mental hospitals and to lower the rate of returns to state hospitals by previously hospitalized individuals. Significant progress has been made in counteracting the continued spiral of state hospital admissions in the hospitals for the mentally ill. While admissions have increased, there has been a corresponding increase in the number of patients discharged or released on leave.

Community-based Services

The significant progress which is being achieved in reducing resident hospital population in the hospitals for the mentally ill has delayed the need of providing additional bed capacity. One of the factors associated with this reduction is the increased number of patients placed on convalescent leave. Additional social work positions, based on established workload staffing standards, are proposed to service the increased number of patients placed on convalescent leave.

It is proposed to also expand post-hospital services by increasing the family home care program to provide for the placement of additional numbers of patients in this program. These programs will allow for the release of patients who would otherwise have to remain in hospitals, and will prevent the readmission of many patients who otherwise have to return to the hospital because of the severity of their illness.

A proposed increase in the use of tranquilizing drugs in the outpatient clinics is but one step in enriching the community-based treatment program.

It is also proposed to continue on a permanent basis positions temporarily authorized due to an unanticipated workload increase in the opening and licensing of new private institutions.

Hospital Services

To expand hospital services, a more effective program of maintaining the health of hospital patients and their receptiveness to treatment is provided through an increase of such items as drugs, equipment, rehabilitation supplies, personal care supplies and miscellaneous feeding supplies. While the number of mentally ill patients treated and released has increased to a point of balance with admissions, the number of admissions, a direct corollary of population, is increasing. Additional positions, based on established workload staffing standards, are proposed to staff for the increased admissions. In addition, several positions are requested at the hospital level to correct existing deficiences and provide a more effective program for the treatment and care of both mentally ill and mentally retarded patients.

Children's Programs

Special programs are proposed in this budget for two segments of the patient population of the hospitals for the mentally ill—children and geriatrics. Additional staff is proposed for the children's units at Camarillo and Napa State Hospitals to develop an intensive treatment program for the inpatient care of emotionally disturbed children and adolescents. This is necessary to meet a developing demand for comprehensive, intensive treatment rather than a program which emphasized diagnostic evaluation and custodial care.

Geriatrics Programs

The program for geriatrics includes a preadmission screening unit in Northern California to prevent inappropriate admission of geriatrics to the State hospitals, additional staff for one hospital to provide intensive treatment care for 250 geriatric patients to prepare them for early release, and a special social work unit to accelerate the release and placement into the community of geriatric patients no longer requiring the specialized services of the hospital. The finding of homes willing to care for these patients prevents them from becoming chronic custodial cases who later become almost impossible to place.

Training Programs

The training program will continue the development of both the psychiatric residency training program and the career residency program which was initiated two years ago. The psychiatric residency training program is designed to offer training to doctors in the field of psychiatry but who do not now work for the State of California. On the other hand the latter program provides a residency program for certain selected staff physicians who have indicated a desire to make a career of State medicine and who demonstrate the ability and potential for psychiatric specialization. Extension of a scholarship and intern-

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

Training Programs—Continued

ship program which was initiated last year is proposed to provide a continuing aid to recruitment and training in the areas of social work, clinical psychology and physical therapy. Under this program, selected advanced students in the above professional areas will be given an opportunity to increase their skills in the field of mental health through scholarship and internship support. A chief of professional education is proposed in the central office to take direct responsibility for administration and co-ordination of all training activities (professional and non-professional) of the department. During the 1963-64 fiscal year all residency training positions will be transferred administratively to the central office under the supervision of this position in order to insure optimum effectiveness of the residency program. Residents will be assigned to those hospitals where candidates are available for training. This will provide the department with a more flexible approach to reduce the number of vacancies in these programs. Training funds are also proposed for professional consultation services and a training position is provided at Atascadero.

Administrative Programs

In addition to the above, administrative strengthening in the areas of accounting, management analysis, disaster planning, and insurance coverage of patients, is proposed by the addition of staff to the central office. A Planning and Development Unit is also proposed which is to be fully reimbursed from the Federal Government. To further strengthen departmental management the personnel function will be placed under the Deputy Director, Administrative Services. Personnel policy direction will remain with the director of the department.

Mentally Retarded Programs

The program initiated in 1962-63 to improve the services for the mentally retarded is continued in this budget. There are at present approximately 2,300 patients on the waiting list for admission to state hospitals for the retarded. Each one of these persons on a waiting list represents a need for assistance with a critical problem not only by the retarded child but also his family. Without help, the stress and strain of such a situation has a disorganizing effect on families unable to cope with the additional problems.

During the current fiscal year approximately 1,100 beds for the mentally ill are being converted to beds for the mentally retarded at DeWitt and Patton State Hospitals in order to alleviate the waiting problem. In the 1963-64 fiscal year 786 additional new beds will be activated at Porterville and Fairview State Hospitals. It is estimated that there will be 2,000 admissions in 1962-63 and 2,400 admissions in 1963-64.

In addition to the increased bed capacity noted above, research and testing goes forward to develop promising, less expensive, and more therapeutic alternatives to merely increasing the number of beds. These include the use of private medical facilities, family care home placements, enriched educational programs, increased use of community services, and the use of the Short-Doyle program for the retarded.

WORKLOAD AND PROGRAM AUGMENTATION DISTRIBUTION

	Workload Increases	*Program Augmentations*	*Totals*
I Training	–	$236,037	$236,037
II Community-based Services	$150,251	433,148	583,399
III Hospital Services	495,849	489,287	985,136
IV New Facilities for Mentally Retarded	1,275,241	–	1,275,241
V Special Programs—Geriatric Services	–	221,770	221,770
VI Special Programs—Children's Units	–	177,507	177,507
VII Administrative Strengthening	–	175,550	175,550
Totals	$1,921,341	$1,733,299	$3,654,640
General Fund	*1,921,341*	*1,692,453*	*3,613,794*
Federal funds [a]	–	*40,846*	*40,846*

The total supplemental program of the Department of Mental Hygiene for 1963-64 is discussed in detail in the following two sections with the items for workload increases in the first, followed by the items which provide for new and improved levels of service.

[a] Federal grants and expenditures therefrom not included in overall budget totals.

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM

A. WORKLOAD INCREASES

II. COMMUNITY-BASED SERVICES

A. Private Institution Licensing and Inspection	$34,844
B. Convalescent Leave	115,407
	$150,251

A. Private Institution Licensing and Inspection:

1	Supervising program consultant	$8,604
2	Program consultants	15,600
1	Intermediate typist-clerk	4,242
	Estimated salary savings	—1,280
	Operating expense	3,800
	Equipment	1,908
	Retirement, health and welfare	1,970
—		
4	Totals	$34,844

These positions for the Bureau of Private Institutions were temporarily established during the current year to provide the staffing necessary to meet the expanded workload of the private institution inspection and licensing program related to an increase in the number of new institutions opened throughout the State. This increased workload has not diminished and the positions are now requested permanently. The program consultants, operating from two regional offices, interview applicants for licenses, inspect proposed facilities, inspect licensed facilities on a continuing periodic basis, and conduct special surveys. The supervising position is required to direct the day-to-day operation of the program in the Northern region of the State and to supervise the consultant positions in that region.

B. Convalescent Leave:

1	Supervising psychiatric social worker	$7,800
8	Senior psychiatric social worker	56,640
4	Intermediate typist-clerk	16,968
	Estimated salary savings	—3,663
	Operating expense	18,400
	Equipment	13,507
	Retirement, health and welfare	5,755
—		
13	Totals	$115,407

The 13 additional social worker and clerical positions are requested to maintain the presently authorized level of service for patients on convalescent leave from the state hospitals. This request is based upon the established workload staffing standards with an estimated active leave caseload of 12,998 patients by June 30, 1964. The social workers provide assistance in arrangements for release of patients from the hospital and return to the community and then assist these patients in their rehabilitation and readjustment to community living.

III. HOSPITAL SERVICES

A. Workload for Increased Admissions	$379,050
B. Hospital Workload	116,799
	$495,849

A. Workload for Increased Admissions:

12	Staff psychiatrist	$167,904
4	Clinical psychologist II	34,416
2	Supervising psychiatric social worker	15,610
12	Senior psychiatric social worker	84,960
2	Laboratory assistant II	8,088
10	Intermediate typist-clerk	42,420
	Estimated salary savings	—15,902
	Equipment	17,080
	Retirement, health and welfare	24,474
—		
42	Totals	$379,050

In the basic treatment phases of the departmental program, specific workload standards have been developed and utilized for a number of years in developing a progressive and effective program for the care and treatment of the mentally ill and mentally retarded. The groups of positions listed above are within this category.

In accordance with the workload standards adjusted to the estimated resident population and admission for the 1963-64 fiscal year the positions shown above are required to maintain the level authorized in the current budget. Application of uniform standards to each hospital requires a distribution of positions as follows:

	Staff	*Clinical*	*Social Worker*		*Lab.*	*Intermediate*
	Psychiatrist	*Psychologist*	*Supervisor*	*Senior*	*Asst. II*	*Typist*
Agnews	2	1	–	–	–	1
Atascadero	–	1	–	–	–	1
Camarillo	1	–	–	–	1	–
DeWitt	–	–	–	1	–	–
Mendocino	1	–	–	2	–	1
Metropolitan	3	1	1	3	–	2
Modesto	1	–	–	1	–	1
Napa	3	1	1	3	1	3
Patton	–	–	–	–	–	–

Totals	12	4	2	12	2	10

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

A. WORKLOAD INCREASES—Continued

III. HOSPITAL SERVICES—Continued

On the basis of the approved standard of 1 professional clerical pool position for each 3 professional positions utilizing pool services, 10 additional intermediate typist-clerk positions are required to provide the necessary clerical services for the professional positions included in this proposal.

B. Hospital Workload:

6	Janitor	$24,246
5	Personnel clerk	21,210
12	Trust section clerk	50,904
	Estimated salary savings	—4,339
	Operating expenses	4,900
	Equipment for related positions	12,711
	Retirement, Health and Welfare	7,167
23	Total	$116,799

6 Janitor

The positions are requested for the janitorial services for new buildings at Sonoma and Stockton and additional administrative space at Langley Porter. Three positions will be assigned to Stockton for the new professional office building, and 2 positions will be assigned to Sonoma for the school addition. One position is included for Langley Porter for housekeeping of space converted for expanded training and research programs. All of the positions are based upon established workload standards for janitorial services.

5 Intermediate typist-clerk

One position is proposed for the personnel section at each of the following hospitals: Agnews, Atascadero, Camarillo, DeWitt and Napa on the basis of workload increases calculated on the total positions at these institutions. The workload standard is based on 1 clerk for each 250 positions.

12 Intermediate typist-clerk

The clerical positions are proposed for the patients' trust sections at 6 hospitals for the mentally ill to meet increased workloads occasioned by increased admissions, the accelerated leave and discharge program, and increases in the activity of the patients' personal deposit accounts. Based upon the units of workload to be processed at each hospital three positions each are requested for Agnews and Napa, 2 positions each for Stockton and Metropolitan, and 1 position each for Mendocino and Patton.

IV. NEW FACILITIES FOR MENTALLY RETARDED

A. Porterville (68 positions and related expenses)	$305,240
B. Fairview (295 positions and related expenses)	970,001
Total	$1,275,241

A. Porterville State Hospital:

1	Physician and surgeon II	$13,992
1	Clinical psychologist II (effective 10-1-63)	6,453
1	Intermediate typist-clerk (medical pool)	4,242
1	Recreation therapist (effective 10-1-63)	4,236
1	Senior psychiatric social worker (effective 10-1-63)	5,310
3	Senior psychiatric nurse (wards)	17,928
13	Psychiatric nurse (wards)	74,022
3	Food service assistant	10,476
2	Janitor, housekeeper	8,088
37	Psychiatric technician—trainee (12 effective 8-1-63, 12 effective 9-1-63, 13 effective 10-1-63)	112,167
1	Laundry assistant	3,492
3	Carpenter (1), electrician (1), building maintenance man (1)	18,420
1	Upholsterer	5,556
	Estimated salary savings	—12,796
	Initial operating supplies inventory	10,000
	Operating expenses	800
	Equipment	1,708
	Retirement, health and welfare	21,146
68	Totals	$305,240

Porterville State Hospital is opening an additional 110 beds for mentally retarded in the acute hospital area in the summer of 1963. The positions necessary for the operation of this building are proposed to be established at various times in accordance with the best administrative practices. In making these assignments the entire staffing of the state hospital has been taken into consideration. The additional positions will bring the staffing of Porterville State Hospital to a parity with similar hospitals.

B. Fairview State Hospital:

1	Assistant superintendent, psychiatric service	$15,432
1	Senior stenographer (effective 10-1-63)	3,651
3	Physician and surgeon II (1 effective 7-1-63, 2 effective 10-1-63)	34,980
2	Clinical psychologist II (effective 10-1-63)	12,906
1	Physical therapist (effective 10-1-63)	4,446
3	Intermediate typist-clerk (pool)	12,726
2	Intermediate typist-clerk (personnel)	8,484
1	Assistant supervisor, rehabilitation services (9-1-63)	5,360
3	Teacher of mentally retarded (effective 4-1-64)	4,824
2	Senior psychiatric social worker (effective 10-1-63)	10,620
4	Senior psychiatric nurse	23,904
18	Psychiatric nurse (effective 8-1-63)	93,744

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

A. WORKLOAD INCREASES—Continued

IV. NEW FACILITIES FOR MENTALLY RETARDED—Continued

6	Senior psychiatric technician II (3 effective 7-1-63 and 3 effective 10-1-63)	$26,397
18	Senior psychiatric technician I (9 effective 7-1-63 and 9 effective 10-1-63)	71,820
175	Psychiatric technician trainee (35 effective 8-1-63, 35 effective 10-1-63, 35 effective 12-1-63, 35 effective 1-2-64 and 35 effective 2-1-64)	401,065
2	Food service supervisor I	8,484
10	Food service assistant II (3 effective 10-1-63, 3 effective 1-1-64, 3 effective 3-1-64)	18,972
19	Food service assistant I (6 effective 10-1-63, 6 effective 12-1-63, 7 effective 3-1-64)	35,552
4	Janitor-housekeeper (effective 10-1-63)	12,036
2	Assistant seamstress (effective 10-1-63)	6,954
9	Laundry assistant (3 effective 10-1-63, 3 effective 12-1-63, 3 effective 2-1-64)	16,760
6	Carpenter (2), fusion welder (1), painter (2), plumber (1) (effective 9-1-63)	28,944
1	Upholsterer (effective 9-1-63)	4,630
1	Groundsman (effective 9-1-63)	4,070
1	Automotive equipment operator I (effective 9-1-63)	4,630
	Estimated salary savings	—39,213
	Initial operating supplies inventory	60,000
	Operating expenses	2,800
	Equipment	6,498
	Retirement, health and welfare	68,525
295	Totals	$970,001

Fairview State Hospital is opening an additional 676 new beds for the mentally retarded during 1963-64. These ten new wards are of several classifications, and the establishment of positions for these wards has been programmed to meet the population intake. As is the case with Porterville State Hospital, the various position classes and the number requested are all comparable to those provided the other state hospitals.

B. PROGRAM AUGMENTATIONS

I. TRAINING

A.	Training administration and consultants	$30,078
B.	Residencies, scholarships and Internships	205,959
		$236,037

A. Training Administration and Consultants *$30,078*

1	Chief of professional training (effective January 1, 1964)	8,940
1	Senior stenographer (effective January 1, 1964)	2,394
	Estimated salary savings	—$509
	Operating expenses	1,600
	Equipment	1,468
	Retirement and Health and Welfare	812
2	Totals	$14,705

A chief of professional training and clerical assistance are proposed to establish a unit in the Sacramento office to take direct responsibility for administration and co-ordination of all professional and nonprofessional training activities of the department. While this position will be responsible for training of on-ward personnel and the nonprofessional staff, the primary emphasis will be placed on the training of professional staff. In order to integrate all training under one position the existing training function will be transferred from the personnel office to the supervision of this position. This position will work closely with various educational facilities such as medical schools, schools of public health, school of social welfare, other training institutions and professional associations. This position will be responsible for the program content of professional training; for evaluation of the effectiveness of the training programs, identifying professional manpower needs and availability and recommending new programs as indicated; for development of training for community facilities and for assisting local mental health agencies in their training activities.

1	Training assistant I	$7,080
	Estimated salary savings	—309
	Operating Expenses	200
	Equipment	575
	Retirement, Health and Welfare	487
1	Total	$8,033

This position is proposed at Atascadero for the development of training in work simplification, safety, security, paperwork management, and the administration of an on-going management and supervisory training program. In addition, the security staff which is unique to this hospital has special training needs which are not now being met. This position will provide staffing comparable to that provided the other 13 hospitals of the department.

Consultants	$7,340

Additional training consultant funds ($5,240) are proposed for Fairview to establish an adequate level of consultant services comparable to other hospitals of the department. An increase of $2,100 is proposed for Departmental Administration to provide consultant services for the mental retardation units and the day treatment centers which originally were not provided with consultant services.

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

B. PROGRAM AUGMENTATIONS—Continued

I. TRAINING—Continued

B. *Residencies, scholarships and internships* *$205,959*

Psychiatric Residents:

3	Psychiatric resident III	$29,844
2	Psychiatric resident II	12,240
—5	Psychiatric resident II	—30,600
	Estimated salary savings	—514
	Equipment	2,250
	Retirement, health and welfare	733
0	Total	$13,953

The 3 psychiatric resident III positions are proposed to be located at Langley Porter Neuropsychiatric Institute, Neuropsychiatric Institute at UCLA and the Community Psychiatric Training Center at Berkeley. Due to the wide range of educational subjects included in the three years of training for general psychiatry, it is not possible to devote sufficient time to qualify the individual in the practice of the recognized subspecialties of child psychiatry and community psychiatry. These three positions offer an additional year of training to residents who display exceptional interest and capabilities in these fields.

The 2 psychiatric resident II positions are proposed to provide the Neuropsychiatric Institute at UCLA with 30 authorized positions and will permit 10 residents to train in each of the three years of the training program.

The 5 psychiatric resident II positions presently authorized, 2 at Mendocino, 1 at Metropolitan and 2 at Stockton, are to be reassigned in the 1963-64 fiscal year from these hospitals to provide for optimum use of training positions and thereby provide the positions required for this proposal.

Career Residents:

9	Career residents	$114,264
	Estimated salary savings	—5,142
	Operating expenses	1,800
	Equipment	3,375
	Retirement, health and welfare	7,709
9	Totals	$122,006

Eighteen career psychiatric resident positions were authorized in the 1961-62 and 1962-63 fiscal years to initiate a program of training physicians who are now working in State hospitals but have had no previous training in psychiatry. The requested 9 positions will provide a complement of 27 positions so that one career resident will be in training in each of the 3 years of required training at each of the training hospitals. It is proposed to place 1 position each at Agnews, Camarillo, Mendocino, Metropolitan, Napa, Patton, Stockton, Pacific and Sonoma State Hospitals.

Scholarships ____________ $30,250

In 1962-63 authorization to initiate the recruitment technique of scholarships and internship program was undertaken. Scholarship funds are proposed to provide for approximately 20 individuals in professional education programs in the field of Mental Health.

Internships ____________ $39,750

It is also proposed to fund approximately 20 internships in the fields of social work, clinical psychology and rehabilitation therapy. Due to the difficulty of recruiting full staffs in each of these professions, high vacancies have persisted for a number of years reducing the effectiveness of planned and authorized treatment programs. Several of the hospitals are approved by the appropriate professional organizations for field placements or internships in social work, clinical psychology, the rehabilitation therapies, and other treatment professions.

By establishing the recruitment technique of scholarship and intern programs, it is anticipated that recruitment will be improved, thereby contributing to a more effective treatment program.

II. COMMUNITY-BASED SERVICES

A. Family Care	$420,148
B. Drug Therapy—Outpatient Clinics	13,000
Total	$433,148

A. Family Care:

Additional family care home placements $276,000

The program of family care for patients in private homes offers an opportunity for patients to be placed into the community as a step towards rehabilitation and to make hospital beds available for patients whose only treatment resource is hospitalization. It is estimated that an additional 300 mentally ill and 200 mentally retarded patients can be placed in homes by June 30, 1964. This will amount to an average increase of 200 fully financed cases over the 1962-63 year-end number of 2,270. The funds requested are to finance board and care costs of the additional placements based upon an average of 200 cases financed for the full year at a rate of $115 per month.

In addition to the expenditures for living expenses, 16 new positions and related expenses are required. These are shown below:

Staff for 300 additional mentally ill cases:

1	Supervising psychiatric social worker	$7,800
5	Senior psychiatric social worker (3 effective July 1, 1963, and 2 effective January 1, 1964)	28,320
2	Intermediate typist-clerk	8,484
	Estimated salary savings	—2,007
	Retirement, health and welfare	3,211

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

B. PROGRAM AUGMENTATIONS—Continued

II. COMMUNITY-BASED SERVICES—Continued

Staff for 200 additional mentally retarded cases:

1	Supervising psychiatric social worker	$7,800
5	Senior psychiatric social worker (3 effective July 1, 1963, and 2 effective January 1, 1964)	28,320
2	Intermediate typist-clerk	8,484
	Estimated salary savings	—2,007
	Retirement, health and welfare	3,211
	Operating expense	34,000
	Equipment	18,532
16	Totals	$144,148

The 16 additional social worker and supporting clerical positions are requested to provide the necessary staff for the projected 500 year-end increase of patients in family care home placements. The staffing requested is in accordance with established workload standards. The social workers find homes in various communities, place patients and provide necessary continuing services to these patients and the caretakers. Incidental expense allowance of $10,800 is included in operating expense to provide for the standard allowance required for additional mentally ill patients.

B. Drug Therapy—Outpatient Clinics ______ *$13,000*

Increasingly, since 1954, the outpatient mental hygiene clinics have been prescribing drugs for their registered patients particularly with the development of effective tranquilizing and energizing drugs. At the same time there is a greater number of increasingly disturbed patients in the case load of the clinics. The psychiatric services provided by the clinics have been limited by the lack of a supply of these drugs for distribution. In many instances therapy is incomplete because the patient does not have the resources to purchase the prescribed drugs even though the clinic fee is entirely waived. These funds are requested to establish a small drug allotment at each clinic for distribution as required for patients as an aid to successful treatment.

III. HOSPITAL SERVICES

A. Strengthening Hospital Services ______ $489,287

A. Strengthening Hospital Services:

	Increase in hospital equipment	$118,865
	Increase in special (tranquilizing) drugs	142,722
	Increase in personal care supplies	49,770
	Increase in rehabilitation supplies	49,285
	Increase in miscellaneous feeding supplies	71,715
3	Supervising psychiatric nurse	19,296
2	Security officer I	8,484
2	Patients' estates and accounts specialist	13,488
1	Safety coordinator	$7,800
0.5	Intermediate typist-clerk	2,116
	Estimated salary savings	—2,307
	Operating expenses	2,400
	Equipment for related positions	2,048
	Retirement, health and welfare	3,605
8.5	Total	$489,287

Increase in hospital equipment __________ $118,865

In recent years a limitation on funds has not permitted orderly replacement of equipment to the extent needed nor permitted the purchase of sufficient additional equipment. The proposed increase in the present allotment will be distributed to individual hospitals based on approved equipment lists and will provide additional and replacement items of equipment to improve the overall effectiveness of the treatment of patients. Such items include patient lifts, wheel chairs, walkers, gurneys, laboratory instruments and other medical equipment.

Increase in special (tranquilizing) drugs __$142,722

At present it is possible to provide treatment with special tranquilizing drugs for 30 percent of the resident population. The proposed increase is to extend this treatment to an additional 5 percent of the resident population. With new developments, these drugs are proving more effective and are serving a wider variety of uses than before. This proposal will take advantage of these new uses and patients will be treated with these drugs who would not have been considered previously for such type of treatment.

Increase in personal care supplies ________ $49,770

At present the department is providing personal care supplies at the rate of $4.95 per capita for mentally retarded patients and $5.95 per capita for mentally ill to provide such items as barber and beauty supplies, tobacco and smoking supplies, shampoo and small personal hygiene items. This proposal is for an additional $1.05 per capita and will allow for some price increase, permit larger allowances for these types of items and in some cases better quality. The department requires the purchase of this type of item by patients who have funds sufficient for this purpose. This allotment is primarily used for supplying patients who are without funds.

Increase in rehabilitation supplies ________ $49,285

An increase is proposed in the allotment for the purchase of rehabilitation supplies and operating expense to provide a yearly per capita cost of $5. While this proposal represents a 22 percent increase over the existing allowance for the mentally ill patients and a 39 percent increase for the mentally retarded patients, the allowance provides for some price increases and includes recreational supplies, woodworking supplies, ceramics, books, games, party supplies, etc. These types of material are an important part of the treatment program and are tools for the therapists.

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

B. PROGRAM AUGMENTATIONS—Continued

III. HOSPITAL SERVICES—Continued

Increase in miscellaneous feeding supplies $71,715

It is proposed to increase the allotment for miscellaneous feeding supplies for the mentally ill from $5.40 per year to $7.50 per year. This is necessary to provide for the supply and replacement of items incidental to the daily preparation and service of food. This proposed amount is the same that was approved by the 1962 Legislature for the hospitals for the mentally retarded.

2 Security officer I

Two security officers are proposed for Atascadero based on post assignments. One position is requested to staff the new admissions building which will be in operation for the first time in the 1963-64 fiscal year. The other position is to eliminate deficiencies in the relief of the total hospital security force which produces overtime liabilities or leaves security posts unmanned.

3 Supervising psychiatric nurse

Three supervising psychiatric nurse positions are proposed for Langley Porter Neuropsychiatric Institute to provide adequate supervision to the nursing services of the institute. The need for additional supervision has become critical because of the development of new programs and of the expansion of existing treatment, teaching, research, and rehabilitation programs. These positions will provide for nursing supervision on each floor of the institute for 2 shifts of the day and is comparable to staffing at the Neuropsychiatric Institute at University of California at Los Angeles.

2 Patients' estates and accounts specialist

These positions are proposed for the patient trust function at 1 hospital and 1 institute for the mentally ill. One patients' estates and accounts specialist position was temporarily established in the current year at Camarillo to determine the value of added specialized staff in the hospital trust function as recommended by a Department of Finance management survey. The initial experience with the additional position shows a significant increase in credits to the General Fund for care, support, and maintenance from personal accounts. The additional position has improved financial counseling services to patients and their families, permitted participation in rehabilitation planning, and furnished the Bureau of Patients' Accounts with additional information of value to their function. The position is proposed to be continued on a permanent basis. One position is also proposed for the Langley Porter Neuropsychiatric Institute to fully develop the revenue sources available and to deal with insurance companies, patients and their relatives regarding hospital charges.

1 Safety coordinator
0.5 Intermediate typist-clerk

One safety co-ordinator and secretarial assistant are proposed to further implement the department's environmental health and safety program. Significant progress has been achieved in the development and operation of safety programs at the hospital level. Based on the results achieved by the 1 position an additional position is now requested to provide the hospitals continuing consultation and technical assistance in the planning, developing and carrying out of local safety programs. This position will devote full time to those hospitals located in the southern part of the State, while the existing position will concentrate on those in Northern California. It is expected that the 2 positions will significantly reduce the costs of compensation cases in the Department of Mental Hygiene.

V. SPECIAL PROGRAM—GERIATRIC SERVICES

A. Community Screening Unit	$41,167
B. Inpatient Service	144,917
C. Hard-to-place Geriatric Unit	35,686
Total	$221,770

A. Community Screening Unit:

1	Staff psychiatrist	$13,992
2	Senior psychiatric social worker	14,160
1	Intermediate typist-clerk	4,242
	Estimated salary savings	—1,458
	Operating expense	5,800
	Equipment	2,183
	Retirement, health and welfare	2,248
4	Totals	$41,167

These positions are proposed for the Bureau of Social Service to establish a geriatric pre-admission screening unit in Northern California. The primary objective of this unit will be to insure that those persons admitted to state hospitals require the specialized treatment services of a state hospital and, conversely, that persons are not admitted who do not require these services. It is estimated that the admission of geriatric patients to state hospitals can be reduced through the operation of this pilot screening unit.

A social work evaluation of the needs of aged persons who come to the attention of local admitting authorities will provide an opportunity for matching the basic housing and welfare needs of these individuals with the available community resources. In addition, the relatives of patients will be able to provide better home care of the elderly persons by the use of this counseling service. Similar social work consultation to committing courts, health departments, and other official agencies, can significantly reduce the

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

B. PROGRAM AUGMENTATIONS—Continued

V. SPECIAL PROGRAM—GERIATRIC SERVICES—Continued

number of commitments of non-psychiatric geriatric patients to the State hospitals. Such screening needs to be done prior to commitment and at the location where commitments take place.

B. Inpatient Service:

1	Senior psychiatrist	$14,700
44	Psychiatric technician—trainee (effective 10-1-63)	119,988
1	Intermediate typist-clerk	4,242
	Estimated salary savings	—6,252
	Operating expense	400
	Equipment	958
	Retirement, health and welfare	10,881
46	Totals	$144,917

The above positions are requested to strengthen the existing treatment program for the patient 65 years and older in our state hospitals for the mentally ill.

This group consists of approximately 12,000 patients in the population of our hospitals for the mentally ill, and 3,500 of the annual admissions. Studies and experiences at several state hospitals indicate that about half of the 12,000 resident patients over 65 could eventually be released from state hospitals by the use of an augmented treatment and rehabilitation program; the findings of suitable placements for such patients, and the augmentation of patients' financial resources through public assistance programs. Experience shows that, when the patients' psychiatric and physical problems receive immediate attention and care, as many as 35 to 50 percent of admissions can return to their homes or other facilities within 60 days. Therefore, with intensive treatment and care, lengthy hospitalization can often be prevented.

An increase in nursing personnel, together with the appropriate medical leadership, is the first step toward achieving such a goal. This proposal provides for an enrichment of nursing personnel to treat 250 patients at one hospital near the level provided in the intensive treatment wards (employee-patient ratio of 1:4.4) and a senior psychiatrist position to give medical direction to the program.

C. Hard-to-Place Geriatric Unit:

1	Supervising psychiatric social worker (effective 10-1-63)	$6,453
3	Senior psychiatric social worker (effective 10-1-63)	15,930
1.5	Intermediate typist-clerk (effective 10-1-63)	4,674
	Estimated salary savings	—1,218
	Operating expense	4,733
	Equipment	3,187
	Retirement, health and welfare	1,927
5.5	Total	$35,686

A hard-to-place geriatric unit is proposed to minimize the number of geriatric patients currently being cared for on a long-range basis at state hospitals due to lack of available or alternative placements.

These positions are proposed for the Bureau of Social Service to establish a community-based unit of social worker positions for the purpose of accelerating the release of additional aged persons from state hospitals. This unit will operate in conjunction with the enriched geriatric inpatient program proposed above. This will provide for a significant demonstration of the effectiveness of such a community-based staff in collaborating with hospital social worker and medical staffs in the selection of elderly patients for community placement. The workers will interview patients, contact relatives and friends and work with community resources to develop individual placement plans. They will also supervise the placement of geriatric patients on leave and will offer brief counseling and referral services to discharged geriatric patients as required.

VI. SPECIAL PROGRAMS—CHILDREN'S UNITS

A. Children's Program—Camarillo State Hospital:

1	Assistant superintendent—children's services	$15,432
2	Psychiatric nurse	11,112
12	Psychiatric technician trainees	43,992
1	Elementary teacher	6,432
1	Intermediate typist-clerk (school)	4,242
	Estimated salary savings	—3,654
	Operating expenses	2,000
	Equipment	1,000
	Retirement, health and welfare	5,935
17	Totals	$86,491

B. Children's Program—Napa State Hospital:

2	Psychiatric nurse	$11,112
17	Psychiatric technician trainee	62,322
1	Elementary teacher	6,432
1	Intermediate typist-clerk	4,242
	Estimated salary savings	—3,785
	Operating expenses	3,400
	Equipment	1,000
	Retirement, health and welfare	6,293
21	Totals	$91,016
		$177,507

As communities have developed diagnostic and treatment services on an outpatient basis for emotionally disturbed children, there has been a shift in requests for admission from short-term diagnostic services to long-term intensive 24-hour treatment required for a child with a severe emotional disturbance. This trend will continue both as a result of more children in our population, and as a result of a greater ability

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—WORKLOAD INCREASES AND PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

B. PROGRAM AUGMENTATIONS—Continued

VI. SPECIAL PROGRAMS—CHILDREN'S UNITS—Continued

to identify those children who require and can benefit from 24-hour intensive care.

At present no intensive treatment program for the inpatient care of emotionally disturbed children and adolescents is authorized in either of the children's units. Most of the care consists of brief diagnostic studies and long-term custodial care with limited staff.

In lieu of adding new beds, greater use can be made of existing beds through an intensive treatment program, much as has been done with the adult mentally ill patients. This proposal is the initial step increasing the current nursing staff ratio and supplementing the existing educational program and helps meet the current critical child care needs.

An assistant superintendent—children's services is proposed at Camarillo to provide medical supervision over the children's unit to replace the position that was transferred to Departmental Administration to supervise the statewide program.

VII. ADMINISTRATIVE STRENGTHENING

A. Insurance Coordination	$10,069
B. Business Management Services	98,988
C. Mental Health Consultation for Local Agencies	12,247
D. Planning and Development (Federal funds) [a]	40,846
E. Disaster Planning	13,400
Total	$175,550

A. Insurance Coordination:

1.	Insurance coordinator (effective 11-1-63)	$7,680
	Estimated salary savings	—346
	Operating expense	1,600
	Equipment	600
	Retirement, health and welfare	535
1	Totals	$10,069

An insurance coordinator position is requested for liaison with insurance carriers doing business in California to encourage the recognition by the companies that mental illness is a treatable illness and should be included in the coverage offered by insurance carriers. Coverage for both inpatient and outpatient services is to be advocated for all types of health insurance policies. This program is consistent with the long-range plan in which the department is encouraging direct treatment by private and local agencies.

B. Business Management Services:

2	Associate administrative analyst	$17,208
1	Intermediate typist-clerk	4,242
	Estimated salary savings	—965
	Operating expense	1,800
	Equipment	1,700
	Retirement, health and welfare	1,504
3	Totals	$25,489

Two associate administrative analyst positions are requested to augment the authorized staffing of the management analysis section of the department.

One position is requested to standardize county commitment documents, co-ordinate the department's merit award function, and to carry out the hospital management audit program—which is the determination of usefulness and necessity of certain administrative processes.

An assistant food administration position was temporarily reclassified to an administrative analyst during the current year to begin work on the followup and implementation of the departmentwide food services staffing study conducted by the Department of Finance. This position is requested as a proposed new position to complete the work on the food services program, participate in the hospital management audits and to assist in compiling departmental manuals.

The intermediate typist-clerk is requested to furnish the necessary clerical support for the 2 analyst positions.

1	Intermediate typist-clerk	$4,242
1	Intermediate account clerk	4,242
1	Property clerk I	5,028
	Estimated salary savings	—608
	Operating expense	600
	Equipment	2,000
	Retirement, health and welfare	995
3	Totals	$16,499

These positions are requested to meet an increased workload in the central office accounting section. The workload has resulted from continuing increases in additional family care home placements, mentally retarded placements in private medical facilities, increase in Bureau of Social Work staff, community organization specialists, establishment of 3 day treatment centers and other related activities requiring supplies, services, purchase orders, leases, claims, payroll expenditures, property and equipment inventory and records on 45 offices of the department, 3 day treatment centers, 11 outpatient clinics and 3 mental retardation units.

Computer Installation	$57,000

The present punchcard system is inadequate to furnish the statistical data required by the department in a timely and efficient manner. A complete evaluation has been made by the staff of the Department of Mental Hygiene and the Organization and Cost Control Division of the Department of Finance with recommendations as to type of electronic data

---

[a] Federal grants and expenditures therefrom not included in overall budget totals.

VII. ADMINISTRATIVE STRENGTHENING—Continued

processing equipment that would meet the requirements of the department. The increased cost for the first year with the additional rental, one-time charges and initial operating supplies is approximately $57,000 over the existing program with the second and subsequent years estimated at $40,000 each. The computer installation will be organized under the Deputy Director Administrative Services and will become a computer service center for the use of all units of the department.

C. Mental Health Consultation for Local Agencies:

1	Public health nurse	$6,744
0.5	Intermediate typist-clerk	2,121
	Estimated salary savings	—399
	Operating expense	2,100
	Equipment	1,000
	Retirement, health and welfare	681
1.5	Totals	$12,247

The Department of Mental Hygiene has assumed the responsibility for providing mental health consultation and aid in mental health education of local public health personnel since the termination of the mental health unit in the State Department of Public Health. These services have been provided on the request of local health departments by personnel from the social services offices, clinics, and State-local mental health units. However, the demand has exceeded the available time for such service.

One public health nurse position is requested in the Departmental community services section to work with local health departments as a mental health nurse consultant. A half-time clerk is also requested to furnish necessary clerical support.

D. Planning and Development:

1	Chief of Planning and Development	$14,700
1	Associate Planning Analyst	8,604
1	Senior stenographer	4,908
1	Intermediate typist-clerk	4,242
	Estimated salary savings	—1,460
	Operating expense	4,000
	Equipment	3,600
	Retirement, health and welfare	2,252
4	Total *(Federal funds)*	$40,846

This proposal is to establish a planning and development unit for the overall mental health planning for the State to be fully financed from Federal grant funds. This unit will provide staff guidance in intermediate and long-range planning and make recommendations for continuing or changing program direction as findings warrant. It will follow up on the Department's Long Range Plan and will identify areas of major planning need.

E. Disaster Planning:

1	Disaster Planning Officer	$10,948
	Estimated salary savings	—492
	Operating expense	1,600
	Equipment	600
	Retirement, health and welfare	744
1	Total	$13,400

An officer is requested to plan, organize, coordinate and evaluate a statewide program of action in case of disaster for all state hospitals for the mentally ill and mentally retarded. This position will integrate the department's program with operations of the California Disaster Office and other agencies of the Federal, State, and Local Government so as to provide the necessary protection of patients and staff during emergencies resulting from natural or war-caused disasters.

DEPARTMENTAL ADMINISTRATION FUNCTIONS

GENERAL ANALYSIS

The Department of Mental Hygiene is organized in three primary functions: Administration, Bureau of Patients Accounts, and Bureau of Social Services.

Departmental Administration of the Department of Mental Hygiene performs the primary functions of policy formulation, co-ordination, and direction of the overall activities of the department including its hospitals, clinics, and other facilities. Services are provided in the following areas: research, community mental health activities, public information, business and fiscal management, co-ordination of the nursing and rehabilitation service programs, personnel management and training, food administration, statistics, engineering, guardianships, deportation and institution transfers, and inspection and licensing of private institutions. Also, the department is responsible for the administration of National Mental Health Act funds for California, and the outpatient clinic program.

The Bureau of Patients Accounts assesses and collects charges for the care and treatment of the mentally ill patients within the ability of the patients or their responsible relatives to pay. In addition, reviews are made for the purpose of determining possible benefits to which patients are entitled. The effectiveness of the bureau's program is indicated in the following table of annual collections for patients' care and treatment:

Actual 1959-60	Actual 1960-61	Actual 1961-62	Estimated 1962-63	Estimated 1963-64
$11,716,788	$12,724,759	$13,845,277	$14,894,000	$15,394,000

The Bureau of Social Service conducts preleave investigations, arranges placements to permit hospital leaves for mentally ill and mentally retarded patients, and assists in re-establishing patients as responsible members of the community. Determining and arranging for employment opportunities and living accommodations, developing the most healthful family relationships, and frequent patient contacts to effect a firm and lasting adjustment are all important elements of the overall leave program of the department. In this regard, the department arranges home leaves, industrial leaves, and family care home leaves.

SOCIAL WORKER CASELOAD AND UNIT COST

	1961-62	1962-63	1963-64
Year-end number of active assigned leave of absence cases	11,971	12,826	12,998
Total number of social workers	200.9	228	228
Ratio of active assigned cases to all social workers (including supervisors)	59.6	56.3	57.0
Ratio of active assigned cases to all social workers (excluding supervisors)	70.8	67.2	68.1
Cost per active case assigned	$205.66	$220.20	$223.56

Further expansion of community services authorized by the Short-Doyle Act is programed in 1963-64. Research projects at the various hospitals have been approved and this program is explained in detail under the budget request for research funds. The entire departmental cost of the specialized training program is provided for in this budget.

The following administrative adjustments were made in 1962-63: 2 clerical positions were temporarily established to meet increased workload in the central office accounting section; 1 chief of children services and 1 clerk were transferred from Camarillo to provide medical program supervision over the specialized field of children and youth in accordance with understandings in the 1962 Legislature and are continued as permanent positions; 4 positions were temporarily established in the Bureau of Private Institutions to meet increased workload in the field of licensing and inspecting private institutions; and 3 positions were established in the research section to prepare research journals and publish reports and journals produced by the authorized research program and are fully reimbursed from research funds.

[a] Federal grants and expenditures therefrom are not included in overall budget totals.

[b] Funds made available within each category through savings effected under "Agency Plan" of organization.

Department of Mental Hygiene

DEPARTMENTAL ADMINISTRATION—Continued

FAMILY CARE

Provision is made for an average of 2,183 cases in 1962-63 and 1,970 cases in 1963-64 fully financed by the State and an average of 250 cases in 1963-64 partially financed by the State to be placed on leave of absence to family home care. The program includes provision for payment at the rate of $115 per month.

OPERATING EXPENSES

The caseload totals reflect a downward adjustment in the current year of 150 cases by June 30, 1963, and an additional 600 cases during 1963-64 or a total of 750 cases by June 30, 1964. This reduction is due to patients qualifying for Aid to Disabled (ATD) under the program administered by the Department of Social Welfare.

EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
Allowances for subsistence and care of patients on leave of absence to family care homes	$2,400,572	$3,221,250	$2,928,600	—$292,650 (—9.1%)

CARE AND TREATMENT OF MENTALLY RETARDED

This appropriation provides for payment to private medical facilities for the care of mentally retarded persons who are on waiting lists for placement in state hospitals. The Legislative authorization for this program is provided by Chapter 1764, Statutes of 1961.

OPERATING EXPENSES

Payments to private medical facilities	$105,464	$250,000	$250,000	

RESEARCH PROGRAM

This appropriation is allocated to the administration of the research program in the central office, and between hospital level and project support phases to insure a comprehensive program that includes both applied and basic research. A research unit at each hospital is the ultimate goal with 7 units having been formed thus far. All hospital research units carry out their own research projects in the hospital and assist other staff members of the various disciplines with their investigations. The balance of funds are used to support research investigations undertaken by departmental, hospital and clinical staff personnel.

All funds appropriated for the program are available for expenditure for a 3-year period. This type of appropriation is similar in nature to Capital Outlay appropriations in that research projects authorized in one fiscal year may require 2 or 3 years to complete. This requires that all necessary funds to complete a project be reserved in order to insure the completion of the project with the funds appropriated by the Legislature. All funds are allocated by the Department of Mental Hygiene with the approval of the Department of Finance.

Research Units:[a]				
Department and Research Publications	$58,670	$103,338	$106,442

SPECIAL PROJECT ACTIVITIES

Objectives

The Department of Mental Hygiene conducts many special research projects of value to the development of mental health in California for which funds are obtained from the federally supported National Institute of Mental Health.

Program and Performance

The National Institute of Mental Health, interested in the furtherance of mental health, make funds available to the department for research projects and activities not financed by the State.

Projects financed by nonstate funds include overhead charges to reimburse the State for additional costs incurred.

Activities are listed indicating the type of activity and funding. Since project fiscal years may not coincide with the state fiscal year, projects are assigned to the state fiscal year which most nearly coincides with the project fiscal year.

GENERAL ANALYSIS

Objectives

The day treatment centers provide a program of day psychiatric treatment to patients who return to their homes each night and who otherwise would require 24-hour hospitalization.

Program and Performance

The day treatment program was initiated with the establishment of a center in San Diego in 1960. Two additional centers were established in Los Angeles and San Francisco in 1962. These centers are designed to provide rapid and intensive treatment similar to that given by 24-hour institutions but with the added therapeutic benefit of not removing patients from the community environment.

GENERAL ANALYSIS

Objectives

The outpatient mental hygiene clinics provide for the prevention, early diagnosis and treatment of mental illness, retardation or disorder, and are established to assist persons not requiring hospitalization.

Program and Performance

The programs provided by the 6 state-supported clinics and the 1 federally supported clinic at Berkeley operate in metropolitan and rural areas. The Department of Mental Hygiene acts as administrator of National Mental Health Act funds for California and is responsible for allocation of such funds to other agencies as well as setting and maintaining required levels of service. In addition to the general services, the East Bay Clinic at Berkeley conducts a training program for social workers, psychologists, and psychiatrists.

The total performance of the clinics is indicated by the following schedule which shows the number of hours spent by professional employees in interviews with patients and in preventive services to communities. Of the professional time allocated to all services 89.4 percent was directed toward treatment of clinic outpatients and 10.6 percent toward preventive work in the community in the 1961-62 fiscal year. It is estimated that the percentages will be 87.3 percent and 12.7 percent respectively for both the 1962-63 and the 1963-64 fiscal years.

The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally occurring vacancies (e.g., in areas remote from metropolitan centers, recruiting is more difficult); (2) the proportion between children and adults in the caseload of patients (e.g., a child's case takes 2 to 3 times more staff time than does an adult case); (3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g., 10 hours of professional staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment interviews); and (4) other extraneous factors.

In view of the proposed Legislation to amend the Community Mental Health Service program, the funding of the Outpatient Mental Hygiene Clinics should eventually be included under that program. This is in accordance with the Long Range Plan of the Department of Mental Hygiene for the treatment of mental illness.

---

[d] Federal grants and expenditures therefrom are not included in the overall budget totals.

GENERAL ANALYSIS

Objectives

The Langley Porter Neuropsychiatric Institute is a teaching and research center for the University of California and the Department of Mental Hygiene and provides care and treatment for patients appropriate to the overall teaching and research program.

Program and Performance

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads.

Caseload:	1961-62	1962-63	1963-64	Change
Hospital inpatient days	29,471	31,121	31,121	–
Outpatient annual interviews [b]	20,561	21,443	22,500	1,057
Allocation of Costs: [c]				
Inpatient department	$1,586,227	$1,742,273	$1,738,376	—$3,897
Outpatient department	528,742	580,752	579,459	—1,293
Patient:				
Inpatient (daily)	$53.82	$55.98	$55.85	—$0.13 (—0.2%)

Average Cost Per	1961-62	1962-63	1963-64	Change
Outpatient (per interview)	25.72	27.08	25.75	—$1.33 (—4.9%)

The current program of the institute includes training programs for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Clinical and basic research projects of various kinds are under way. The facilities include an outpatient department, a 104-bed inpatient service, plus 13 day/night program beds which accommodate 26 patients.

An expanded training program in community mental health services has been undertaken as an ongoing activity. In addition an increased number of medical school students will receive training in psychiatry.

During 1962-63, 1 fully reimbursed research assistant II was temporarily established to perform research on electroencephalograph treatment under a contract with the U.S. Department of the Navy.

Reimbursements and expenditures for medical care and research services to Department of the Navy and Department of Public Health are not reflected in the budget year due to uncertainty of continuation of the projects.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	

GENERAL ANALYSIS

Objectives

The Neuropsychiatric Institute at the University of California, Los Angeles, is a teaching and research center, and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research programs of the University and the Department of Mental Hygiene.

Program and Performance

The Neuropsychiatric Institute was built as a part of the Medical School of UCLA and was opened on December 1, 1960.

In 1957-58 the institute was authorized to assume full support of an expanded outpatient clinic program to meet the teaching needs of the University of California medical school. With the opening of the new institute in December 1960, the program was expanded to include training for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Also included in the program are clinical and basic research projects, a day hospital program, a somatotherapy room, and a 188-bed inpatient service.

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads.

	1961-62	1962-63	1963-63	Change
Caseload:				
Hospital inpatient days	43,800	52,000	55,000	3,000
Outpatient annual interviews	20,570	22,600	22,600	–
Allocation of Costs:				
Inpatient department	$2,521,674	$2,790,421	$3,267,680	$477,259
Outpatient department	$840,558	$930,140	$1,089,226	$159,086
Average Cost Per Patient:				
Inpatient (daily)	$57.57	$53.66	$59.41	$5.75 (10.7%)
Outpatient (per interview)	$29.49	$41.16	$48.20	$7.04 (17.1%)

GENERAL ANALYSIS

Objectives

Agnews State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily serves the Counties of Santa Clara, San Mateo, Santa Cruz, San Francisco, Alameda, San Benito, and Monterey.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	3,980	4,354	4,865
Total net releases	3,912	4,559	4,819
Net transfers from other hospitals	7	117	96

Administrative changes during 1962-63 included the abolishment of 1 psychiatric technician position due to savings in nursing staff time realized through the use of mechanical imprinting equipment for recording of patient information on hospital records.

GENERAL ANALYSIS

Objectives

Atascadero State Hospital provides care and treatment for sex psychopaths, and for mentally ill male patients requiring maximum security. This hospital serves all counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department. While the facilities are designed for maximum security, the program emphasis is on treatment.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	1,577	1,722	1,460
Total net releases	1,568	1,597	1,394
Net transfers from other hospitals	159	10	6

The following administrative adjustments in Personal Services were made during 1962-63: 0.6 position was temporarily established for performance of special repair and maintenance projects by hired labor rather than by contract; and 1 psychiatric technician position was abolished as a result of savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records.

GENERAL ANALYSIS

Objectives

Camarillo State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. It serves primarily the Counties of Los Angeles, Ventura, Santa Barbara, and San Luis Obispo.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A juvenile unit is located on the hospital grounds where a specialized treatment program is conducted for minors. An after-care facility is operated by the hospital, which extends psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	3,974	4,103	3,530
Total net releases	4,031	4,178	3,835
Net transfers from other hospitals	—153	6	213

The following administrative adjustments in Personal Services were made during 1962-63: 1.3 positions were temporarily established for performance of special repair and maintenance projects by hired labor rather than by contract; 1 position was administratively established in the fiscal section to test the validity of added specialized staff in the hospital trust function in accordance with a recommendation of a Department of Finance Management survey; 2 positions, (1 assistant superintendent, children's services, and 1 clerk) were transferred to the Departmental Administration to provide departmentwide supervision of children's programs, and; 1 psychiatric technician position was abolished as a result of savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS

Objectives

DeWitt State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and mentally retarded patients. It serves primarily the Counties of El Dorado, Yolo, Sutter, Placer, Nevada, Sierra, Butte, and Plumas.

Program and Performance

It is planned that the average population at this institution will total 2,400, equally divided between mentally ill (1,200) and mentally retarded (1,200), during the 1963-64 fiscal year. The proportion of mentally retarded patients has been markedly increased as DeWitt was selected as one of the six hospitals to undertake a program of increasing the capacity for the mentally retarded in 1962-63. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Mentally Ill:			
Total admissions	946	1,287	1,267
Total net releases	1,047	1,307	1,326
Net transfers from other hospitals	—7	—424	—575
Mentally Retarded:			
Total admissions	–	–	–
Total net releases	10	10	44
Net transfers from other hospitals	1	79	54

The following administrative adjustments in Personal Services were made during 1962-63: 1.6 positions were temporarily established for performance of special repair and maintenance projects by hired labor rather than by contract; 1 psychiatric technician position was abolished due to savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records; and 2 positions were abolished due to a change in the bakery operation at this hospital.

GENERAL ANALYSIS

Objectives

Mendocino State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation and serves primarily the Counties of Marin, Sonoma, Mendocino, Humboldt, Del Norte, Siskiyou, Modoc, Trinity, Shasta, Lassen, Tehama, Glenn, Colusa, and Lake.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	1,236	1,848	1,608
Total net releases	1,247	1,953	1,650
Net transfers from other hospitals	—81	28	73

The following administrative adjustments in Personal Services were made during 1962-63: 1.1 positions were temporarily established to perform special repair and maintenance projects by hired labor rather than by contract; 1 psychiatric technician position was abolished as a result of savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records; and 3 positions were abolished when the vegetable garden operation was discontinued.

Personnel man-years	1,295.6	1,341.5	1,368.9	27.4

GENERAL ANALYSIS

Objectives

Metropolitan State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and serves primarily the Counties of Los Angeles and Orange.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	2,440	2,643	3,279
Total net releases	2,689	2,972	3,252
Net transfers from other hospitals	40	183	121

The following administrative adjustments in Personal Services were made during 1962-63: 2.4 positions were temporarily established to perform special repair and maintenance projects by hired labor rather than by contract; 1 psychiatric technician was abolished due to savings in nursing staff time realized through use of mehancial imprinting equipment for recording of patient information on hospital records; a research team consisting of 4 positions was withdrawn and the funds reallocated to other research projects. The team will be reestablished when the research program requires the services.

GENERAL ANALYSIS

Objectives

Modesto State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics. It serves primarily the Counties of Stanislaus, Tuolumne, Mono, Mariposa, Merced, Madera, Fresno, Kings, Tulare, and Kern.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill, and emphasizes treatment rather than custody. An after-care facility is operated by this hospital, which extends psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in the tabular form following:

	1959-60	1960-61	1961-6
Mentally Ill:			
Total admissions	683	758	1,038
Total net releases	824	871	1,162
Net transfers from other hospitals	—130	126	162
Mentally Retarded:			
Total admissions	1	–	–
Total net releases	1	2	—6
Net transfers from other hospitals	—104	—42	—79

Prior to the 1962-63 fiscal year, a limited number of mentally retarded patients were treated at this hospital. Thes patients were transferred during the 1961-62 fiscal year to othe hospitals caring for the mentally retarded.

The following administrative adjustments in Personal Service were made during 1962-63: 1.4 positions were temporarily established to perform special repair and maintenance projects b hired labor rather than by contract; 1 psychiatric technicia was abolished due to savings in nursing staff time realize through the use of mechanical imprinting equipment for recording of patient information on hospital records.

GENERAL ANALYSIS

Objectives

Napa State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. Its patients are primarily from the Counties of Marin, Solano, Contra Costa, San Francisco, Alameda, Sonoma, and Napa.

Program and Performance

The level of care and treatment techniques utilized at the hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department and emphasize treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill tubercular patients in the northern part of the State; a juvenile unit is located on the grounds where a specialized program is conducted; and a special program for the treatment of alcoholics is available.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	3,999	4,257	4,704
Total net releases	4,214	4,635	4,894
Net transfers from other hospitals	—24	69	289

Administrative changes during 1962-63 included the abolishment of 1 psychiatric technician due to savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records.

GENERAL ANALYSIS

Objectives

Patton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation and a limited number of mentally retarded patients. It serves primarily the Counties of Inyo, San Bernardino, Los Angeles, Riverside, San Diego, and Imperial.

Program and Performance

It is planned that the average population at this institution will consist of 4,225 mentally ill and 500 mentally retarded patients during the 1963-64 fiscal year. The mentally retarded unit was activated during the fall of 1962 to speed up the acceptance of the mentally retarded. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill tubercular patients in the southern part of the State. An after-care facility, operated by this hospital extends psychiatric, medical and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Mentally Ill:			
Total admissions	2,896	2,845	3,031
Total net releases	2,975	3,066	2,974
Net transfers from other hospitals	531	119	—369

The following administrative adjustments in personal services were made during 1962-63: 2.7 positions were temporarily established to perform special repair and maintenance projects by hired labor rather than by contract; 1 psychiatric technician was abolished as the result of savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records.

GENERAL ANALYSIS

Objectives

Stockton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation and serves primarily the Counties of Sacramento, Amador, Alpine, Alameda, Contra Costa, San Joaquin, and Calaveras.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital, which extends psychiatric, medical and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	3,018	3,194	3,117
Total net releases	2,940	3,426	3,066
Net transfers from other hospitals	—329	50	—50

The following administrative adjustments in personal services were made during 1962-63: 2 positions were temporarily established to perform special repair and maintenance projects by hired labor rather than by contract; and 1 psychiatric technician position was abolished due to savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records.

Personnel man-years	968.9	1,081.4	1,112.5	31.1

GENERAL ANALYSIS

Objectives

Fairview State Hospital serves the southern counties of the State by providing care and treatment for mentally retarded patients in that area.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

This hospital was activated in the 1958-59 fiscal year, with the first patients being admitted during January, 1959. A total of 676 additional beds will be activated during the 1963-64 fiscal year.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	375	371	240
Total net releases	148	181	161
Net transfers from other hospitals	693	95	5

The following administrative adjustments in personal services were made during 1962-63: 1 psychiatric technician position was abolished due to savings in nursing staff time realized through the use of mechanical imprinting equipment for recording of patient information on hospital records; 1 position was abolished due to a change in the bakery operations at this hospital; and 0.5 man-year was temporarily provided for special repairs and maintenance projects in lieu of contracting for the work.

Personnel man-years	1,338.5	1,414.2	1,422.9	8.7

GENERAL ANALYSIS

Objectives

Pacific State Hospital provides care and treatment for mentally retarded patients principally from the southern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	536	339	288
Total net releases	126	275	214
Net transfers from other hospitals	—392	—72	—4

The following administrative adjustments in personal services were made during 1962-63: 0.1 position for x-ray technician relief was abolished in conformance with existing staffing standards; 1 psychiatric technician position was abolished due to savings in nursing staff time realized through the use of mechanical imprinting equipment for recording of patient information on hospital records; 2 positions were abolished due to a change in the bakery operation at this hospital; and 0.2 position was temporarily established to perform special repairs and maintenance projects by hired labor rather than by contract.

The following administrative adjustments in personal services were made during 1962-63: 0.2 position was temporarily established to perform special repair and maintenance projects by hired labor rather than by contract; and 1 psychiatric technician position was abolished due to savings in nursing staff time realized through the use of mechanical imprinting equipment for recording of patient information on hospital records.

GENERAL ANALYSIS

Objectives

Sonoma State Hospital provides care and treatment for mentally retarded patients principally from the northern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1959-60	1960-61	1961-62
Total admissions	394	240	268
Total net releases	160	199	295
Net transfers from other hospitals	—71	—80	6

The following administrative adjustments in personal services were made during 1962-63: 1.9 positions were temporarily established to perform special repair and maintenance projects by hired labor rather than by contract; and 1 psychiatric technician position was abolished as a result of savings in nursing staff time realized through use of mechanical imprinting equipment for recording of patient information on hospital records.

GENERAL ANALYSIS

Objectives

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

Program and Performance

Air pollution continues to be a major problem and the department has fully implemented the expanded programs in air quality monitoring and air sanitation standards authorized by the last legislature.

The department is continuing its programs of providing health services to migratory agricultural workers and its consultative services to local health departments particularly in the fields of maternal and child health, tuberculosis, public health nursing, and social work, nutrition, vector control, and dental health. Field studies and consultation are provided in industrial disease, chronic disease, and water and sewage sanitation, and disposal of radiological wastes.

The vital records program provides registration and certified copies of birth, death, and marriage records and a registry of divorces and annulments.

A Crippled Children Program is operated in co-operation with local health and welfare departments. This program is partially supported by a state subvention and provides medical care for crippled children whose parents are unable to provide needed services.

Licensing programs are operated for hospitals, laboratories and laboratory technicians, audiometrists, canneries, and a number of related food producing establishments.

The Food and Drug Inspection Program continues to provide protection from adulterated foods, drugs, and beverages including a program initiated by the 1961 Legislature for the control of hazardous substances and cosmetics.

The Health Education Program stimulates education in the health field by consultation to departmental staff and local agencies and the development of media.

Special projects financed from other than state funds provide a research and investigative program.

Administrative adjustments in 1962-63 include the establishment of 30 positions and the abolishment of 3.

Six of the positions are for a federally financed Neurological and Sensory Disease Program.

One position is for an emergency health service as part of the California disaster program.

Seven positions were established for a federally financed program for the Chronically Ill and Aged.

Sixteen positions were approved for a program of radiation licensing and regulation under the authority of Chapter 1711, Statutes of 1961, and financed by reimbursements.

Three positions in the Mental Health Bureau were abolished in 1962-63 and the functions were transferred to the Department of Mental Hygiene.

In 1963-64 it is proposed to transfer 7 positions from the Disaster Office to the Department of Public Health to consolidate the administration of emergency health services in time of disaster.

In addition to transferring the 7 Civil Defense positions and the continuation of the 27 administratively established positions as permanent, a total of 41 new positions are proposed to meet workload needs and program changes and expansions.

Although these positions are described in more detail in the various divisions they are categorized briefly as follows:

Three clerical and 1 tradesman position in the Division of Administration.

Thirteen additional positions for the emergency health service function, one-half the cost to be borne by the Federal Government.

Six positions for X-ray licensing are proposed to be funded from federal grants for radiation.

Six positions for workload in the air pollution monitoring network are proposed.

Five additional positions are proposed to provide diagnostic services in the enterovirus and enterorespiratory diseases.

Seven positions are requested in the Division of Preventive Medical Services, 2 for Hospital Regional Planning, 1 for a safety program on the medical aspects of accidents, 3 for licensing workload in the Bureau of Hospitals, and 1 assistant division chief.

Other major workload or program changes not immediately requiring additional positions include $100,000 for converting to electronic data processing and $348,849 for assumption of the operation of the Los Angeles County Motor Vehicle Emission Testing Facility. This latter amount is offset by a reduction in contract services purchased by the State in 1962-63.

DIVISION OF ADMINISTRATION

Objectives

The Division of Administration includes the Director's Office, Bureau of Business Management, Bureau of Personnel and Training, Bureau of Vital Statistics and Data Processing, and Management Analysis. It provides administrative direction and staff services for the department, and consultation to local health departments in these functions.

Program and Performance

Business services for the department are centralized in the Bureau of Business Management. They include general administrative and operative services, stockroom, mail and messenger service, operation of building and telephone switchboard, accounting, budget preparation and control, licensing, purchasing, a car pool of specialized vehicles, field audit of public health subvention programs, and fiscal consultation to local governmental agencies on subventions.

The Bureau of Personnel and Training has a dual responsibility: first, to develop and administer a comprehensive personnel management program, second, to initiate and carry out a training program.

The Management Analysis unit is responsible for review of systems and procedures, and establishment of workloads and staffing patterns within the department.

The Bureau of Vital Statistics and Data Processing provides direction and assistance as well as related processing services in the development of public health records and vital statistics. This unit provides service to local health agencies as well as units of the department, and includes the preparation of special

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF PUBLIC HEALTH—Continued

DIVISION OF ADMINISTRATION—Continued

Program and Performance—Continued

interpretive reports, analysis of statistical data relating to births, deaths, marriages, population, and data processing consultation to specific programs.

For 1963-64 a total of $100,000 is proposed in operating expense for conversion to medium-sized computers in the centralized data processing unit. Estimated annual cost of the final program will be approximately $130,000 of which it is anticipated 50 percent will be recovered from special projects financed from sources other than the General Fund.

One painter position is proposed on the basis of workload. One additional workload position is proposed for the Bureau of Personnel and Training in connection with the other proposed new positions in this budget. Two clerical positions for services in connection with the regional hospital planning program, which were limited to June 30, 1963 by the Legislature are proposed to be continued together with two positions included in the Bureau of Hospitals.

One position was added administratively during the current year to provide services in connection with the Radiation Licensing and Registration Program. It is proposed to continue it during the budget year for the same purpose. In both years it is funded completely from reimbursements.

DEPARTMENT OF PUBLIC HEALTH—Continued

DIVISION OF ALCOHOLIC REHABILITATION

Objectives

This division engages in the demonstration treatment and rehabilitation of alcoholics. All phases of the rehabilitation of alcoholics are investigated and studied as well as all factors necessary to the reduction and prevention of chronic alcoholism and other excessive uses of alcohol.

Program and Performance

The present program consists of research, education, and demonstration treatment. Research is conducted both by state staff and other agencies under contract in the following areas:

1. Experimental methods of treating alcoholics.
2. Follow-up studies to evaluate the effectiveness of treatment methods.
3. The nature of alcoholism and the metabolism of alcohol in the human body.
4. The causes of alcoholism.

Demonstration treatment of alcoholics is conducted throug 8 pilot community clinics. Public information and educatio programs include the publication of a monthly bulletin, dissemination of appropriate information, distribution of pertinen literature, and sponsorship of training institutes. The demonstration projects for hospital care, recovery homes and detoxification centers added by the 1961 Legislature are administere by this division.

A screening clinic is proposed in Los Angeles for alcoholic being considered by the court for commitment to state hospitals This function is to be established administratively in 1962-6 and financed by the Department of Mental Hygiene out o savings.

DIVISION OF EMERGENCY HEALTH SERVICES

Objectives

By Executive Order of the Governor, the Director of the Department of Public Health was assigned responsibility for the Public Health Services of the Civil Defense Organization. Such responsibility includes the following:

1. The department shall prepare to use its available resources and such other resources as may be made available for such purpose, to perform assigned functions during a state of disaster or a state of extreme emergency.
2. Department functions shall include, but shall not be limited to, the following:
   a. Planning and development of the statewide emergency Public Health Program.
   b. Planning and development of, in co-operation with the Director of the Department of Agriculture, a statewide emergency program against chemical and biological warfare.
   c. Planning and development, maintenance, and custody of a statewide stockpile of emergency medical supplies and equipment to include sanitation units, blood bank supplies, first aid stations, civil defense emergency hospitals, and emergency supply points containing blood bottles, blood substitutes, antibiotics, emergency dressings and similar material.
   d. Planning and development of, in co-operation with the California Medical Association and the allied medical associations, a condition of preparedness to meet disaster on all local and state levels, and to provide medical care for casualties resulting in an extreme emergency.
   e. The planning and development of a statewide progra to train health manpower in civil defense knowledg and skills and including the administration of the medical self help program on a statewide basis.
3. During a state of extreme emergency the Director of th Department of Public Health shall be the Chief of th Public Health Services of the Civil Defense Organization
4. To the extent its available personnel and resources permit the Director of the Department of Public Health shal assign departmental representatives to serve at the headquarters and regional offices of the California Disaste Office, during a state of extreme emergency.

Program and Performance

One position was established administratively during the current year to provide services in connection with California's disaster program. This position plus 7 positions to be transferre from the Disaster Office and 13 additional positions are proposed for the budget year to fully implement an emergenc health service program in the public health and medical car field. As in other disaster service programs, 50 percent of th cost will be borne by the Federal Government.

DIVISION OF COMMUNITY HEALTH SERVICES

Objectives

This division has responsibility for integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, providing local health services by contract to areas without organized health departments, and for providing nursing, social work, and health education consultation and services to local health departments and other units of the State.

Program and Performance

Liaison is maintained with each of the individual local health departments, with the Conference of Local Health Officers and all other divisions and bureaus of this department. For small counties who do not maintain their own health departments a minimal public health program is operated under contract. The program for public health residency training is co-ordinated in this division. The Bureaus of Public Health Social Work, Public Health Nursing, and Health Education provide recruiting, training, consultation, technical, and administrative assistance to local health departments. Information and education services are furnished for the balance of the department.

One public health nurse was added administratively during the current year and is proposed for continuation during the budget year to meet workload associated with the new Federal Program for the Chronically Ill and Aged. This position and associated operating expenses are financed from federal funds received for this purpose.

DIVISION OF DENTAL HEALTH

Objectives

This division has responsibility for the administration of a program to protect and improve the dental health of the public.

Program and Performance

The program is implemented by advisory and consultative services to local health departments, and community groups, agencies and educational institutions; epidemiological studies of dental diseases; and promotion of training, clinical facilities, water fluoridation, and other public health preventive measures.

DIVISION OF ENVIRONMENTAL SANITATION

Objectives

This division has the primary responsibility for the services necessary to provide a healthful environment for the people of California.

Program and Performance

The division consists of Bureaus of Radiological Health, Air Sanitation, Sanitary Engineering, Vector Control, and Food and Drug Inspection, which includes a cannery inspection section.

The Bureau of Radiological Health has been established to bring together all activities concerned with radiation. These include maintenance of environmental surveillance of radiation sources, collection of data and interpretation of significant fluctuations in radiation levels, observation of radiation users facilities and practices, assisting in site location and other safety factors of reactor developments, and registration of all radiation sources.

The Bureau of Sanitary Engineering administers a program of consultation, inspection, and regulation in the fields of sewage disposal, industrial waste disposal, water supply, sanitation of bathing places and recreational areas, water contamination, inspection of radioactive waste sources, and evaluation of the public health hazards of waste disposal and use of isotope tracers.

The program of the Bureau of Air Sanitation includes investigation of the effects of air pollution, assistance to local agencies in the measurement and control of air pollution and its effects, establishment of standards for maximum allowable contaminants in motor vehicle exhause, and establishment of standards for quality of ambient air. An air monitoring network is maintained in co-operation with local air pollution authorities.

The Bureau of Food and Drug Inspection insures the purity of foods and drugs in California by an inspection program of the manufacturing, wholesale, and retail outlets throughout the State. This program not only removes particular lots of foods and drugs from consumer channels, but operates to provide a long-range program of correction and prevention of unsatisfactory environmental conditions. It also has responsibility for the enforcement of correct labeling of kosher food and investigates fraudulent cancer cure devices.

Canneries are licensed and inspected to provide sanitary operation and prevent the occurrence of botulism.

A field program is maintained by the Bureau of Vector Control to stimulate adequate local vector control programs; endemic surveys are conducted to determine the existence of vector-borne disease hazards and control techniques; and methods and equipment are evaluated and demonstrated.

As directed by Chapter 1711, Statutes of 1961, a program to license radioactive materials and register radiation producing machines has been added administratively during the current year and is proposed for continuation during the budget year. Fifteen positions in this division and one in the Division of Administration, together with operating expenses were authorized administratively to carry out this program in 1962-63 financed from reimbursements. The same program is proposed for 1963-64 again to be financed from reimbursements.

Six positions, and related expenses for a total of $108,500, are proposed to be financed from federal grants for the X-ray registration.

Six positions are proposed for workload in connection with the air pollution monitoring network.

Of the $505,947 budgeted in 1962-63 for contractual services, $348,849 is expended under contract for laboratory services provided by the Los Angeles Air Pollution Control District. In 1963-64 it is planned for the Department of Public Health to assume the responsibility of operating the motor vehicle emissions facility for the same amount as expended in 1962-63. This is shown under the Motor Vehicle Emissions Facility portion of this budget.

[a] Grants from Federal Government and expenditures therefrom are not included in the budget totals.

MOTOR VEHICLE EMISSIONS FACILITY

Objectives

The motor vehicle emissions facility provides testing of devices used to reduce motor vehicle emissions and testing of motor vehicles in connection with standards setting.

Program and Performance

During the budget year it is proposed to assume responsibility for operation of the laboratory now operated by the Los Angeles Air Pollution Control District under contract. Services will be provided to the department and to the Motor Vehicle Pollution Control Board. Total cost to the State will be the same under the proposed method as during the current year.

The amount included in this budget provides not only for the operation of the facility but also for the acquisition of the equipment now owned by the district in five annual installments. The purchase price recognizes the depreciated value of the equipment.

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the budget totals.

DIVISION OF LABORATORIES

Objectives

This division provides laboratory services to the department and to local areas without laboratories, consultation, investigation and reference service for local laboratories, and regulation of laboratories and laboratory technicians.

Program and Performance

Individual laboratories are maintained in the fields of sanitation and radiation, industrial hygiene and air pollution, food and drug, viral and rickettsial diseases, and microbiology.

The field services section provides consultation, inspection, and licensing of hospital, clinical and local health department laboratories, laboratories using animals, firms producing biologics, and bone and artery banks.

Five additional positions are proposed to provide diagnostic services in the enterovirus and respiratory diseases which has previously been supported from a federal grant for this purpose but which is no longer available.

DIVISION OF PREVENTIVE MEDICAL SERVICES

Objectives

The Division of Preventive Medical Services is responsible for the medical, hospital, and other services necessary for the prevention of disease.

Program and Performance

The division consists of 9 units: maternal and child health, crippled children services, communicable diseases, chronic disease control, prevention of blindness, occupational health, nutrition, mental health services, and hospitals.

A program of maternal and child health services includes studies and investigations of child health problems, and provides technical consultation to local health departments, hospitals, maternity homes, schools, physicians, and other professional groups.

The program for crippled children provides consultation and assistance to the counties in their operation of crippled children's programs including:

1. Establishment of standards for care and consultation in the maintenance of such standards.
2. Provision of funds for diagnosis and treatment.
3. Planning and consultation in the provision of treatment and rehabilitation services.
4. Maintenance of records on these children.

In the communicable disease field, surveillance is maintained of all communicable diseases which are significant to public health in California. Clinical and administrative consultation is provided to local agencies both on a routine and emergency basis, and epidemiologcial field investigations are conducted. Tuberculosis control is accomplished by a subsidy program to

DEPARTMENT OF PUBLIC HEALTH—Continued

DIVISION OF PREVENTIVE MEDICAL SERVICES—Continued

Program and Performance—Continued

counties for assistance in the care of tuberculosis patients, and consultation in case finding, clinic, and nursing services.

The program in chronic disease control, including the investigation of the medical aspects of air pollution, consists of:

1. Consultaton to local health agencies, hospitals, and private physicians with regard to preventive measures, and early identification of chronic diseases.
2. Demonstration and evaluation of specific chronic disease control services.
3. Epidemiologic investigations and special studies of the public health significance of chronic diseases.

The occupational health program of the department consists of:

1. Assistance to local health departments in developing preventive health programs for detecting, preventing, and correcting health hazards in industry.
2. Consultation and educational programs to professional, industrial, and labor groups interested in occupational study of industry-wide problems affecting large segments of working population.
3. Analysis of occupational health statistics.
4. Direct services to industry in study of occupational health hazards where other resources are not available.

Consultation and advisory services are provided to local and state health departments to help them to meet mental health problems associated with public health practices.

A subsidy program for the construction of general hospitals, nursing homes, diagnostic and treatment centers, chronic disease hospitals, and rehabilitation centers is administered by the Bureau of Hospitals. It also establishes standards for hospital and related facilities (including tuberculosis sanitariums), inspecting and licensing of these institutions, and providing limited technical consultation to them.

A program is operated to improve care in nursing homes. A program to provide medical services for migratory agricultural workers is conducted chiefly through locally operated temporary projects.

Technical and administrative assistance in nutrition services are provided local health agencies, as well as assistance in recruitment and training of staff.

Two new federally funded programs were added administratively during the current year in the Bureau of Chronic Diseases and are proposed for continuation in the budget year:

1. Three medical officers, a social research technician, and 2 clerks are for workload in connection with the program to provide better medical services to the chronically ill and aged.
2. A medical officer, 2 statisticians, 2 clerks and 1 man-year of temporary help are to provide an inventory of the services in the State available in the Neurological and Sensory Disease field. This program will terminate on June 30, 1966.

The function of the Bureau of Mental Health was administratively transferred to the Department of Mental Hygiene in 1962-63. Three positions were deleted from this budget.

An assistant chief is proposed in the division office on a workload basis.

Two professional positions in Bureau of Hospitals and 2 clerical positions in departmental administration are proposed for continuation in the budget year for a regional hospital planning program. The authorization for these positions and program of regional planning terminates on June 30, 1963. On the basis of the work already done and the prospects for beneficial results it is proposed to extend this program at least for another two years.

Two hospital field positions and a clerk are proposed for the workload increase in the Bureau of Hospitals to be financed from the General Fund.

One additional position, Public Health Medical officer III, is proposed for the initiation of a program in the public health medical aspects of safety and accident prevention.

DIVISION OF RESEARCH

Objectives

This division is responsible for co-ordination of the research activities conducted by the department both with state funds and with funds from outside sources.

Program and Performance

The division of research stimulates an active and effective public health research program in California by:

1. Defining major unsolved health programs.
2. Assisting in the design of research proposals.
3. Co-ordinating requests for funds from other agencies.
4. Consultation and assistance in the operation of research projects.

MOTOR VEHICLE POLLUTION CONTROL BOARD

Objectives

The Motor Vehicle Pollution Control Board is charged with the responsibility to:

a. Determine and publish the criteria for approval of motor vehicle pollution control devices;
b. issue certificates of approval for acceptable devices;
c. exempt certain classes of vehicles from compliance with Chapter 3, Division 20, Health and Safety Code.

Program and Performance

The Motor Vehicle Pollution Control Board was established in the Department of Public Health under the provisions of Chapter 23, Statutes of 1960 and is responsible directly to the Governor. The board is composed of 13 members including the Director of Public Health, Director of Agriculture, Commissioner of the Highway Patrol, Director of Motor Vehicles, and 9 other members appointed by the Governor with consent of the Senate.

The provisions of the law requiring installation of control devices on vehicles specify a timetable which goes into effect only after the control board has certified 2 or more devices. When such devices are approved, they will be required to be installed on motor vehicles in California as follows:

1. One year after certification date on all new vehicles registered in the State.
2. One year after the certification date on used motor vehicles upon transfer of registered owner.
3. After the second December 31, following the certification date on all used commercial vehicles.
4. After the third December 31, following the certification date on all vehicles.

The requirements for new vehicles will apply automatically throughout the State. The law allows boards of supervisors or air pollution control districts to determine whether control devices shall be required on used vehicles.

Temporary help funds in the amount of $4,000 were added administratively in the current year and are proposed for continuation in the budget year to provide for necessary technical consultants on testing control devices.

It is proposed that contractual services be increased in the budget year by $64,118 to provide additional funds for contractual services with private laboratories that have equipment, facilities, and personnel which cannot be duplicated within the State and which is essential to adequately carry out the board's legal responsibility in respect to testing devices.

SPECIAL PROJECT ACTIVITIES

Objectives

The department conducts many projects involving research, investigations, demonstrations, and special services of value to the development of the California public health program financed from funds which are obtained from the Federal Government or private foundations.

Program and Performance

Numerous organizations interested in furtherance of public health make funds available to the department, for activities not financed by the State. Each special activity must be related to public health needs in California or be related to investigations or research being conducted by the State. Projects financed by nonstate funds include overhead charges to reimburse the State for additional costs incurred. Expenditures and reimbursements are not included in budget totals.

Known activities are detailed indicating the type of activity and source of funding. Since project fiscal years may not coincide with the state fiscal year, projects are assigned to the state fiscal year which most nearly coincides with the project fiscal year.

OFFICE OF THE DIRECTOR

Cancer Field Research (National Institutes of Health)

This grant provides the resources to conduct a general research program in the causes of cancer, through studies in human cancer epidemiology, cancer in animals, the connection of viruses and cancer, and physical-chemical surveillance of the atmosphere for causative agents.

BUREAU OF VITAL STATISTICS AND DATA PROCESSING

Medical Certification Study (National Institutes of Health)

This is an evaluative study of the reliability and accuracy of medical and health data on certificates of death. It is being conducted to extend information available for general interpretation of mortality statistics and to develop a plan of action for California to improve the quality of medical certification of death.

BUREAU OF MATERNAL AND CHILD HEALTH

Child Health Research Unit (Children's Bureau, Department of Health, Education, and Welfare)

This unit conducts studies of major child health problems, and provides technical assistance to state and local special studies. Current emphasis is on study of the distribution and quality of medical care for children, particularly care provided by public agencies.

Childhood Accidents (National Institutes of Health)

The frequency of medically attended injuries among a large population of children under 15 years is being investigated. This study is designed to determine whether certain personal and environmental factors are associated more with "accident" children than with "nonaccident" children.

Farm Labor Child Health (Children's Bureau, Department of Health, Education, and Welfare)

The Western Branch, American Public Health Association, will co-ordinate the efforts of health agencies in the western states on health programs for seasonal agricultural workers and their families. The Western Branch will serve as an information center on current and past efforts in this field.

Seatbelt Study (National Institutes of Health)

A study of the attitudes affecting the public's acceptance of automobile safety belts.

Mental Retardation Field Clinics (Children's Bureau, Department of Health, Education, and Welfare)

Field diagnostic services are provided for mentally retarded children in Southern California communities. Diagnostic techniques are being taught and local agencies encouraged to assume sponsorship of the clinics.

BUREAU OF CRIPPLED CHILDREN SERVICES

Congenital Heart Evaluation (Children's Bureau, Department of Health, Education, and Welfare)

Crippled Children Services will devise methods to follow up children undergoing treatment for congenital heart diseases.

This will enable them to evaluate the efficacy of treatment methods.

Regional Congenital Heart Program (Children's Bureau, Department of Health, Education, and Welfare)

Diagnosis and treatment are provided children with congenital heart disease in the western region. These services are furnished in California at centers where medical staff are continually developing and improving such diagnostic and treatment procedures; only in such centers can such service be made available to children in the less populous surrounding states.

BUREAU OF COMMUNICABLE DISEASES

Venereal Disease Casefinding (Communicable Disease Center, Public Health Service)

To counteract the rising number of cases of infectious venereal disease, casefinding and educational efforts have been increased in the State. The objectives are to demonstrate to private physicians and laboratories in local health jurisdictions, the importance of their co-operation with the health department in tracing contacts. In addition, educational material and films are being distributed to physicians, schools, and service organizations.

Tuberculosis Death Study (United States Public Health Service)

A grant to define and study agency communication relative to tuberculosis detection; to define and classify by age, occupation, etc. persons contracting tuberculosis; to determine public attitudes toward seeking medical services in tuberculosis cases.

BUREAU OF CHRONIC DISEASE CONTROL

Cancer Chemotherapy (National Institutes of Health)

A data collection center for California's part in a national cancer chemotherapy evaluation program is provided. It is a part of the California Tumor Registry. Newly reported cases of cancer are registered, and previously reported cases are followed. Quality control is maintained on the abstracting of cases in hospitals; the necessary mechanical procedures are carried out to prepare punched cards for the Cancer Chemotherapy National Service Center. This provides basic data for many other cancer studies.

Human Population Laboratory (National Institutes of Health)

One population will be carefully defined for intensive study with attention focused on its personal characteristics and behavioral patterns to determine how these are related to the development of disease in this population. Studies of several chronic diseases and their interrelation are being made.

DEPARTMENT OF PUBLIC HEALTH—Continued

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 61-62 (Filled)	NO. OF POSITIONS 62-63 (Auth.)	NO. OF POSITIONS 63-64 (Auth.)	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

SPECIAL PROJECT ACTIVITIES—Continued

BUREAU OF CHRONIC-DISEASE CONTROL—Continued

Cancer Monograph Tabulation (National Institutes of Health)

Tabulations, describing in detail some 200,000 cases of patients with neoplasms who were reported to the Tumor Registry, are being supplied to the Cancer End Results Program. This data is to allow correlation of variables such as age, sex, and treatment with the survival experience of the patients. A monograph based on this data is being prepared.

Cervical Cytology Methodology (Bureau of State Services, Public Health Service)

This is a study of methods to ascertain the extent of knowledge about, and the degree of usage of cervical cytology as a cancer detection device in the community.

Air Pollution Medical Conference (National Institutes of Health)

The conference will bring together annually persons doing research in the health effects of air pollution, to exchange information, and establish goals for new studies. The department conducted a similar conference on a smaller scale in prior years. The grant provides for the publication and distribution of the proceedings.

Air Pollution Time Series Analysis (National Institutes of Health)

The statistical methods of time series analyses, which have been successful in economics and business, are being adapted to the study of the effect of air pollution and weather phenomena on health.

Longshoremen Heart Study (Bureau of State Services, Public Health Services)

In co-operation with Kaiser Foundation Hospital and the International Longshoremen's and Warehousemen's Union, a follow-up multiphasic examination of a group of longshoremen is being conducted, to determine what tests and symptoms may lead to early detection of heart disease.

Area-Wide Tumor Registry (Bureau of State Services, Public Health Service)

A tumor registry which will report all cases in Alameda County is being established. This is to provide a pool of information on a concentrated population for use in epidemiologic studies of cancer.

Lead Study (Bureau of State Services, Public Health Service)

The amount of lead in blood and urine are being checked against the amount in the atmosphere, to determine the relationship of the two.

Effects of Inhaled Air Pollutants (National Institutes of Health)

This study has the aim of resolving certain problems in methods to be used in the study of associations between inhalation of polluted air and diseases of the respiratory system.

BUREAU OF NUTRITION

Obesity Study (National Institutes of Health)

This is a study with the object of developing accurate, nonlaboratory methods, for assessing obesity and caloric intake and expenditure, applicable to large-scale studies of morbidity and mortality.

BUREAU OF HOSPITALS

Hospital Utilization (National Institutes of Health)

A program on a statewide basis is being devised for the regular collection and evaluation of data relating to hospital utilization. The program which will be developed can be applied on a national basis; information collected to date by independent surveys, by official and private agencies, provides an inadequate factual basis for effective planning on a statewide and community basis.

DIVISION OF ALCOHOLIC REHABILITATION

Drinking Patterns (National Institutes of Health)

An exploratory study to develop valid methods of eliciting, measuring, and analyzing patterns of alcoholic beverage usage and associated conditions. The way in which alcoholic beverages are consumed; i.e. where, when, why, with whom, as well as the amount consumed, is to be studied with the intent of developing hypotheses which relate drinking patterns and attitudes to socioeconomic data, general health, and general parental, marital, and cultural beliefs regarding alcoholic consumption.

DIVISION OF LABORATORIES

Viral Disease Study (National Institutes of Health)

A study of etiology, immunology and epidemiology of viral diseases. New means are being sought to diagnose viral diseases in order to facilitate epidemiological studies of them; the role of viruses in the causation of human diseases is being evaluated.

Encephalitis Study (Rockefeller Foundation)

A general study of arthropod-borne virus diseases is being conducted. Rodents and arthropods are being investigated as reservoirs of virus.

Influenza Project (Department of Army)

This study is concerned with the etiology and prophylaxis of viral respiratory disease in military recruits. As the importance of various etiologic agents is determined, vaccines will be developed or applied and their efficacy evaluated.

Influenza Supplement (National Institutes of Health)

Viral respiratory diseases are being investigated in conjunction with the Influenza Project described above.

Zincuria Study (National Institutes of Health)

A simplified technique for the early detection of liver damage through alcoholism is being developed by studying the amount of zinc excreted by the body under various conditions.

Fluorescent Antibody Technique (Bureau of State Services, Public Health Service)

The State is to test and demonstrate a new technique. This is a nationwide project to bring about the use of new equipment, giving rapid standard test results, for the identification of bacteria associated with rheumatic fever.

Enterovirus Sera Testing (National Institutes of Health)

Type-specific Enterovirus Immune Sera, produced in a laboratory outside the State, are to be tested and certified by us for the National Cancer Institute.

Microbiology Training (Office of Vocational Rehabilitation)

A grant to establish a training program in the Division of Laboratories in research applicable to current problems of the public health lab, as well as general orientation to areas of public health research interest.

BUREAU OF SANITARY ENGINEERING

Water Quality Study (National Institutes of Health)

This is a study of the public acceptance of water with a high concentration of dissolved mineral solids. Potential new sources of water for drinking, particularly in arid areas, may have a high concentration of these minerals. Existing standards, based on past practices are not necessarily applicable to California water supplies.

DEPARTMENT OF PUBLIC HEALTH—Continued

SPECIAL PROJECT ACTIVITIES—Continued

BUREAU OF VECTOR CONTROL

Organo-phosphorus Resistant Mosquitoes (National Institutes of Health)

A study is being made of mosquitoes resistant to organo-phosphorus insecticides, which are the primary control agents at this time. The physiological basis for organo-phosphorus resistance is being sought by comparing strains of mosquitoes which are, and are not, resistant to such insecticides.

Physiology of Mosquito Egg Hatching (National Institutes of Health)

The eggs of certain mosquitoes hatch under external stimulus. This is a study of the physiology of this phenomenon, in an attempt to find methods of interfering with or precipitating the stimulus, thereby controlling mosquitoes in the egg stage.

Biologic Control of Mosquitoes (National Institutes of Health)

Means of conducting germ warfare on mosquitoes are being sought. Some microbic parasites produce sickness and death in mosquitoes. By finding and fostering these parasites, it may be possible to devise a new and alternative method of controlling the mosquito population.

DIVISION OF DENTAL HEALTH

Dental Hypoplasias (National Institutes of Health)

The optimum levels of fluoride ion concentration in water supplies are being sought for different temperature zones. Concurrently, the distribution of dental caries among children in areas with varying fluoride levels is being described and compared.

BUREAU OF PUBLIC HEALTH SOCIAL WORK

Consultation in Public Health (National Institutes of Health)

Although consultation is widely used in public health, no attempt has been made to describe the process, or clearly define the limits of consultation. It is the aim of this project to delineate the process and indicate under what conditions it is most effective.

BUREAU OF OCCUPATIONAL HEALTH

Occupational Disease Evaluation (United States Public Health Service)

A contract to study the validity of the information contained in the "Doctor's First Report of Work Injury."

DIVISION OF RESEARCH

Administrative Research and Training (Kellogg Foundation)

Mechanisms designed to stimulate, promote, co-ordinate, and evaluate public health administrative research activities are developed and tested. In co-operation with other units in the department and with local agencies, the project director: encourages and co-ordinates administrative research activities; participates in existing studies in administrative research, giving consultation in project design and development; conducts administrative research. In co-operation with the Schools of Public Health, University of California (Berkeley and Los Angeles), areas or study in public health administration valuable to student and faculty are sought.

Training Program for Epidemiologists (National Institutes of Health)

Persons from various professional disciplines receive practical training in epidemiology, as a supplement to academic studies, and an introduction to epidemiologic practice. A unique opportunity is also offered for participation in interdisciplinary study of public health problems in an operating health agency.

Training Program in Rehabilitation (Office of Vocational Rehabilitation)

This program is to provide training to a limited number of trainees in rehabilitation practices and techniques by acquainting them with the activities of such groups as the Vocational Rehabilitation Service, the Committee on Rehabilitation of the California Medical Association, and the rehabilitation programs of selected local health departments. Trainees are shown the methods for study of rehabilitation needs, programs, and problems.

GENERAL ANALYSIS

Objectives

The Department of Social Welfare has as its objectives the assurance that people in need are given assistance to sustain them and to maintain their human dignities.

Program and Performance

To carry out these objectives the Department of Social Welfare supervises the local administration of the Aid to the Needy Blind, Aid to the Potentially Self-supporting Blind, Aid to Needy Children, Aid to Needy Disabled, Old Age Security, Medical Assistance for the Aged, and medical care for assistance recipients programs. It licenses plans for the reception and care of aged and for the reception and care of children, both directly and through the accreditation of local agencies. It licenses public and private adoption agencies and provides reports to the courts for independent adoptions. It issues certificates of authority for institutions for the aged that provide life care contracts. It operates a program of medical care for the prevention of blindness and restoration of sight. It receives moneys from the Federal Government for the promotion and extension of child welfare services throughout the State and arranges for the use of such moneys for the purposes provided.

The department operates these programs under state law. It receives large sums from the Federal Government for the operation of cash assistance programs, for the medical care of assistance recipients and for child welfare services. It must submit, and maintain current with the Federal Government, operational plans which assure that these federally supported programs are operated in a manner consistent with federal law and the rules and regulations of federal agencies.

The department exercises no authority over the nature and scope of the general assistance program; this is entirely a county responsibility.

During the 1963-64 fiscal year, approximately 750,000 persons will receive money or services provided by agencies under the supervision of the department or licensed by it. The total amount paid to and for these persons, and for administrative costs, is expected to amount to about $825,000,000.

The last session of the United States Congress enacted a substantial number of amendments affecting the administration of public assistance. The principle emphasis of these federal amendments is to encourage services directed towards rehabilitation and reduction of dependency of public assistance recipients.

During 1962-63 a total of 22.5 positions were established administratively or transferred from the Department of Public Health. All of them are proposed to be continued as proposed new positions in the current year. These positions include the following:

Eleven positions were transferred from the Department of Public Health when the entire Medical Assistance to the Aged function was transferred from that department to the Department of Social Welfare. These positions are continued into the budget year on a permanent basis.

Three positions (2 professional, 1 clerical) were added to process an increased load of board appeals. The same number are proposed in 1963-64.

Four and a half positions were established to investigate possible overcharging on drug prescriptions. These positions were funded from rebates from the drug manufacturing companies and are proposed to be continued in the 1963-64 year.

Four positions (3 professional and 1 clerical) were established to initiate an expansion of the training program based on recent federal legislation. These positions are also included as new positions in 1963-64.

Administrative adjustments proposed for 1963-64 include transferring 3 training positions to the local assistance activity budget in order that full costs of administrative assistance activities to counties will be reflected.

SUMMARY OF PROPOSED POSITIONS AND COST

	Number of Positions	*Estimated Cost*
Direct operations	23.8	$169,330
Management support	23.5	322,171
Public assistance appeals	3	24,109
Standardization and direction of services	14	100,817
State Employees' Retirement	–	39,865
State Employees' Health and Welfare	–	4,422
Totals	64.3	$648,403
General Fund	–	*407,725*
Federal funds [a]	–	*240,678*

DETAIL OF PROPOSALS BY PROGRAM

Direct Operations

ADOPTIONS	
1 Social service specialist II	$8,133
1 Child welfare specialist I	6,070
1 Intermediate stenographer	3,909
Related expenses	4,080
3	$22,192

An additional social service specialist II position is proposed to further staff the adoption resource referral center and for workload in relinquishment adoptions to be financed by federal Children's Bureau funds.

In 1956, one-half of a position was authorized to establish this center whose purpose is to match children and homes on a statewide basis when local agencies have been unable to effect placements. The increasing difficulty experienced by many local agencies indicates a need for expansion of this service. Additional difficult problems follow the growth and development of the adoption relinquishment program. Examples of important problems to which it has not been possible to give adequate attention are:

1. Reported shortage of adoptive applicants; scrutiny of agency procedures and policies which may aggravate the situation; analysis of data collected and initiation of corrective action.
2. Depletion of Maternity Care Fund.
3. Qualifications, recruitment, and training of agency staff; use of ancillary personnel.
4. Completion of long-standing projects such as adoption pamphlet, face sheet, interstate procedure.

One child welfare specialist I and 1 clerical position are required for workload increases in independent adoptions.

---

[a] Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF SOCIAL WELFARE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS—Continued

DETAIL OF PROPOSALS BY PROGRAM—Continued

Direct Operations—Continued

LICENSING (WORKLOAD)

1	Social service specialist II	$8,132
3	Child welfare specialist II	20,058
3	Child welfare specialist I	18,209
4	Intermediate stenographer	17,398
	Related expenses	10,163
11		$73,960

The Department of Social Welfare is responsible for the licensing of institutions for children and the aged. A workload measure was developed several years ago and a modified version of it has been applied to this annual workload of the department since that time.

Based on this accepted standard a total of eleven positions (7 professional, 4 clerical) are requested as shown above.

LICENSING (YARDSTICK COMPLETION)

3.5	Child welfare specialist II	$23,398
4	Child welfare specialist I	24,278
	Related expenses	8,197
7.5		$55,873

In 1961 the workload standard for licensing institutions which provide care on a 24-hour basis for children and aged, and day nursing care for children was reviewed in the light of the experience under the present yardstick. A series of modified standards is proposed which recognizes the differences inherent in licensing institutions for the aged compared to those for children.

The time necesary for licensing a home for the aged has been reduced while that for childrens' institutions has been increased, primarily in the attention to facilities already licensed.

The licensing of day nurseries also required more time, particularly as to already licensed facilities.

While in the previous yardsticks the department had emphasized intake, experience has shown that licensed facilities needed additional attention in areas such as the following: changes in program desired by the facility, changes in key personnel, changes in physical plant and equipment, relation to community needs, administrative problems, conformity problems.

Basing the staffing of this function on the new yardsticks and the workload involved indicates a need for a total of 7.5 positions.

DISABILITY REVIEW

1	Medical social work consultant I	$6,685
0.3	Temporary help—medical consultation	5,641
1	Intermediate stenographer	3,910
	Related expenses	1,069
2.3		$17,305

These positions are required on a workload basis for an increased number of disability determinations based on existing workload standards.

Management Support

CENTRAL SERVICES

1	Assistant personnel analyst	$6,372
	Related expenses	1,491
1		$7,863

In order to comply with requirements of the Department of Health, Education and Welfare concerning the adequacy of merit system plans the department is required to review county ordinances, pay plans, classification plans, rules and regulations, and other pertinent data. A 12-months backlog of unprocessed county plan material from civil service counties has developed as a result of lack of staff in the Personnel Bureau.

To meet the continuing workload and reduce the backlog of county plan material 1 assistant personnel analyst is requested.

10	Intermediate stenographer	$40,068
	Related expenses	9,294
10		$49,362

These additional intermediate clerical positions are proposed on a workload basis for the increased work in the central clerical pool.

ELECTRONIC DATA PROCESSING

Related expenses	$100,000

Because of the rapid growth of electronic data processing installations in the counties and the increasing number and variety of reports and claims being processed, the department can no longer meet its data processing needs with present staff and equipment. A feasibility study has been completed. To meet the increasing demands from the Department of Health, Education and Welfare, increasing volumes of operating fiscal and statistical reports, program expansions, requests for information, and the need for research data and development at the county level it is imperative that an advanced data processing system be installed at the earliest possible date. This budget proposes the authorization for data processing equipment with an anticipated delivery date in the latter part of the budget year. Staffing will be subject to review of the Department of Finance and Personnel Board and will be dependent on the development of the departmental program. Anticipated savings will not be realized until complete installation of the system in an operational phase, estimated to be during the 1965-66 fiscal year. There are also many noneconomic and indirect advantages to be obtained from such an installation, i.e., more timely reporting of categorical aid expenditures, better program control, and more uniform program administration.

EMERGENCY WELFARE SERVICES

1	Training Officer II	$9,396
3	Emergency welfare services liaison officer	23,231
	Related expenses	11,108
4	Totals	$43,735

One of the functions of the department is to provide guidance and technical assistance to communities in helping them develop emergency welfare plans and capabilities. A series of guides that have been prepared and included in the state emergency welfare plan for organizing local emergency programs require implementation. Local planning and organization will not develop without stimulation and assistance. This additional staff is proposed to provide minimum field assistance and operational planning in the most essential areas.

TRAINING

3	Training consultant	$24,340
1	Senior stenographer	4,836
	Related expenses	52,987
4	Totals	$82,163

GENERAL ANALYSIS—Continued

Management Support—Continued

TRAINING—Continued

The department has moved its scholarship and training activities for child welfare programs from the Family and Children Division to the Training Bureau. Substantially increased federal funds and the federal requirement to expand child welfare services to the areas not now covered make an expanded training program necessary. Two additional training consultants and 1 clerical position were authorized during the current year, since the 1963 school year planning must be completed by July 1963. These positions are proposed to be continued on a permanent basis from the additional federal funds.

One training consultant is proposed for staff development work within the Department of Social Welfare. Educational leave stipends to departmental employees are provided for in the $50,000 for training grants under operating expenses. All of this is part of the department's effort to raise staff capability, particularly in the areas of rehabilitation and dependency. Of this amount, $37,500 will be financed from federal funds.

FRAUD AND ABUSE INVESTIGATION

2	General auditor III	$17,032
1	Tabulating machine operator	4,494
1	Intermediate stenographer	4,422
0.5	Temporary help	5,000
	Related expenses	8,100
4.5		$39,048

Following an examination of the records concerning drugs paid for under the Public Assistance Medical Care Program, it appeared that some vendors were abusing the program. To start an immediate investigation, 2 general auditors III, a half-time pharmaceutical consultant, and a clerical position were administratively authorized during the current year. These positions are proposed to be continued on a permanent basis for a continuing review of possible abuse. They are financed from the rebates offered by certain pharmaceutical manufacturers.

To take advantage of rebate offers from various pharmaceutical manufacturers all of the prescriptions are tabulated by machine. The substantial increase in the number of prescriptions being received required 1 additional tabulating machine operator in the current year. This position is also financed from the rebates offered by pharmaceutical manufacturers and is proposed to be continued on a permanent basis.

Public Assistance Appeals

1	Assistant counsel	$7,376
1	Intermediate stenographer	3,910
	Related expenses	1,863
2		$13,149

Due to the growth in the size of the staff of hearing officers, the chief referee can no longer provide the necessary supervision and review the decisions of each hearing officer. The rapid growth of the volume of decisions rendered makes necessary additional effort to keep them uniform and consistent. It is proposed also to develop and maintain an index and precedent file of decisions rendered in the categorical aid appeal cases by the department.

It is proposed to add 1 assistant counsel for these purposes and an additional intermediate stenographer for clerical support.

1	Social service specialist III	$9,450
	Related expenses	1,510
1		$10,960

One social service specialist III is required based on workload increases in the appeals to the Social Welfare Board.

This position, a second professional position and a clerk were added administratively in 1962-63 to meet the workload and reduce a backlog of cases. The workload position is proposed for continuation in 1963-64.

Standardization and Direction of Services

Federal law and regulation, as well as the directions developed in the State, emphasize extending services which tend to retain capacity for self-care in self-maintenance or which tend to correct the elements which bring about dependency. This is a major redirection of welfare administration.

Whereas previously specific standard concepts were developed and used in determining who was eligible and how much he received, now the direction clearly is to be as specific and as accountable in the area of nonmonetary benefits. It will be just as important to see that appropriate services are provided as it is to see that the correct amount of money is paid, and to observe whether the intended objective is in fact accomplished.

The positions which follow are concerned with the definition and standardization of these reviews, with their expression in useful form, with the consultation and advice necessary to create this second directed program, with the facilities and abilities necessary to provide the specific services, with reporting of services rendered and results obtained, and with the necessary cost accounting for the additional federal funds made available.

FUNDING

2	Governmental auditor II	$12,744
1	Accounting technician II	4,309
3	Intermediate account clerk	11,178
	Related expenses	8,008
6		$36,239

In recognition of the increased administrative costs involved in the "service" concept, the Congress also provided for an increase in Federal participation in certain selected costs from 50 to 75 percent. In order to provide the basis for reporting this increased reimbursement the rules of the Department of Health, Education and Welfare further complicate the already complex cost accounting systems. To handle the increased workload resulting from these changes, 1 accounting technician II and 1 intermediate account clerk are proposed in the accounting office for the cost accounting and control accounts units.

To provide for county participation, the administrative expense claim forms were revised and expanded. To provide for this additional volume of work of claim review, 1 additional intermediate account clerk is proposed.

The increased complexity of the fiscal records caused by this increased reimbursement will also require 3 auditors for field examination of the county records; however, an intermediate account clerk (intermittent) is proposed in lieu of a third auditor for work in the field in the larger counties for routine scheduling and listing work.

REPORTING

3	Assistant research technician	$19,116
1	Tabulating machine operator	4,104
1	Intermediate account clerk	3,726

DEPARTMENT OF SOCIAL WELFARE—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS—Continued

Standardization and Direction of Services—Continued

REPORTING—Continued

1 Key punch operator	12,376
– Related expenses	3,726
6	$43,048

The legislation passed at the last session of Congress will require a new series of federal reports on the services activities without eliminating those already in existence. Further, the definition of the type of cases needing services, the specific types of service rendered, the evaluation of the service in relation to the characteristics of the case, the estimating of volume of services needed and of the capability of recording them and the counting of results achieved will require the development of a series of sample studies geared to the needs of the state, as distinguished from the additional required federal reports. The positions requested are considered minimum in the sense that any further requirements must wait upon the actual development of the program.

One research technician is proposed for report design, maintenance and analysis of periodic reports; an intermediate account clerk for review, editing and coding of reports and schedules; and 1 tabulating machine operator and 1 key punch operator for routine processing of these additional reports.

Two additional research positions are proposed for inquiry in the service areas. One position will be assigned to ANC; the other to OAS, ANB and ATD.

PLANNING AND CONSULTATION

1 Social welfare services specialist	$12,061
1 Social services specialist II	8,132
Related expenses	1,337
2	$21,530

The recent social security amendments directed toward services to recipients require a great amount of effort from all sections of the department. In many instances, the detailed federal requirements have not yet been fully developed. Counties present a wide array of performance in relation to requirements. The way in which the department itself operates vis-a-vis these new requirements not only have to be conceived in general terms, but have to be interpreted in many details. This effort needs a focal point from which it can be granted and co-ordinated. A position of social welfare services specialist is proposed for this specific purpose and to continue development of the service plans on a continuing basis.

The child welfare provision of the Social Security Act was amended to establish a new day care program. In order to secure the funds it is anticipated Congress will appropriate early in the 1963 session, it is necessary to have a state plan for this purpose on July 1, 1963. A social service specialist II is proposed to be established for preparation of the initial plan and subsequent working with other state agencies and local government to put the approved plan into operation. Additional federal funds from the Children's Bureau will be used for this position.

Welfare Study Commission

Objectives

The commission established by Chapter 2045, Statutes of 1961, is charged with studying the entire field of public welfare in California and making recommendations for improvement of all aspects thereof. The commission will cease to exist upon adjournment of the 1963 Regular Session of the Legislature.

Program and Performance

The commission is composed of 26 members: 17 members appointed by the Governor to consist of 3 directors of a county welfare department, 1 county probation officer, 4 county supervisors, 3 county administrative officers, 1 superior court judge, 1 district attorney, and 4 persons representing the general public; the chairman of the State Social Welfare Board, the Directors of Employment, Mental Health, Public Health, and Social Welfare; and 4 members of the Legislature, 2 from the Senate and 2 from the Assembly, appointed by their respective houses.

In accordance with the enabling legislation, the commission is to study and make recommendations on:

1. The whole field of public welfare laws in this State, including the administration of those laws.
2. The economic and social effects of the existing programs.
3. The basic policy for public assistance programs and their relation to federal welfare and social insurance benefit programs.
4. The areas where the policies of existing programs are deficient or inconsistent with the public purpose to be served.
5. The nature and scope of service which are an appropriate part of a comprehensive and integrated public welfare program.
6. The administrative organization, methods of administration and governmental cost sharing, and research and control procedures which will be most effective in conserving human resources and public funds.
7. Statutory revisions necessary to carry out the recommendations of the commission and to simplify and integrate the Public Welfare Law.

Services are contracted with the Department of Social Welfare in order to take advantage of federal funds available for these purposes.

GENERAL ANALYSIS

Objectives

The citizens' committee advises the Governor on action needed to solve the problems of aging; encourages and provides consultation to the local communities of the State in developing programs to meet the needs of their senior citizens; works toward a more effective use of the resources of the State in behalf of its senior citizens; and acts as an information center on all aspects of aging.

Program and Performance

The committee of 8 citizens is appointed by the Governor and is augmented by 4 members of the Legislature, two from the Senate and 2 from the Assembly, appointed by their respective houses.

The committee is charged with the responsibility to study the problem of aging in California and to make recommendations to the Governor for needed action. Through its staff, it provides consultation and guidance to the communities of California on the development of programs designed to meet the varied needs and problems of their older residents. Further, it receives as a result of this activity the expressions of community interest and concern regarding the needs and problems of aging persons which are helpful in the formulation of recommendations by the committee for the consideration of the Governor. The committee and its staff serve as a clearing house on activities in the field of aging at a state and local level. A library of books, periodicals, and pamphlets concerned with the field of aging is being developed. A newsletter is prepared to summarize the developments and programs in the field of gerontology and to give information regarding current activities at a state and local level in California.

The 1963-64 Budget is based on the continuation of the activities of the committee and its staff at their present level.

GENERAL ANALYSIS

Chapter 2073, Statutes of 1961, established the Highway Transportation Agency and authorized the appointment of an administrator. Under this organization, the administrator is responsible for the supervision over and the operation of the Departments of Public Works, Motor Vehicles, and the California Highway Patrol. He is the chief adviser to the Governor in these areas and as such participates in the development of administrative policy and insures that such policies are put into effect.

The agency concept was implemented for the first time in October 1961 with all costs of the office being a pro rata charge against the component departments. A position of administrator was established with minimum clerical help. Other assistance as needed was provided by the departments involved within their then authorized budgets.

It is proposed in the 1963-64 Governor's Budget to appropriate for the operations of this office directly and to strengthen the staff of the office. To this end 1 additional professional staff member and a clerk are proposed in this budget. Many of the housekeeping activities such as accounting will continue to be performed by the departments within the agency.

GENERAL ANALYSIS

Objectives

The California Highway Patrol is charged with the responsibility of providing adequate patrol of the highways at all times of the day and night to assure the safe, lawful, rapid and economical use of the highway system of the State of California.

Program and Performance

The department is headquartered in Sacramento and has 1 or more field offices in all but 3 of the State's 58 counties. Traffic in the 3 counties where no office is maintained is patrolled by resident officers. A fleet of approximately 1,654 mobile units operate approximately 60,000,000 miles annually for patrol, enforcement of laws and regulations pertaining to the weight, height, length, brakes, lights of commercial vehicles, school bus inspection, school crossing guard supervision, removal of abandoned vehicles, supervision, service, administration, and training.

The Field Operations Division is responsible for attaining the objectives of the department and is supported by the Administration, Operational Planning and Analysis, Safety Services, and Training Divisions, all operating within policy established by the commissioner.

The Administration Division discharges the business affairs of the department; prepares the departmental budget; conducts studies to develop cost data; administers the personnel program; provides general file, messenger, and reproducing services; leases real property and co-ordinates capital outlay and maintenance projects; prepares specifications for and develops prototype mobile equipment; records data relative to mobile equipment operations; tests accessories and tires used on mobile equipment; maintains an inventory of all equipment; supplies all materials used from a central stores system; and supervises radio and wire communications.

The Technical Services Division was divided into 2 new divisions on October 15, 1962. Prior year operations of the Technical Services Division are reflected in this budget. Current and budget year operations are divided between Operational Planning and Analysis Division and Safety Services Division.

The Operational Planning and Analysis Division created October 15, 1962, is responsible for the conduct of operational analysis and production of data for utilization in planning and the making of management decisions; conducts planning for the purpose of translating the department's purpose and objectives into operational programs with recommendations for implementation; determines the distribution of budgeted uniformed strength; co-ordinates disaster planning with the disaster office; prepares statistical data; and issues orders and bulletins.

The Safety Services Division created October 15, 1962, develops and distributes radio and television programs, traffic safety information and news releases; controls permits for emergency equipment; issues light and brake station licenses; co-ordinates testing of accessories for compliance with state law; operates a central auto theft record unit; writes and releases administrative regulations pertinent to departmental responsibilities; and operates a voice and wire communications center in headquarters.

The Training Division provides training of new and retraining of in-service uniformed personnel; provides training programs for nonuniformed classifications; and co-ordinates the department's training program with other state departments.

The Land and Buildings Division is not an operating function and contains no personnel. The function includes the costs of leasing, utilities, maintenance, and repairs of office building space.

The total number of proposed new positions for the 1963-64 fiscal year is 183.5. There is also a reduction of 8 previously authorized positions in the budget year. The proposed new positions may be detailed as follows:
